Business Summary

NLC is a producer of specialty chemicals and services. Contributions to sales by business segment:

	1988	1987
Water & waste treatment	25%	25%
Process chemicals	20%	21%
Petroleum chemicals	12%	13%
U.S. subsidiaries	14%	12%
International	29%	29%

Foreign operations accounted for 27% of sales and 23% of operating profits in 1988.

NLC's service chemicals are generally designed to help customers maintain a high level of operating performance and efficiency or to improve the quality of their products. Water and waste treatment chemicals are used for water clarification, water pollution control and the control of corrosion, scale, foam, or microbial activity in industrial, utility, commercial, institutional and municipality boiler and cooling systems. Process chemicals are used in metals industries to protect equipment, as lubricants, rust protection and for metal casting; in pulp and paper industries to improve preparation and quality; in mining and mineral processing to improve yields, control dust and to improve effluent water quality; in automobile production for paint spray and hydrocarbon emission control. Petroleum chemicals are used in oil and natural gas drilling and production; enhanced oil recovery; pipeline and transmission systems; and petroleum refining (including refined product additives). Other products include superabsorbent polymers, adhesives and sealants, and fluorescent pigments and colorants.

Dividend Data

Dividends have been paid since 1928. A dividend reinvestment plan is available. An amended "poison pill" stock purchase right was adopted in 1989.

Summary

With about $22 billion in assets, this bank holding company is among Ohio's largest. Operations are conducted through 16 member and community banks and various finance-related subsidiaries in Ohio, Kentucky, and southern Indiana. Earnings for the first nine months of 1989 were aided by growth in earning assets, improvement in credit quality, fee income growth, and continued control of overhead. A sizable mortgage servicing company was purchased in 1989, and the acquisition of Ohio's seventh largest thrift is pending.

Business Summary

National City Corp. is an Ohio-based bank holding company which had $21.6 billion in assets at year-end 1988 and was conducting operations through seven member banks and nine community banks serving Ohio, Kentucky, and southern Indiana. Other divisions and subsidiaries engage in credit card and retail payment processing, leasing, merchant banking, mortgage banking, trust and investment management, small business investment, and venture capital activities.

At December 31, 1988 total loans amounted to $14.3 billion, up 9.1% from the year-earlier level (as restated), and were divided:

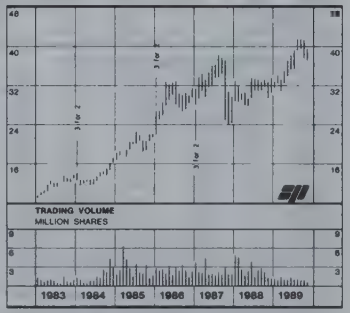
Domestic commercial	54.4%
Consumer	20.5%
Real estate-mortgage	14.4%
Credit card & home equity	9.3%
International	1.4%

In 1988 loans accounted for 74% of average earning assets, total investment securities 20%, and other earning assets 6%.

Average sources of funds in 1988 were time deposits 34%, demand deposits 16%, money market accounts 14%, savings and NOW accounts 12%, Federal funds borrowed and securities sold under repurchase agreements 12%, shareholders' equity 7%, long term debt and other borrowed funds 3%, and other 2%.

During 1988, the average yield on interest earning assets was 10.53% (10.12% in 1988), and the average rate paid on interest bearing liabilities was 6.70% (6.31%), for an average spread of 3.83% (3.81%).

Loan loss allowances were 1.86% of outstanding loans in 1988, compared with 2.17% a year earlier. Net loan chargeoffs were 1.22% of average loans in 1988, versus 0.90% in 1987. Of reserves, $87 million was allocated for LDC credit exposure of $181 million. Nonperforming assets amounted to $232.4 million (1.6% of total loans) at December 31, 1988, compared with $224.2 million (1.7%) a year ago.



Important Developments

Oct. '89— NCC said that record income for the 1989 nine month period reflected improved net interest income from continued loan growth, and a reduction in loss reserves due to improved credit quality in the credit card portfolio. Fee income growth and continued overhead expense control also aided profitability. During the third quarter NCC acquired Shawmut Mortgage Co. of Ohio (subsequently renamed National City Mortgage Co.), which had a $2.5 billion mortgage servicing portfolio and 13 origination offices generating more than $500 million annually in residential mortgages. Also, the acquisition of Gem Savings Association of Dayton, a mutually-owned thrift with assets of $1.6 billion, was expected to be completed by 1989 year-end, subject to regulatory approval.

Next earnings report expected in mid-January.

Review of Operations

For the nine months ended September 30, 1989, total interest income increased 20%, year to year, and total interest expense was up 30%, for a 9.1% gain in net interest income. The provision for loan losses narrowed 8.2%, to $93.5 million from $101.9 million. Noninterest income rose 4.4%, primarily due to increased item processing revenue, and following a 5.0% rise in noninterest expense, pretax income advanced 19%. After taxes at 26.0%, versus 24.3%, net income increased 17% to $3.22 a share, from $2.74.

Finances

Under new regulatory risk-based capital standards scheduled for implementation in 1990 and 1992, NCC's core capital and total capital, as defined, were 7.3% and 9.7%, respectively, of risk-adjusted assets at September 30, 1989, which were in excess of the proposed minimum levels of 4.0% and 8.0%.

In July, 1988 NCC acquired, for approximately 19.8 million common shares, First Kentucky National Corp., a Louisville, Kentucky-based bank holding company with about $4.9 billion in assets. In 1987 FKNC earned $32.4 million, down from $50.9 million in 1986. In 1988's first seven months, it earned $31.0 million.

Dividend Data

Cash has been paid in each year since 1936 and the payout increased in each year since 1964. A dividend reinvestment plan is available.

Summary

National Education, the nation's largest technical training company, provides training to business, industry and government through a variety of delivery media (including print, video, and computer-based training systems), operates vocational and technical schools, offers independent study courses, and publishes educational materials. Profitability is currently being impacted by problems at the Applied Learning subsidiary coupled with soft demand from certain sectors.

Current Outlook

The per-share loss anticipated for 1990 is expected to be larger than the $0.25 a share deficit estimated for 1989.

No dividends have been paid.

Revenues are expected to continue to trend downward in 1990, reflecting economic conditions and recent problems in the Applied Learning unit. These factors will also have an adverse effect on profitability, despite operating efficiencies from the consolidation of recent acquisitions. The necessity of raising at least $25 million in net capital in early 1990 will sharply boost interest expenses.

Net Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	99.5	99.2	82.7	44.6
Jun.	96.6	105.0	84.5	58.6
Sep.	94.2	109.0	94.7	72.0
Dec.	---	144.4	117.0	72.1
	---	457.5	378.9	247.3

Revenues for the nine months ended September 30, 1989 declined 7.3% from those of the comparable year-earlier period. Profitability was hurt by the lower revenues, which largely reflected problems at the Applied Learning unit, and was further impacted by an unusual charge of $2.5 million (net) to provide customer credits. A net loss of $1.0 million ($0.03 a share) contrasted with net income of $27.1 million ($0.93).

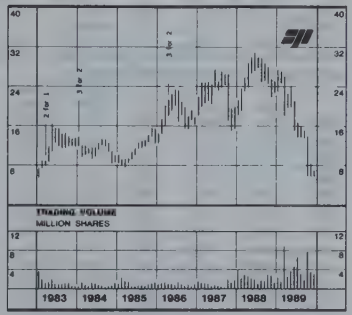
	Ed0.25	1.57	0.14	1.02



Important Developments

Dec. '89— NEC announced a one-year credit agreement with its bank lenders to refinance $62 million of debt. Implementation of the agreement allows the company to focus its attention on its various businesses and on resolving the problems involving customer credits at the Applied Learning unit. Applied Learning's revenues softened in the second quarter of 1989 due to a lengthening in the selling cycle stemming from a realignment of the sales organization and the marketing of a broader array of training products and consulting services. NEC also said that it plans to raise $25 million in capital in early 1990.

Aug. '89— NEC named Jerome W. Cwiertnia, formerly CFO, as president, COO and director. Earlier, David C. Jones, a former chairman of the U.S. Joint Chiefs of Staff, was elected chairman.

Next earnings report expected in late January.

Business Summary

National Education (formerly National Systems) is the world's largest training company with operations in industry and vocational training and educational publishing. Contributions by industry segment in 1988:

	Revs.	Profits
Training, publishing & services	67%	83%
Education centers	33%	17%

The company operates 53 vocational and technical schools under the name National Education Centers. These schools provide training in the technical, business and health care areas which NEC believes have the highest demand for skilled entry-level personnel. Ten centers are "super schools" which offer multiple curricula and state-of-the-art classroom facilities and teaching techniques. Some centers are "cluster schools" which have expanded a single discipline campus to add more programs. The centers emphasize hands-on training with modern technologies and equipment found in on-the-job situations. Course offerings of the Educational Centers range in tuition cost from $2,900 to $13,480 and in course length from six to 27 months.

The Training, Publishing & Services segment consists of Applied Learning International (ALI), formed in December, 1987 by the acquisition of Advanced Systems Inc. and its consolidation with Deltak, Inc. The segment was expanded in December 1988 with the pooled acquisition of Spectrum Interactive Inc., a leading developer of strategic training systems for major U.S. firms. ALI offers some 7,000 training courses to about 8,000 clients through 75 worldwide centers, and provides full-service training, education and consulting services and products for on-site training of personnel in modern computer technology. The training centers offer programs and services designed to train new employees or upgrade, re-train or crosstrain present employees in skill areas ranging from entry-level to high technology skills. ICS Independent Study offers about 50 independent study courses ranging from high school completion through degree programs in business and engineering. Steck-Vaughn publishes supplemental soft cover educational materials.

Dividend Data

NEC's policy is to retain earnings for the development of its business and it does not pay regular quarterly cash dividends. A "poison pill" stock purchase right was adopted in 1986.

Capitalization

Summary

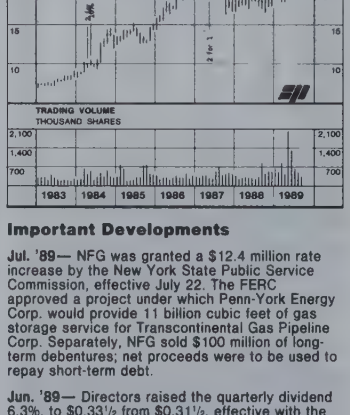
This integrated natural gas system serves the Buffalo, New York area and extensive contiguous districts reaching into western Pennsylvania and eastern Ohio. The company has a favorable gas supply situation, aided by self-help efforts and additional supplies of pipeline gas. In March, 1989 the company sold publicly 2 million common shares at $19.25 each. In June, 1989 directors raised the dividend 6.3%.

Current Outlook

Share earnings for the fiscal year ending September 30, 1990 are projected at $2.05, up from $1.90 estimated for fiscal 1989.

Dividends are expected to continue at $0.33½ quarterly.

Gas distribution profits for fiscal 1990 are expected to increase, reflecting higher rates, and residential and industrial customer growth. Nonutility profits are expected to rise slightly, reflecting an anticipated increase in gas prices and gas production, and greater gas storage and transmission activities. Share earnings growth is likely to be restricted by higher interest charges and more shares outstanding.



Operating Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	251	222	225	261

Important Developments

Jul. '89— NFG was granted a $12.4 million rate increase by the New York State Public Service Commission, effective July 22. The FERC approved a project under which Penn-York Energy Corp. would provide 11 billion cubic feet of gas storage service for Transcontinental Gas Pipeline Corp. Separately, NFG sold $100 million of long-term debentures; net proceeds were to be used to repay short-term debt.

Jun. '89— Directors raised the quarterly dividend 6.3%, to $0.33½ from $0.31½, effective with the July, 1989 payment.

Mar. '89— NFG sold publicly 2 million common shares at $19.25 each; proceeds were to be used to help finance capital expenditures and for general corporate purposes.

Next earnings report expected in mid-November.

Business Summary

National Fuel Gas is a public utility holding company whose main subsidiary distributes natural gas in western New York, northwestern Pennsylvania, and until December, 1986 a small area of eastern Ohio. Other subsidiaries are engaged in natural gas exploration, production, gathering, purchasing, transmission, storage and by-product operations. Revenue contributions in recent fiscal years:

	1988	1987	1986
Gas sales			
Residential	58%	56%	56%
Commercial	17%	17%	18%
Industrial	9%	10%	14%
Other	6%	7%	5%
Other revenues	10%	10%	7%

National Fuel Gas Distribution provides retail gas service to the metropolitan areas of Buffalo, Niagara Falls and Jamestown, N.Y., and Erie and Sharon, Pa. Customers served at fiscal 1988 year-end totaled 687,239 (681,485 a year earlier). Gas sales volume was 154.7 Bcf in fiscal 1988 (150.8 Bcf in fiscal 1987).

Supply Corp. is engaged in the production, purchase, storage, tranportation and sale of natural gas, operates a pipeline from Pennsylvania to the Canadian border, and provides NFG with 97% of its gas requirements. Penn-York provides natural gas storage to 18 utilities in eight northeastern states and two interstate pipeline companies.

Other operations include oil and gas exploration and production, pipeline construction, and operation of a saw mill.

Dividend Data

Dividends have been paid since 1903. A dividend reinvestment plan is available.

Nov. 1'89	1989					
14⅛	20⅞-13⅜	NM	None	None	C	1.04

Summary

National Intergroup purchased FoxMeyer Corp., a large pharmaceuticals distributor, in 1986 to lessen its dependence on cyclical steel and aluminum businesses. The substantial loss in the second quarter of fiscal 1988-9 was primarily attributable to problems at Fox Meyer, which has since returned to profitability. Operations of National Aluminum Corp. were classified as discontinued in the second quarter of fiscal 1989-90 due to the planned sale of its assets.

Current Outlook

A loss of a $1.15 a share is anticipated for the fiscal year ending March 31, 1990, versus a loss of $0.64 for fiscal 1988-9.

Dividends were omitted in June, 1988.

Growth at FoxMeyer's core drug distribution division and improved sales at Ben Franklin stores in fiscal 1989-90 should boost revenues. Margins at FoxMeyer should continue to improve and losses at Ben Franklin diminish. Earnings should continue to grow at National Steel, albeit, at a slower pace.

Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	729	711	1,196	1,059
Sep.	748	729	681	1,044
Dec.	---	779	722	1,139
Mar.	---	862	756	1,298
	---	3,081	3,355	4,541

Sales from continuing operations for the six months ended September 30, 1989 advanced 21%, year to year. Operating income (before goodwill) at FoxMeyer Drug rose to $16.0 million and the loss at Ben Franklin declined to $2.7 million. Equity income from National Steel was up slightly to $16.3 million despite softer demand and lost orders due to a threatened strike. The net loss from continuing operations was $0.78 a share, versus a loss of $2.89 (restated), before income from discontinued operations of $0.95, versus $0.64, and before special credits of $0.69, versus $0.25.

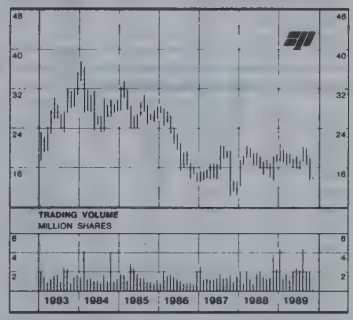
Mar.	Ed0.15	0.12	d1.43	d0.78
	Ed1.15	d0.64	d1.31	d2.46



Important Developments

Oct. '89— Management said that its principal distribution businesses—FoxMeyer Drug Co., Ben Franklin Stores and Permian—continued to show fundamental improvements in operations during the second quarter of fiscal 1989-90. A stronger cash position has enabled the company to reduce long-term debt in the second quarter to below $400 million; further decline to $300 million was expected in the third quarter due to the receipt of $60 million for repayment of notes from Weirton Steel Co. and the anticipated sale of certain assets of National Aluminum Corp., which was classified as a discontinued operation in the second quarter of fiscal 1989-90. NII is continuing discussions with NKK Corp. of Japan concerning the sale of its 50% stake in National Steel.

Next earnings report expected late January.

Business Summary

National Intergroup (formerly National Steel) is a multi-industry holding company. During the past six years, NII has engaged in a major corporate realignment to divest cyclical and low-return businesses and to use the proceeds to acquire distribution and service businesses which are not capital or labor intensive. Operations include the distribution of pharmaceuticals and general merchandise. NII also holds an interest in a steel company and in a partnership engaged in the gathering and distribution of crude oil and the transportation of petroleum and petroleum products. Segment contributions in fiscal 1988-9 (operating profits in million $):

	Sales	Profits
Distribution	85%	-$17.0
Aluminum	14%	$73.3
Diversified	1%	-$0.1

The consumer distribution segment includes FoxMeyer Drug Co. and Ben Franklin Stores, Inc. FoxMeyer is the third largest drug wholesaler in the U.S., with operations primarily in the midwestern and southern tier states. FoxMeyer distributes pharmaceuticals and health and beauty aids to a diverse customer base through 13 drug distribution centers. Ben Franklin is a wholesale supplier of general merchandise to over 1,105 franchise variety and craft stores and 682 other wholesale accounts, principally drug stores.

Unconsolidated subsidiaries include a 50% stake in National Steel Corp., the sixth largest steelmaker in the U.S., and 44.7% of Permian Partner's L.P., which is engaged in the purchasing, transporting and reselling of crude oil in the U.S.

National Aluminum Corp. was classified as discontinued operations in the second quarter of fiscal 1989-90 due to the planned sale of its assets.

Dividend Data

Common dividends were omitted in June, 1988 after having been paid since 1907. Dividends were maintained on the $5 preferred stock. A "poison pill" stock purchase right was adopted in 1986.

Summary

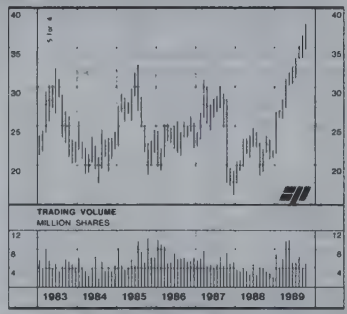
National Medical Enterprises is one of the nation's largest hospital management companies, owning and operating acute care, psychiatric and rehabilitative hospitals, nursing homes and substance abuse treatment centers. The company expects to complete a planned spin-off to shareholders of its Hillhaven nursing home and retirement housing divisions during the second quarter of fiscal 1989-90.

Current Outlook

Share earnings from continuing operations for the fiscal year ending May 31, 1990 are likely to rise to about $2.95 from fiscal 1988-9's $2.58, which excludes a loss from discontinued units of $0.65.

Dividends should continue at $0.18 quarterly.

Revenues from continuing operations for fiscal 1989-90 should show further growth, aided by improved utilization in acute care and specialty hospitals, new psychiatric facilities and rate increases. Profitability should be relatively well maintained, with lost operating income from the nursing homes to be spun off offset by reduced debt payments and interest and lease income from Hillhaven.



Net Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7

Important Developments

Oct. '89— Company sources stated that NME expected to complete the planned spin-off to shareholders of its Hillhaven nursing home and retirement housing divisions by the end of November, 1989. Under the plan, NME will transfer about 110 of its presently owned 220 nursing homes and most of the remaining long-term care assets and liabilities to the new Hillhaven company. NME will retain ownership of the remaining nursing home properties and lease them to Hillhaven. Including other homes operated under leases and management contracts, Hillhaven will operate some 360 units and generate revenues of over $1 billion. The distribution to shareholders is expected to be treated as a taxable dividend. NME plans to retain at least a 10% interest in the new Hillhaven, which is expected to be listed on the NYSE.

Next earnings report expected in late December.

Business Summary

Contributions by business segment in fiscal 1988-9 were:

	Revs.	Profits
General hospitals	40%	38%
Specialty hospitals	31%	52%
Long-term care facilities	29%	10%

As of August 31, 1989 the company owned and operated 36 acute care or general hospitals with 6,583 licensed beds. Patient days in acute care hospitals totaled 1,251,095 in fiscal 1988-9, up 2.3% from the year before. Admissions were 197,435, up 1.2%, year to year, and average occupancy was 51%, versus 49% in fiscal 1987-8. Medicare represented some 35.0% of general hospital revenues, Medicaid 5.6%, and private pay and other 59.4%.

Specialty hospitals include 72 psychiatric hospitals and substance abuse treatment centers, and 27 physical rehabilitative hospitals. Patient days at psychiatric and substance abuse facilities rose 14% to 1,581,343 in fiscal 1988-9 and were up 27% at rehabilitation hospitals. Occupancy at psychiatric and substance abuse units was 84% in fiscal 1988-9, up from 81% the year before.

Long-term care operations (to be spun off; see Important Developments) include the operation as of August 31, 1989 of 352 nursing homes with 43,771 licensed beds. Net nursing home revenues in fiscal 1988-9 by source were derived as follows: Medicaid 53.0%, Medicare 11.2%; and private and other 35.8%. This group also operates pharmacies and dialysis centers.

Dividend Data

Dividends were initiated in 1973. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

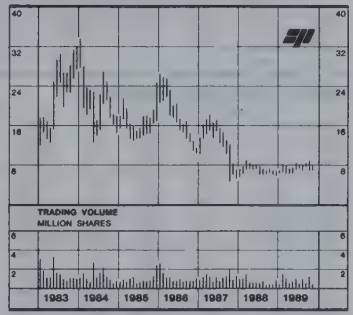
Summary

This research-oriented company manufactures and distributes medical, health care and consumer products, and provides services to electric utilities and the U.S. Navy. Results have been largely unprofitable in recent years, and losses increased in the first nine months of 1989. Cash dividends were omitted in early 1989.

Business Summary

National Patent Development Corp. (NPD) manufactures and distributes medical, health care and consumer products, provides training and other services to various industries, and is engaged in research and new product development projects. Contributions in 1988 (profits in 000) were:

	Revs.	Profits
Physical science	51%	$10,225
Consumer products	24%	4,694
Medical/technology	18%	-6,411
Industrial and other	7%	4,445



The Medical/Technology Group's National Patent Medical division markets wound management products, pharmaceutical cotton, orthopedic soft goods, and the Caridex Caries Removal System, which serves the dental community. Interferon Sciences (IFSC, NASDAQ), 81% owned, is developing interferons for the treatment of various diseases. NPDC-AS101, Inc., a joint venture between National Patent and Bar-Ilan University of Israel, is engaged in the development of immunomodulating compounds for the treatment of certain viruses.

The Consumer Products division, through the Five Star Group, is engaged in the wholesale distribution of brand name and private label products, including paints, stains, waxes and other home and garden items.

The Physical Science Group, through General Physics Corp., 85% owned, provides training, operations, engineering and maintenance services to various industries, including the electric power industry and the U.S. Navy. Duratek Corp. (DRTK, OTC), 63% controlled, is developing products for removing low-level radioactive contaminants from waste water systems in nuclear power plants.

The Industrial Group's MXL Industries specializes in plastic coating application and the production of optical injection molding. Eastern Electronics Manufacturing Corp. is involved in electrical contracting and manufactures the BAC Datamaster, an infrared alcohol analyzer.

Important Developments

Oct. '89— Interferon Sciences said it had received FDA approval for its Alferon N Injection for the treatment of genital warts. The drug is the first human leukocyte-derived alpha interferon product approved for sale in the U.S. The worldwide market for alpha interferon products is expected to grow to $350-400 million by 1992, with expected U.S. sales of $70-100 million. Separately, NPD said it plans to buy up to 200,000 Interferon common shares in periodic, open-market purchases.

Jun. '89— The company's General Physics subsidiary was awarded a $35 million contract by the U.S. Army to be the prime contractor for construction and operation of a chemical demilitarization training facility in Aberdeen, Maryland.

Next earnings report due in late March.

Review of Operations

Total revenues for the nine months ended September 30, 1989, advanced 7.9%, year to year, reflecting increased sales by the Physical Science group and Consumer Products division. Margins narrowed, and the loss from continuing operations widened to $6,146,000 ($0.57 a share), from $944,000 ($0.09). Per share results exclude gains from the early retirement of debt of $0.13 and $0.29, and losses from discontinued operations of $0.01 and $0.02, in the respective interims.

Dividend Data

Cash dividends, initiated in 1984, were omitted following a $0.02 1/4 payment in February 1989.

Finances

In November 1989, NDP entered into a $15 million revolving credit and term loan agreement to be used to fund an exchange offer for any and all of its Swiss convertible bonds. For each SFr. 5,000 principal amount of the bonds, the company is offering SFr. 3,000 of 8% bonds due March 1, 1995, SFr. 750 in cash, reset warrants to buy 75 NPD common shares (exercisable until March 1, 1995), and common stock warrants to acquire common stock with a market value of SFr. 250 (exercisable until March 1, 1995). The offer will remain open until December 8, 1989.

In July 1987, the company sold publicly $12.5 million principal amount of debentures and 500,000 common stock purchase warrants through Offerman & Co.

Capitalization

Long Term Debt: $121,308,000 (9/89), incl. $90,993,000 of Swiss bonds, conv. into com. at $18 to $26.92 a sh.

Minority Interest: $4,628,000 (9/89).

7⅞	10-6⅝	NM	None	None	C	1.25

Summary

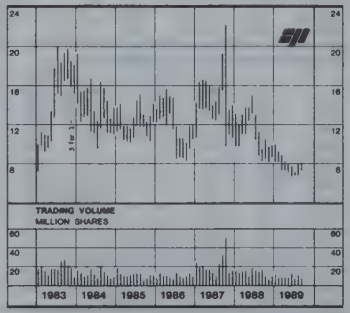
This semiconductor manufacturer has essentially completed a major restructuring that included sale of a subsidiary that produced point-of-sale systems and sale of its 60% interest in National Advanced Systems, which sold Hitachi mainframe computers and peripherals. In addition, excess capacity was closed. A loss from continuing operations, NSM's third in the past four years, was incurred in fiscal 1988-9 due to slowing growth in the semiconductor industry and restructuring charges. Sluggish industry conditions are likely to allow only breakeven operations to be achieved 1989-90.

Current Outlook

Breakeven results are likely to be reported for the fiscal year ending May 31, 1990, versus the $2.09 loss from continuing operations in fiscal 1988-9.

Cash dividends have never been paid.

Sales from continuing operations for fiscal 1989-90 are expected to decline modestly due to slowing growth in the semiconductor industry and continuing pressure on prices. Improved manufacturing productivity, benefits from aggressive efforts to reduce costs, including the closing of excess manufacturing capacity during fiscal 1988-9, and reduced interest expense caused by lower borrowing because of cash received from the sale of discontinued operations should aid margins. However, even in the absence of restructuring charges, only breakeven results are likely.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	398	445	518	501
Nov.	---	405	640	457
Feb.	---	379	629	398
May	---	419	683	512
	---	1,648	2,470	1,868

Sales from continuing operations for the three months ended August 27, 1989 declined 11%, year to year, reflecting sluggish industry conditions. Due to a 9.6 percentage point decline in the gross profit margin, the pretax loss was $25.4 million, versus pretax income of $16.0 million. After tax items, the loss from continuing operations was $21.9 million ($0.24 a share), versus income of $13.6 million ($0.10). Results exclude a $0.41 loss from discontinued operations in the fiscal 1988-9 interim.

Important Developments

Sep. '89— Upon releasing first quarter results, NSM said that it was exactly on target in meeting the goals it announced earlier in the year. It added that it was particularly encouraged by its improved performance from the fourth quarter despite flat industry conditions and pricing pressures in certain areas.

Next earnings report expected in mid-December.

Business Summary

National Semiconductor is a leading manufacturer of semiconductor components. Other operations were discontinued in fiscal 1988-9.

NSM designs, develops manufactures and markets a wide variety of semiconductor products including microprocessors, linear integrated circuits, digital integrated circuits, hybrid circuits and subsystems, electronic packaging, and miscellaneous services and supplies for the semiconductor industry. Its semiconductors use both bipolar and metal-oxide-silicon (MOS) process technologies. These circuits are grouped by function as digital and linear (analog) devices. NSM's digital devices include both standard and custom logic and memory integrated circuits.

The company has been shifting its emphasis in semiconductor design for several years from standard, commodity-type products to proprietary products and application specific integrated circuits (ASICs).

Foreign operations accounted for 45% of sales and $1.0 million in pretax income in fiscal 1988-9.

Operations discontinued during fiscal 1988-9 were the Datachecker Systems Inc. subsidiary that manufactured and serviced electronic terminals and systems for retail businesses and the company's 60% interest in National Advanced Systems unit. It marketed and serviced medium- and large-scale IBM-compatible mainframe computers and certain peripheral equipment manufactured by Hitachi, Ltd. The company sold it interests in these operations for approximately $90 million and $398 million, respectively.

Summary

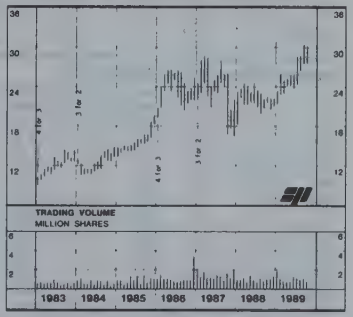
National Service Industries is a diversified company with interests primarily in lighting equipment, textile rentals, and specialty chemicals. To a lesser extent, it is active in the insulation, men's apparel, envelope and marketing services areas. Earnings for fiscal 1989 advanced for 14th consecutive year, reflecting gains at all business segments except chemicals. Higher profits are projected for fiscal 1990.

Current Outlook

Share earnings for the fiscal year ending August 31, 1990 are estimated at $2.05, up from fiscal 1989's $1.92.

The quarterly dividend, currently at $0.21, is expected to be increased about 10% in December, 1989.

Earnings for fiscal 1990 from lighting equipment operations should be slightly higher, reflecting a continuation of unit volume growth of fixtures. Textile profits are expected to benefit from favorable contributions by acquisitions. Chemical earnings should increase slightly, reflecting increased usage of products, especially those used for sanitation and water treatment and a small improvement in margins. Profits from noncore businesses are expected to increase marginally, reflecting a minor increase in total unit volume, especially in the area of filing systems and sales aids for the carpet industry, and a slight increase in margins at apparel operations.



Net Sales & Services (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6

Aug.	405	375	356	337
	1,539	1,414	1,327	1,283

Sales and service revenues for the fiscal year ended August 31, 1989 (preliminary) increased 8.9% fromthose of the preceding year, reflecting higher sales and service unit volumes and to a lesser extent higher prices. Benefiting from higher earnings in all business segments except chemicals, net income advanced 10%. Earnings per share were $1.92, compared with $1.75.

	1.92	1.75	1.54	1.45

Important Developments

Sep. '89— NSI said that fiscal 1989 earnings growth was restricted as the chemical division reported a decline in profits, reflecting lower margins at its Selig Chemical unit. The decline was offset by record earnings at NSI's Zep Manufacturing unit.

Next earnings report expected in mid-December.

Business Summary

National Service Industries conducts operations through seven divisions. Contributions by business segment in fiscal 1988:

	Revs.	Profits
Lighting equipment	43%	38%
Textile rental	23%	27%
Chemical	14%	23%
Other	20%	12%

The lighting equipment division produces for the construction industry fluorescent and high intensity discharge fixtures, architectural downlighting fixtures, emergency lighting fixtures, track lighting systems, and relocatable wiring systems. Fluorescent work lamps, and decorative fixtures are produced for consumers.

The textile division rents table linen, bed linens, towels, uniforms, operating room packs, and dust control materials.

The chemical division manufactures chemical products, used primarily in maintenance, sanitation, and water treatment. Products include soaps, detergents, waxes, and disinfectants.

Other divisions sell insulation products, supply men's dress and sports apparel, envelopes, filing systems, and provide sales aids for the carpet industry.

Dividend Data

Dividends have been paid since 1937. A "poison pill" stock purchase right was adopted in 1988.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

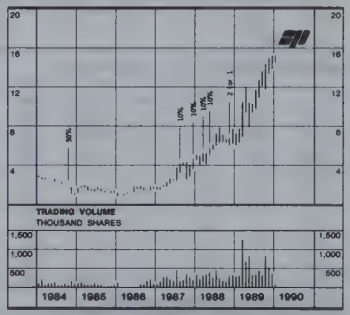
Summary

This company is a marketer of herbal nutritional products, such as vitamins, and household items, including a water purifier; it also has a 55% interest in Canyon Medical Products, a newly formed developer of cardiopulmonary products. Growth in sales and earnings has been strong in recent years and continued to improve through the first nine months of 1990, aided by a significant expansion of the company's independent sales force.

Business Summary

The principal business of Nature's Sunshine Products, Inc. since 1972 has been the manufacture, packaging and sale of nutritional and personal-care products. Its nutritional products include encapsulated herbs, concentrated herbs, beverages, vitamins, juices, seasonings, diet and weight-loss plans and mineral and food supplements. Personal-care products include natural skin, hair and beauty care products. The company also manufactures and distributes a reverse-osmosis water purification system ("Nature's Spring"). Nature's Sunshine acquired 55% ownership of Canyon Medical Products in 1988; subsequent to December 31, 1988, Canyon has been selling femoral bypass cannula catheters and other cardiopulmonary products.



The company sells its products primarily to managers, who numbered 2,845 at September 30, 1989. Managers generally purchase products from the company by the payment of all or substantially all of the purchase price in cash, credit cards or checks accompanying each order. Managers in turn sell the products to the distributors sponsored in their sales group, who sell directly to consumers or use the products themselves. Many distributors sell on a part-time basis to residents of their communities or supply their families with the company's products. Demand for the products is created principally by the more than 45,000 active members (at December 31, 1988) of the company's independent distributor sales force.

Nature's Sunshine purchases herbs and other raw materials in bulk, subjects them to testing for quality-control purposes and capsulates, tabulates or concentrates its products, which are then packaged for shipment. Most of the company's products are manufactured at its headquarters in Spanish Fork, Utah. Certain products, including liquid-filled vitamins, cosmetics and personal-care items, are manufactured for the company in accordance with its specifications and standards by contract manufacturers. The company operates a regional warehouse in Columbus, Ohio, and also has a retail store in Mesa, Arizona, where it sells bottled water and an under-the-counter water purification system.

International sales accounted for 21% of revenues in 1988, up from 19% in 1987. The company expects to see continued growth in its international markets and is involved in start-up operations in Great Britain.

Important Developments

Oct. '89— Management reported that it expects the sales and earnings growth it achieved in the first nine months of 1989 to continue into 1990. In addition, the company said it was on track to report earnings of $0.80-$0.90 a share for 1989.

Next earnings report expected in mid-January.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	12.20	10.56	9.00	7.27
Jun.	12.92	10.92	9.54	7.77
Sep.	12.77	11.20	9.74	7.72
Dec.		11.83	9.91	8.31
		44.52	38.18	31.07

Net sales for the nine months ended September 30, 1989, advanced 16%, year to year, reflecting growth of the sales force and increased demand for health and nutritional products. Margins widened on the higher revenue base and well controlled operating costs, and after a sharp increase in other income (net), the gain in pretax income was extended to 37%. Following taxes at 39.4%, versus 37.7%, net income was up 33%, to $3,095,662 ($0.60 a share), from $2,318,890 ($0.45, adjusted). Results for the 1988 period exclude a special credit of $43,076 ($0.01, adjusted) from the cumulative effect of an accounting change.

Finances

In May 1989, the company's board of directors authorized the repurchase of up to 200,000 shares of its common stock on the open market.

On January 1, 1988, the company sold its Japanese branch operation, resulting in a loss of $100,000, which was recognized in 1987. Sales to the Japanese market would continue through export operations.

Capitalization

3¾	7-3¼	16	None	None	B-	1.62

Summary

This company is the largest producer of medium and heavy-duty trucks in North America. Having pared unprofitable operations and materially overhauled its capital structure, NAV has scored an impressive profit turnaround in recent years. Despite softer demand for both medium and heavy-duty trucks, earnings for fiscal 1990 should post a limited rebound, after being penalized in fiscal 1989 by costs associated with the introduction of new truck models and production problems at a new paint facility.

Current Outlook

Profits for the fiscal year ending October 31, 1990 are estimated at $0.45 a share, versus the $0.23 reported for fiscal 1989.

Dividends are unlikely to be resumed in 1990.

Demand for medium and heavy-duty trucks will remain soft in fiscal 1990 as fleet operators' capital spending programs are pared as economic growth slows. NAV should outperform the industry, however, as the firm's new models have been well received. While an overhang of used trucks will check prices for new vehicles, margins should widen as promotional costs are scaled back, production problems at NAV's new paint facility are corrected, and production and inventory levels are adjusted to current market conditions. Raw materials and component costs should stabilize. Unit sales for NAV's engine and parts businesses will be flat. Comparisons will benefit from increasing contributions from NAV's truck financing unit.

Important Developments

Dec. '89— Citing lower truck and engine sales, intense price discounting by truck manufacturers, and higher manufacturing costs, NAV said it expected to post a net loss in fiscal 1990's first quarter. NAV also projected a 2%-4% drop for industry sales of medium-duty trucks in fiscal 1990 and an 8%-18% decline for heavy-duty trucks. Additionally, management said the 15% production cutback implemented in fiscal 1989's fourth quarter has been sufficient to bring its new and used truck inventories into balance with current market conditions.

Jul. '89— NAV unveiled a prototype of a new diesel engine which it claims will meet the tougher state and Federal pollution guidelines to be implemented in 1994.

Next earnings report expected in mid-February.

Business Summary

Navistar (formerly International Harvester) is the largest producer of heavy-duty trucks in North America and second largest manufacturer of medium-duty trucks. Contributions to sales in recent fiscal years:

	1988	1987	1986
Medium trucks	37%	37%	39%
Heavy trucks	41%	40%	37%
Parts	13%	14%	14%
Engines	9%	9%	10%

In fiscal 1988 NAV sold 93,760 vehicles, up from 82,370 in fiscal 1987. NAV's share of the combined medium and heavy-duty truck market was 27% in fiscal 1988, versus 26% in fiscal 1987. Output is sold to private and common carriers, lessors, utilities, school bus manufacturers and the construction and energy industries. NAV also markets three medium-duty trucks manufactured by Nissan Diesel Motor Co. NAV's products are distributed through a network of 858 independent dealers. Vehicles obtained as trade-ins are sold through 15 used truck centers.

All Navistar trucks are equipped with diesel engines. Medium-duty trucks, accounting for two-thirds of truck sales, are powered with NAV-built engines, while engines for NAV's heavy-duty trucks are produced by outside suppliers. In fiscal 1988 NAV sold 95,300 engines (up from 76,500 in fiscal 1987) to original equipment manufacturers for use in pick-up trucks and vans.

Navistar Financial Corp. finances new retail sales of Navistar trucks, dealers' inventories and used trucks produced by various manufacturers. Truck receivables outstanding at October 31, 1988 were $1.57 billion. Harco National Insurance Co. provides commercial physical damage and liability coverage to NAV dealers, retail customers and others.

Dividend Data

Dividends on the common were omitted in 1981.

Finances

Net income in fiscal 1988's fourth quarter included $23 million ($0.09 a share) from the settlement of prior year's tax audits.

Summary

This utility holding company serves customers throughout Massachusetts, Rhode Island and New Hampshire. On November 1, 1989 NES announced that it was withdrawing its $2.0 billion offer to acquire Public Service Co. of New Hampshire (PNH), which filed for bankruptcy on January 28, 1988. NES's acquisition offer for PNH was one of four reorganization proposals for PNH, including a $2.3 billion bid by Northeast Utilities (NU), a $2.29 billion offer from United Illuminating (UIL), and PNH's own restructuring valued at $2.2 billion.

Current Outlook

Share earnings for 1990 are projected at $2.50, up from the $2.30 estimated for 1989, which includes a nonrecurring net gain of $0.18 expected in the fourth quarter.

Dividends are expected to continue at the current rate of $0.51 quarterly.

Share earnings for 1990 should be aided by the outcome of any or all of several rate cases. Additionally, earnings would profit substantially if the Seabrook nuclear plant begins commercial operations.

Operating Revenues (Million $)

Sep.	415	397	361	343
Dec.	---	371	340	344
	---	1,520	1,448	1,432

Based on a brief report, revenues for the nine months ended September 30, 1989 rose 5.7%, year to year, primarily reflecting higher kwh sales and higher rates. Net income was $96.0 million ($1.65 a share), in contrast to a net loss of $73.9 million ($1.30), which included a net write-off of $179 million ($3.15) for Seabrook expenditures.

Important Developments

Nov. '89— On November 1 NES announced that it was withdrawing its $2.0 billion offer to acquire Public Service Co. of New Hampshire (PNH), which filed for bankruptcy on January 28, 1988. NES's acquisition offer for PNH was one of four reorganization proposals for PNH, including a $2.3 billion bid by Northeast Utilities (NU), a $2.29 billion offer from United Illuminating (UIL), and PNH's own restructuring valued at $2.2 billion. Separately, NES reported that the implementation of an agreement that certain of its subsidiaries have reached with a joint venturer is expected to result in a nonrecurring gain of approximately $0.18 a share. The company added that if implementation does not occur by December 28, 1989, the agreement will terminate, unless otherwise extended.

Next earnings report expected in late January.

Business Summary

New England Electric System is a utility holding company serving communities in Massachusetts, Rhode Island and New Hampshire. Electric revenues by customer class in recent years:

Revenues	1988	1987	1986	1985
Residential	41%	41%	34%	39%
Commercial	34%	35%	32%	32%
Industrial	21%	22%	22%	22%
Other	4%	2%	7%	7%

Power sources in 1988 were coal 44%, oil 28%, nuclear 15%, and hydro and other 13%. Peak load in 1988 was 4,107 mw and capability totaled 5,268 mw for a capacity margin of 22%. NES participates in the Hydro Quebec Interconnection. Phase I was completed in October, 1986 and Phase II is planned for completion in 1990.

NES owns 10% of the Seabrook nuclear facility. Seabrook licensing, which has been disputed by Massachusetts officials, was further complicated by the January, 1988 bankruptcy of the project's largest investor, Public Service of New Hampshire (35.6%). On June 13, 1989 the Seabrook plant achieved its first nuclear reaction. A low power license was awarded May 26, 1989. In 1988's second quarter, NES resolved its Seabrook prudency issues and wrote off some $179.0 million, net ($3.14 a share) of plant costs. If Seabrook enters service, a portion of the charge would be reversed and NES would be provided a $16.8 million annual rate increase for five years.

Dividend Data

Dividends have been paid since 1947. A dividend reinvestment plan is available.

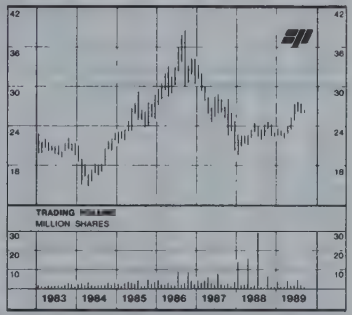
Summary

This utility, serving portions of New York's upstate rural economy, owns 18% of the Nine Mile Point 2 nuclear plant. Regulatory issues concerning the plant led the company to cut its quarterly dividend 24% in early 1988; in August, 1989 the dividend was raised 2.0% from that reduced rate. Nine Mile Point 2 completes NGE's base load construction program for the foreseeable future.

Business Summary

New York State Electric & Gas Corp. provides electricity to about 745,000 customers and gas to 139,000 customers in the central, eastern and western parts of New York. The service area covers approximately 17,000 square miles, and over 80% of the area's population of 1.8 million is located outside the corporate limits of cities. The upstate New York economy is composed of light industry, high technology businesses, agriculture, recreation facilities, and colleges. Electric sales accounted for 89% of revenues in 1988 and gas 11%. Contributions to electric revenues in recent years:

	1988	1987	1986	1985
Residential	43%	43%	42%	38%
Commercial	22%	22%	21%	19%
Industrial	17%	17%	17%	15%
Other	19%	18%	20%	28%



Capacity in 1988 consisted of coal 94%, nuclear 4% and hydro 2%. Peak load in 1988 was 2,574 mw and current system capability totals 3,183 mw for a capacity margin of 19%. Gas sales in 1988 were 35.1 million dth, versus 32.2 million dth in 1987.

NGE has an 18% interest in the Nine Mile Point 2 nuclear plant, which was constructed and is being operated by Niagara Mohawk Power Corp. In 1987 NGE wrote off $322 million (net of tax benefits) of disallowed costs associated with the plant. Approximately $6 million of the write-off was reversed in 1988, and NGE also received a $52.2 million payment from Niagara Mohawk pursuant to a July, 1986 agreement with the plant's co-tenants. The commercial operation of Nine Mile 2 brought to an end the company's construction program for significant new generating capacity. Additional capacity is not expected to be required until the mid-1990s.

Construction expenditures for 1988 were $228 million and are projected by the company to total $669 million for 1989 through 1991, including $221 million for 1989. These expenditures are primarily earmarked for extension of service and for efficiency improvements at existing generating facilities. NGE estimates that internal sources will be sufficient to fund its three-year construction program.

In March, 1989 a two-year rate stabilization plan was approved for NGE under which its base electric and gas rates will remain at their present levels through January, 1991. NGE's allowed return on common equity will be 13%, with any earnings above the allowed return to be shared equally between customers and stockholders.

Important Developments

Aug. '89— NGE said that the five owners of Nine Mile Point 2 had developed an interim operating agreement providing for additional management oversight by the four nonmanaging co-tenants.

Next earnings report expected in mid-November.

Sep.		312	294	275
Dec.		336	296	316
		1,340	1,290	1,277

Revenues for the six months ended June 30, 1989 rose 9.5%, year to year, aided by a 40% increase in electric sales to other utilities and higher purchased gas costs being passed on to customers. The cost of fuel, purchased gas and electricity costs and other operating expenses rose more rapidly, and operating income advanced 5.3%. After sharply lower other income and higher interest charges, net income fell 5.5%. Following preferred dividends, share earnings were $1.77, versus $1.91.

Summary

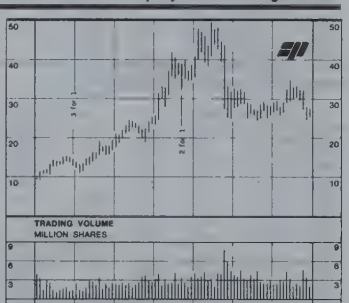
This diversified communications company publishes The New York Times newspaper, 32 smaller-city newspapers and 16 magazines; operates radio and television stations; syndicates news and features; and has substantial holdings in Canadian newsprint mills and a paper mill in Maine. As part of a long-range strategic plan to emphasize publishing, the company recently sold its cable television system for $420 million. Long-term earnings prospects are favorable for all of the company's business segments.

Current Outlook

Earnings in 1990 are tentatively projected at $1.40 a share, compared with the $1.10 from continuing operations estimated for 1989.

No increase is likely in the $0.13 quarterly dividend in the near term.

Revenues from continuing operations will continue to be impacted through 1990 by sluggish newspaper advertising demand and circulation, and by softness in the New York area economy. Magazine advertising and circulation revenues should rise at double-digit rates, aided by the addition of new titles. Results will be restricted by the weakness in newspaper revenues, magazine startup costs and dilution from acquisitions, despite much lower newsprint costs. Interest income will rise sharply, but equity earnings will plunge.



Revenues (Million $)

Quarter:	1989	[1]1988	1987	1986
Mar.	423	417	409	375
Jun.	460	443	426	401

Dec.		450	448	418
		1,700	1,690	1,565

Revenues for the nine months ended September 30, 1989, rose 3.9%, year to year, aided by acquisitions by the magazine unit; operating income dropped 3.4%. Equity earnings were down sharply, and income from continuing operations declined 23%; share net fell to $1.11, from $1.38. Per share results exclude income from discontinued operations of $2.52 and $0.06 in the respective periods.

Important Developments

Dec. '89— NYT said it will record a charge of $0.57 a share against 1989 fourth quarter earnings, reflecting costs associated with voluntary union staff reductions and a valuation reserve against the company's equity investment in forest products.

Aug. '89— The company completed the sale of its cable TV unit for $420 million, resulting in a net gain of $193 million, or $2.46 a share. Proceeds will be used largely for debt reduction.

Jul. '89— NYT acquired McCall's magazine for $57,768,000 in cash plus $23,732,000 in assumed liabilities. The company noted that dilution from the purchase would impact earnings in the second half of 1989 by $0.13 a share and would reduce 1990 earnings by $0.18 a share. McCall's and Family Circle together reach an unduplicated audience of 30.4 million women readers, about a third of all adult women in the U.S.

Next earnings report expected in early February.

Business Summary

Contributions by business segment in 1988:

	Revs.	Profits
Newspapers	81%	87%
Magazines	15%	8%
Broadcasting/Information Services	4%	5%

The New York Times Company is primarily engaged in publishing and distributing local, national and foreign editions of the New York Times newspaper. About 70% of daily circulation is in NYC and NYC suburbs, and 30% elsewhere, including all 50 states and 66 foreign countries. Average circulation is about 1,068,000 copies daily and 1,629,000 Sunday. Other interests include: newspapers—26 dailies and nine weeklies, located primarily in the Southeast, and a one-third interest in the International Herald Tribune; 17 magazines, including Family Circle, McCall's, Golf Digest, Golf World (U.S.), Child, Decorating Remodeling, Tennis and Cruising World; The New York Times News Service, Special Features, and The Large Type Weekly.

Broadcasting properties include five TV stations (WNEP-TV, serving the Wilkes-Barre-Scranton area of Pennsylvania; WQAD-TV, serving the "Quad-Cities" area of Illinois and Iowa; KFSM-TV in Fort Smith, Ark.; WHNT-TV in Huntsville, Ala.; WREG-TV in Memphis); and two radio stations (WQXR AM & FM in NYC). The company sold its 162,000-subscriber cable TV system (NYT Cable TV) in southern New Jersey in August 1989. A substantial minority interest is held in three Canadian newsprint associates, and in a paper mill in Maine.

Dividend Data

Cash dividends have been paid on the Class A and Class B shares since 1958. A dividend reinvestment plan is available for Class A shares.

Newell Co.

NYSE Symbol NWL Options on NYSE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 28'89	1989					
22	25¼-12¾	17	0.50	2.3%	A-	1.48

Summary

Through a series of acquisitions, including the 1987 purchase of Anchor Hocking, Newell has become a high-volume consumer and industrial goods company. Major products include cookware, hardware, painting products and tableware. Earnings increased significantly in recent periods, reflecting acquisitions and wider margins, and further growth is expected in 1990. During the first quarter of 1989 NWL converted all of its $2.08 preferred stock into common stock, increasing the common stock float by 6.0 million shares. The shares were split 2-for-1 in December.

Current Outlook

Earnings for 1990 are projected at $1.50 a share, up from 1989's estimated $1.35, giving effect to the 2-for-1 stock split in December.

The quarterly dividend on the split shares was raised 14%, to $0.12½ from $0.11 (adjusted), with the December, 1989 payment.

Excluding acquisitions, sales for 1990 should increase moderately, reflecting continued demand for all of the company's products. Margins should widen on improved performance at NWL's various operating divisions. Interest charges will be lower. Substantially lower preferred dividend requirements will be offset by more common shares outstanding.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	271.9	236.2	101.3	94.5
Jun.	275.7	233.8	94.7	95.1
Sep.	296.8	264.5	263.6	106.3
Dec.	---	253.7	260.1	105.5
	---	988.2	719.7	401.4

Sales for the first nine months of 1989 increased 15%, year to year, mainly reflecting acquisitions. Following improved performance of the industrial products and consumer glass and plastics business, margins widened, and pretax income rose 39%. After taxes at 41.6%, versus 41.5%, net income was also up 39%. Following sharply lower preferred dividend requirements, share earnings (adjusted) were $0.92 on 27% more shares, versus $0.70.

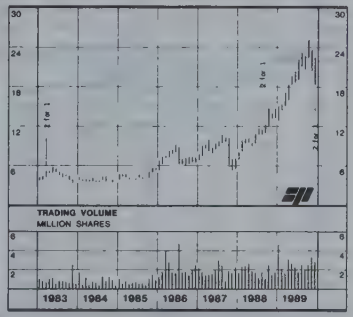
Dec.	E0.42	0.39	0.24	0.16
	E1.35	1.09	0.69	0.55



Important Developments

Oct.'89— NWL attributed the increased in sales for the first nine months of 1989 to the acquisitions of Thomas Paint Applicator, REMA bakeware, Wear-Ever, and the metal closure business of Owens Illinois. Margins widened on improvements in the industrial product lines and the consumer glass and plastics businesses. Separately, Vermont American, in which NWL owns 1.2 million shares, agreed to be acquired by Emerson Electric and Robert Bosch GmbH for $40 a share, which will result in a $23.5 million pretax gain for NWL. The cash generated from this transactions and recent sale of NWL's Carr-Lowrey speciality glass container division will enable NWL to bring to long-term debt to total capital ratio down to a target level of 33%.

Nov. '89— NWL sold its Boye/Wright division, a sewing notions marketer and manufacturer, for approximately $35 million.

Next earnings report expected in late January.

Business Summary

Newell produces and sells a complementary family of moderately-priced consumer hardware and housewares under a variety of brand names and a select group of industrial goods. Business segment contributions in 1988:

	Sales	Profits
Hardware/housewares	73%	81%
Industrial products	27%	19%

Through the Amerock division, Newell sells a broad line of cabinet, windown and bath hardware. Through the Mirro/Foley unit, Newell produces aluminum cookware, bakeware and kitchen utensils. Anchor Hocking offers a broad line of table top glassware and oven bakeware. Newell Window Furnishings manufactures and sells drapery hardware, window shades and accessories. EZ Paintr produces a broad line of manual paint applicator products.

Newell also makes wall-hung shelving system components and household hardware; propane/oxygen torches under the BernzOmatic name; bath scales under the Counselor name; and Anchor Hocking plastic microwave cookware.

Products are sold principally through national and regional discount, variety, chain and hardware stores, hardware and houseware distributors, and home improvement centers.

Industrial products include Anchor Packaging metal, plastic and combination caps, other closures, and dispensing systems for the packaging industry.

Dividend Data

Dividends, paid each year since 1946, were initiated on the publicly held stock in June, 1972.

Newmont Mining

NYSE Symbol NEM Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 20'89	1989					
43¾	45⅞-31⅝	44	0.60	1.4%	B-	1.31

Summary

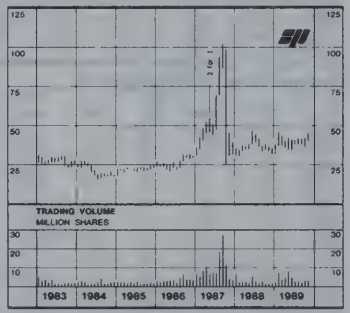
Newmont Mining owns 90% of Newmont Gold Co., which is the largest gold producer in North America. NEM also has Australian gold mining interests and U.S. coal interests. In August, 1989 Hanson PLC owned or had tenders for over 90% of the issued share capital of Consolidated Gold Fields PLC, which owns some 49.3% of NEM. Hanson has not yet revealed what it plans to do with CGF's interest in NEM.

Current Outlook

Earnings for 1990 are projected at $1.30-$1.40 a share, up sharply from 1989's estimated $0.95.

Dividends should continue at $0.15 quarterly.

Sales for 1990 may rise moderately. Gold profits are likely to advance significantly on expected slight increases in gold production and prices, and well-controlled costs. However, a recapitalization of Peabody would probably lead to little contribution from that unit, and operating earnings overall may be essentially flat. Nevertheless, much reduced interest expense (as cash from a Peabody recapitalization would be used to pay down debt) should result in substantially higher net profits.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	132.2	92.4	115.1	83.1
Jun.	174.5	113.0	128.1	96.6
Sep.	195.7	137.2	127.4	86.7
Dec.	---	157.5	143.5	114.4
	---	500.1	514.0	380.8

Sales for the first nine months of 1989 advanced 47%, year to year. With a net after-tax charge of $3.9 million, versus a net after-tax gain of $62.9 million, net income was $46.0 million ($0.68 a share), versus $70.3 million ($1.04), before a loss related to discontinued lines of $0.05 a share, versus income of $0.16 a share.

Common Share Earnings ($)

Dec.	E0.27	0.32	0.06	d0.75
	E0.95	1.37	5.28	1.13

Important Developments

Aug. '89— Hanson PLC said that it owned or had tenders for over 90% of the issued share capital of Consolidated Gold Fields PLC (CGF), which owns some 49.3% of NEM. Under UK takeover rules, once a buyer has over 90% of the shares of the company being acquired, it can purchase the balance. Hanson has not revealed what it plans to do with CGF's interest in NEM. Meanwhile, NEM bought a further 5% interest in Peabody Holding (already 49.97%-owned by NEM) from The Equitable Life Assurance Society for $57.5 million. NEM said that after closing the deal, it would complete a recapitalization of Peabody. NEM expected to receive cash proceeds of at least $400 million, which would be used to reduce its debt, and expected Peabody to incur additional debt of at least $800 million. NEM would then sell the newly acquired percentage of Peabody so as to return to less than 50% ownership.

Next earnings report expected in early February.

Business Summary

NEM is principally a gold operating and exploration company in the U.S. and Australia, and also has domestic coal mining interests.

Newmont Gold Co. (90%-owned) produced 895,500 ounces of gold in 1988 from its facilities in Nevada, versus 589,000 in 1987. Under an expansion plan begun in 1987, NGC was expected to produce 1.43 million ounces in 1989, 1.5 million in 1990, and 1.6 million in each year thereafter. Proven and probable reserves at year-end 1988 were 16.3 million ounces, the largest reserve position in North America.

Newmont Australia Ltd. (75%-owned) produced 237,200 ounces of gold in 1988, versus 1987's 197,000, as its share of the 70%-owned Telfer mine, 60%-owned New Celebration mine (80%-owned since September 25, 1989) and 100%-owned Wattle Gully mine (acquired March, 1987 and depleted in 1988). Output was expected to reach over 250,000 ounces in 1989. Proven and probable reserves at the end of 1988 equaled 2,512,400 ounces.

NEM holds a 49.97% equity interest in Peabody Holding Co., owner of the largest North American coal producer, which mined 80,831,100 short tons of coal in 1988. NEM also has a further 5% interest in Peabody, which is accounted for as a portfolio investment held for sale.

In September, 1988 NEM's Newmont Oil Co. (NOC) agreed to sell its North Sea oil and gas interests to Clyde Petroleum (Netherlands) B.V. for $234 million. Earlier, NOC signed two agreements to sell its U.S. oil and gas business and interests for some $169 million. The sales of these assets were concluded in October.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was amended in 1989.

Summary

This Australian company, with major operations in the U.S., the U.K. and Hong Kong, is primarily engaged in newspaper, magazine and book publishing, theatrical films and other programming, broadcasting, and printing. The company has been actively engaged in acquisitions and selected divestitures. In September, 1989 NWS announced that it shelved a plan, first announced in March, to form a 20%-owned company that would acquire and develop media and communications businesses worldwide. In a related development, NWS transferred its book publishing operations to a new 50/50 joint venture as part of a plan to reduce debt.

Current Outlook

Earnings per ADS for the fiscal year to end June 30, 1990 are projected to at US$1.80, down 24% from the US$2.39 of fiscal 1989.

Semiannual dividends totaling approximately $0.13 (after 15% Australian tax) have been declared in the past 12 months.

Revenues for fiscal 1990 were boosted in the first quarter by the inclusion of Triangle Publications, and will benefit for the full year from business gains of ongoing operations. Profitability will be impacted, however, by an ongoing airline strike in Australia, and losses related to Sky Television. Higher interest costs will also reduce net income. Currency fluctuations will impact reported earnings. The company expects earnings to recover in fiscal 1991.

Revenues (Million U.S. $)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Sep.	1,514	1,275	981	821
6 Mos. Dec.		2,929	2,095	1,658
9 Mos. Mar.		4,561	3,145	2,800
12 Mos. Jun.		5,955	4,754	3,834

Revenues (in U.S. $) for the quarter ended September 30, 1989 advanced 19%, year to year. Operating income increased 31%, aided by improvement in U.S. operations and by acquisitions. After other items, including sharply higher interest expense, net income fell 60%. Earnings per ADS were $0.23, down 50% from $0.46.

Important Developments

Sep. '89— NWS said that it shelved a plan, first announced in March, to create a separate, 20%-owned company to acquire and develop media and communications businesses, due to difficulties in raising $1 billion from private sources to initially capitalize the venture. The venture would have provided NWS a means of continuing an aggressive international acquisition program without burdening News Corp.'s balance sheet with additional debt obligations. In a related move, in August NWS transferred its book publishing operations to a new 50/50 joint venture, Harper & Collins, as part of a plan to reduce debt assumed in recent acquisitions. The book publishing operations are William Collins PLC, Harper & Row Inc. and other publishing operations in Britain.

Next earnings report expected in late February.

Business Summary

The News Corporation is an Australian company, largely engaged in media operations. Contributions by business segment in fiscal 1989:

	Revs.	Profits
Newspapers	37%	47%
Magazines	15%	19%
Television	9%	7%
Filmed entertainment	15%	8%
Commercial printing	6%	4%
Other	18%	15%

The company's principal operations are located in the U.S. (48% of fiscal 1988 revenues and 42% of profits), the U.K. (22% and 28%), and Australia and the Pacific Basin (30% and 30%).

U.S. operations include newspaper, magazine and book publishing; commercial printing; theatrical and TV film production; and TV station operations. Major properties include the Boston Herald; San Antonio Express-News; New York magazine; New Woman magazine; 7 travel business publications; World Printing; Twentieth Century Fox Film; Fox Broadcasting (TV stations in Houston, Dallas, Los Angeles, Chicago, Boston, New York and Washington, D.C.); Salem House Limited; and World Printing. Triangle Publications, publisher of TV Guide, Seventeen, Daily Racing Form and Good Food, was acquired in October, 1988.

United Kingdom operations include newspaper, magazine and book publishing; commercial printing; and cable TV programming. Major properties incl ude Times Books; Townsend Hook and Co.; Eric Bemrose Ltd.; Sky Television; The Times, The Sunday Times, The Sun, News of the World, and Today; John Bartholomew & Son; Robert Nicholson Publications; William Collins plc; Geographia Limited; Convoys Group; News Datacom; and Utell. A pan-European weekly newspaper is planned for a fall-1989 launch.

Australian operations consist of over 100 daily and weekly newspapers; magazine and book publishing; commercial printing; newsprint production; airline operations; recorded music; livestock farming; and computer software and services. Pacific Basin operations include newspaper publishing (Hong Kong, Fiji and Papua, New Guinea); printing; and book publishing. Major properties include The Australian (nationwide); The Sun-News Pictorial, The Herald (Melbourne); Daily Mirror, The Daily Telegraph, The Sunday Telegraph (Sydney); Sunday Mail (Adelaide); Sunday Times, Sunday Independent (Perth); Bay Books; Angus & Robertson; Ansett Airlines; Computer Power Group Holdings Pty. Ltd.; Festival Records; and South China Morning Post (Hong Kong).

In 1989 the company transfered its book publishing operations to a new 50/50 joint venture, Harper & Collins. In May 1989 the travel and electronic publishing group was sold for $825 million.

Jan. 3'90	1989-90					
14⅜	15-10¾	21	---	---	B	0.44

Summary

This New York-based utility has completed its fuel diversification into nuclear energy. NMK has a 41% interest in the Nine Mile Point 2 nuclear plant which entered service in April, 1988. The company's 100%-owned Nine Mile Point 1 nuclear plant has been idle since December, 1987 due to performance problems. As a result of uncertainties with the Nine Mile 1 outage, directors omitted the common dividend on August 31, 1989. NMK anticipates that the plant will not be ready to restart prior to late in the 1990 first quarter.

Current Outlook

Share earnings for 1990 are projected at $1.20, up from the $0.95 estimated for 1989.

The $0.30 quarterly common dividend, omitted in August, 1989 may be resumed in late 1990 following the projected return to commercial operation of the Nine Mile Point 1 nuclear plant and rate negotiations.

Share earnings for 1990 will benefit from higher electric and gas sales, and the projected restart of the idle Nine Mile Point 1 plant. Longer-term prospects should be enhanced by an expected rate settlement in late 1990.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	849	811	788	831
Jun.	711	703	625	637
Sep.	613	608	557	555
Dec.	---	679	654	638
	---	2,800	2,623	2,660

Revenues for the nine months ended September 30, 1989 rose 2.4%, year to year, owing to pass-through items and higher sales. However, after a sharp increase in production costs, operating income dropped 20%. Following higher interest expense, net income was down 33%. Share earnings were $0.79 on 3.9% more shares, versus $1.34

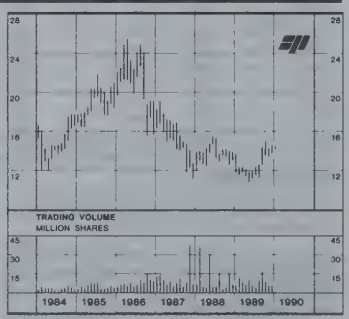
	E0.95	1.21	0.05	2.71



Important Developments

Dec. '89— NMK reached an agreement in August, 1989 with the staff of the PSC, the State Attorney General and intervenor groups that will permit the full recovery of replacement power costs for the outage of the Nine Mile 1 nuclear plant, subject to negotiations. The negotiations are expected to begin in early 1990 and should be concluded by year-end 1990. Pursuant to the agreement, NMK omitted the common dividend, the resumption of which will depend upon the restart of the Nine Mile 1 plant. NMK said that in September, 1989 it received approval of its restart action plan from the Nuclear Regulatory Commission (NRC). The remaining condition is NRC Region 1 approval of NMK's readiness for restart report. The company said that it anticipates Nine Mile 1 will not be ready to restart prior to late in the 1990 first quarter.

Next earnings report expected in late January.

Business Summary

Niagara Mohawk supplies electricity (84% of 1988 revenues) and gas (16%) to a large area of upstate New York and some parts of southern Ontario. Electric revenues in recent years:

Revenues	1988	1987	1986	1985
Residential	34%	34%	33%	31%
Commercial	35%	36%	36%	34%
Industrial	20%	20%	21%	21%
Other	11%	10%	10%	14%

Power requirements in 1988 were derived from coal 17%, oil 34%, nuclear 15%, hydro 9%, and purchased power 25%. Peak load in 1988 was 6,220 mw and system capability totaled 7,372 mw, for a capacity margin of 16%.

NMK owns 41% of the Nine Mile Point 2 nuclear plant. In 1987 NMK wrote-off its share of disallowed Nine Mile Point 2 costs. Based on a projected January, 1988 commercial operation date, the company wrote-off some $755.0 million ($5.94 a share) of disallowed expenditures.

Modification work in November, 1987 delayed the unit's operation, resulting in an additional write-off of $78.0 million ($0.61 a share) which was taken in 1987's fourth quarter. The plant was declared commercial April 5, 1988.

Dividend Data

Common dividends were omitted in August, 1989 after having been paid since 1950. Dividends on preferred shares have been continued.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.30	Jan. 27	Feb. 13	Feb. 17	Mar. 31'89

Summary

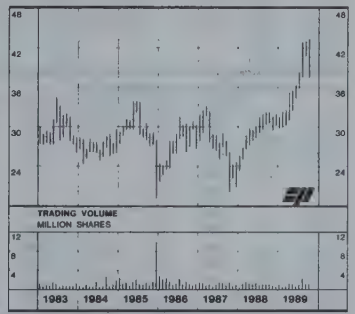
This diversified energy company's major subsidiary is a natural gas distributor serving northern Illinois. Other operations include freight and container transportation, oilfield services, and oil and gas exploration and production. Earnings for the first nine months of 1989 rose slightly, reflecting higher profits at gas distribution and exploration and production operations.

Current Outlook

Share earnings for 1990 are projected at $3.90, up from an estimated $3.70 for 1989.

Dividends are expected to continue at $0.50 quarterly.

Gas distribution profits for 1990 are expected to be slightly higher, reflecting customer additions, and an expected return to more normal weather conditions. Exploration and production profitability should rise, reflecting higher oil and gas production, and an increase in average gas prices. Marine profits should be higher, aided by increased margins at containerized freight operations, reflecting increased transportation of goods from Caribbean ports to the U.S. and greater demand for marine services.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	689	667	616	775
Jun.	266	233	235	321
Sep.	173	145	157	206
Dec.	---	464	428	505
	---	1,509	1,436	1,807

Operating revenues for the nine months ended September 30, 1989 rose 7.9%, year to year, reflecting increases at all business segments. Benefiting from higher distribution and oil and gas profits, income from operations advanced 13%, but following lower nonoperating income, higher interest expense, and a higher tax rate, net income was up 7.0%, to $2.43 from $2.24.

Important Developments

Oct. '89— The company's Northern Illinois Gas (NIG) unit redeemed its $50 million 12.5% First Mortgage Bonds due 1994. In June NIG privately sold $50 million of mortgage bonds; proceeds were to be used for debt refinancing, utility plant construction, and general corporate purposes. Separately, management expected all of its businesses to show improved overall performance for 1989. For the first nine months of 1989 gas distribution operating income rose 14%, as strong natural gas demand and lower depreciation more than offset effects from weather that was 6% warmer than in the year-earlier period.

Jun. '89— The Illinois Commerce Commission approved NIG's revenue-neutral rate restructuring case, which would allow the company to establish rates that more accurately allocate costs among all customer classes and create service options that would improve NIG's competitive position.

Next earnings report expected in early February.

Business Summary

NICOR is a diversified energy company engaged in the purchase, storage, distribution, transportation and sale of natural gas; oil and gas exploration and development; gas gathering and brokering; fully containerized liner shipping; and offshore marine service and supply shipping. Segment contributions in 1988:

	Revs.	Profits
Gas distribution	88%	85%
Marine	8%	10%
Exploration & development	4%	5%

The Northern Illinois Gas subsidiary serves some 1.6 million customers in an area over 17,000 square miles, covering 544 communities in northern Illinois. Gas sales volume in 1988 of 332.2 Bcf was up from 301.9 Bcf in 1987. Gas transported for others totaled 119.0 Bcf, versus 100.7 Bcf in 1987. Degree days in 1988 were 6,273, against 5,557 in 1987.

Marine operations consist of transportation of containerized freight between Florida and Caribbean ports, and offshore support, including rig support, anchor handling, rig-towing, seismic exploration, and specialized well services.

Exploration and production is conducted primarily in Oklahoma, Louisiana, and Wyoming. Gas gathering and brokering systems are located in Oklahoma, Texas and Colorado. Proved reserves at year-end 1988 were estimated at 4.9 million bbls. of oil and 126.9 Bcf of gas.

Summary

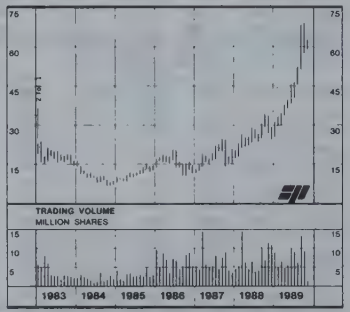
NIKE is one of the world's largest suppliers of high-quality athletic footwear. Virtually all of its products are made by independent contractors, with a majority manufactured outside the U.S. The company also produces a line of leisure sports apparel. Earnings grew substantially following the decline in 1986-7, and they should continue to rise in 1989-90 on strong demand for all of the company's product lines, tighter inventory controls and a more-profitable product mix.

Current Outlook

Earnings for the fiscal year ending May 31, 1990, are estimated at $6.05 a share, up from 1988-9's $4.45.

The $0.15-a-share quarterly dividend should be increased in 1989-90.

Sales for the fiscal year ending May 31, 1990, should rise substantially, reflecting higher prices, increased demand for existing products and new product introductions, growth in apparel sales and international expansion. Margins should widen slightly on the increased volume, tighter inventory controls and a more-profitable product mix. Interest charges may decline.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	603	511	283	257
Nov.	---	322	234	183
Feb.	---	465	332	199
May	---	413	354	238
	---	1,711	1,203	877

For the three months ended August 31, 1989, sales rose 18%, year to year, reflecting a 16% increase in domestic footwear operations, a 22% gain in domestic apparel revenues and a 23% increase in foreign revenues. Gross margins widened on strong demand in all categories, and net income advanced 33%, to $75.9 million ($2.01 a share), from $57.0 million ($1.52).

Common Share Earnings ($)

Quarter:	1989-90	1988-9	1987-8	1986-7

Nov.	---	0.66	0.50	0.13
Feb.	---	1.30	0.74	0.12
May	---	0.97	0.81	0.29
	---	4.45	2.70	0.93

Important Developments

Sep. '89— NIKE said its "futures" orders for footwear scheduled for domestic delivery during the period September 1989 through January 1990 were 37% higher in units than in the same period last year. Futures orders were up 52% when measured in dollars. NIKE added that its record results for the first quarter and strong futures orders for the next five months reflected continuing strength across all product categories. The company said demand for fitness shoes and tennis shoes was especially strong, with sales rising 27% and 48%, respectively, during the first quarter. NIKE went on to say that gross margins benefited from this broad strength and from sound inventory management. The company's financial position continued to be strong.

Next earnings report expected in mid-December.

Business Summary

NIKE, Inc. designs, develops and markets worldwide a broad variety of high-quality footwear and apparel products for a wide range of sport, athletic and leisure activities. In May 1988, the company acquired Cole Haan Holdings, a designer and marketer of high-quality classic footwear, for $95 million.

U.S. contributions to revenues by product in recent fiscal years were:

	1988-9	1987-8
Basketball shoes	24%	24%
Running shoes	12%	15%
Fitness shoes	14%	11%
Racquet shoes	4%	5%
Other footwear	14%	8%
Apparel	12%	12%

Foreign sales accounted for 20% of total revenues in 1988-9, versus 25% the year before.

NIKE footwear products are designed for specific athletic use, although a large percentage are purchased for casual or leisure purposes. In addition, the company offers a line of sports apparel, including tennis, running, bicycling and fitness wear, as well as athletic bags and accessory items. The apparel and accessories line is designed to complement the company's footwear products.

The company's products are sold to approximately 16,800 retail accounts in the U.S. and, through a mix of independent distributors, licensees and subsidiaries, in about 60 other countries.

In 1988-9, some 58% of the company's footwear was produced in South Korea and 18% in Taiwan, while the remainder was manufactured in a variety of nations. About 48% of the company's apparel production was manufactured in the U.S. and the remaining 52% in Asia (mainly in Taiwan).

Summary

This independent energy company explores for and develops crude oil and natural gas throughout the major basins in the U.S. as well as overseas. Earnings comparisons in 1988 and 1989 and possibly 1990 will reflect nonrecurring income associated with the receipt of gas contract settlements. The settlement fees have funded in part the company's aggressive exploration program. NBL's longer-term outlook will hinge upon improved oil and gas prices and the success of its exploration.

Current Outlook

Share earnings for 1990 are projected at $0.20, versus $0.55 estimated for 1989 which includes nonrecurring income.

Dividends should remain at $0.04 quarterly, after having been raised from $0.03 with the August, 1989 payment.

Revenues for 1990 are expected to decline slightly, owing to the take or pay contract settlements in 1989. Crude oil prices are projected to slip in early 1990 while gas prices should remain more stable. Profit comparisons will be limited by the absence of the nonrecurring gains in 1989.

Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	50.4	57.4	50.9	43.2
Jun.	63.3	46.5	44.2	27.0

Dec.	---	47.1	52.9	36.9
	---	191.7	189.6	129.3

Revenues for the nine months ended September 30, 1989 rose 11%, year to year, owing to the gas contract settlements and the gain on the sale of the Plains Petroleum Co. common stock. Net income rose to $20.8 million ($0.48 a share, which excluded a special credit of $0.20), from $10.3 million ($0.23).

Important Developments

Nov. '89— NBL reported share earnings for the nine months ended September 30 of $0.48, versus $0.23 a year earlier. Revenues advanced 11% in the 1989 period, primarily reflecting nonrecurring income in 1989's first six months. In 1989, NBL recorded a total of $18.8 million in take or pay contract settlements, versus $11.8 million settlement income in 1988's first six months. The company has one remaining take or pay contract outstanding which may be settled in 1990. NBL said that the potential settlement would be expected to be less than the $15.3 million settlement received in 1989's second quarter. Also, in 1989's second quarter, NBL recorded a $2.7 million gain on the sale of Plains Petroleum Co. common stock.

Next earnings report expected in late January.

Business Summary

Noble Affiliates is an independent energy company with exploration and production operations, conducted through its Samedan Oil Corp. subsidiary, throughout major basins in the U.S., including the Gulf of Mexico and offshore California, as well as Canada, Tunisia and Indonesia.

Net proved reserves at 1988 year-end totaled 30.9 million barrels of oil and 337.1 Bcf of natural gas. Estimated present value of future net cash flows from NBL's reserves at December 31, 1988 was $412 million, versus $458 million at year-end 1987 and $440 million at year-end 1986.

Production in 1988 amounted to 9,669 barrels of oil a day (10,005 in 1987) and 158.0 Mmcf of gas a day (158.4). Average price per barrel was $14.39, versus $17.09 in 1987. Gas prices averaged $2.05 per Mcf in 1988, versus $2.08.

At year-end 1988 NBL owned interests in 4,590.5 gross (501.0 net) productive oil wells and 887.5 gross (201.4) productive gas wells. Developed acreage totaled 929.909 gross (270.744 net) acres and undeveloped acreage totaled 2,672,400 gross (784,117 net) acres worldwide.

Including purchases, NBL replaced some 123% of its oil production in 1988 and the company replaced about 101% of its gas production in 1988.

Dividend Data

Dividends were initiated in 1975.

Summary

This Canadian company is a major producer of copper and other metals and holds interests in oil and gas companies, as well as in firms that manufacture plastics, wire and tubing, aluminum and forest products. Earnings reached record levels in 1988, reflecting higher profits in all major businesses. The company, in conjunction with Trelleborg AB of Sweden, recently offered to purchase Falconbridge Ltd. for $C37 a share.

Business Summary

Noranda Inc. (formerly Noranda Mines) is a diversified natural resource company. Noranda and its associated companies are engaged in the metals and minerals, oil and gas, manufacturing and forest products businesses. Contributions to revenues and operating profit in 1988 were:

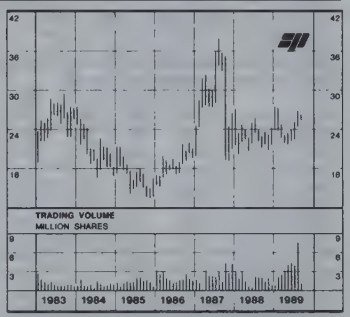
	Revs.	Profits
Forest products	53%	51%
Manufacturing	27%	19%
Metals & minerals	17%	25%
Oil and gas	3%	5%

The metals and minerals group is a major producer of copper, lead, zinc and related by-products; gold and silver; sulphuric acid, potash and phosphate fertilizers. The group operates thirteen mines and five metallurgical plants. Products are marketed to customers in 65 countries.

In 1987, Noranda consolidated its forest products companies into Noranda Forest Inc. and sold a 19% interest in the unit through an initial public offering. Operating in Canada and the U.S., the group produces lumber, plywood, waferboard, pulp and paper.

The acquisition of a 38% interest in Norcen Energy Resources and a 48% interest in North Canadian Oils in late 1987 established the energy group as a major participant in the Canadian oil and gas industry. At 1988 year-end, the group had proved and probable reserves of 210 million barrels of oil and natural gas liquids, and gas reserves of 3.2 trillion cu. ft.

Manufacturing operations focus on value-added businesses related to natural resource activities, and primarily consist of the production and fabrication of aluminum and aluminum building products, and the manufacture of steel and copper wire and cable.



Major investments in 1988 included the acquisition of a 22.8% interest in Falconbridge Ltd., a Toronto-based metals producer, for $334 million (see Important Developments), and the $63 million purchase of a 55% interest in a 130 million ton Montana copper-silver deposit.

Important Developments

Aug. '89— Noranda and Trelleborg AB of Sweden said they had offered to purchase the approximately 73% of Falconbridge Ltd. shares they don't already own. Their offer of $C37 a share topped an earlier $C36.125 a share offer by NYSE-listed Amax Inc. Falconbridge's directors said they support the new offer, but reserve the right to withdraw their support if a higher bid is made for Falconbridge.

Jul. '89— The company said it plans to offer publicly $100 million of 10.5% ten-year debentures. Proceeds would be used to reduce short-term debt.

Summary

This specialty retailer of apparel and accessories, widely known for its emphasis on service, is expanding its business to the East Coast. The company currently operates two stores outside Washington, D.C. A $500 million capital expenditure program over the next three years, which includes several new stores, augurs well for future sales and earnings growth.

Current Outlook

Share earnings for the fiscal year ending January 31, 1991, are projected at $2.15, up from the $1.70 estimated for 1989-90.

The quarterly cash dividend has been increased frequently.

Sales gains for 1990-1 should reflect higher productivity in recently constructed stores and new store expansion. Gross margins should remain about level, reflecting a more-competitive pricing environment. Expense ratios may weaken as a result of store additions. Expansion into the East Coast provides a good base for long-term growth.

Important Developments

Nov. '89— Nordstrom said the mid-October earthquake in northern California reduced earnings for the third quarter of 1989-90 by not more than $0.04 a share. Costs and expenses identified directly with the earthquake amounted to $1,270,000. In addition, sales in all northern California stores after the earthquake were significantly below normal for varying periods, which will affect results for the fourth quarter to some degree. During the third quarter of 1989-90, two new stores were opened—a second store in the Washington, D.C., area and the first in Sacramento, Calif. Both stores experienced successful openings. At the end of the quarter, the company operated 60 stores with a total of 6,896,000 sq. ft.

Next earnings report expected in late February.

Business Summary

Nordstrom is a specialty retailer, selling primarily full lines of medium-to-upscale apparel, shoes and accessories for women, men and children. At January 31, 1989, it was operating 58 stores (occupying an aggregate of 6,374,000 sq. ft. of space), versus 56 stores (5,527,000 sq. ft.) at 1987-8 year-end. Nordstrom stores are located in Washington, Oregon, Alaska, California, Utah, Montana and Virginia. The company also operated leased shoe departments in 11 department stores in Hawaii.

Sales in recent years were derived as follows:

	1988-9	1987-8
Women's apparel and accessories	59%	59%
Shoes	18%	18%
Men's apparel and accessories	17%	17%
Children's apparel and accessories	4%	4%
Other	2%	2%

Nordstrom stores feature a wide selection of style, size and color in each merchandise category. Emphasis is placed on fashion and customer service. The company also places importance on store design and fixturing to enhance its merchandise presentations. As of January 31, 1989, Nordstrom operated 42 large specialty stores and six smaller "Place Two" units, as well as 10 clearance stores. Sales per square foot of selling space were $380 in 1988-9, $349 the year before and $322 in 1986-7.

Dividend Data

Cash has been paid in each year since 1971.

36¼	41¼-30¼	10	1.44	4.0%	B+	1.16

Summary

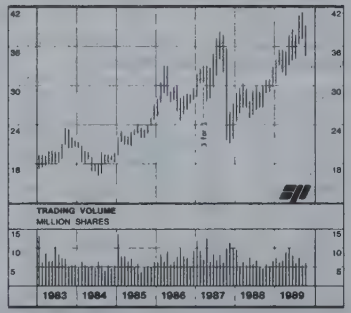
This company operates a 17,000 mile rail system and provides a variety of motor carrier services. In October, 1989 directors authorized the repurchase of up to 45 million NSC common shares (26% of total outstanding) through 1992 year-end. Since late 1987, NSC has repurchased 19 million of its common shares (10%) under a 20 million share buyback program. While a sluggish economy and the absence of 1989's nonrecurring gains could hurt operating profits in 1990, per-share comparisons will benefit from the share buybacks.

Current Outlook

Earnings for 1990 could reach $3.95 a share, versus the $3.65 anticipated for 1989.

Dividends were raised 9.1% ,to $0.36 quarterly from $0.33, with the September, 1989 payment.

Rail profits are likely to be flat in 1990, as improvement for intermodal traffic and grain are outweighed by lower volumes for metals, chemicals and other cyclical traffic. Squeezing margins will be higher labor costs and flat rates. North American Van Lines could post a moderate profit gain, despite a difficult operating environment in each of its markets, as cost reduction programs at its truckload unit begin to pay off. Weakness in the computer industry will penalize results for NAVL's high-value products business. Despite the absence of 1989's gains from the sale of real estate and securities, EPS comparisons should benefit from the share buybacks.



Oper. Revenues (Million $)

Important Developments

Oct. '89— Directors authorized the repurchase of up to 45 million NSC common shares (26% of total outstanding) through 1992 year-end. Timing of the purchases, which will be made through open-market transactions, will be governed by NSC's assessment of market conditions and alternative investment opportunities. NSC also reported that it had repurchased 19 million common shares since launching a 20 million share buyback program in November, 1987. Completion of that program is anticipated by 1989 year-end.

Apr. '89— NSC said that it sold half its holdings in Trailer Train, a railcar lessor, to Consolidated Rail Corp. The transaction lifted pretax income for 1989's second quarter by $21.5 million (about $0.08 a share after taxes).

Next earnings report expected in late January.

Business Summary

Norfolk Southern Corp. was formed through the 1982 consolidation of the Norfolk & Western Railway Co. and the Southern Railway Co. Contributions (in million $) by business segment to operating profits:

	1988	1987	1986
Railroad	$936.9	$682.8	$661.9
Motor carrier	8.4	42.6	40.1

Rail service is provided over 17,037 miles in 20 states, primarily east of the Mississippi River, and the Province of Ontario. NSC transported 100.8 billion tons-miles of freight in 1988, up from 94.3 billion ton-miles in 1987. Coal is the rail's largest traffic source, generating 34% of freight revenues in 1988. NSC originated 115.2 million tons of coal on its line in 1988, 82% of which moved under contract. Other important traffic groups are chemicals (produced 12.1% of rail revenues in 1988), paper (11.1%), and automobiles (10.4%).

North American Van Lines (NAVL) provides a broad range of motor carriage services. Some 34% of revenues are derived from domestic relocation of household goods. NAVL also is a leading carrier of truckload general freight (30% of revenues), engages in the transport of high-value, time-sensitive freight (21%), and forwards household goods overseas through a network of 300 agents (15%).

Pochahontas Land Corp. manages over 650,000 acres of properties in six states. NSC collects royalties from properties containing 1.8 billion tons of coal, develops real estate, leases oil and gas and timberland properties, holds 8.3% of Advanced Telecommunications Corp. NSC also owns the Hotel Roanoke in Virginia, which it will transfer to Virginia Polytechnic Institute in early 1990.

Dividend Data

Dividends were paid by Norfolk & Western Railway since 1901 and Southern Railway since 1943. A dividend reinvestment plan is available.

Summary

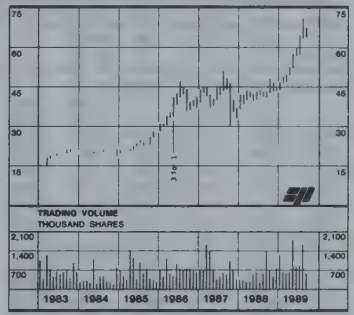
This Chicago-based interstate bank holding company's lead subsidiary is Northern Trust Co., the fourth largest bank in Illinois. The return to profitability for 1988 was attributable to a substantial decrease in the provision for loan losses, an increase in net interest income and a strong gain in noninterest income. Net income was up an impressive 30% in 1989's first half.

Business Summary

Northern Trust Corporation is an interstate bank holding company whose lead bank is Northern Trust Co. in Chicago, the fourth largest bank in Illinois. The company also owns several smaller Illinois banks, three Florida banks, one bank each in Arizona, California and Texas (see Important Developments), a trust company and several nonbanking subsidiaries.

At December 31, 1988, gross loans and leases outstanding of $4.67 billion were divided:

Commercial and industrial	42%
Financial institutions	7%
Lease financing	1%
Brokers	7%
Residential mortgages & commercial real estate	29%
Consumer	5%
International	6%
Other	3%



The allowance for loan losses totaled $151,100,000 at 1988 year-end ($233,400,000 a year earlier), or 3.24% (5.89%) of loans and leases outstanding. Net loans charged off amounted to $102,300,000 in 1988 ($21,600,000 in 1987), equal to 2.39% (0.54%) of average loans and leases. Nonperforming assets at December 31, 1988, totaled $27,100,000 ($85,000,000 a year earlier). The company started 1988 with LDC term loans totaling $221 million and closed the year with just $28 million (see Finances).

Total deposits of $6.75 billion at 1988 year-end were divided: demand and other noninterest-bearing 28%, savings and money market 34%, savings certificates 21%, other time 4% and foreign 13%. Interest income (including fees) on loans and leases contributed 40% of total income for 1988, interest on money-market assets 13%, interest on investment securities 15%, other interest income 1%, trust fees 21% and other noninterest income 10%.

On a tax-equivalent basis, the average yield on interest-earning assets was 8.98% in 1988 (8.33% in 1987), while the average rate paid on interest-bearing liabilities was 6.83% (6.26%), for a net spread of 2.15% (2.07%).

Important Developments

Jun. '89— Northern expanded into Texas through the acquisition, for an undisclosed amount, of Concorde Bank Dallas N. A. The bank, which was renamed Northern Trust Bank of Texas N. A., has assets of about $70 million.

Jan. '89— The company established an Employee Stock Ownership Plan (ESOP) which purchased 1,500,000 newly issued shares (about 9%) of the company's common stock with funds from a 10-year loan of up to $75 million. Northern also authorized the repurchase of up to 1,000,000 of its common shares over a two-year period.

Next earnings report expected in mid-October.

Review of Operations

Net interest income for the six months to June 30, 1989, rose 9.0%; year to year, reflecting a 15% increase in average earnings assets; the net interest margin declined slightly to 2.99%, from 3.09%. Results benefited from 8.5% higher noninterest income versus a smaller 7.9% advance in noninterest expense, and a 33% decline in the provision for loan losses ($8,000,000, versus $12,000,000). After taxes at 12.0%, against 17.2%, net income was up 30%. Following preferred dividends, earnings per common share rose to $2.99 on 9.1% more shares ($2.90 fully diluted), from $2.49 ($2.42).

Finances

The company realized a gain of $21.40 million in 1988 on the sale of its Northern Building.

Because of worsening economic conditions in less-developed countries (LDCs), Northern Trust added $151 million to the reserve for loan losses in 1987. The company sold $198 million of the LDC loans in 1988, resulting in a loss of $98 million, which was charged to the loan loss reserve.

Northeast Utilities

NYSE Symbol NU

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 15'89	1989					
22⅜	23-18½	11	1.76	7.9%	A	0.49

Summary

This utility holding company serves customers in Connecticut and Massachusetts. NU has offered to purchase Public Service Co. of New Hampshire (PNH), which filed for bankruptcy in January, 1988. PNH has a 35.6% interest in the Seabrook nuclear plant. NU's $2.25 billion acquisition offer for PNH is one of three reorganization proposals for that entity. Competing bids include a $2.29 billion offer by United Illuminating, and PNH's own restructuring proposal valued at $2.2 billion.

Current Outlook

Share earnings for 1990 are estimated to reach $2.10, up from the $1.90 projected for 1989.

Until the company's proposed acquisition of Public Service of New Hampshire is resolved, NU is unlikely to raise the $0.44 quarterly dividend.

Share earnings for 1990 will be aided by higher kwh sales. If, however, the company's bid to acquire PNH were accepted by the bankruptcy court, the effect on NU could be materially dilutive.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	560	537	461	550

Dec.	---	528	487	510
	---	2,079	1,878	2,032

Based on a brief report, revenues (from electric operations only) for the nine months ended September 30, 1989 rose 5.2%, year to year, primarily reflecting higher September, 1989 sales. However, after higher electric production maintenance expenses, net income declined 4.9%. Share earnings were $1.45, versus $1.52, excluding earnings from the gas business of $0.05 in both periods.

Important Developments

Oct. '89— NU and the Official Committee of Equity Security Holders of Public Service of New Hampshire (PNH) announced the filing of a joint plan whereby NU would acquire PNH for $2.25 billion. PNH has a 35.6% stake in the Seabrook nuclear plant. Under the plan, NU would pay $1.65 billion cash to PNH creditors and assume $100 million in PNH pollution control bonds. PNH preferred and common shareholders would receive about $500 million in cash, preferred stock and notes, plus 5.3 million warrants for NU common exercisable at $24 a share when Seabrook reaches full power. NU's offer is one of three reorganization proposals for PNH. United Illuminating has offered $2.29 billion for PNH, and PNH has its own restructuring plan valued at $2.2 billion.

Next earnings report expected in late January.

Business Summary

Northeast Utilities, the largest utility in New England, is a holding company whose three subsidiaries operate in Connecticut and Massachusetts. The company completed the distribution of its gas business to NU shareholders on July 1, 1989. Revenues by class in recent years:

Revenues	1988	1987	1986	1985
Residential	41%	43%	41%	41%
Commercial	32%	35%	33%	33%
Industrial	18%	19%	19%	20%
Other	9%	3%	7%	6%

Power sources in 1988 were nuclear 58%, fossil 26%, hydro 6% and purchases and other 10%. Peak demand in 1988 was 4,883 mw and capability totaled 5,738 mw, for a capacity margin of 15%. Gas sales in 1988 were 31,707 MMcf, versus 30,804 MMcf in 1987.

NU owns 65% of the 1,150 mw Millstone 3 nuclear plant, which was placed in operation in April, 1986. In December, 1987 NU wrote-off $119.0 million ($1.10 a share) of disallowed Millstone 3 costs retroactive to 1986. NU also has a 4.1% share in the Seabrook nuclear facility. Seabrook licensing has been disputed by Massachusetts officials. Licensing efforts have been further complicated because the project's largest investor, Public Service Co. of New Hampshire (35.6% interest), filed for bankruptcy in January, 1988. On June 13, 1989 the Seabrook plant achieved its first nuclear reaction. A low power license was awarded on May 26, 1989. In their report on NU's 1988 financial statements, auditors noted the existence of uncertainties regarding the Seabrook plant.

Dividend Data

Dividends have been paid since 1927. A dividend reinvestment plan is available.

39¼	40-30¼	13	2.22	5.7%	A	0.40

Summary

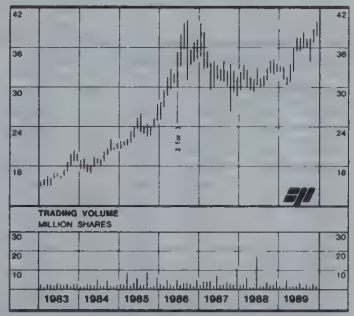
This leading electric and gas utility, serving much of Minnesota and the upper Midwest, derives its power requirements primarily from coal, and to a lesser extent, nuclear sources. NSP's coal facilities are expected to exceed potential emission control standards and the nuclear plants are among the highest rated facilities in the nation. The longer-term outlook is enhanced by excellent cash flow and the diversified coal and nuclear capacity. In November, 1989 the company filed an electric rate increase request with the Minnesota PUC for an overall rate increase of $121 million, or 10.2%.

Current Outlook

Share earnings for 1990 are projected at $3.35, up from the $3.20 expected for 1989.

The dividend is expected to continue at $0.55½ quarterly.

Share earnings for 1990 should benefit from higher rates. The longer-term outlook is strengthened by the diversified coal and nuclear plants and also by strong cash flow and a supportive regulatory climate.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	561	549	473	541

Dec.	---	484	429	421
	---	2,007	1,770	1,782

Revenues for the 12 months ended September 30, 1989 rose 1.2%, year to year, owing mostly to higher gas sales. After a more rapid rise in production costs, however, operating income was down 3.4%. Following lower AFUDC and net other income, net income decreased 8.0%. After 4.6% higher preferred dividends, share earnings were $2.93, versus $3.23.

Dec.	E0.54	0.27	0.39	0.59
	E3.20	3.11	3.01	3.09

Important Developments

Dec. '89— NSP reported that the Minnesota Public Utilities Commission approved an interim electric rate increase of $81.5 million, or 6.9%, which is lower than the $91 million, or 7.7%, interim increase sought by the company in its November 2, 1989 rate filing. The interim increase is subject to refund with interest. The filing seeks an overall rate increase of $121 million, or 10.2%. If approved, effective in November, 1990 this would be an average annual increase of about 3.5% since NSP's last rate increase. The PUC has 10 months from the filing date to issue a final order. NSP reported that as part of the rate case, it is requesting a higher rate of return on its shareholders' investment. It believes that its present rate of return is nearly the lowest of any U.S. utility.

Next earnings report expected in late January.

Business Summary

Northern States Power and subsidiaries provide electricity and gas, and to a minor extent telephone services, to a population of more than 3 million in sections of Minnesota, Wisconsin, Michigan and North and South Dakota. Electricity accounted for 84% of operating revenues in 1988, gas 15%, and telephone about 1%. Contributions to electric revenues in recent years:

Revenues	1988	1987	1986
Residential	35%	35%	35%
Small comm'l & ind'l	17%	17%	17%
Large comm'l & ind'l	38%	39%	38%
Other	10%	9%	10%

Sources of electric generation in 1988 were 48% coal, 33% nuclear, 2% hydro and 17% purchased power and other. Peak demand in 1988 was 6,923 mw and system capability was 7,975 mw for a capacity margin of 13%. Gas sales in 1988 of 73,892 MMcf, were up from 64,231 MMcf in 1987.

NSP's nuclear plants consistently rank among the highest rated facilities in the nation. The company's coal facilities, which use low-sulfur coal and are equipped with emissions control equipment, would be expected to exceed potential national requirements for acid rain. In the 1990's, NSP may increase its power purchases and also the company may build peaking facilities.

Dividend Data

Dividends have been paid since 1910. A dividend reinvestment plan is available.

Summary

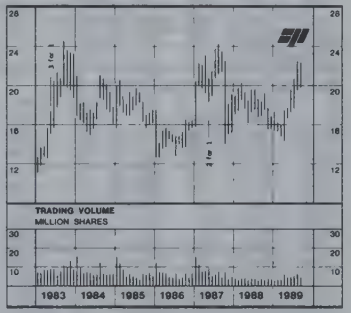
Northern Telecom (52%-owned by Bell Canada) is the largest telecommunications equipment manufacturer in Canada and second only to AT&T in North America. The company is a leader in digital central office switching equipment technology. NT anticipated that sales and earnings for 1989 would increase, partly reflecting streamlining and restructuring programs.

Current Outlook

Earnings for 1989 are estimated at $1.30 a share, versus 1988's $0.70, which includes a $0.57 nonrecurring charge. Earnings for 1990 are tentatively projected at $1.60 a share.

The dividend is expected to remain at $0.07 quarterly.

Revenues for 1989 should increase moderately, as soft demand for central office switches and lower prices are offset by increased shipments of add-on features such as the DMS SuperNode. Margins are likely to be substantially unchanged, as volume and pricing pressure on some product lines is offset by the higher margins on recently introduced products.



Revenues (Million U.S. $)

Quarter:	1989	1988	1987	1986
Mar.	1,380	1,218	1,143	970

Dec.	---	1,533	1,299	1,314
	---	5,408	4,854	4,384

Revenues for the six months ended June 30, 1989 increased 11%, year to year (1988 restated). Margins narrowed, and operating income declined 13%. With a 71% rise in investment and other income, pretax income decreased 7.5%. After taxes at 29.0%, versus 27.8%, net income was down 9.0%. Earnings per share were $0.49, compared with $0.56.

Important Developments

Aug. '89— NT planned to extend a stock repurchase program until September 6, 1990, subject to regulatory approval, which would allow the repurchase of up to 10 million common shares (4.2% of the total outstanding) beginning September 7, 1989. Under a program begun a year earlier, NT repurchased 1,109,500 shares. The shares would be bought at market prices, and may be repurchased to prevent dilution resulting from new shares being issued under employee and shareholder plans. Earlier, NT said that barring an economic downturn, it expected 1989 as a whole to produce revenue and earnings growth, reflecting increased sales in both the North American and offshore markets, and the benefits of restructuring and streamlining programs. Order input during the 1989 second quarter was $1.59 billion, up 16%, year to year. The order backlog at June 30, 1989 was $1.70 billion, up 16%, year to year.

Next earnings report expected in late October.

Business Summary

Northern Telecom Ltd. is the largest manufacturer of telecommunications equipment in Canada, and the second largest (to AT&T) in North America. Revenues sources in recent years:

	1988	1987
Central office switching	53.8%	53.1%
Business systems	24.3%	26.8%
Transmission	10.6%	10.3%
Cable & outside plant	8.3%	8.4%
Other	3.0%	1.4%

Sales in the U.S. accounted for 62.0% of revenues in 1988, those in Canada 34.2%, and other sales 3.8%.

NT's telecommunications products include both digital and analog central telephone office switching systems, subscriber apparatus (such as telephone sets), business communications systems, transmission equipment, and wire, cable and related outside plant products. Principal customers are telephone operating companies in Canada and the U.S.

Bell-Northern Research Ltd., 70% owned (Bell Canada owns the balance) is Canada's largest industrial R&D organization and is active in all phases of telecommunications research.

Summary

North-West is a broad-based, independent telecommunications firm whose interests include telephone service and sales, cable television, data processing services, telephone directory publishing, printing and cellular mobile telephone service. A three-for-two stock split was effected in mid-1989. In September 1989, the company and its financial advisor, Morgan Stanley & Co., were exploring a variety of alternatives for North-West.

Business Summary

North-West Telecommunications, Inc. was formed in 1982 as a holding company by North-West Telephone Co. (its principal subsidiary) to meet wide-ranging future telecommunications needs and opportunities outside the normal scope of utility company operations. The company now is also active in the cable TV service and printing and publishing fields.

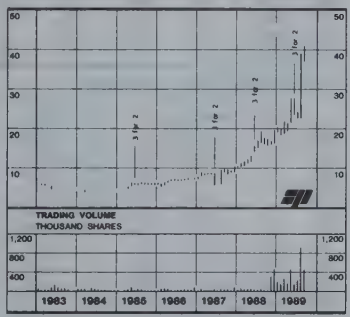
Revenues and operating income (in 000s) for 1988 were derived from:

	Revs.	Income
Telephone serivce	72%	$8,311
Printing & publishing	25%	-306
Cable TV service	3%	124

North-West Telephone is the largest of four subsidiaries that furnish local and long-distance service to customers located in 30 exchanges throughout Wisconsin. At 1988 year-end, they were providing service to approximately 63,100 customers. The territories served are primarily small cities and their surrounding rural areas; the largest communities are Tomah and Ripon.

In addition, the company provides cellular mobile telephone service in the Milwaukee, Appleton, Green Bay and Eau Claire areas of Wisconsin, sells terminal equipment through its North-West Telecom Systems unit and performs certain data processing services for unaffiliated telephone companies through its North-West Datatech Corp. subsidiary.

Gronseth Directory Service Corp. in 1988 published 183 directories for 241 telephone utilities located in 28 states and two directories independent of any affiliation with telephone utilities. Sentinel Printing Co. is a full-service printer, producing many of the directories published by Gronseth.



Through Platteville Cable, a unit of one of its telephone companies, the company operates cable television systems in six communities in southwestern Wisconsin. At 1988 year-end, Platteville Cable was serving about 6,500 subscribers (see Finances). In June 1988, North-West sold its NorCom Video subsidiary (consisting of two CATV systems in Minnesota) for $9.5 million, recognizing an after-tax gain of about $4.3 million ($0.90 a share, as adjusted).

Important Developments

Sep. '89— The company said that with its financial advisor, Morgan Stanley & Co., it was continuing a study of a variety of strategic alternatives. As part of the study, Morgan Stanley was authorized to contact a select group of companies to investigate their interest in a business combination with North-West.

Next earnings report expected in late October.

Oper. Revenues (Million $)

Quarter:	1989	1988	1987	[1]1986
Mar.	12.45	12.10	11.60	7.26
Jun.	13.68	13.03	12.42	6.88
Sep.		14.00	13.59	7.81
Dec.		12.60	12.40	9.27
		51.73	50.01	31.23

For the six months ended June 30, 1989, operating revenues advanced 4.0%, year to year. Profitability was hurt by start-up expenses associated with cellular rural service area activity, increased publishing and printing costs and lower-than-expected margins in the telephone equipment sales and service subsidiary. After-tax income fell 28%, to $1,536,000 ($0.27 a share, based on 22% more shares), from $2,138,000 ($0.46, as adjusted). Results for the 1988 period exclude a $1.03-a-share gain from the sale of cable properties.

Finances

In September 1989, management reported that the closing on a letter of intent signed in April 1989 had been delayed to October 31. The letter covered the sale of five of six CATV franchises held by Platteville Cable to Leonard Communications. The properties being sold serve about 3,700 subscribers, while the franchise being retained serves more than 2,700 subscribers.

Northrop Corp.

NYSE Symbol NOC Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 5'89	1989–90					
18	29¾–16	NM	1.20	6.7%	B	0.90

Summary

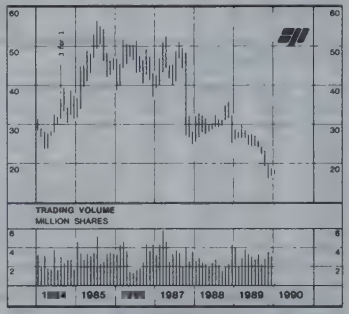
Northrop is an important manufacturer of military aircraft, with programs for production of the B-2 Stealth bomber and development of the Tacit Rainbow missile plus subcontractor production of the Navy's F/A-18 and the 747. NOC is competing for development of the Air Force's Advanced Tactical Fighter (ATF). It is also a leading producer of defense electronics. Future earnings could be affected by delays or reductions of the B-2 and other development programs because of Federal budget problems.

Current Outlook

Earnings for 1990 are projected at $2.25 a share, versus 1989's estimated loss of $0.40.

Dividends should continue at $0.30 quarterly.

Revenues for 1990 should be slightly below the 1989 level. A small decline is likely for the aircraft segment, reflecting lower revenues from the development portion of the B-2 contract and fewer F/A-18 shipsets. Margins should improve as a result of staff reductions and assuming smaller writeoffs. Electronics sales should also be modestly lower, reflecting reduced funding on some programs, with wider margins resulting from probable smaller writeoffs. Interest expense should be somewhat higher.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,281	1,369	1,407
Jun.	---	1,397	1,346	1,420
Sep.	---	1,246	1,358	1,459
Dec.	---	---	1,726	1,767
	---	---	5,797	6,053

Sales for the first nine months of 1989 declined 3.6%, year to year. Reflecting larger contract writeoffs, there was a net loss of $46.9 million ($1.00 a share), versus a profit of $55.2 million ($1.18, before a $2.87 special credit).

Common Share Earnings ($)

Dec.	E0.65	E0.60	d1.83	0.74
	E2.25	Ed0.40	d0.65	2.01

Important Developments

Nov. '89— The company commented that congressional authorization of production of two B-2 bombers in 1990 and long-lead funding of five for 1991 demonstrated that production of the aircraft would go ahead.

Nov. '89— Northrop delivered the first YF-23 ATF prototype to the Air Force for testing. However, the program has been delayed for six months, and the company was negotiating with the Air Force for payments to cover cost of the delay.

Oct. '89— Northrop reported that an $8 million writeoff on the F-15 ECM development contract in the third quarter had brought electronics segment writeoffs to $60 million for the nine months of 1989. Also, there was a $150 million writeoff on a classified program in the second quarter.

Next earnings report expected in late January.

Business Summary

NOC is a diversified manufacturer whose sales and profits by major industry segment in 1988 were:

	Sales	Op. Inc.
Aircraft	80%	68%
Electronics	17%	30%
Services	3%	2%

Sales to U.S. Government accounted for 92% of sales in 1988.

The major aircraft program is the B-2 stealth bomber, production of which began in 1988. Northrop is major subcontractor on the F/A-18 multimission plane, producing 40% of its content. It is also subcontractor for fuselage sections of the Boeing 747. The F-5, in production for more than 20 years, is being phased out. The Tacit Rainbow radar-suppression missile is under developement, and NOC is teamed with McDonnell Douglas for development of the YF-23 Advanced Tactical Fighter.

Northrop is an important supplier of electronic countermeasures equipment, makes precision navigation systems, gyroscopes and guidance packages, and electro-optical systems.

Service activities include aircraft maintenance and base support services for the U.S. Government.

Dividend Data

Dividends have been paid since 1951. A reinvestment plan is available.

Norton Co.

1705K

NYSE Symbol NRT Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
52½	61¼-44¾	12	2.00	3.8%	B+	0.97

Summary

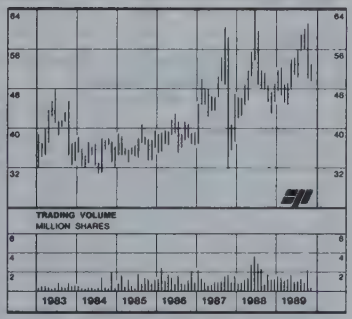
Norton is the world's largest producer of abrasives, manufactures ceramics, plastics and chemical process products, and through subsidiaries is a leading supplier of drilling products and services for the energy industry. In October, 1989 NRT said that it was considering the possible sale or other disposition of all or part of its wholly owned subsidiary, Eastman Christensen Co.

Current Outlook

Earnings for 1990 (for the company as now constituted) are projected at $4.75 a share, versus 1989's estimated $4.65.

Dividends should continue at $0.50 quarterly.

Sales for 1990 may rise slightly, reflecting sluggish economic growth. Abrasives and engineering materials earnings should be little changed as the weak manufacturing sector of the economy places downward pressure on some product prices and, thus, narrows profit margins. However, Eastman Christensen's income will probably increase moderately, as expected heavier oil and gas drilling activity outweighs the impact of a full year's financing costs associated with its buyback.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	388	355	294	293
Jun.	392	363	323	295
Sep.	369	341	300	260
Dec.	---	352	343	259
	---	1,410	1,261	1,107

Sales for the first nine months of 1989 rose 8.6%, year to year. With sharply higher earnings from engineering materials and drilling products, and despite essentially flat profits from abrasives, net income was up 11%, to $3.66 a share from $3.31, before special tax credits of $0.21, versus $0.37.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	1.37	1.27	0.64	0.83
Jun.	1.38	1.17	1.07	0.86

Dec.	E0.99	0.75	0.68	d3.62
	E4.65	4.06	2.97	d1.63

Important Developments

Oct. '89— NRT said that it was considering the possible sale or other disposition of all or part of its wholly owned subsidiary, Eastman Christensen (EC). In June NRT acquired through subsidiary companies the 50% partnership interest of EC that it did not already own from Texas Eastern Corp. for $115 million. For the 12 months ended November 30, 1988 EC generated pretax income of $23 million on revenues of $221 million.

Nov. '88— NRT began a $5.5 million project to convert part of its Carborundum complex in Wheatfield, N.Y., into a manufacturing plant for seeded-gel abrasives. The plant, which would be operational within six months, would make NRT's revolutionary abrasive grains that are used in many high performance bonded and coated abrasives.

Next earnings report expected in early February.

Business Summary

Norton is the world's largest producer of abrasive products; makes engineering materials; and through subsidiaries is a major provider of drilling products and services. Contributions by business segment:

1988	Sales	Profits
Abrasives	67%	58%
Engineering materials	33%	35%
Petroleum & mining	---	7%

International sales amounted to 47% of total sales and 44% of operating profits in 1988.

Abrasives products include bonded abrasives (grinding wheels), coated abrasives (sandpaper), superabrasives (diamond and cubic boron nitride wheels and tools), and construction products (masonry and concrete cutting machines).

Engineering materials include three business units: advanced ceramics (composed of abrasive materials, industrial ceramics and high-performance ceramics), performance plastics and chemical process products.

In late June, 1989 NRT acquired through subsidiary companies the 50% partnership interest of Eastman Christensen (EC) that it did not already own from Texas Eastern Corp. EC provides natural and synthetic diamond-drilling and coring bits, downhole tools, measurement-while-drilling systems, and directional drilling and surveying. NRT also produces proppants in a joint venture with Alcoa.

Dividend Data

Dividends have been paid since 1922. A "poison pill" stock purchase right was adopted in 1986.

Summary

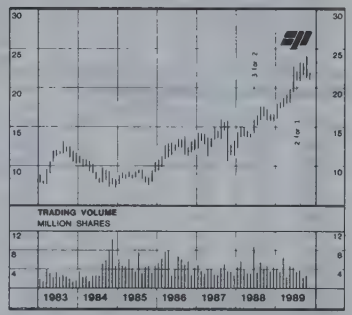
This Minneapolis-based holding company owns banks in seven north-central states and Arizona, and has substantial consumer and commercial finance and mortgage banking operations nationwide. In September, 1989 NOB agreed to acquire First Interstate Corp. of Wisconsin, a $1.7 billion asset bank holding company, for about $215 million in stock. The shares were split 2-for-1 in July, 1989.

Current Outlook

Earnings for 1990 could reach $2.75 a share, up from the $2.53 projected for 1989, after giving effect to the 2-for-1 split.

Dividends were raised 11%, to $0.20½ from $0.18½, with the September, 1989 declaration.

Loans should continue their moderate uptrend through 1990, despite a slowing in the regional economy, as NOB has emerged from its restructuring phase and could increase its market share. Domestic loan quality has improved (nonperforming domestic loans were 0.80% of loans at September 30, versus 0.94% a year ago), benefiting the net interest margin. LDC loans are minimal. NOB has conservative levels of reserves, so that additional provisions could be moderate. NOB continues to improve the efficiency of its banks by consolidation and is developing new sources of revenues, investing heavily in the credit card business and insurance brokering. Mortgage banking is also being rebuilt, after being restructured in the mid-1980s, and could benefit from a pickup in volume. The proposed acquisition of First Interstate of Wisconsin may cause some dilution in 1990. The venture capital portfolio has about $33 million of unrealized gains.



Review of Operations

Net interest income for the nine months ended September 30, 1989 rose 11%, year to year, reflecting reduced levels of nonperforming loans, growth of earning assets, and a slightly wider net interest margin. The provision for loan losses was 26% higher, at $115 million. Despite larger losses on sale of securities, higher fee income, particularly in mortgage banking and credit card operations, led to a 17% rise in noninterest income. In the absence of $27.6 million of restructuring charges, noninterest expense was up 4.0%, and pretax income rose 43%. After taxes at 26.6%, versus 7.3% (including a tax credit), net income was up 13%. Share earnings were $1.87 ($1.85 fully diluted), versus $1.66 ($1.63).

Important Developments

Sep. '89— NOB and First Interstate Corp. of Wisconsin (FIW), a bank holding company with assets of $1.7 billion, announced a definitive agreement calling for the merger of FIW and NOB. FIW holders will receive NOB common stock intended to have a value of $25.50 a share, or about $215 million in total. The merger is expected to be completed in early 1990.

Next earnings report expected in mid-January.

Business Summary

Norwest Corp. is the nation's 32nd largest banking organization, with over 200 branches in Minnesota, Iowa, Nebraska, Montana, North Dakota, South Dakota, Wisconsin and Arizona. Banking services include large credit card operations (1 million accounts), trust, and insurance brokerage. Other subsidiaries engage in consumer finance (650 offices nationwide), commercial finance, mortgage banking (142 offices), venture capital ($110 million invested), and data processing for financial firms. Operating earnings (in million $) were divided in recent years:

	1988	1987	1986	1985
Banking	$155.1	-$83.0	$39.0	$42.8
Financial services	81.5	76.4	81.9	58.1
Mortgage	-9.7	2.9	0.3	14.5
Venture capital	4.3	9.7	14.5	18.9

Average earning assets of $18.7 billion in 1988 were divided: commercial loans 29%, real estate loans 19%, consumer loans 23%, investment securities 26%, other 3%. Average sources of funds were interest-free deposits 13%, other deposits 51%, borrowings 28%, equity 6% and other 4%.

At year-end 1988 nonperforming assets were $135 million (0.9% of loans and related assets), down from $372 million (2.7%) a year earlier, partly reflecting chargeoffs of LDC loans. Net chargeoffs were 1.93% of average loans in 1988, against 2.38% in 1986.

Dividend Data

Dividends have been paid since 1939. A dividend reinvestment plan is available.

Summary

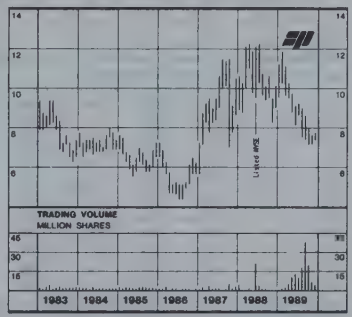
This Alberta-based energy company has interests in petrochemicals, gas transmission, pipeline development, petroleum and manufacturing. The company plans to substantially expand its pipeline system over the next six years. In September, 1989 the company sold 52.1 million common shares under rights at C$8.75 each. Earnings for the first nine months of 1989 fell sharply on higher nonoperating charges.

Current Outlook

Share earnings for 1990 are projected at C$0.95, down from the C$1.05 estimated for 1989.

Dividends are expected to continue at $C0.13 quarterly.

Profits from petrochemical operations for 1990 should remain about unchanged, as a small increase in sales volumes is offset by continued softness in prices. Pipeline profits should be higher, reflecting an increase in transmission volumes on increased demand for gas and expansion of services. Consolidated earnings are expected to be hurt by higher interest charges and additional shares outstanding.



Revenues (Million Can. $)

Quarter:	1989	1988	1987	1986
Mar.	1,297	716	542	789
Jun.	1,209	624	528	639

Important Developments

Oct. '89— NVA said that selling prices for its major petrochemical commodities declined between 30% and 35% since the 1989 first quarter, with the largest portion of the decline occurring in the 1989 third quarter. The company said that net income continued to be negatively affected by the high level of the Canadian dollar relative to the U.S. dollar. Separately, for the first nine months of 1989 NVA transported more than 2 Tcf of natural gas, up 3% from the year-earlier level. NVA planned to spend over $3 billion over the next six years to expand its pipeline system.

Sep. '89— NVA sold 52,127,748 common shares at $8.75 (Canadian) each in a 1-for-5 rights offering; net proceeds of about C$445 million were used for debt reduction and the redemption of preferred stock.

Next earnings report expected in mid-February.

Business Summary

NOVA Corporation of Alberta (formerly NOVA, AN ALBERTA CORP.) engages principally in energy activities. Contributions to revenues and profits (in Canadian $ millions) in 1988:

	Revs.	Profits
Petrochemicals	61%	$681
Pipelines	15%	286
Gas marketing	20%	5
Petroleum & Other	4%	6

Petrochemical operations conducted through wholly-owned Novacor Chemicals Ltd. and Polysar Ltd. produce products including, ethylene, styrene, propylene, polyethylene, polystyrene, methonol, and rubber.

The Alberta-based gas transmission division operates 9,222 miles of pipeline. Gas throughput in 1988 totaled 2.75 Tcf of gas (2.35 in 1987). NOVA has 50% interests in Foothills Pipe Lines (Yukon) Ltd., which is responsible for construction of the Canadian segment of the Alaska Highway Pipeline Project, Pan-Alberta Gas Ltd. and Trans Quebec & Maritimes Pipeline Inc.

Petroleum operations consist of Husky Oil Ltd. (43%-owned) and wholly-owned Novalta Resources Ltd. Other operations consist of the manufacturing and worldwide sale of pipeline valves and flow control products, and Novacorp International Consulting Ltd., which markets engineering and technical expertise worldwide.

Summary

This company (formerly Novo Industri) is one of the worlds's leading producers of insulin, as well as the largest manufacturer of industrial enzymes. Other pharmaceutical and bioindustrial products are also offered. In April, 1989 Novo merged with Nordisk Gentofte A/S, a leading Danish maker of insulin and other drug products, through the issuance of some 6.1 million common shares, and changed its name to Novo-Nordisk.

Current Outlook

Earnings for 1990 are estimated at about $3.50 per ADS, up from the $3.15 indicated for 1989, assuming relative stability in the krone/dollar exchange ratio.

An annual dividend from 1988 earnings of about $0.463 (net of the 15% Danish tax) was paid May 12, 1989, compared with the $0.522 paid in May, 1988 from 1987 earnings.

Revenues for 1990 are expected to show further progress from the 6.8 billion Danish krone forecast for 1989, aided by higher sales of insulin, other pharmaceuticals, and industrial enzymes. Despite rising costs, profitability should benefit from the better volume and cost efficiencies and economies from the combination with Nordisk.

Important Developments

Apr. '89— The company merged with Nordisk Gentofte A/S, a leading Danish maker of insulin and other drug products, through the issuance of some 6.1 common shares of Novo-Nordisk. Assuming Novo and Nordisk had been combined from the start of 1988, pro forma Novo-Nordisk would have had revenues of 6.3 billion Dkr., pretax income of 953 million Dkr., taxes of 292 million Dkr., and earnings of 661 million Dkr. (equal to $3.04 per ADS based on 1988 year-end exchange rates). Novo noted that the merger with Nordisk will strengthen its competitive position, especially in the insulin market; bring to Novo new pharmaceutical products, notably growth hormones; and increase its potential to produce new diabetes care, blood products and other new drugs by pooling the R & D efforts of both firms.

Next earnings report expected in mid-November.

Business Summary

This company (formerly Novo Industri), whose sales base was substantially augmented with the April, 1989 acquisition of Nordisk Gentofte A/S, is one of the world's leading producers of insulin, as well as the largest maker of indust rial enzymes. It also makes several other drug and bioindustrial products.

Pro forma sales for the combined company in 1988 broke down by product category approximately as follows: diabetes products (principally insulin) 52%, other pharmaceuticals and medical products 14%, enzymes and other bioindustrial products 29%, and A/S Ferrosan products 5%.

Geographically, pro forma 1988 sales were divided: countries in the EEC 44%, other Europe 17%, North and South America 19%, and the rest of the world 20%.

Insulin, which is used in the treatment of diabetes, is the company's principal product. Together with Nordisk, Novo estimated that it accounted for about 35.2% of the 120,000 megaunit world market in 1988. Other pharmaceutical and medical products include heparin, blood products (such as albumin and factor VIII), gynecological items, antibiotics, injection systems and pumps.

Bioindustrial consists of the following divisions: Detergent (provides enzymes to the detergent industry), Enzyme Process (serves the starch, alcohol, dairy, brewing, textile, protein, and leather industries), Wine & Juice (provides enzymes to producers of wine and fruit juice), and Biochemicals (produces bulk antibiotics).

Other operations consist primarily of A/S Ferrosan (100%-owned), which markets prescription and over-the-counter drugs and disinfectants in Scandinavia.

Dividend Data

Dividends have been paid since 1974. Payments are made in April from the prior year's earnings; under Danish law no interim payments may be made. Payment in the past 12 months:

Nucor Corp.

NYSE Symbol NUE In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 9'89	1989					
57½	67½-44⅞	20	0.44	0.8%	B+	1.30

Summary

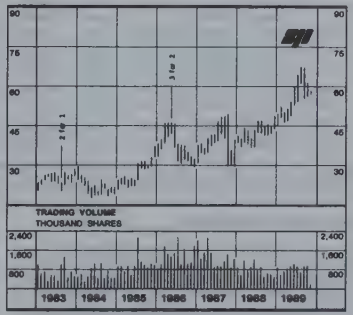
North America's third largest minimill steelmaker and the leading producer of steel joists, Nucor uses highly efficient electric arc furnaces, continuous casters and automated rolling mills. Nucor is in the process of expanding into the market for wide flange beams and sheet and strip steel. Earnings for the first nine months of 1989 were adversely affected by costs related to the start-up of a new plant and higher interest costs for NUE's ongoing expansion. Increased sales, higher margins and lower interest costs should permit higher earnings in 1990.

Current Outlook

Earnings for 1990 are projected at $3.50 a share, versus the $2.50 estimated for 1989.

The $0.11 quarterly dividend may be increased in 1990.

Sales growth for 1990 is expected to match that of 1989, as contributions from Nucor-Yamato and NUE's 800,000 ton-per-year mill to produce hot and cold rolled sheet at Crawfordsville cushion a likely drop in deck, joist and steel sales. Margins should improve, as lower raw material costs and the abatement of start-up costs offset some probable weakness in product prices. Aided further by a decline in interest expense and a level tax rate, earnings should rise. Longer-term prospects are enhanced by NUE's expansion into markets for wide flange beams and sheet and strip steel products.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	310	245	187	189

Dec.	E0.49	0.84	0.62	0.38
	E2.50	3.34	2.39	2.17

Important Developments

Oct. '89— NUE reported a 38% decline in share earnings on a 14% rise in sales for 1989's second quarter. It said that earnings for 1989's first nine months and third quarter were adversely affected by significantly higher pre-operating and start-up costs for new facilities. The cost increases lowered comparative net earnings per share by more than $0.65 in the nine months of 1989, and by more than $0.05 in the third quarter. NUE said that the start-up at the new 800,000 ton-per-year steel mill to produce hot and cold rolled sheet steel, near Crawfordsville, Ind., was proceeding satisfactorily.

Nov. '88— NUE announced that it had completed the sale of its Research Chemicals operation to Rhone-Poulenc and that it had realized a net gain of $38.6 million on the sale.

Next earnings report expected in early February.

Data as orig. reptd.

Business Summary

Nucor is primarily a producer of steel and steel products, including hot-rolled and cold-finished steel shapes, steel joists and girders, wide flange beams, heavy structural steel products, steel deck and steel grinding balls.

Annual production capacity (including the newly constructed 650,000 tons-per-year steel mill in Blytheville, Ark.) totaled about 2,800,000 tons in 1988. Production in 1988 totaled 2,095,000 tons, versus 1,790,000 tons in 1987. Approximately 30% of 1988 production was consumed internally.

Four Nucor steel mills produce bar, light structural carbon and alloy steels. Operations are located in South Carolina, Nebraska, Texas, and Utah and consist of highly efficient electric arc furnaces, continuous casters and automated rolling mills. The primary raw material is scrap steel. Steel sales in 1988 totaled 1,437,000 tons, up from 1,313,000 tons in 1987.

Six Vulcraft plants produce steel joists, joist girders and steel deck for nonresidential construction markets. Sales of joists in 1988 were unchanged from 1987's 444,000 tons. Steel deck sales decreased to 147,000 tons in 1988 from 154,000 tons in 1987.

Two divisions produce cold finished steel products. Sales of cold finished steel products totaled 155,000 tons in 1988, up from 133,000 tons in 1987.

Through Nucor-Yamato Steel, a joint venture which is 51% owned by Nucor, NUE produces produces wide flange beams and heavy structural steel products. The new 650,000 tons-per-year mill began operations in the second half of 1988 and was operating at 50% capacity at the end of 1988.

Dividend Data

Cash dividends have been paid since 1973. A dividend reinvestment plan is available.

Summary

NYNEX operates the U.S.'s third largest local exchange telephone business, serving the majority of telephone customers in New York State and the New England states (over 50% in the New York City and Boston areas). Long-term growth prospects are enhanced by unregulated businesses. Earnings for the first nine months of 1989 were adversely affected by a slowdown in the financial services industry in New York, increased competition, and a strike by some 60,000 union employees.

Current Outlook

Earnings for 1990 are tentatively placed at $6.30 a share, versus the $5.75 estimated for 1989.

The $1.09 quarterly dividend may be raised a modest amount in early 1990.

Telephone revenues should increase moderately in 1990, reflecting growth in access lines and greater network usage; some rate relief is also anticipated. Telephone operating expenses are likely to rise, holding any increase in telephone profits to a modest amount. Earnings from unregulated units should increase, reflecting continued rapid growth from cellular units and improved profits from NYN's Business Center stores.

Important Developments

Oct. '89— NYN said that a continuing strike by some 60,000 employees had negatively affected the installation of access lines during the 1989 third quarter; access lines decreased 18,000 during the period. The strike resulted in delays for installation, repair and directory assistance services. The deviation from past earnings growth rates was attributed largely to lower earnings at New York Telephone, which was being affected by softness in the New York City area economy and intensifying competition. Earlier, New York Telephone requested a $359 million rate increase, effective January 1, 1990, which would offset the elimination of previously authorized charges for inside wire and other telephone equipment. Furthermore, New York Telephone was seeking a new five-year regulatory plan and an additional $520 million rate increase effective January 1, 1991.

Next earnings report expected in late January.

Business Summary

NYNEX is the third largest telephone holding company in the U.S., based on 1988 revenues. The company's telephone subsidiaries, New York Telephone and New England Telephone & Telegraph, are engaged in the furnishing of exchange telecommunications and access service in New York, Maine, Connecticut, Massachusetts, New Hampshire, Rhode Island, and Vermont for approximately 15.0 million customer access lines. NYN's telephone subsidiaries accounted for approximately 86% of its operating revenues in 1988.

The company provides cellular mobile communications services through subsidiaries of NYNEX Mobile, either directly or through partnerships, within the company's service areas in the Northeastern U.S. As of year end 1988, NYN was serving some 127,000 cellular customers, up 70% from a year earlier. NYNEX Business Systems sells a wide range of telecommunications, information and other business products through more than 80 NYNEX Business Centers and a direct sales force.

NYNEX Enterprises undertakes various procurement support activities, such as product evaluation, contracting, materials management and disposition, warehousing, transportation, and equipment repairs for NYNEX and its subsidiaries. NYNEX Service provides staff support services. NYNEX Information Resources publishes directories and provides nontraditional directory services. Other subsidiaries provide credit financing, real estate consulting and management, and international marketing and consulting services.

The company jointly owns, with the six other regional holding companies, Bell Communications Research, which provides technical assistance and consulting services to the companies.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Finances

Capital expenditures amounted to $2.8 billion in 1988, an increase of 9.1% from 1987, and were expected to remain at a comparable level in 1989 During 1988 NYN purchased 4.7 million shares of its common stock (2.9 million shares were purchased in 1987) at a cost of $302 million ($194 million).

To comply with the 1982 concent decree with the DOJ, AT&T on January 1, 1984 spun off its 22 Bell operating companies in the form of seven regional holding companies, one of them being NYNEX.

NYSE Symbol OXY Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 2'89	1989					
27⅞	30½-25⅛	33	2.50	9.0%	B-	0.81

Summary

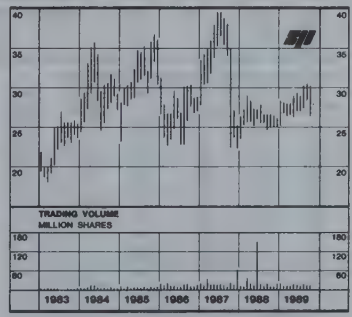
Occidental Petroleum is a worldwide energy exploration and production company with substantial interests in chemicals. OXY has diversified into natural gas transmission, beef processing and coal mining. Oil and gas operations have been impaired by production interruptions in the North Sea, but chemical earnings are benefiting from the May, 1988 acquisition of Cain Chemical Inc. Asset restructurings throughout the corporation can be expected in order to support the common dividend.

Current Outlook

Share earnings for 1990 are estimated at $1.45, versus the $1.25 projected for 1989.

The $0.62½ quarterly dividend is likely to be maintained.

Revenues in 1990 may show some modest improvement owing to higher natural gas prices, increased gas production, and a phased resumption of North Sea production. Potential asset divestitures could be used to pay down debt. Profit comparisons should benefit from improved prospects in the gas sector.



Operating Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	5.14	4.48	4.16	3.83
Jun.	5.05	4.74	4.33	3.83
Sep.	4.83	4.91	4.22	3.72
Dec.	---	5.28	4.39	4.17
	---	19.42	17.10	15.34

Revenues for the nine months ended September 30, 1989 rose 6.3%, year to year. As a result of lower crude oil production in the North Sea, offset in part by the inclusion of Cain Chemical, income from operations declined 2.2%. Following a sharp increase in unallocated corporate charges, net income fell 26%, to $0.82 a share on 15% more shares from $1.28. Earnings exclude an extraordinary gain of $0.11 a share in the 1989 period, versus an extraordinary loss of $0.05 a year earlier.

Dec.	E0.43	0.02	0.10	0.05
	E1.25	1.26	0.78	0.66

Important Developments

Oct. '89— Earnings of OXY's oil and gas division for the first nine months of 1989 fell to $78 million from $253 million a year earlier, reflecting sharply lower crude oil production and a $22 million restructuring charge in domestic oil and gas operations. The natural gas transmission unit recorded earnings of $116 million in the 1989 period, versus $169 million in the 1988 interim, as pricing failed to adequately cover rising costs. Earnings in the chemical sector were $842 million, compared with $622 million a year earlier, reflecting the May, 1988 acquisition of Cain Chemical. Earnings of the company's 51% owned IBP, inc. unit of $56 million, down from $67 million, were limited by lower margins and reduced volumes in beef operations. Coal division earnings were impaired by work stoppages.

Next earnings report expected in late January.

Business Summary

OXY is a diversified energy and chemical company with worldwide oil and gas operations.

Net Income (Million $)	1988	1987
Oil & gas	$210	$276
MidCon	176	245
Chemicals	878	322
Agribusiness	103	85
Coal	14	11

In 1988 production totaled 85 million barrels of oil and 308 Bcf of natural gas. Proved reserves at 1988 year-end stood at 723 million barrels of oil and 2,920 Bcf of natural gas. On July 6, 1988 an explosion destroyed the OXY's 36.5% owned Piper Alpha platform. Daily production from the Piper field through the first six months of 1988 consisted of 132,600 barrels of oil, 15 million cf of natural gas, and 6,100 barrels of natural gas liquids. Production at the Piper Alpha platform may resume in 1992. Production at the smaller tangential Claymore and Scapa combined platform resumed in July, 1989.

Subsidiary operations include Occidental Chemical Corp. which acquired Cain Chemical Inc. in May, 1988. MidCon Corp. is a a natural gas transmission company. The agribusiness sector consists of OXY's 51% interest in IBP, inc. a beef and pork processor. Island Creek Coal Corp. mines Eastern coal.

Dividend Data

Dividends were resumed in 1974. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

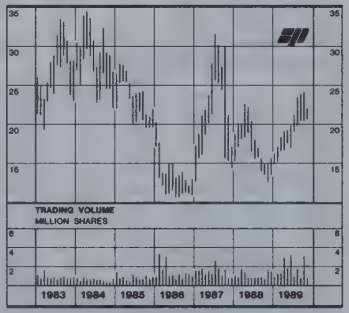
ODR (61%-owned by Murphy Oil) in October, 1989 announced a restructuring plan involving the divestiture of its unprofitable contract drilling business. A new ODR subsidiary consisting of the contract drilling business would make an initial public offering of 15% to 20% of its common stock. Subsequently (according to present plans) ODR would make an exchange offer of the contract drilling stock for a portion of ODR's outstanding shares. Upon completion of the offer, shares of the contract drilling unit still held by ODR would be distributed to remaining ODR stockholders on a pro rata basis.

Current Outlook

Share earnings for 1990 from continuing operations are projected at $0.75, versus 1989's estimated $0.65. Estimates for both years exclude the unprofitable contract drilling business.

The company has declared a quarterly $0.07½ dividend since early 1988. The dividend policy is reviewed quarterly.

Revenues in 1990 from continuing oil and gas production and diving operations are expected to benefit from a firming natural gas market. The oil and gas operations and diving business should be profitable.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	98	85	118
Jun.	[2]159	98	91	92
Sep.	77	95	110	83
Dec.	---	114	105	71
	---	406	390	364

Revenues from continuing operations for the nine months ended September 30, 1989 rose 12%, year to year, owing to sharply higher natural gas production. Higher crude oil prices, increased natural gas production, and firming diving operations led to net income of $26.2 million ($0.51 a share), versus $6.1 million ($0.12). Earnings exclude losses from the contract drilling business of $1.56 a share versus $0.80.

Important Developments

Oct. '89— ODR and Murphy Oil Corp., which owns about 61% of ODR, released a joint announcement that ODR's directors has decided to restructure the company by separating the unprofitable contract drilling business from the oil and gas and diving businesses. ODR will form a new subsidiary for the contract drilling business which would make an initial public offering of between 15% and 20% of its shares. ODR anticipates that during mid-1990 it will make an exchange offer of contract drilling common stock for a portion of the outstanding shares of ODR common Upon completion of the offer, shares of the contract drilling business then held by ODR would be distributed to remaining ODR stockholders on a pro rata basis. As a result of the planned restructuring, ODR began accounting for the contract drilling business as a discontinued operation in 1989's third quarter.

Next earnings report expected in early February.

Business Summary

Ocean Drilling & Exploration explores for and produces crude oil and natural gas, and has operated a large fleet of offshore drilling rigs. ODR also has interests in underwater diving. Segment contributions in 1988 (profits in million $):

	Revs.	Profits
Contract drilling	30%	-$40.9
Oil and gas	52%	64.0
Diving	18%	-1.3
Affiliated companies	---	-5.7

Excluding affiliated companies, 45% of revenues were generated outside the U.S.

Oil and gas exploration is conducted for ODR's own account mainly in the U.S., the United Kingdom and Gabon. Net crude and liquids production in 1988 averaged 20,015 b/d (44% in the U.K. and 38% in the U.S.), and 130,783 Mcf of gas (nearly all U.S.). Crude and liquids reserves at 1988 year-end were 31.8 million bbls.; gas reserves totaled 331.3 billion cubic feet.

Offshore contract drilling services have been conducted around the world with a fleet of 38 versatile drilling units, consisting of 20 semisubmersibles, 15 jackups, two drillships, and one submersible. Rig utilization in 1988 was 62%, versus 50% in 1987 and 39% in 1986.

Long term debt at 1988 year-end included $80.1 million of the obligation to pay certain banks which had issued letters of credit on behalf of Mentor Insurance Ltd., a bankrupt insurance subsidiary. In March, 1986 the liquidators of MIL filed suit asserting various claims against ODR. ODR has not recognized any liability or loss that may result. Auditors noted in their opinion on ODR's financial statements uncertainties associated with the litigation.

Dividend Data

Dividends were resumed in early 1988 after having been omitted in mid-1986. The dividend policy is to be reviewed on a quarterly basis.

Summary

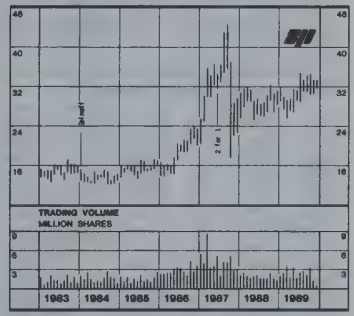
Ogden designs, builds and operates solid-waste resource recovery plants, and engages in diverse service management businesses which serve the building, aviation, food, entertainment and energy industries. OG also provides financial services and recently entered the hazardous waste incineration business. Good earnings growth is expected to continue in 1990, reflecting greater resource recovery construction activity and strength in building and aviation services.

Current Outlook

Earnings for 1990 may rise to $2.00 a share from the $1.75 (including nonrecurring gains) estimated for 1989.

An increase in the $0.31¼ quarterly dividend is possible in early 1990.

Revenues for 1990 are anticipated to advance about 20%. The Operating Services group will continue to benefit from good growth in building services and aviation services, aided by new contracts. Contributions from asbestos abatement should improve strongly. Good gains are seen for Project Services, reflecting greater resource recovery construction activity and higher profits from Environmental Services. Results should benefit from an improved product mix and greater profit contributions from Financial Services. The tax rate should be about 27%. Long-term prospects are enhanced by the strong growth prospects seen for the waste-to-energy and toxic waste processing industries.



Sales & Oper. Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	279	231	203

Important Developments

Nov. '89— The company said that it was considering a spinoff of its Ogden Allied Services unit. OG also noted that it planned to reduce its ownership in its Ogden Projects subsidiary to 80% in 1990 through two separate offerings.

Oct. '89— Ogden entered into an agreement to acquire ERC International Inc. for about 2,359,000 common shares. The company said that ERC's technical and professional services activities would significantly enhance Ogden Allied Services' diversified support services operations and would further the group's program to provide professional services in the high technology field. The transaction was expected to become effective following ERC shareholder approval in January 1990.

Next earnings report expected in early February.

Business Summary

Ogden Corp. is one of the largest and most comprehensive service management organizations in the world. It also builds and operates mass burn resource recovery facilities and has financial and hazardous waste units. Contributions by segment in 1988:

	Revs.	Profits
Operating services	86%	82%
Project services	13%	16%
Environmental services	1%	Nil
Financial services	---	22%

Ogden Allied Services Corp. offers building, aviation, leisure, industrial, human and asbestos abatement services. Customers include airlines, banks, owners and tenants of office buildings, sports arenas and other large industrial organizations.

Ogden Projects (OPI; 92% owned) builds and operates solid-waste resource-recovery plants utilizing the mass-burn technology of Martin GmbH of West Germany. At November 22, 1989 OPI had 26 Martin projects (including 13 fully operational and seven under construction) with a value about $3.5 billion. OPI also owns Ogden Environmental Services (formed in 1986), which builds and operates modular facilities to incinerate nonradioactive hazardous waste using circulating bed combustion technology.

Summary

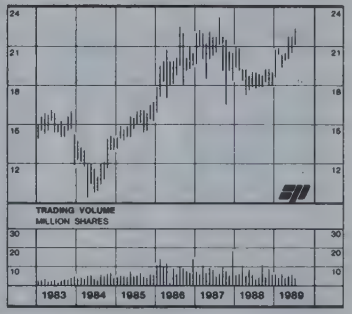
This electric utility, serving Ohio and western Pennsylvania, has diversified its fuel sources with substantial investments in the Perry nuclear facility and the Beaver Valley 2 nuclear plant. In 1989's third quarter, the company will be initiating a rate request that will complete the recovery of OEC's nuclear investments. A decision is expected by the end of 1990's second quarter. The longer-term outlook is enhanced by the completed construction program and materially improved cash flow.

Current Outlook

Share earnings for 1989 are projected at $2.30, up from 1988's $1.22, which included an $0.84 write-off of nuclear plant costs. Share earnings for 1990 are estimated at $2.40.

Materially improved cash flow and a supportive regulatory outlook should enable OEC to maintain the $0.49 quarterly dividend.

Share earnings for 1989 will reflect the absence of the write-off of disallowed nuclear expenditures. Longer-term prospects are enhanced by the completed construction program and strong cash flow.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	547	527	446	462
Jun.	513	516	443	422
Sep.	---	567	473	434
Dec.	---	533	418	425
	---	2,143	1,780	1,742

Revenues for the 12 months ended June 30, 1989 rose 12%, year to year, due to higher rates related to the Perry 1 nuclear plant. After a less rapid increase in fuel costs, operating income was up 32%. Following the write-off of disallowed nuclear expenditures, net income declined 31%. Share earnings were $1.36, versus $1.96.

Important Developments

Jun. '89— The company announced its intention to file on or about August 1, 1989 a rate case for recovery of its remaining nuclear investments. The company received an initial rate order for the Perry 1 nuclear plant in January, 1988. OEC will be seeking a 7.5% increase effective July 1, 1990 and a 5.3% hike effective July 1, 1991, essentially for costs of the Beaver Valley 2 nuclear plant. As part of the August rate filing, OEC will be seeking to recover some $483.0 million of deferred costs for Beaver Valley 2 and also Perry 1. An order is expected by the end of 1990's second quarter. OEC reported that it has not reached a decision on the future of the mothballed Perry 2 nuclear plant in which it has invested some $397.0 million. A net charge would be $210.0 million, excluding taxes and salvage value.

Next earnings report expected in mid-October.

Business Summary

Ohio Edison and its wholly-owned subsidiary Pennsylvania Power Co. serve the highly industrialized areas of northern Ohio and western Pennsylvania. OEC is enhancing electric sales by an aggressive marketing program to other electric utilities. Electric revenue contributions:

Revenues	1988	1987	1986	1985
Residential	34%	35%	36%	35%
Commercial	25%	26%	26%	25%
Industrial	25%	26%	26%	28%
Other	16%	13%	12%	12%

Sources of electric generation in 1988 were 72% coal, 21% nuclear and 7% purchases. Peak demand was 5,027 mw and system capability totaled 6,405 mw, for a capacity margin of 22%. The company could be vulnerable to severe acid rain legislation. Current proposals are vague and OEC has not speculated on the potential finacial impact.

OEC has access to 35% of the Perry 1 nuclear station and 42% of the Beaver Valley 2 nuclear unit. In March, 1989 the PUC of Ohio issued an order that finalized the prudency disallowance for the two plants. As a result of the order, OEC's total write-off was $284.0 million (pretax). Share earnings for 1988 were restated to $1.22 from $2.06 because of the write-off. In their report on OEC's 1988 financial statements auditors noted the existence of uncertainties associated with the nuclear construction program.

Dividend Data

Dividends have been paid since 1930. A dividend reinvestment plan is available.

Dec. 11'89	1989					
37¾	38¼-32	13	2.38	6.3%	A-	0.32

Summary

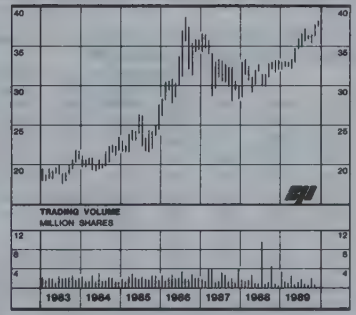
This electric utility, which serves a large portion of Oklahoma, including Oklahoma City, and western Arkansas, derives slightly more than half its power from coal and the remainder from gas following the addition of coal-fired plant in mid-1984. No new base load capacity additions are planned before the year 2000. Modestly higher earnings are expected for 1990, reflecting more normal weather and slightly higher electric rates.

Current Outlook

Earnings for 1990 could reach $3.25 a share, up from the $3.15 likely for 1989.

Dividends at $0.59½ quarterly are the minimum expectation.

A modest earnings increase is anticipated for 1990, reflecting a variety of factors, including a return to more normal weather conditions, the absence of certain costs associated with overhaul of production facilities, an increase in electric customers and modestly higher electric rates. A stock repurchase plan could bolster earnings per share comparisons.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	235	238	224	239
Jun.	270	269	266	243
Sep.	357	359	350	362
Dec.	---	233	225	246
	---	1,098	1,065	1,091

Operating revenues for the nine months ended September 30, 1989 fell 0.4%, year to year, reflecting unseasonably cool weather in the second and third quarters of 1989. Operating expenses were up 1.7% due to increases in scheduled overhauls and routine maintenance. Net income declined 12%. Share earnings were $2.52 on 1.0% fewer shares, versus $2.83.

Dec.	E0.62	0.37	0.59	0.55
	E3.15	3.20	2.60	2.75

Important Developments

Dec. '89— The company said that through November it had repurchased 1,186,000 shares of its common stock under a program to buy back up to two million shares in 1989.

Nov. '89— The company said that despite the adverse effects of unfavorable weather conditions, it remained optimistic that total 1989 revenues would meet or exceed last year's revenues. Management cited several factors in support of its belief: first of all, increases in natural gas sales by the Enogex unit; secondly, an increase in sales for resale; thirdly, a slight increase in electric customers; fourthly, consistent growth in industrial kwh sales; and lastly, a $7.0 million increase in electric rates due to the expiration of a temporary rate reduction.

Next earnings report expected in early February.

Business Summary

Oklahoma Gas and Electric supplies electricity to a population of about 1,600,000 in Oklahoma and western Arkansas, deriving about 90% of 1988 revenues from the former state. The Enogex Inc. subsidiary owns and operates a gas pipeline system and five gas processing plants. Contributions to total revenues by class of customers:

Revenues	1988	1987	1986	1985
Residential	36%	37%	37%	36%
Commercial	23%	23%	24%	23%
Industrial	20%	21%	22%	22%
Other	21%	19%	17%	19%

The fuel mix in 1988 was 45% natural gas and 55% coal. A mix of 41% natural gas and 59% coal was expected by 1993. Peak load in 1988 was 4,690 mw and capacity at time of peak was 5,703 mw, for a capacity margin of 17.8%.

With the commercial operation of the 515-mw, coal-fired Muskogee Unit 6 in 1984, OGE completed its base load construction for this century. In lieu of base load plants, OGE intends to meet its power needs through purchased power and small peaking units in the 100mw-200mw size range.

Dividend Data

Dividends have been paid since 1908. A dividend reinvestment plan is available.

Summary

Headquartered in Grand Rapids, this multibank holding company owns 17 banks in Michigan and five in Illinois with over 190 banking offices. Recent results benefited from loan growth and higher interest rates. The dividend was increased 15% in late 1989.

Business Summary

Old Kent Financial Corporation is a multibank holding company headquartered in Grand Rapids, Mich. As of November 10, 1989, the company had 22 affiliate banks with nearly 200 banking offices serving more than 100 Michigan and Illinois communities. The largest affiliate bank is Old Kent Bank & Trust Co. (Grand Rapids), with assets of $3.26 billion at 1988 year-end. Other subsidiaries ranged in size from $717 million in assets to $14 million.

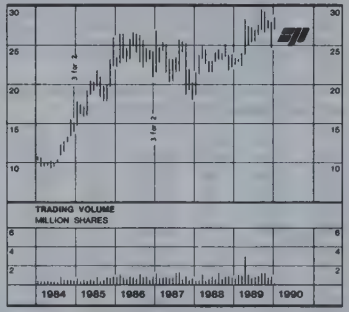
Loans outstanding totaled $4.69 billion at the end of 1988 and were divided:

Commercial	37%
Consumer	20%
Real estate	43%

The allowance for loan losses totaled $57,296,000 (1.22% of loans outstanding) at the end of 1988, compared with $49,063,000 (1.18%) a year earlier. Net loan chargeoffs in 1988 amounted to $9,133,000 (0.21% of average loans), versus $14,767,000 (0.41%) in 1987. As of December 31, 1988, nonperforming loans (including nonaccrual loans, accruing loans past due 90 days or more, and restructured loans) aggregated $50,372,000 (1.07%) of loans outstanding, compared with $47,198,000 (1.13%) a year earlier.

Deposits averaged $6.09 billion in 1988 and were apportioned: 38% savings, 12% negotiable time, 2% foreign time, 32% other time and 16% demand. Interest and fees on loans provided 64% of total income for 1988, interest on investment securities 18%, interest on deposits 7%, other interest income 1%, trust income 4%, service charges on deposit accounts 3% and other noninterest income 3%.

On a tax-equivalent basis, the average yield on total earning assets was 9.78% in 1988 (9.55% in 1987), while the average rate paid on interest-bearing liabilities was 6.53% (6.18%), for a net spread of 3.25% (3.37%).



Important Developments

Jan. '90— The company said it would redeem all outstanding shares of its Series A 14% cumulative convertible voting preferred stock on April 1, 1990, at $13.30 a share (see Capitalization).

Nov. '89— The company said it completed the sale of two north-central Illinois subsidiaries, Colonial Trust & Savings Bank and Illinois Regional Bank (combined assets of $65 million), for $5.75 million.

Jul. '89— Based on a study performed by Olson Research Associates in the July 1989 issue of the United States Banker magazine, Old Kent was named the top bank holding company in the nation. The rankings are based on a complex formula involving 125 financial ratios that evaluate each holding company's profitability, safety, soundness and ability to sustain a high level of earnings.

Next earnings report due in late January.

Review of Operations

Total interest income for the nine months ended September 30, 1989, advanced 22%, year to year, reflecting a higher interest rate environment and continued growth in earning assets. The higher rates led to a 31% jump in interest expense, and the gain in net interest income was limited to 9.7%. The provision for loan losses gained 20%. Following a 13% increase in noninterest income and a 6.1% rise in noninterest expense, pretax income was up 18%. After taxes at 27.5%, versus 25.1%, net income rose 14%, to $63,392,000 ($2.40 a share; $2.14 fully diluted), from $55,452,000 ($2.12; $1.89), as restated to reflect the October 1988 acquisition of Unibancorp on a pooling-of-interests basis.

Oct. 20'89	1989					
27¾	31⅝-18½	11	1.40	5.1%	B	1.11

Summary

This company operates a fully integrated intrastate gas utility and is also engaged in nonutility energy-related activities, including oil and gas exploration, natural gas liquids extraction, and contract drilling. In July, 1989 directors raised the quarterly dividend 17% and authorized the repurchase of about 1.4 million OKE common shares. In January, 1990 shareholders are expected to vote on proposals to increase the number of authorized shares and to effect a 2-for-1 stock split.

Current Outlook

Share earnings for the fiscal year ending August 31, 1990 are projected at $2.70, up from fiscal 1989's $2.58 (both unadjusted for proposed 2-for-1 split).

Dividends are expected to continue at $0.35 (unadjusted) quarterly.

Profits from utility operations in fiscal 1990 should increase slightly, assuming normal weather conditions and some residential customer additions; gas volumes sold and transported to industrial customers should increase partly due to increased movement by corporations of industrial operations into the state of Oklahoma. Profits from oil and gas exploration and production operations should rise slightly on higher average energy prices.

Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Nov.	128	111	143	173

May	143	134	124	166
Aug.	106	97	89	108
	618	571	587	737

Revenues for the fiscal year ended August 31, 1989 (preliminary) rose 8.2%, year to year. Benefiting from lower interest expense and the absence of a $1.57 a share writedown of certain assets, net income advanced to $36.6 million from $7.1 million. Share earnings were $2.58, versus $0.48 (both unadjusted), which excludes a special credit of $1.03.

Important Developments

Sep. '89— OKE said that shareholders may be asked to vote at the January 18, 1990 meeting on proposals to increase the number of authorized shares from 20 million to 60 million and to declare a 2-for-1 stock split. In July directors raised the quarterly dividend 17%, to $0.35 from $0.30, effective with the August, 1989 payment, and authorized the company to repurchase about 1.4 million shares of its outstanding common stock.

Jun. '89— OKE sold its Thermal Systems Inc. unit to Trigen Energy Co.; the unit sells steam and chilled water, and operates a food warehouse.

Apr. '89— The Oklahoma Department of Commerce said more than $700 million of investment in new and expanding industry was announced in the state during the last year, which will create over 10,000 new jobs during the next few years.

Next earnings report expected in early January.

Business Summary

ONEOK, Inc. (formerly Oklahoma Natural Gas) is a diversified energy company engaged in natural gas utility operations in Oklahoma and nonutility energy-related activities, including oil and gas exploration and production. Segment data (profits in million $):

Fiscal 1988	Revs.	Profits
Gas utility	86%	$86.4
Oil and gas production	5%	-20.9
Gas liquids extractions	7%	- 1.2
Contract drilling	1%	-17.0
Other	1%	- 0.3

Gas utility operations are conducted principally by Oklahoma Natural Gas Co., which distributes gas to about 629,000 customers in 225 communities in Oklahoma, with Oklahoma City and Tulsa the largest markets, and at wholesale to other distributors serving 41 Oklahoma communities. Gas sales volume in fiscal 1988 totaled 113.5 Bcf, compared with 106.7 Bcf a year earlier.

The ONEOK Exploration Co. and ONEOK Resources Co. subsidiaries are engaged in oil and gas exploration, development and production. At fiscal 1988 year-end proved reserves amounted to 98.7 Bcf of gas and 2.5 million barrels of oil. Other nonutility operations include extraction and sale of natural gas liquids and contract drilling of oil and gas wells.

The company planned to file for the recovery of take-or-pay costs in future rate proceedings.

Dividend Data

Common dividends, omitted in March, 1988, were resumed in 1989 as follows. A "poison pill" stock purchase right was adopted in 1988.

Dec. 12'89	1989					
28⅜	30-13	18	None	None	B	0.79

Summary

This company designs and manufactures precision optical components and systems for medical, industrial and scientific applications. Earnings rose strongly in fiscal 1989, and continued to climb in the first quarter of fiscal 1990, benefiting from stong operating results in most of the company's product areas.

Business Summary

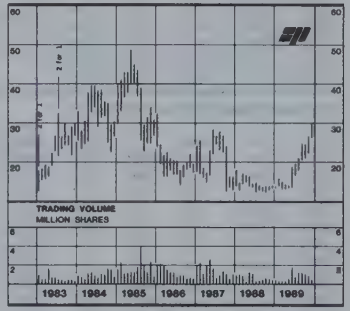
Optical Radiation Corporation manufactures optical products of two principal types—ophthalmic and industrial/scientific. Contributions to sales in recent fiscal years were:

	1989	1988	1987
Vision care	80%	81%	79%
Scientific/industrial	20%	19%	21%

Ophthalmic products offered by the Optical Components segment include the ORCOLITE line of hard-resin, bifocal and trifocal lens blanks, which are used by optical laboratories to produce finished prescriptions, and an abrasion-resistant lens coating. The group also develops specialized ophthalmic and related products for the scientific, military and optical laboratory markets. During 1989, Optical introduced a line of polycarbonate "finished" single vision lenses that eliminate conventional grinding and polishing.

The Omega Group subsidiary is the world's largest independent processor of eyeglass lenses. Omega also provides a wide range of optical laboratory products and services, contact lenses, national-branded frames and eyewear, optical equipment and related accessories.

Ophthalmic products in the vision care segment include newly developed models of intraocular lenses (IOLs), which are used to restore substantial vision for patients who have lost the natural lens of the eye as a result of cataract surgery. The IOL is surgically implanted after the cataract is removed. The line includes ultraviolet-blocking IOLs, which give the company a leadership position in the IOL market. In fiscal 1985, Optical Radiation developed LiteStyle eyeglass lenses, which are more scratch-resistant than plastic, can be up to 20% thinner than plastic and require 10 times the energy to break the glass. In April 1989, the company received FDA approval to initiate a 600 person clinical study of Orcolon, a new ophthalmic surgery product; premarket approval is expected in late fiscal 1990. Approval was also received to commence human trials on Memory Lens; the lens, made from a new, patented material, could represent a major advance for small incision IOL implants.



Industrial and scientific products include a line of custom-designed and standardized photo exposure systems sold to electronic component manufacturers to produce multilayer circuit boards and microcircuits; theatrical and audio-visual equipment; and xenon and mercury-xenon lamps and electroforming technology used within the company and in a number of aerospace, defense, electronic and medical instrument applications. In late fiscal 1989, the company discontinued operations of its Visionetics Corp. unit (see Finances).

Important Developments

Sep. '89— Optical Radiation and Eastman Kodak Co. said they had developed a process through which a digital optical sound track can be printed directly onto motion picture film. The product will be marketed in early 1990 as Cinema Digital Sound.

Next earnings report expected in mid-February.

Jul.		30.18	27.24	26.70
		109.57	101.50	100.69

Net sales for the three months ended October 28, 1989, advanced 13%, year to year, reflecting gains in both the vision care and scientific/industrial products areas, as well as significant growth in consumer optical products. Costs and expenses rose less rapidly, and pretax income climbed 50%. After taxes at 27.0%, versus 25.1%, income from continuing operations was up 46%, to $2,727,000 ($0.42 a share, on 6.9% fewer shares), from $1,866,000 ($0.27). Results exclude a loss of $0.05 a share from discontinued operations in the 1988 interim.

Dividend Data

No cash has been paid.

Finances

During fiscal 1989, Optical Radiation discontinued its Visionetics Corp. subsidiary, a Brookfield, Conn., manufacturer of automatic optical inspection equipment for the printed circuit board industry. As a result, the company recorded a charge of $3,508,000 ($0.52) to close the operations, and a charge of $1,572,000 ($0.24) to reflect the unit's loss for the year.

Over the past three fiscal years, the company has repurchased more than 1.9 million shares at a cost of $27.2 million.

In May 1989, Optical Radiation placed a $15 million mortgage on most of its Azusa, Calif., complex, replacing other mortgages aggregating $2.3 million. Net proceeds of $12.6 million were earmarked for general corporate purposes, which could include additional stock repurchases, depending on market conditions.

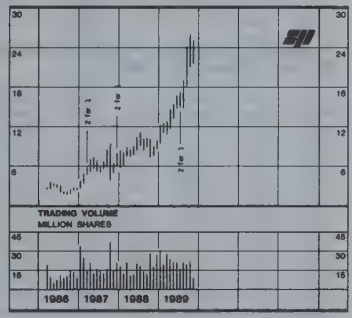
Summary

Oracle supplies computer software products used for database management, applications development and decision support, as well as end user and other applications. Significant earnings growth has been achieved, aided by strong worldwide demand for the company's products, and further profitable growth is expected in the 1989-90 fiscal year. The shares were split two for one in mid-1989.

Earnings for the fiscal year ending May 31, 1990, are estimated at $1.00 a share, up from 1988-9's $0.61.

Initiation of cash dividends is not anticipated.

Revenues are expected to continue growing in excess of a 50% rate in the 1989-90 fiscal year, reflecting high demand for Oracle's relational database management system and related tools and applications, which run across a variety of hardware platforms. Margins may narrow somewhat, as the company invests heavily in sales and marketing and R&D programs, and further builds the infrastructure necessary to support its growth. The tax rate is expected to approximate 32%.



Operating Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	175.5	90.6	41.3	17.8
Nov.		123.7	60.3	28.4
Feb.		153.4	76.3	34.9
May		215.9	104.2	50.4
		583.7	282.1	131.3

Total operating revenues for the three months ended August 31, 1989, rose 94%, year to year, reflecting a doubling of license revenues and a 77% increase in service revenues. Margins narrowed slightly on high sales and marketing costs and R&D expenses, and following other expense versus other income (net), pretax income was up 63%. After taxes at 32.0%, against 33.0%, net income advanced 65%, to $11,679,000, from $7,067,000. Earnings per share were $0.09, compared with $0.05, as adjusted for the two-for-one stock split in mid-1989.

	E1.00	0.61	0.32	0.13

Important Developments

Jul. '89— ORCL announced a series of database server products for various operating systems and network environments. Earlier, the company began shipping Oracle for Macintosh, which transforms Apple Computer's Hypercard into a full-function SQL database and allows Macintosh, IBM PC, minicomputer and mainframe systems to share identical database information.

Next earnings report expected in late December.

Business Summary

Oracle Systems Corporation develops and markets computer software products used for database management, applications development, decision support, programmer tools, computer network communication, end user applications and office automation. The principal product is "Oracle," a relational database management system (DBMS). The company offers its products, along with related database design, applications consulting and support services worldwide.

Operating revenues in recent fiscal years were derived as follows:

	1988-9	1987-8
Domestic operations	51.7%	52.5%
Foreign distributors-		
Europe	0.9%	1.2%
Other	0.6%	1.3%
European operations	33.0%	35.0%
Other intl. operations	13.8%	10.0%

"Oracle" has the same user interface, the SQL command language, as IBM's relational DBMS products for its mainframe computers, SQL/DS and DB2. The software was designed and written to make it adaptable, or "portable," to most computer hardware and operating systems. In addition to IBM and other mainframes, "Oracle" currently runs on a broad range of minicomputers and microcomputers.

A variety of applications development "tools," which increase programmer productivity, are sold as add-ons to the "Oracle" DBMS. Oracle currently offers four decision support products: a spreadsheet interface to the database; Easy, a simple interface for the novice user; a reporting tool; and an add-in for Lotus 1-2-3. Office automation products for use with the "Oracle" DBMS include "Oracle Mail."

The company also offers an integrated family of end user financial applications including general ledger, purchasing, payables, assets, receivables and revenue accounting programs, and end user manufacturing applications. These application products use the "Oracle" DBMS and related development and decision support tools.

Dividend Data

No cash dividends have been paid. Two-for-one stock splits were effected in July 1989 and in March and December 1987.

Finances

R & D expenditures totaled $52,570,000 (9.0%) of operating revenues in 1988-9, compared with $25,708,000 (9.1%) the year before.

Capitalization

Long Term Liabilities: $37,746,000 (8/89).

Common Stock: 127,774,713 shs. ($0.01 par).
Lawrence J. Ellison & Robert N. Miner beneficially own some 27% & 10%, respectively.
Shareholders: 1,457 of record (5/89).

Orange & Rockland Utilities

NYSE Symbol ORU

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 22'89	1989					
29½	30⅞-27¼	10	2.30	7.8%	A	0.32

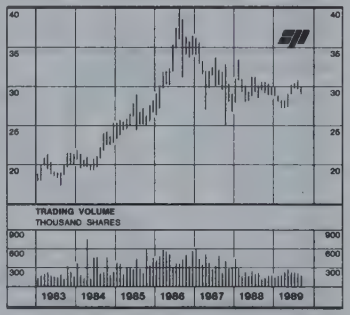
Summary

This electric-gas utility serves a 1,350-square-mile area in southeastern New York State, northern New Jersey, and northeastern Pennsylvania. The company has no nuclear plant capacity and does not anticipate construction of additional capacity for the foreseeable future. Nonregulated subsidiaries are engaged in natural gas marketing, land development, and radio broadcasting.

Business Summary

Orange & Rockland Utilities, through its subsidiaries (Rockland Electric Co. in New Jersey and Pike County Light & Power Co. in Pennsylvania) supplies electric service to about 241,000 customers and gas service to about 102,000 customers in a 1,350 square-mile area on the northern fringe of New York City including part of southeastern New York, northern New Jersey, and northeastern Pennsylvania. Electric revenues accounted for 78% of revenues and 90% of operating income in 1988, and gas for 22% and 10%, respectively. Contributions to electric business by class of customers:

Revenues	1988	1987	1986	1985
Residential	43%	42%	42%	39%
Commercial	26%	26%	27%	26%
Industrial	26%	25%	25%	24%
Other	5%	6%	6%	11%



The fuel mix in 1988 was oil 26%, natural gas 24%, coal 24%, purchased power 22%, and hydro 4%. The company expects purchased energy to continue to grow as a percentage of total system output. Peak load in 1988 was 971 mw and net capability at time of peak was 1,020 mw, for a capacity margin of 4.8%. Average residential rates were 10.90c per kwh (10.50c in 1987), and average annual usage 7,079 kwh (6,703).

During 1988 ORU sold 21,976 Mmcf of natural gas, versus 19,840 Mmcf in 1987. At December 31, 1988 the gas distribution system included 1,554 miles of mains. The company purchases over 90% of its firm contract demand natural gas from Tennessee Gas Pipeline Co. and Columbia Gas Transmission Corp.

In June, 1989 ORU estimated construction expenditures for 1989-93 at $269.5 million, including $49.2 million for 1989. No new generating capacity additions are anticipated for the foreseeable future. The company expects to finance such expenditures with internally generated funds and equity financing. Future growth in demand for electricity is expected to be met by purchased power (including Canada), by cogeneration, and by demand-side management (conservation programs).

Nonutility subsidiaries are engaged in natural gas marketing, oil and gas production, land development and the operation of several radio stations.

Important Developments

Aug. '89— ORU filed an application with the New York Public Service Commission for a 7.4% or $22.5 million electric base rate increase. If approved, the new rates would go into effect in July, 1990. Management said that the request was made to recover projected costs in a number of areas, and increase ORU's return on equity to 13.96% from 12.5%.

Next earnings report expected in late October.

Dec.		125.9	111.1	118.8
		486.7	451.3	474.7

Operating revenues for the six months ended June 30, 1989 rose 13%, year to year, reflecting higher fuel cost recoveries and increased electric sales. Following increases in the cost of fuel used for electric production and the cost of gas purchased for resale, operating income fell 4.2%. After higher interest charges, net income declined 14%. Following preferred dividends, share earnings were $1.25, versus $1.49.

Finances

On September 7, 1989 the New York Public Service Commission approved the company's petition to issue up to $80 million of first mortgage bonds, which ORU will offer in one or more series when appropriate market conditions prevail. Proceeds would primarily be used to reduce outstanding short-term debt.

Dividend Data

Dividends have been paid since 1908. A dividend reinvestment plan is available.

Nov. 2'89	1989					
36¼	42-25½	91	1.20	3.3%	NR	NA

Summary

Oryx Energy is the largest independent oil and gas company in North America. Formerly Sun Exploration and Production, the company was renamed Oryx Energy in May, 1989 following its divestiture from Sun Co. in November, 1988. In September, 1989 ORX announced an agreement to acquire substantial oil and gas properties from British Petroleum Co. in the North Sea and elsewhere. The acquisition, expected to be closed on January 1, 1990, positions ORX as a worldwide energy producer. The acquisition's debt service would restrict near-term earnings and may place the $0.30 quarterly dividend at some risk.

Current Outlook

Share earnings for 1990 are estimated at $0.30, down from the $0.45 projected for 1989.

The heavy financing costs associated with the purchase of the overseas oil and gas properties and the unfavorable payout ratio may place the $0.30 quarterly dividend at some risk.

Revenues for 1990 are expected to be up substantially over 1989 due to the planned production from the overseas oil and gas properties. Higher natural gas prices and increased gas volumes should aid operating margins. The debt service resulting from the acquisition would impair profitability.

Total Revenues (Million $)

Quarter:	1989	1988	[1]1987
Mar.	306	332	---
Jun.	304	332	---
Sep.	295	306	---
Dec.	---	316	---
	---	1,286	1,564

Revenues for the nine months ended September 30, 1989 declined 6.7%, year to year, reflecting lower crude oil volumes. Higher crude oil and natural gas prices, increased gas volumes, and the absence of the 1988 period's asset divestitures resulted in net income of $40 million ($0.38 a share, excluding an $0.80 special credit), in contrast to a net loss of $307 million ($2.91).

Important Developments

Sep. '89— ORX announced that it had agreed to acquire a portfolio of international oil and gas properties from BP Exploration for $1.31 billion, with closing scheduled for January 1, 1990. The acquisition will add 283 million equivalent barrels of proved reserves, mostly in the North Sea but also in Indonesia, Dubai, Ecuador, Colombia, Gabon and Italy. ORX said it expected these properties to produce about 34 million eqb in 1990, which would be a 40% increase over current U.S. production. ORX projected discretionary cash flow, before financing and exploration expenses, from the properties at about $250 million in 1990. The acquisition, which would be funded through debt, is expected to result in some earnings dilution. ORX would seek to reduce the debt through internal cash flow, asset sales and lower capital spending.

Next earnings report expected in late January.

Business Summary

Oryx Energy (formerly Sun Exploration and Production), together with its subsidiaries, acquires, explores for and develops, produces and markets crude oil and condensate, natural gas and natural gas liquids. The company was spun off by Sun Co. in November, 1988. Effective June 30, 1988 ORX adopted a plan to divest nonstrategic oil and gas assets. The provision for the asset divestitures was $395 million in 1988 ($260 million, net), $14 million in 1987 ($8 million, net) and $48 million in 1986 ($26 million, net).

The company is the managing general partner of 97.9%-owned Sun Energy Partners, L.P., which conducts the company's U.S. exploration and production business. In December, 1985 ORX conveyed to Sun Energy Partners, L.P. all of its U.S. oil and gas properties and other related assets in exchange for a 97.9% general partnership interest in the form of units of partnership interest. The remaining 2.1% interest was sold publicly.

Net production in 1988 was 125,700 barrels per day of crude oil and condensate, 23,800 barrels per day of processed natural gas liquids, and 674 Mcf per day of natural gas. At December 30, 1988 ORX had estimated net proved domestic reserves of 601 million barrels of crude oil, condensate and recoverable natural gas liquids and 2,242 Bcf of natural gas. At the end of 1988, the company held 4,300,000 gross (2,067,000 net) developed oil and gas acres and 5,197,000 gross (2,982,000 net) undeveloped acres.

During 1988 the company participated in the drilling of 10 net exploratory oil wells (16 in 1987), 17 exploratory gas wells (12) and 80 dry wells (99). In 1988 ORX replaced 97% of its reserves. In 1988 44% of the reserves added were gas, which resulted in an oil to gas reserve mix of about 60/40. By the mid-1990s the company's goal is to increase gas reserves so that the reserve mix would be closer to 50/50.

The average price received for crude oil production during 1988 was $13.78 per barrel, a 16% decrease from 1987's average price of $16.48. The average price received for natural gas production during 1988 was $1.64 per Mcf, up 10% from 1987's average price of $1.49. The company does not anticipate the price of oil to surge back to levels exceeding $30 a barrel, as in the early 1980s. By the mid-1990s ORX is projecting oil prices in the mid-$20 range. The company estimated that natural gas prices per Mcf would be valued at about 1/8 of crude oil prices per barrel.

Dividend Data

Dividends were initiated on a quarterly basis in 1988.

Summary

Founded in 1895 as a regional manufacturer of overalls, Oshkosh B'Gosh produces high-quality apparel for children, youth wear and men's and women's casual and workwear clothing. After declining substantially in 1988 because of production problems, shipping delays and order cancellations, earnings should rebound in 1989 and 1990 on a more-favorable product mix and more-efficient manufacturing operations.

Current Outlook

Earnings for 1990 could reach $2.65 a share, up from 1989's estimated $2.40.

The quarterly dividend on the Class A stock was increased 14%, to $0.08 a share, with the September 1989 payment.

Sales for 1990 should rise 8%-12%, reflecting continued demand for GOSHA's apparel resulting from favorable demographics, as well as international expansion and higher prices. Margins may continue to widen somewhat on a more-profitable product mix, streamlined production techniques and more-efficient shipping schedules.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	90.5	65.3	64.1	48.8
Jun.	53.3	51.1	45.2	38.8
Sep.	107.9	85.0	63.3	60.2
Dec.	---	51.6	53.7	50.4
	---	253.0	226.3	198.2

Net sales for the first nine months of 1989 rose 25%, year to year, reflecting increased unit shipments and higher prices. Margins widened substantially on manufacturing efficiencies and improved product pricing, and pretax income was up 72%. After taxes at 38.4%, versus 38.1%, net income rose 71%, to $29.3 million ($2.01 a share), from $17.1 million ($1.17).

Common Share Earnings ($)

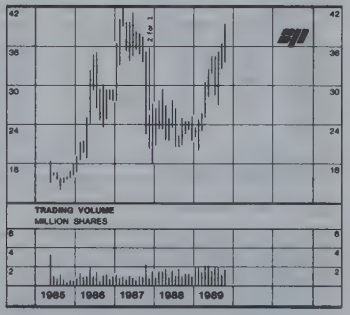
Dec.	E0.39	0.12	0.35	0.42
	E2.40	1.29	1.64	1.42



Important Developments

Oct. '89— GOSHA attributed the 27% year-to-year gain in sales for the third quarter of 1989 to strong demand for basic merchandise, coupled with earlier shipments of Holiday merchandise. The company said unit shipments were up 21%, year to year. Earnings improvement resulted from the increased unit sales, as well as improved gross margins.

Aug. '89— Increased net income on a year-to-year basis during the second quarter of 1989 was attributed to favorable pricing and manufacturing efficiencies, which included high plant utilization, relatively stable textile prices, sewing efficiencies from larger production runs and more-timely delivery of trim and material.

Next earnings report expected in February.

Business Summary

Oshkosh B'Gosh designs, manufactures and markets a broad range of children's clothing, as well as lines of youth wear and men's and women's casual and workwear clothing. Children's wear is for sizes up to seven; youth wear for sizes seven to 20; and men's and women's clothing are in adult sizes. Approximately 89% of 1988's sales were children's wear, versus 16% in 1979. The company's products are marketed primarily under its Oshkosh or Oshkosh B'Gosh labels.

Spring and fall are the primary selling seasons, accounting for 73% of 1988's sales. Product offerings for a season will typically consist of a variety of clothing items, including bib overalls, pants, jeans, shorts and shortalls, shirts, blouses and knit tops, skirts, jumpers, sweaters, jackets and coats, coveralls, children's playwear, work outerwear and miscellaneous accessories. Substantially all of the company's products are designed and sold as separates, versus ensembles.

The company's products are sold primarily through better-quality department and specialty stores, although sales are made also through direct-mail catalog companies, foreign retailers and other outlets, including 13 company-operated retail stores.

In 1988, the company made 67% of its products at its own 16 manufacturing facilities. The remaining 33% was produced by independent contractors.

As of December 31, 1988, the company had $93 million of booked orders, versus $72 million a year earlier. Products generally are shipped three to six months after booking.

Dividend Data

Prior to its 1985 recapitalization, the company paid some cash on its old common shares in each year since 1936. Currently, when any cash payment is made on the Class B, a dividend equal to 115% of such amount per share must be paid on the Class A stock.

Nov. 27'89	1989					
26⅜	46-25	24	0.80	3.0%	B+	1.29

Summary

This company is a leading maker of outboard motors, and has acquired 10 boat businesses since September, 1986. OM recently sold its non-marine operations, which include include power mowers and turf care equipment. OM's earnings from continuing operations are expected to rebound in fiscal 1990, but still be far short of the record level achieved in fiscal 1988.

Current Outlook

Earnings from continuing operations for the fiscal year ending September 30, 1990 are estimated at $1.80 a share, up from fiscal 1989's $1.09.

The dividend may remain at $0.20 quarterly.

Earnings in fiscal 1990 are likely to be restrained by a relatively slow-growth economic environment. However, profitability may be helped by the absence of unusual charges and improved results from some of OM's newer boat businesses. Demographics of the U.S. population are favorable for long-term growth of the marine industry, but in times of consumer caution, purchases may be deferred.

	E1.80	1.09	3.74	2.56

Important Developments

Nov. '89— In fiscal 1989's fourth quarter OM's earnings from continuing operations were hurt by a $0.25 a share charge related to the closing of manufacturing operations in Canada and the transferral of work to other facilities; and a $0.33 a share charge related to a factory recall program for stern drive engines. Also, OM's net sales from continuing operations, which now include only marine-related businesses, were down 9.0%, year to year; U.S. sales declined 15%, while international sales were up 14%. OM said that an industrywide decline for U.S. marine products had begun in the spring of 1989 and had continued into the fall. Certain of OM's expense levels, including marketing costs, were geared toward higher sales goals, and this likely contributed to the lower earnings.

Next earnings report expected in late January.

Business Summary

Outboard Marine is a major manufacturer of marine products, including outboard motors, stern-drive engines and boats. Since late 1986, OM has acquired 10 boat manufacturers. OM was also a manufacturer of power lawn mowers and light industrial vehicles, but these businesses were recently sold (see Finances). Sales contributions by business segment in recent fiscal years (including businesses that have since been sold):

	1988	1987
Marine products	85%	85%
Lawn-Boy & related products	10%	9%
Vehicles & turf care	5%	6%

Marine products include Johnson Evinrude outboard motors. Cobra stern drives, Sea Drive marine power systems, plus a variety of replacement parts and accessory items. Boat businesses acquired by OM since December, 1986 include Bramco, Inc., Sunbird Boat Co., Stratos Boat Co., Carl A. Lowe Industries, Inc., Four Winns, Inc., Sea Nymph, Inc., Hydra-Sports Corp., RYDS Batindustri AB, Donzi Marine Corp., and Chris-Craft.

Dividend Data

Dividends have been paid since 1937. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Finances

In 1989, OM sold its non-marine businesses, which included Cushman vehicles and Lawn-Boy power mowers, for a total of $335 million, subject to adjustment. In fiscal 1989's fourth quarter OM recognized a net gain from the transactions of $3.00 a share. These businesses had sales in fiscal 1989 of $214 million.

Capitalization

Sep. 29'89	1989					
11½	15⅞-11¼	18	0.26	2.3%	A	1.20

Summary

This company distributes medical and surgical supplies, pharmaceuticals and related products. It also packages generic and brand name pharmaceuticals and assembles sterile procedure trays. After four consecutive annual earnings increases, profits for the first half of 1989 were down sharply, reflecting price weakness for medical gloves, a nonrecurring charge, higher expenses for computers and other factors. Late in 1989's second quarter, OMI acquired National Healthcare & Hospital Supply, which has annual sales of about $250 million.

Business Summary

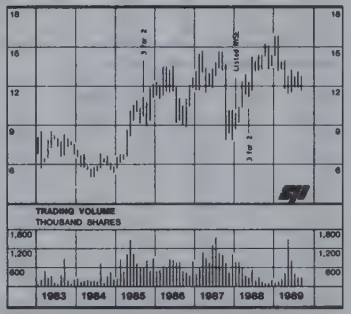
Owens & Minor distributes medical and surgical supplies; and pharmaceutical and other products. The company also packages generic and brand name pharmaceuticals and assembles sterile procudure trays. Contributions by business segment in 1988:

	Sales	Profit
Medical/surgical	68%	72%
Wholesale drug	32%	28%

The medical/surgical division distributes over 48,000 products, and was operating 19 distribution centers serving hospitals, nursing homes, and other institutions in 25 states and the District of Columbia as of year-end 1988. Areas served include New Jersey, Minnesota and surrounding states, and in the mid-Atlantic, southeastern, and southcentral sections of the U.S. Products distributed include urological products, dressings, needles and syringes, surgical packs and gowns, sterile procedure trays, surgeon's and examination gloves, sutures, and intravenous products.

Hospitals generally account for over 90% of the medical/surgical division's sales, reflecting Owens & Minor's strategy to concentrate on hospital customers in the belief that hospitals will remain the primary focus on the health care industry. Important elements of this strategy have been to focus on providing a high volume of disposable products at low cost.

The wholesale drug division distributes over 28,000 products, including prescription and over-the-counter drugs, health and beauty aids, and sundries. As of year-end 1988 this division was operating three distribution centers serving independent retail drugstores, chain drugstores, and hospital pharmacies in Delaware, Maryland, the District of Columbia, Virginia, North Carolina and Florida. Pharmaceuticals generally account for over 80% of this division's sales.



Important Developments

Aug. '89— Owens & Minor said that it expected a significant amount of new business in all operating divisions during the second half of 1989. Normal sales growth momentum was expected to resume, with additional benefits anticipated from completed acquisitions. In addition, the company said that its program to control costs had begun to show positive results. Moreover, OMI said that it had started the task of centralizing certain functions that it felt could be more efficiently performed at headquarters without taking away the entrepreneurship of divisional management.

Aug. '89— OMI said that results for the 1989 second quarter reflected one month of performance from recently acquired National Healthcare & Hospital Supply (NHHS). NHHS operates 8 medical-surgical distribution centers in the western U.S., with annual sales of about $250 million.

Next earnings report expected in late October.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	195.8	177.7	132.2	106.0
Jun.	218.7	177.4	140.9	111.2
Sep.		186.6	147.2	121.5
Dec.		189.9	156.6	128.8
		731.6	576.8	467.6

Sales for the first half of 1989 advanced 17%, year to year, reflecting additional revenues from the second quarter 1989 acquisition of National Healthcare. Profitability was adversely affected by a deterioration in the market price of imported surgeon's and examination gloves, costs related to the implementation of a new computer system, 131% heavier interest charges (net), and larger than expected expenses related to the TransHealth acquisition. Including a $2.5 million ($0.17 a share) nonrecurring charge in 1989 for the devaluation of surgical gloves, net income fell 78%, to $0.11 a share from $0.48 (adjusted).

Owens-Corning Fiberglas

NYSE Symbol OCF Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 8'90	1989-90					
26⅛	36⅞-22¼	6	None	None	NR	1.56

Summary

This company is a leading producer of glass fiber products and also makes other construction and industrial products. OCF underwent a dramatic restructuring in 1986 to defeat a takeover attempt by Wickes Companies. In the restructuring, OCF assumed $1.5 billion of debt, increased shares outstanding by more than nine million, and sold its aerospace and strategic materials group. Despite weakness in the homebuilding market, earnings are expected to remain relatively strong in 1990.

Current Outlook

Earnings for 1990 are expected to approximate the $4.00 a share estimated for 1989.

An early resumption of dividends, omitted in 1986, is unlikely.

Sales for 1990 are expected to be flat to up slightly, reflecting a weak homebuilding market. Other construction markets may also soften. International markets should be strong. Earnings should be helped by lower interest costs as the company continues to pay down debt.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	665	632	736
Jun.	---	721	735	688
Sep.	---	743	760	753
Dec.	---	---	704	714
	---	---	2,831	2,891

Sales for the nine months ended September 30, 1989 were essentially unchanged, year to year. Margins narrowed, and pretax earnings declined 2.8%. After taxes at 43.8% versus 41.6%, and lower equity income, net income was down 9.4%. Per-share earnings were $2.99, compared with $3.34. Results for the 1988 interim excluded a special charge of $0.20 a share for the early retirement of debt.

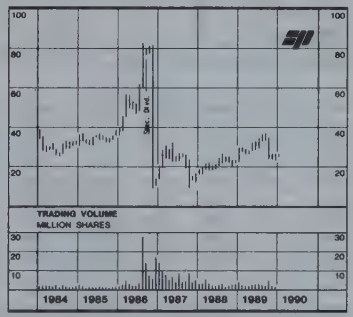
	E4.00	E4.00	4.71	5.30



Important Developments

Oct. '89— The company said that third quarter earnings reflected reduced activity in a number of major markets including construction and marine products. Automotive products sales were expected to continue to decline. International sales were strong, particularly in Europe.

Aug. '89— OCF completed the acquisition of its affiliate, Fiberglas Canada, by purchasing the 50% interest held by PPG Industries for about $200 million in cash.

Jan. '89— OCF announced that it had formed a new industrial materials group combining domestic and European production of fiber glass reinforcements and textile products under one management structure.

Next earnings report expected in late January.

Business Summary

OCF is the world's leading manufacturer of glass fiber products. It also produces calcium silicate, asphalt, and polyester resins. Contributions by industry segment in 1988 were:

	Sales	Profits
Construction products	63%	46%
Industrial materials	19%	29%
International	18%	25%

Construction products include glass wool fibers formed into thermal and acoustical insulation; roofing shingles and systems; air-handling systems; and calcium silicate insulation.

The industrial materials segment produces glass fiber yarns, rovings, mats, strand and reinforcement products, resins and gelcoats.

International operations are conducted in Europe and South America and include production and sale of glass fiber insulation, yarns, rovings and chopped strand mats.

The aerospace and strategic materials division was sold early in 1987.

Dividend Data

Common dividends were omitted in 1986 after having been paid since 1950. The most recent payment was $0.35 on September 15, 1986. A "poison pill" stock purchase right was adopted in 1986.

Finances

The company is a defendant in some 62,700 lawsuits claiming health damage from use of the company's asbestos products manufactured and distributed from 1958 through 1972. The company does not believe the lawsuits will have a materially adverse effect on its financial position, and OCF's auditors gave an unqualified opinion on the 1988 financial statements.

In November, 1986 shareholders approved a restructuring plan in which each OCF common share was converted into $52 cash, $35 face amount of a subordinated discount debenture, and one share of new common stock. The restructuring was financed by $1.5 billion of new debt and the sale of the aerospace and strategic materials group, and was in response to a takeover attempt by Wickes Companies.

Capitalization

Long Term Debt: $1,455,000,000.

Common Stock: 40,231,670 shs. ($0.10 par). Institutions hold approximately 67%. Shareholders of record: 16,244.

PHH Corporation

NYSE Symbol PHH

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 4'89	1989					
36½	38⅞–31⅝	12	1.16	3.2%	A-	0.72

Summary

PHH offers a broad range of corporate services in the areas of vehicle, relocation, and facilities management to more than 2,500 corporate clients. In the fiscal 1989-90 first half the company's two largest business segments, vehicle services and relocation services, continued their growth of recent years, but domestic vehicle deliveries slowed in the second quarter as U.S. customers slowed spending for new vehicles amid an uncertain economic outlook.

Business Summary

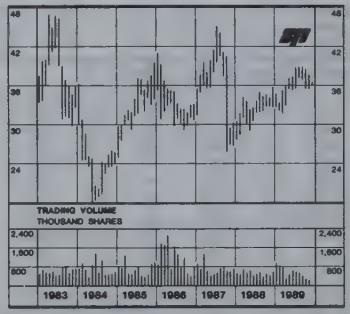
PHH Corporation (formerly PHH Group, Inc.) through its subsidiaries, offers a broad range of vehicle, relocation and facilities management services to over 2,500 clients, including many of the world's largest corporations. Contributions to revenues and operating income (in thousand $) by business segment in fiscal 1988-9 were:

	Revs.	Income
Vehicle services	58%	$38,851
Relocation services	41%	39,573
Facilities services	1%	-4,518

Foreign operations, primarily in Europe and Canada, accounted for 14% of consolidated revenues in fiscal 1988-9.

Vehicle related services consist of truck and auto fleet management, and leasing and vehicle cost control services for corporations in the U.S., Canada and the U.K. Services include new vehicle purchasing and arranging delivery; fleet financing; registration, title, tax, and insurance requirements compliance; used vehicle sales; business travel expense control programs; fuel purchasing and control programs and centralized billing programs. The number of vehicles under management equaled 409,651 at April 30, 1989, up 8.7% from 376,840 a year ago.

Relocation services (U.S., Canada, and U.K.) consist of transferred employee/spouse counseling and consulting, moving services, and rental management; the purchase, management and resale of transferees' homes on behalf of corporate and government clients; and mortgage banking services. A subsidiary provides corporate relocation services. During fiscal 1988-9, the company acquired 28,928 homes (versus 28,283 in fiscal 1987-8) and sold 27,927 homes (28,576). At April 30, 1989 the mortgage servicing portfolio totaled $1.7 billion, up from $1.1 billion a year earlier, and the ending inventory of homes was 9,422 (8,421).



Facilities management services consist of strategic facilities planning, interior architectural design, space planning, and furniture and fixture procurement, installation and resale for corporate clients.

Important Developments

Nov. '89— PHH reported that operating performance of the international vehicle services and relocation segments in the fiscal 1989-90 first half were in line with objectives. Although vehicles under management at October 31, 1989 increased 9%, year to year, PHH said that a reduction in domestic vehicle deliveries negatively impacted results in the domestic vehicle services segment during the second quarter. The company saw more uncertainty in the U.S. marketplace and felt this might be causing customers to be less aggressive in their new vehicle acquisition plans. PHH remained optimistic relative to international expansion plans and its relocation services businesses.

Next earnings report expected in late February.

Sep. 22'89	1989					
16⅞	18⅞-10	7	0.12	0.7%	B	1.76

Summary

PHM Corp. is a holding company that operates Pulte Home (a large builder of moderately-priced single-family homes and condominiums with operations in 170 subdivisions in 11 states) and has mortgage banking and finance subsidiaries. About 40% of the shares are closely held.

Current Outlook

Earnings for 1989 are estimated at $1.95 a share, versus the $1.26 of 1988, which included numerous unusual items. Earnings for 1990 are projected at $1.50 a share.

Dividends should remain at $0.03 quarterly.

Homebuilding revenues for 1989 should be down moderately despite a flat first half because of a declining backlog. Financial services revenues will be up strongly because of acquisitions. Wider margins on higher priced units in the move-up market should help earnings.

[1]Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	271	217	258	135
Jun.	283	275	290	202
Sep.	---	298	273	234
Dec.	---	381	310	267
	---	1,170	1,131	837

Revenues for the six months ended June 30, 1989 rose 13%, year to year, reflecting the S&L acquisitions. Operating results were favorably impacted by benefits provided from the thrift operations, reduced mortgage foreclosure losses and increased gains on the sale of mortgage-backed securities. Pretax income more than doubled. After a tax credit, versus taxes at 39.3%, net income was $34.2 million ($1.28 a share), compared with $7.4 million ($0.28). Results exclude special losses of $0.11 and $0.01 per share in the respective interims.

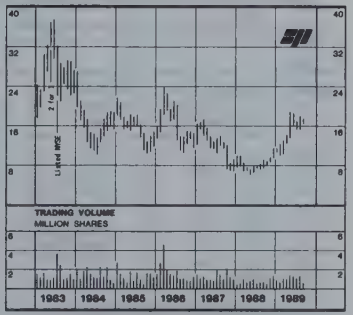
Dec.	E0.30	0.79	d0.35	0.35
	E1.95	1.26	0.29	0.79



Important Developments

Aug. '89— Second quarter share earnings included $0.11 for a land condemnation award, $0.15 for a reduction in mortgage foreclosure losses, and $0.14 from the sale of mortgage-backed securities related to the early redemption of certain long-term debt.

Aug. '89— The order backlog at June 30 was 1,907 units, down 23%, year to year. The dollar value of the backlog was $275 million, down 11%. New orders during the second quarter were 1,458 units, down 22%.

Mar. '89— Earnings for 1988 were favorably impacted by $0.39 a share from the sale of mortgage servicing rights and $0.37 a share from income and reduced taxes from S&L operations. Earnings for the year were negatively impacted by reserves of $0.31 a share established for valuation of western state assets and $0.30 a share for mortgage-related losses.

Next earnings report expected in early November.

Business Summary

PHM Corp. is a holding company for Pulte Home, a major nationwide builder of moderately-priced single-family homes, and mortgage and finance subsidiaries. Operations are conducted in 170 company-developed subdivisions in 11 states. Units sold (settlements) in recent years were:

Single-family	1988	1987	1986
detached	5,037	6,220	6,606
attached	1,948	1,317	2,677

The prices for units sold in 1988 ranged from $60,000 to over $500,000, with an average price of $121,000.

Construction of homes is generally initiated after a down payment has been made by the customer and a written mortgage commitment has been received from a reputable lender. Homes are sold only for cash. No second mortgages are accepted. PHM does not speculate in raw land. ICM Mortgage, PHM's mortgage banking subsidiary, provides customers with financing. Mortgages are often issued at below market interest rates with PHM expensing the mortgage discounts.

In September, 1988 PHM acquired five insolvent savings and loan associations in Texas. PHM committed to invest a total of $45 million in the thrifts.

Dividend Data

Dividends have been paid since 1977.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Summary

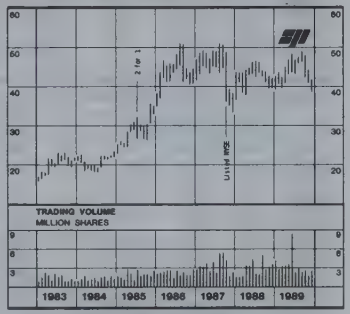
This bank holding company, the 14th largest in the nation, has evolved into a "superregional" bank through interstate acquisitions. Headquartered in Pennsylvania, it also owns banks in Indiana, Kentucky, Ohio, New Jersey and Delaware. Good loan quality and excellent expense controls should help the company extend its record of strong operating earnings gains in 1990. In December, 1989 PNC's Pittsburgh National Bank agreed to merge with a $3 billion asset Pittsburgh-based savings and loan.

Current Outlook

Earnings for 1990 could reach $5.90 a share ($5.80 fully diluted), up from the $5.35 ($5.25) estimated for 1989.

The $0.53 quarterly dividend is the minimum expected.

Loan growth eased during the first nine months of 1989, running about a 13% growth rate versus 1988's 16% pace, reflecting slowing economic growth. The pace is expected to slow in 1990 as well. Loan quality remains good, domestic nonperforming loans are only 1.3% of loans, and are reserved at about 90%. While problem real estate construction loans declined in the September quarter, this $2.9 billion portfolio does represent a source of risk. LDC loans, reduced to $216 million, are adequately reserved for at 64%. Large, well-run trust operations, which include advising money market mutual funds, are a source of growth. PNC continues to enhance the profitability of its large corporate business through sales of fee-based services. It is also building its investment banking products business aimed at middle market corporations. PNC, already highly efficient, should benefit from the consolidation of its data processing centers. The First Federal merger will increase PNC's Pittsburgh market share to 24%, and is expected to aide earnings in 1990.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 7.4%, year to year (1988 restated for acquisition), reflecting a 10% increase in average interest-earning assets. The net interest margin (taxable equivalent basis) was 3.65%, compared with 3.75%. The provision for credit losses was 1.1% higher, at $114 million. Aided by a 17% increase in service charges, fees and commissons, noninterest income gained 5.7%. With noninterest expense up 5.1%, pretax earnings increased 11%. After taxes at 24.4%, versus 23.6%, net income was up 10%, to $3.98 a share ($3.89 fully diluted) from $3.70 ($3.61).

Important Developments

Dec. '89— Pittsburgh National Bank, an affiliate of PNC, and First Federal of Pittsburg, (FFP) a savings and loan with $3.0 billion in assets, announced they reached agreement to merge FFP into Pittsburgh National. Because FFP is a mutual institution, the merger will be effected without a cash payment or the issuance of additional stock by PNC. It was anticipated the transaction could be completed in the first quarter of 1990.

Next earnings report expected in mid-January.

Business Summary

PNC Financial Corp, the nation's 13th largest bank holding company, was formed in 1983 through the merger of Pittsburgh National Corp. and Provident National Corp. PNC provides retail banking services through the 510 branches of its subsidiary banks in Pennsylvania, Kentucky, Ohio, Indiana, New Jersey and Delaware; wholesale banking services, including asset based finance, are provided through offices in 19 states and 9 foreign countries. PNC's trust operations are sizable, with about $79 billion ($41 billion discretionary) of assets under management.

During 1988 average earning assets of $34.0 billion (up 15% from 1987) were divided: commercial loans 39%, real estate loans 11%, consumer loans 13%, foreign loans 2%, investment securities 28%, other investments 7%. Average sources of funds were demand and savings deposits 31%, time deposits 38% (total deposits were $24.8 billion, up 17%), short-term borrowings 22%, long-term debt 2%, equity 6%, and other 3%.

At year-end 1988 nonperforming assets were $451 million (1.83% of loans), against $436 (2.04%) a year earlier. The reserve for loan losses was 2.19% of loans, down from 2.48%, reflecting net chargeoffs of LDC loans of $37 million. LDC loans of $351 million were 50% reserved for. Net chargeoffs during 1988 were 0.66% of average loans, versus 0.54%. Increases in these ratios reflected deterioration in the LDC loan portfolio.

Dividend Data

Cash has been paid by the predecessors in each year since the 1860s. A dividend reinvestment plan is available.

Nov. 1'89	1989					
39⅝	46-38⅝	9	1.52	3.8%	A+	1.33

Summary

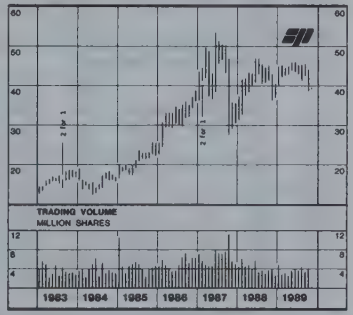
This company is a leading manufacturer of flat and fiber glass, industrial and specialty chemicals, coatings and resins, and medical instruments and services. PPG intends to continue to strengthen its core businesses and to expand international operations, while developing new products related to existing businesses and entering into new businesses through acquisitions. Earnings for 1989 and 1990 should be restricted by downturns in key markets.

Current Outlook

Earnings for 1990 are projected at about $4.30 a share, versus the $4.10 expected for 1989.

Dividends at $0.38 quarterly are the minimum expected.

Earnings for 1990 are expected to benefit from continued moderate worldwide economic growth and ongoing productivity and cost reduction programs, including the restructuring of the glass business. The trade paint business should be aided by the acquisition of the Lucite business, while continued strong replacement and European markets should boost the glass and coatings units. However, expected weak domestic automobile and construction markets, continued price competition for flat glass, and lower prices for chlorine derivatives should limit the earnings gain.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,459	1,373	1,261	1,137
Jun.	1,490	1,451	1,334	1,209
Sep.	1,360	1,361	1,261	1,140
Dec.	---	1,432	1,328	1,201
	---	5,617	5,183	4,687

Sales for first nine months of 1989 rose 3.0%, year to year, reflecting volume and price increases. With lower glass profits, net income declined 0.4%. Share earnings were $3.25 (on slightly more shares), versus $3.32.

Common Share Earnings ($)

Mar.	1.15	1.07	0.73	0.59
Jun.	1.13	1.22	0.85	0.77
Sep.	0.97	1.03	0.76	0.70
Dec.	E0.85	0.94	0.85	0.61
	E4.10	4.26	3.19	2.66

Important Developments

Oct. '89— PPG said that lower third-quarter earnings reflected the effect on the glass business of increased competitive production capacity and reduced domestic demand. Chemical profits were penalized by lower prices for chlorine derivatives. A $117 million pretax gain, primarily for the sale of its 50% interest in Fiberglass Canada for $200 million, was largely offset by reserves for restructuring of the flat glass business.

Sep. '89— PPG agreed to purchase the Lucite paint and Olympic stain businesses of The Clorox Co. for $130 million. Combined annual sales of the units exceed $100 million.

Jan. '89— PPG sold six million shares of treasury stock to its employee stock ownership plan, and initiated a 10 million share stock repurchase program. The sale increased the ESOP's interest in PPG to 14%.

Next earnings report expected in late January.

Business Summary

PPG, a diversified manufacturer, derived 1988 sales and operating income as follows:

	Sales	Profits
Glass	42%	46%
Coatings & resins	35%	29%
Chemicals	20%	27%
Other	3%	-2%

Foreign activities contributed 30% of sales and 29% of operating profits in 1988.

PPG is one of the world's largest producers of flat glass. Major markets include original and replacement glass for automobiles, commercial and residential construction, aircraft transparencies, and glass products for various industrial uses. PPG is the second largest domestic producer of continuous strand and chopped strand fiber glass, including plastic reinforcement yarns and industrial and decorative yarns.

PPG produces protective and decorative coatings for the automotive, appliance, container, industrial and trade paint markets, metal pretreatments, adhesives and sealants for the automotive industry, and printing inks.

PPG is a leading worldwide producer of chlorine and caustic soda, vinyl chloride monomer, and chlorinated solvents. Specialty chemicals include optical resins, water treatment chemicals, silica compounds, surfactants, phosgene derivatives, and flame retardants. The biomedical systems business provides services for human health care.

Dividend Data

Dividends have been paid since 1899. A dividend reinvestment plan is available. A revised "poison pill" stock purchase right was adopted in 1988.

Summary

This Indiana-based utility holding company, parent of Public Service of Indiana, abandoned its fuel diversification into nuclear energy in 1984. In their opinion to the company's 1988 financial statements, auditors noted uncertainty concerning the outcome of litigation arising from PIN's former nuclear construction program. Prospects for the company have improved, however, and in January, 1989 PIN resumed common dividends after a three-year hiatus.

Business Outlook

Share earnings for 1990 are projected at $2.30, down from the $2.40 estimated for 1989.

Common dividends were resumed with a $0.20 quarterly payment in March, 1989. A modest payout ratio should make possible above-average dividend growth for the foreseeable future.

Share earnings for 1990 could reflect lower rates and potential refunds following resolution of various rate cases. Longer-term prospects could be limited by expenditures made necessary by potentially stringent acid rain legislation.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	266	289	269	269
Jun.	251	217	260	250
Sep.	275	281	278	278
Dec.	---	257	264	252
	---	1,043	1,071	1,049

Revenues for the nine months ended September 30, 1989 rose fractionally (0.6%), year to year. After increased maintenance costs and higher taxes, operating income declined 7.0%. However, following lower interest charges and a 16% decrease in subsidiary preferred dividend requirements, net income was up marginally (0.8%). Share earnings were $1.96, versus $1.95.

Important Developments

Dec. '89— PIN reported that the Indiana Court of Appeals agreed to hear oral arguments in the appeal of PIN's 1986 retail rate order. Intervenor groups have asked the court to nullify the order, which authorized an 8.2% rate increase and incorporated a previous 5% increase into base rates. Separately, the final set of hearings was conducted before the Indiana Utility Regulatory Commission in PIN's request for permanent rates. PSI is seeking a retail rate moratorium until March 1, 1993, as well as performance incentives. The IURC staff has supported a reduction in retail rates of $51.4 million (5.9%), while the Utility Consumer Counselor (UCC) is seeking a $91.4 million (10.4%) reduction. The IURC denied a request by the UCC to make PIN's retail rates interim and subject to refund. A final order is not expected before late February, 1990.

Next earnings report expected in late January.

Business Summary

PSI Holdings, Inc. is the holding company formed in June, 1988 by Public Service Co. of Indiana, now its main subsidiary. Sales in recent years:

Revenues	1988	1987	1986	1985
Residential	37%	37%	37%	36%
Commercial	24%	24%	24%	23%
Industrial	26%	26%	27%	28%
Other	13%	13%	12%	13%

Virtually all power requirements in 1988 were derived from coal. PIN is vulnerable to stringent acid rain legislation. Peak load in 1988 was 4,401 mw and capability totaled 5,921 mw for a capacity margin of 26%.

In 1985 PIN wrote off $2.4 billion ($1.3 billion after taxes) of its $2.7 billion investment in the Marble Hill nuclear facility which was cancelled in November, 1984. The charge was net of regulatory asset and salvage value. In November, 1986 PIN wrote-off some $141.0 million net, of its Marble Hill investment allocated to wholesale customers. Auditors noted in their opinion of the company's 1988 financial statements, legal actions associated with the Marble Hill project and subsequent regulatory proceedings to resolve Marble Hill rate issues.

Dividend Data

Common dividends were resumed in January, 1989 after having been omitted in January, 1986. Subsidiary preferred dividends, which were also omitted in January, 1986, were resumed in January, 1987. A dividend reinvestment plan is available.

PACCAR Inc

NASDAQ Symbol PCAR (Incl. in Nat'l Market) Options on NYSE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 21'89	1989					
22½	52½-37¾	8	[1]1.00	2.4%	B+	1.02

Summary

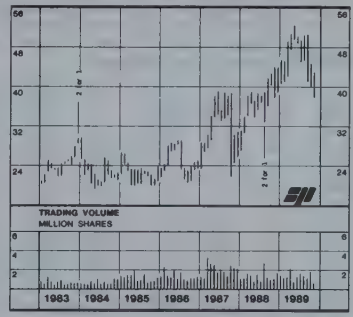
This leading producer of heavy-duty trucks is also active in the manufacture of equipment for the oil and gas and construction industries. PCAR expanded its auto parts distribution business in 1988 with the purchase of Grand Auto for $49 million. Profits could slip in 1990, reflecting slackening demand for heavy-duty trucks. Directors authorized a 4,000,000-common-share (11.5%) buyback plan in April 1989.

Current Outlook

Profits for 1990 are estimated at $5.00 a share, versus the $5.40 anticipated for 1989.

Dividends, at $0.25 a share quarterly, are likely to be supplemented with an extra payment of approximately $1.50 a share in early 1990.

Truck volumes are expected to slip moderately in 1990 as a slowdown in the manufacturing sector prompts fleet operators to curtail new equipment purchases. PCAR's truck volumes should outperform the industry, however, as PCAR expands its share of the medium-haul conventional market and for off-road construction applications. Continued solid contributions are expected from PCAR's Mexican truck unit. While the loan portfolio for PCAR's finance unit will be flat, profits should benefit from reduced reserve requirements. Comparisons for the auto parts business will continue to benefit from a turnaround at Grand Auto. Softer oil prices could check Trico's profits.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

Oct. '89— PCAR completed the sale of its Wagner Mining Equipment Co. unit to Atlas Copco AB, a Swedish conglomerate, for an undisclosed amount. Wagner, which generates annual revenues of about $85 million, is a leading producer of underground mining vehicles.

Apr. '89— Directors authorized the repurchase of 4,000,000 (11.5%) of PCAR common shares, from time to time, through open-market purchases. PCAR noted that during April it had repurchased 202,000 of its shares for $9.8 million. In February, PCAR bought 693,860 of its common shares in a private transaction for $29.8 million.

Jun. '88— PCAR acquired Grand Auto, Inc., a distributor of auto parts in California, Nevada, Washington and Alaska, for $49.2 million.

Next earnings report expected in late January.

Business Summary

Contributions to pretax profits (in millions) by business segment in recent years were:

	1988	1987	1986
Truck manufacturing	$244	$177	$75
Other	3	-12	-6
Financial services	32	28	25

Heavy-duty trucks used for highway and off-road applications are manufactured in the U.S. under the Peterbilt and Kenworth names. PCAR, which distributes trucks through a network of 269 independent dealers in the U.S., ranked second in 1988 among heavy-duty truck manufacturers, commanding a 22.9% market share, versus 20.3% in 1987. PCAR also produces trucks in England under the Foden nameplate. PCAR markets the medium-duty Mid-Ranger vehicle through a venture with Volkswagen do Brasil S.A. and has a 49% interest in VILPAC S.A., a Mexican truck producer.

Winches, used in logging, construction, oil drilling and fishing, are produced through the Braden-Carco-Gearmatic unit. Trico Industries manufactures oilfield pumps and other extraction equipment. In October 1989, PCAR sold its Wagner Mining Equipment Co. unit, a producer of underground mining vehicles, to Atlas Copco AB.

Grand Auto, Inc., acquired in mid-1988, distributes tires, auto parts and accessories and provides minor auto repair and maintenance work at more than 100 retail outlets in Washington, California, Nevada and Alaska. Al's Auto Supply, acquired in late 1987, distributes auto parts through 29 retail outlets in Washington.

Other operations include PACCAR Financial Corp. (with assets of $1.2 billion at 1988 year-end), which provides financing for trucks and trailers produced by PCAR and other manufacturers. PACCAR Leasing manages a full-service lease fleet of 4,500 trucks and trailers.

Nov. 14'89	1989					
50¼	53¾-37⅛	16	3.48	6.9%	A-	0.51

Summary

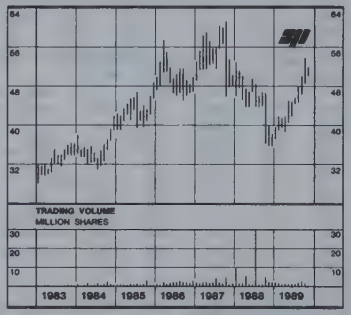
This holding company's principal interest is the distribution of natural gas to over 4 million customers in southern and central California, including Los Angeles. It is also involved in specialty retailing, and oil and gas exploration and production. Share earnings for the first nine months of 1989 declined, reflecting higher interest charges and more shares outstanding. PET has a $130.9 million rate increase application pending.

Current Outlook

Share earnings for 1990 are projected at $3.40, up from the $3.20 estimated for 1989.

Dividends should continue at $0.87 quarterly, supported by cash flow.

Gas utility profits for 1990 are expected to advance, reflecting higher rates, approximately a 5% growth in the rate base, greater use of gas for environmental reasons, and increased competitiveness. Oil and gas exploration and production profits should advance on higher average oil and gas prices and increased production. Retailing earnings are expected to be slightly higher on better margins, partly reflecting efforts to improve efficiency through installation of computer systems in stores.



Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,861	1,493	1,540	1,530
Jun.	1,545	1,293	1,232	1,260

Important Developments

Oct. '89— PET said that its Southern California Gas (SCG) unit expected regulatory decisions by 1989 year-end on the authorized rate of return for 1990, the level of noncore earnings SCG is authorized for 1990, and a rate increase request of $130.9 million.

Jun. '89— PET agreed to a contract with Kern River Pipeline Co. for 150 million cubic feet of capacity per day. The company said that the contract would allow PET to diversify its gas supply by providing the ability to obtain additional gas from the Rocky Mountain region.

May '89— PET sold 1,500 preferred shares at $100,000 each; proceeds would be used to reduce debt. In March PET adopted a "poison pill" stock purchase right.

Next earnings report expected in mid-January.

Business Summary

Pacific Enterprises (formerly Pacific Lighting) distributes natural gas in southern California, including Los Angeles, and portions of central California through its Southern California Gas subsidiary, the nation's largest gas distributor. PET also has substantial nonutility interests. Industry segment contributions in 1988:

	Revs.	Profits
Utility	54%	70%
Retailing	40%	18%
Oil and gas expl. & prod.	4%	9%
Other	2%	3%

Gas sales volume in 1988 totaled 654 Bcf, down from 771 Bcf in 1987. Customers served at 1988 year-end were 4,414,060, compared with 4,303,211 at the end of 1987. PET's major U.S. pipeline suppliers are El Paso Natural Gas Co. and Transwestern Pipeline Co. In 1988 PET acquired 47% of gas supplies on the spot market.

Oil and gas exploration and production is conducted primarily in the U.S. and, to a lesser extent, in Canada and the Dutch North Sea. Proved reserves at year-end 1988 were 74.6 million barrels of oil and 325.5 Bcf of gas, versus 52.4 million barrels and 167.3 Bcf of gas a year earlier.

Other operations include drug and sporting goods stores, interstate and offshore gas transmission, financial services, and alternate energy development. PET intends to derive one-half of its net income from nonutility operations by 1992; they accounted for 33% in 1988.

Dividend Data

Dividends have been paid since 1909. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Pacific Gas & Electric

NYSE Symbol PCG Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 8'89	1989					
20⅜	21⅝-17¼	36	1.40	6.9%	B+	0.49

Summary

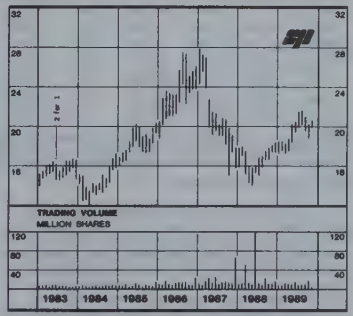
This California-based utility owns the two unit Diablo Canyon nuclear facility. In 1988 PCG agreed to a rate settlement for the plant, which resulted in a $1.43 per share write-off of disallowed costs and a 27% dividend cut. As part of the settlement, revenues derived from the plant will be based upon the facility's operating performance. In October, 1989 PCG stated that repair costs due to the San Francisco area earthquake on October 17 were not expected to have a significant earnings impact. PCG added that it will suffer no significant revenue losses as a result of earthquake-related power outages.

Current Outlook

Share earnings for 1990 are estimated at $2.20, up from the $2.10 projected for 1989.

The $0.35 quarterly dividend, cut 27% from $0.48 in June, 1988, may be raised by mid-1990.

Share earnings for 1990 will benefit from Diablo Canyon's performance-based pricing. Share earnings for 1991 are expected to be below 1990 because both Diablo Canyon units are scheduled for refueling and maintenance outages.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	2,109	1,870	1,752	2,012
Jun.	2,086	1,767	1,775	1,877
Sep.	2,246	1,986	1,828	2,001
Dec.	---	2,044	1,831	1,927
	---	7,646	7,186	7,817

Revenues for the 12 months ended September 30, 1989 rose 14%, year to year, primarily reflecting the generating performance at the Diablo Canyon nuclear plant. Following a less rapid increase in production costs, operating income advanced 21%. After the write-off of disallowed Diablo Canyon costs in December, 1988, net income was $336.0 million, versus $672.7 million. After preferred dividend requirements, share earnings were $0.56, compared with $1.44.

	E2.10	d0.10	1.29	2.60

Important Developments

Oct. '89— PCG stated that repair costs arising from the San Francisco area earthquake on October 17 were not expected to have a significant earnings impact. Also, the company said it will suffer no significant revenue losses as a result of earthquake-related power outages. Separately, PCG reported that Diablo Canyon 1 was taken down for a scheduled maintenance and refueling outage and added that in February, 1990 Diablo Canyon 2 will begin its maintenance and refueling outage.

Aug. '89— PCG updated to $325 million its revenue request in the 1990 General Rate Case. The company stated that the new amount, representing an increase over rates in effect January 1, 1989, is comprised of $250 million in electric revenues and $75 million in gas revenues.

Next earnings report expected in late January.

Business Summary

Pacific Gas & Electric, the nation's largest electric and gas utility, serves much of northern and central California. Of 1988 revenues, electricity accounted for 72% and gas 28%. Electric revenues in recent years:

Revenues	1988	1987	1986	1985
Residential	35%	33%	29%	29%
Commercial	38%	38%	34%	34%
Industrial	17%	19%	21%	24%
Other	10%	10%	16%	13%

Capability in 1988 was 23,947 mw, derived from thermal 38% (gas and geothermal), nuclear 9%, hydro 16%, and purchased power 37%. Peak load in 1988 was 18,490 mw for a capacity margin of 23%. Gas sales in 1988 were 461,292 MMcf, up from 424,722 MMcf in 1987. PCG's nuclear power is derived from its two unit 2,200 mw Diablo Canyon facility. Effective July 1, 1988, PCG resolved prudency and rate issues related to the plant and wrote off $1.0 billion ($1.43 a share) of plant costs. As part of the settlement, revenues from Diablo Canyon will be based on a pre-established price for each kwh of electricity generated by the plant. PCG's future sources of electric generation are expected to come from cogeneration projects.

Dividend Data

Dividends have been paid since 1919. A dividend reinvestment plan is available.

Summary

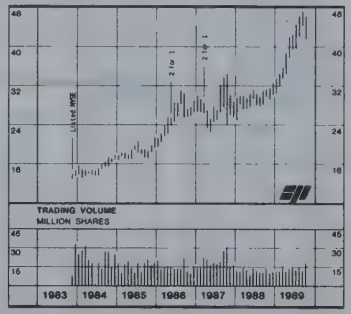
Pacific Telesis, the sixth largest telephone holding company in the U.S., primarily provides telephone service in parts of California and Nevada. The company has also made considerable investments in non-regulated businesses, particularly high growth areas such as cellular mobile telephone operations. The California PUC ordered a shift to incentive regulation as of January 1, 1990.

Current Outlook

Earnings for 1990 are tentatively projected at about $2.90 a share, unchanged from the $2.90 estimated for 1989.

The $0.47 quarterly dividend is the minimum expectation.

Revenues for 1990 from telephone operations are anticipated to decrease, as the benefits from gains in access lines and calling volume are more than offset by a rate cut associated with a new regulatory program for Pacific Bell. Telephone margins are likely to be adversely affected by increased employment and capital costs. Contributions from unregulated operations are expected to continue to significantly improve, reflecting primarily strong growth from the company's cellular and paging units.



Revenues (Billion $)

Important Developments

Oct. '89— The California PUC announced a final decision on an incentive regulation plan for Pacific Bell. The plan, which would become effective January 1, 1990, would replace traditional rate of return regulation. Upon implementation, Pacific Bell would cut rates to an amount compatable with an 11.5% rate of return (ROR). Thereafter, a benchmark ROR of 13.0% would be used as a starting point for a sharing mechanism, whereby earnings above the benchmark ROR would be split equally between ratepayers and shareowners. Earnings above a 16.5% ROR would be refunded to ratepayers. On January 1 of each year, price caps for monopoly services and partially competitive services would be changed according to a formula of inflation minus a 4% productivity factor. Pacific would be required to file for a review of the plan in May, 1992.

Next earnings report expected in late January.

Business Summary

Pacific Telesis is the sixth largest telephone holding company in the U.S. based on 1988 revenues. The company's telephone subsidiaries, Pacific Bell and Nevada Bell, furnish exchange telecommunications and access service in California and Nevada for approximately 13.5 million customer access lines. Telephone operations are regulated under Federal (Federal Communications Commission) and state (public utility commissions or PUCs) authorities. Pacific Bell Directory publishes white and yellow pages and specialized directories for Pacific and Nevada Bell.

Cellular telephone services are provided under the PacTel Cellular name. PacTel Cellular has cellular interests in 33 markets, including majority interests in five of the largest cellular markets in the U.S. As of September, 1989 Pactel Cellular served some 341,000 customers, up 47% from a year earlier. Expansion of the unit's service areas has been made through acquisitions, including 1988 acquisitions in Michigan, Ohio and Georgia. PAC is also the nation's fourth largest provider of paging services, which are offered in over 30 markets.

The company also engages in the business of marketing customer premises telecommunications equipment and related activities in California and Nevada. PacTel Publishing engages in directory related ventures. Other PacTel companies market communications systems outside the U.S.; invest in, manage and broker real properties; and provide financial support services.

The company jointly owns, with the six other regional Bell holding companies, Bell Communications Research, which provides technical assistance and consulting services to the companies.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

0.47	Sep. 22	Oct. 3	Oct. 10	Nov. 1'89

Next dividend meeting: late Dec.'89.

Finances

Since October 1987, directors authorized the purchase of up to 30 million PAC common shares. Through December, 1988 the company had purchased 13.9 million PAC shares under those authorizations, and were holding the shares as treasury stock pending their ultimate disposition.

Capital expenditures totaled $1.59 billion in 1988, a decrease of 22% from the $2.03 billion spent in 1987.

On January 1, 1984 AT&T spun-off its 22 Bell operating companies in the form of PAC and six other regional holding companies (RHCs). That action was taken pursuant to a divestiture agreement settling Federal antitrust action.

Important Developments

Dec. '89— On December 1, PPW revised its offer to acquire Pinnacle West Capital's (PNW) Arizona Public Service Co. (APS) unit by offering to acquire PNW itself through an exchange of 0.18 PPW common share (unadjusted) for each of the 86.7 million PNW common shares outstanding; PPW would either exchange comparable preferred stock or pay cash for the approximately $372.6 million of outstanding APS preferred shares. This offer, which follows an earlier proposal to acquire APS for about $2.1 billion, is based on the assumption that PNW's troubled MeraBank unit is sold prior to closing after having received a capital infusion of $510 million from PNW, and that PNW's other assets (excluding APS) have a net value of $300 million. PPW added that the exchange ratio is subject to adjustment.

Next earnings report expected in early February.

Business Summary

PacifiCorp (formerly Pacific Power & Light) owns electric and telephone utilities and engages in non-regulated ventures of telecommunications, resource development and finance. Giving effect to the January, 1989 acquisition of Utah Power & Light Co. for 53.5 million common shares, results for 1988 were as follows:

	Revs.	Profits
Electric	60%	71%
Mining/minerals	18%	14%
Telecommunications	15%	11%
Financial services	7%	4%

Electric services are supplied in Oregon, Wyoming, Washington, California, Montana, Idaho and Utah. Electric generation in 1988 for PPW was 81% coal, 7% hydro, and 12% purchased power.

NERCO, Inc. (83%-owned) is one of the largest coal producers in the U.S., with reserves in Montana, Wyoming, Indiana, Alabama, Kentucky and Tennessee. It is also a large producer of silver and gold, and has oil and natural gas interests.

Pacific Telecom, Inc. (87%-owned) provides long distance telecommunication services in Alaska and local services in nine states. Private network service is also available. The unit also has investments in nonregulated and technology areas.

PacifiCorp Financial Services, Inc. engages in specialized financing, leasing and asset management services. PPW is exploring the sale of the unit.

Dividend Data

Dividends have been paid since 1950. A dividend reinvestment plan is available.

17⅛	23⅝-16⅛	26	0.52	3.0%	B+	1.68

Summary

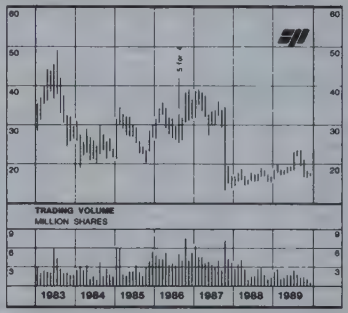
PaineWebber Group is a holding company that provides a broad range of investment services principally through its broker-dealer subsidiary, PaineWebber Inc. With other subsidiaries engaged in specialized investment services, the company is one of the largest financial services firms in the U.S. In December, 1987 PWJ sold 6.7 million preferred shares with an 18% voting interest to a Japanese insurance company for $300 million. Cost controls and share buybacks should boost per-share earnings in 1990.

Current Outlook

Earnings for 1990 are expected to reach $1.40 a share, versus 1989's estimated $1.15.

The $0.13 quarterly dividend is the minimum expected.

Revenue and earnings growth in 1990 may be limited by expected stagnant retail investor activity. Trading volume will likely be contained and commissions under pressure, if investors remain on the sidelines. However, if retail clients do regain their enthusiasm for equities, PWJ would be a strong beneficiary. Underwriting revenues are also expected to be negatively impacted, reflecting heightened competition and narrower margins. While an emphasis on the merger and acquisition and the merchant banking businesses will help longer term, these areas will likely slow from the growth experienced in the recent past. A growing presence in the asset management area will boost and add stability to earnings. As of mid-October PWJ repurchased about 4.6 million common shares, and had authorization to buy back another 3.3 million shares. This, plus general cost controls, should aid share earnings comparisons.



Revenues[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	678	608	629	594
Jun.	727	566	638	608
Sep.	719	642	629	606
Dec.	---	696	541	606
	---	2,512	2,437	2,414

Total revenues for the nine months ended September 30, 1989 rose 17% year to year, as a 22% increase in commissions and a 53% gain in interest income more than offset declines of 22% in principal transactions (due to 1988's $46.3 million gain from the National Car rental deal) and an 18% drop in investment banking revenues. Total expenses were 18% higher, and pretax income fell 3%. After taxes at 37.0%, versus 38.0%, net income was off 1.8%. Following preferred dividends, share earnings were $0.85 on 6.0% fewer shares, versus $0.77.

Dec.	E0.30	d0.20	0.16	0.57
	E1.15	0.58	2.25	2.51

Important Developments

Nov. '89— PWJ approved an expansion of its share repurchase program to 8,000,000 common shares from 6,500,000 shares. At mid-October PWJ had repurchased 4,639,000 common shares, and 2,147,600 shares of convertible exchangeable preferred stock. Separately, in discussing third-quarter results PWJ noted the progress of its asset gathering strategy, as total customer assets rose to $62.9 billion from $47.6 billion a year earlier.

Next earnings report expected in late January.

PWJ's primary business is comprised of four major business groups; retail sales, capital transactions, asset management and banking. Retail sales consists primarily of PWJ's domestic branch office system, which provides clients with investment products and investment services. Capital transactions includes the company's trading and institutional sales function. At year-end 1988 total asset under management were $32.3 billion. The banking group provides financial advice to, and raises capital for a broad range of corporate clients.

Dividend Data

Dividends were resumed in 1975.

Summary

This company is the leading producer of fine disposable filters and other fluid clarification equipment for the health care, aeropower and fluid processing industries. Aided by greater penetration of expanding health care markets and contributions from new products, the company's long record of sales and operating earnings growth should be extended in the years ahead.

Current Outlook

Earnings are estimated at about $1.85 a share for fiscal 1990, up from $1.51 in fiscal 1989 (after a nonrecurring charge of $0.11).

Some increase in the dividend, currently $0.12 a quarter, is likely in early calendar 1990.

Sales in fiscal 1990 should again show double-digit growth, led by another strong gain in health-care related products. Sales to aerospace and fluid processing markets should also rise. Margins should benefit from increased volume, a more favorable product mix and productivity improvements.

Net Sales (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Oct.	110.7	100.5	88.5	80.6

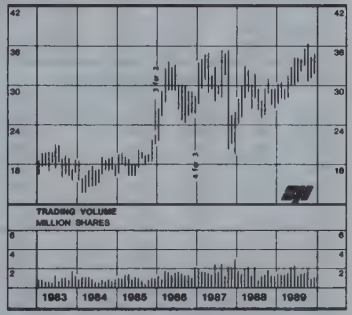
Apr.		0.36	0.53	0.39
Jul.		0.62	0.51	0.43
		1.51	1.55	1.31



Important Developments

Nov. '89— Pall said it expects fiscal 1990 to be its 19th consecutive year of growth in revenues and earnings. The company added that sales in the health care sector are targeted to increase by about 25%; aeropower, which grew 7% in fiscal 1989, should grow about 10%; and fluid processing, which had a boom year in fiscal 1989, is expected to grow about 10% in fiscal 1990, followed by greater growth in the future.

Sep. '89— The company's three facilities in Puerto Rico suffered damage and production interrruptions from Hurricane Hugo. Pall estimated that the storm reduced its revenues by about $3 million, and cut earnings by about $0.05 a share.

Next earnings report due in mid-March.

Business Summary

Pall Corp. makes fine filters and other fluid clarification devices for the removal of solid, liquid and gaseous contaminants from a variety of liquids and gases. Contributions in fiscal 1989:

	Sales	Profits
Health care	38%	46%
Aeropower	33%	34%
Fluid processing	29%	20%

Sales in Europe and in the Pacific Basin accounted for 39% and 12% of fiscal 1989 sales, respectively.

Health care products include filters for direct use by consumers to protect against contamination in ingested or administered fluids; for use in diagnosis of human, animal and plant disease; and for the production of sterile pharmaceuticals and biologicals.

Aeropower products include fuel filters, lubrication oil filters, hydraulic system filters and manifolds. Filters are supplied to manufacturers of military mobile equipment, naval vessels, aircraft ground support equipment, military and commercial airframes and aircraft engines, as well as to producers and users of industrial machinery and mobile equipment.

Fluid processing involves the removal of contaminants and bacteria from liquids and gases in process streams; the retention and recirculation of catalysts; and the collection of the final product of chemical processes. Major markets served are microelectronics components, magnetic tape, film, fiber, paint, chemicals, petrochemicals, gas and oil, and electric power.

Dividend Data

With the exception of fiscals 1971-1973, cash has been paid each year since 1958. A "poison pill" stock purchase rights plan was adopted in November 1989. A dividend reinvestment plan is available.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 2'90	1989-90					
2½	5⅛-2¼	NM	None	None	C	0.84

Summary

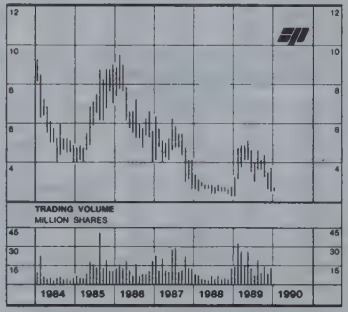
This company's principal subsidiary, Pan American World Airways, had its financial position severely weakened by losses in most years of the 1980s, despite assets sales and new financing. In order to remain viable, Pan Am is attempting to effect a merger or operating combination with another carrier. A mid-1989 attempt to merge with NWA, Inc. failed.

Current Outlook

A loss of about $1.00 a share is projected for 1990, compared with a loss of $2.40 a share estimated for 1989.

Dividends are unlikely for the foreseeable future.

Revenues for 1990 could be up moderately. Pan Am probably can increase its share of transatlantic traffic, which in 1989 was decreased by the aftereffects of the 747 bombing. Some improvement is also possible on expanded domestic services. Results will depend importantly on improving revenue yield, which was depressed on international routes in 1989 by the use of fare wholesaling to attract transatlantic passengers.



Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	733	764	760	678
Jun.	909	925	897	674

Dec.	---	840	877	797
	---	3,569	3,593	3,038

Revenues for the first nine months of 1989 decreased 2.4%, year to year. Operating expenses rose 5.1%. There was a loss from continuing operations of $273.9 million ($1.88 a share), versus a loss of $21.0 million ($0.29).

Dec.	Ed0.52	d0.39	d1.76	d1.44
	Ed2.40	d0.68	d1.91	d3.42

Important Developments

Nov. '89— The company reported that its revenues continued to be negatively affected by declines in traffic and fares in its transatlantic operations and increased competition in its Internal German Service. In addition, yields were depressed by the strength of the U.S. dollar versus European currencies.

Oct. '89— Pan Am began an expansion that was planned to increase its Florida operations 50% by mid-December.

Aug. '89— Pan Am completed transfer of its lease at Kennedy Airport to its employee pension plans in order to satisfy unpaid contributions.

May '89— The company completed the sale of Pan Am World Services for $165 million.

Next earnings report expected in early February.

Business Summary

Pan Am Corporation is a holding company whose operating subsidiaries are Pan American World Airways, Pan Am Express and the Pan Am Shuttle.

Air transportation revenues for 1988 were divided geographically as follows: Atlantic 58%, Latin America 18%, and domestic 24%. Atlantic operations connect the U.S. and points in Europe, the Near and Middle East and Africa. Latin American routes connect the U.S. and points in Central and South America and the Caribbean. In April, 1989 cities served included 25 in Latin America, 36 in Europe, 31 in the U.S., and seven elsewhere. In early 1986 Pan Am sold its Pacific routes to UAL.

Pan Am Express (formerly Ransome Airlines) serves 11 cities in the northeastern U.S. and in Europe connects 11 cities with West Berlin. Pan Am Shuttle provides no-reservation service connecting New York with Washington, D.C. and Boston.

Pan Am World Services, which provides management and technical services, was sold in mid-1989.

As of September, 1989 the active fleet comprised 35 B-747s, 5 737-200s, 89 727-200s (including 13 for the Pan Am Shuttle), 12 A300s and 19 A310s. It plans to acquire two A310s in 1990 and two in 1991.

Dividend Data

No dividends have been paid on the common stock since 1969.

Dec. 5'89	1989					
29⅞	30-20½	NM	2.00	6.7%	B+	0.79

Summary

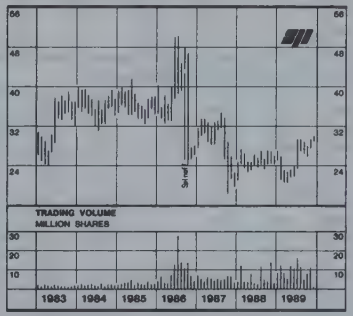
This company owns and operates a major natural gas pipeline network serving Midwestern and Eastern states. Other interests include liquid hydrocarbons, liquefied natural gas, and cogeneration. In June, 1989 PEL completed the acquisition of Texas Eastern Corp.; in April, PEL had acquired 81% of Texas Eastern for $2.58 billion. Operations returned to profitability for the first nine months of 1989 in the absence of a substantial take-or-pay related charge.

Current Outlook

Share earnings for 1990 are projected at $1.25, up from the $0.90 estimated for 1989.

Dividends should continue at $0.50 quarterly, supported by cash flow.

Pipeline profits for 1990 should increase slightly, reflecting growth in transportation volumes at Trunkline Gas, Panhandle Eastern Pipe Line, and Texas Eastern Transmission, despite costs associated with environmental cleanup at Texas Eastern Transmission. Profits from liquefied natural gas operations should benefit from reactivation of the Lake Charles, La. plant. Share earnings growth will be restricted by higher interest charges.



Operating Revenues (Million $)

Dec.	---	275	386	579
	---	1,261	1,563	2,250

Revenues for the nine months ended September 30, 1989 rose 68%, year to year, reflecting the acquisition of Texas Eastern Corp. In the absence of a $244.0 million after-tax charge ($4.48 a share) relating to take-or-pay settlement, net income of $28.3 million ($0.42 a share, on 23% more shares), contrasted with a net loss of $139.4 million ($2.56).

	E0.90	d3.13	2.07	d8.23

Important Developments

Oct. '89— PEL asked for FERC approval for the construction of a pipeline from the Arkoma basin to Independence, Miss. In July, PEL agreed to joint construction of a pipeline connecting PEL's pipeline system to Memphis Light, Gas & Water; the interconnection was expected to be completed by the 1989 winter heating season. Separately, PEL said a program to sell non-pipeline assets had allowed PEL to reduce $1.7 billion of the debt incurred by the acquisition of Texas Eastern Corp.

Jun. '89— Texas Eastern Corp. (TET) was merged into PEL in a transaction where each TET common share not already held by PEL was converted into the right to receive 2.304 PEL common shares. In April PEL had purchased through a tender offer at $53 per share in cash, 48.65 million TET common shares, or 81% of the total TET common shares outstanding.

Next earnings report expected in late January.

Business Summary

This holding company through its Panhandle Eastern Pipe Line and Trunkline Gas subsidiaries is involved in the interstate transportation and sale of natural gas. Other interests include extraction and sale of hydrocarbon liquids, liquefied natural gas, the intrastate sale of natural gas, coal mining, and cogeneration. Profit contributions by business group in recent years (in million $):

	1988	1987	1986
Gas transmission	$64.0	$127.2	$133.5
LNG project	Nil	-5.1	-10.5
Other	-5.0	-12.4	-8.5

PEL's Panhandle Eastern Pipe Line and Trunkline Gas, owns and operates a 17,000-mile gas pipeline network delivering gas to over 100 utilities, serving primarily the Midwest, and four underground storage fields. Gas sales volume in 1988 was 203 Bcf, versus 274 Bcf in 1987. Gas transported for others was 548 Bcf, versus 304 Bcf. Texas Eastern Corp., which was acquired in 1989, operates a pipeline system serving the East Coast.

PEL estimated take-or-pay settlement payments at $892 million; as of December 31, 1988 PEL had paid $694 million to producers.

Other activities include operation of an intrastate gas gathering system and a gas liquids extraction plant in Kansas, marketing of liquid hydrocarbons cogeneration, and operation of a facility for the regasification of imported liquefied natural gas from Algeria. Oil and gas exploration activities were discontinued in 1986.

Dividend Data

Dividends have been paid since 1937. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Pansophic Systems

NYSE Symbol PNS Options on CBOE (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 8'89	1989					
16¼	18⅜-12⅛	15	0.16	1.0%	B+	1.47

Summary

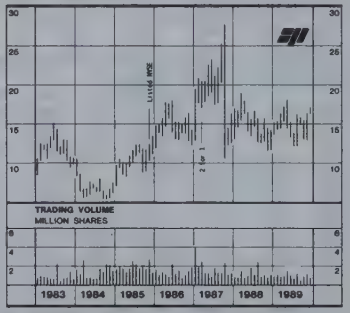
Pansophic develops and supports a variety of systems software products that facilitate information retrieval, library control, and application development. PNS also offers applications and graphics software products, which have become increasingly important contributors in recent years. Share earnings comparisons through fiscal 1990-1 should benefit from strong revenue growth, slightly wider margins, the absence of further investment losses, and a stock repurchase program.

Current Outlook

Earnings for the fiscal year ending April 30, 1991 are projected at $1.40 a share, versus the $1.20 estimated for fiscal 1989-90, and the $0.96 reported for fiscal 1988-9.

Dividends are expected to continue at $0.04 quarterly.

Revenues through fiscal 1990-1 should benefit from continued growth in the company's productivity product segment, and particular strength in the applications and graphics areas. Earnings comparisons are expected to be aided by gradually widening margins and the absence of further investment losses. Per-share earnings are expected to be bolstered by a stock repurchase program. Longer-term growth should be generated from the addition of newly-acquired or internally-developed products, allowing the company to build on its large customer base.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	50.0	40.9	33.6	20.8
Oct.	59.2	44.4	37.4	24.3
Jan.	---	53.0	43.6	34.6
Apr.	---	51.9	50.6	34.9
	---	190.3	165.3	114.6

Revenues for the six months ended October 31, 1989 rose 28%, year to year, reflecting strength across all product lines, particularly in the applications and graphics product segments, with Telon and productivity product sales exhibiting renewed vigor in the second quarter. Margins narrowed on higher selling expenses as a result of a major sales force expansion. However, following investment income of $687,000, versus an investment loss of $1.0 million, pretax earnings increased 36%. After taxes at 35.0% in both interims, net income was also up 36%, to $0.34 a share from $0.25.

Important Developments

Nov. '89— PNS said that it had repurchased about 275,000 of its common shares (about 1.5% of those utstanding) under an authorization to buy back up to 5% of its stock.

May '89— PNS acquired, for $21.1 million and the assumption of certain liabilities, the Systems division of Genigraphics Corp., which manufactures and markets presentation graphics software, workstations and peripherals.

Next earnings report expected in mid-February.

Business Summary

Pansophic Systems develops, markets and supports packaged software products which aid users in the operation, management, and control of computer systems. The products operate primarily on IBM and IBM-compatible mainframe computers, IBM System/3X and AS/400 minicomputers, IBM microcomputers, and other mini and microcomputers, mainly those of Digital Equipment Corp. and Data General. Contributions by product areas:

	1988-9	1987-8	1986-7
System life cycle	31%	38%	40%
Productivity	41%	41%	44%
Applications	15%	9%	6%
Graphics	7%	5%	2%
Other	6%	7%	8%

System Life Cycle products include PANVALET, a library management product which provides storage, controls access and simplifies the ongoing maintenance and production of computer programs, and TELON, a productivity-enhancing applications generation product.

Productivity products include the EASYTRIEVE PLUS and FUSION lines of information retrieval/data management programs, and PANAUDIT PLUS, which is employed in auditing applications. The CORPORATE TIE and PANLINK are mainframe-to-micro communications links, GENER/OL is a non-procedural applications development tool, and TELEVIEW is a session management product.

Applications software products offer manufacturing, distribution and financial reporting capabilities, exclusively for the IBM midrange market.

PNS' graphics software operates in mainframe, mini and microcomputer environments.

Dividend Data

Dividends were initiated in late 1986. A "poison pill" stock purchase right was adopted in 1988.

NYSE Symbol PCI Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 31'89	1989					
55⅞	66¾-39½	40	0.70	1.3%	B+	0.90

Summary

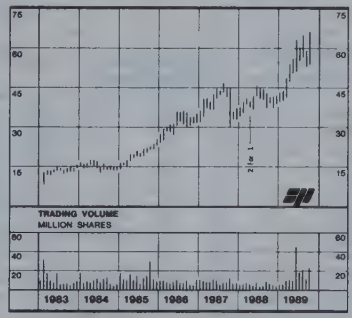
In October 1989, this major entertainment and publishing company (formerly Gulf + Western Inc.) sold its Associates finance business to Ford Motor Co. for $3.35 billion. Paramount was recently unsuccessful in a bid to acquire Time Inc. for about $10.7 billion, but PCI may seek to acquire another sizable company. Also, PCI could be an acquisition target itself.

Current Outlook

On the unlikely assumption that PCI's cash position of more than $3 billion is used only to generate investment income, earnings from continuing operations for the fiscal year ending October 31, 1990, are estimated at $2.30 a share, up from the $0.75 expected for fiscal 1989, which includes unusual third-quarter charges, but excludes prospective asset sale gains.

Dividends currently are at $0.17½ quarterly; future dividend policy could be affected by acquisition activity.

PCI's current entertainment and publishing businesses are expected to have operating profit of about $435 million in fiscal 1990, up from the approximately $410 million expected for fiscal 1989.



Net Revenues[1] (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Jan.	773	706	657	461
Apr.	699	620	559	438
Jul.	951	795	695	619
Oct.		936	993	576
		3,056	2,904	2,094

Revenues for the nine months ended July 31, 1989, increased 14%, year to year. After sizable expense related to an attempted acquisition, net earnings from continuing operations fell to $0.20 a share, from $0.61.

	E0.75	3.21	2.88	1.83

Important Developments

Oct. '89— PCI completed the sale of its its Associates First Capital (AFC) finance unit to Ford Motor Co. for $3.35 billion. AFC had net income of $237.8 million in fiscal 1988. PCI was expected to have an after-tax gain of about $1.3 billion from the sale, and after taxes, net proceeds to PCI were expected to be about $2.7 billion (about $22.60/share). Earlier, in July, PCI terminated an offer to acquire Time Inc. for about $10.7 billion, following several court decisions that were unfavorable to PCI. It appears that PCI may make another attempt to acquire a sizable company in the entertainment/media area. PCI's former target, Time, is now known as Time Warner Inc., reflecting its still-in-process merger with entertainment company Warner Communications. In June, PCI changed its name to Paramount Communications from Gulf + Western Inc.

Next earnings report expected early January.

Business Summary

This major entertainment and publishing company (formerly Gulf + Western Inc.) is now operating with two primary business segments, following the sale of its consumer/commercial finance business. Contributions to profits in the past two fiscal years:

	1988	1987
Consumer/commercial finance	46%	41%
Publishing/information	23%	21%
Entertainment	31%	38%

Entertainment includes Paramount Pictures Corp., which produces and distributes filmed entertainment; Famous Players, which operates about 448 movie screens in Canada; a 50% interest in a U.S. theater business; interests in overseas movie theaters; Madison Square Garden, which PCI is planning to renovate; the MSG cable channel; and a 50% interest in the USA cable network. Also, PCI has purchased, subject to regulatory approval, a 79% equity interest in TVX Broadcast Group Inc., which owns a group of independent television stations.

Publishing and information services, operated through Simon & Schuster and Prentice Hall, include hardcover and paperback books for the general public, textbooks and information services.

PCI's consumer/commercial finance operations, which were conducted by Associates First Capital Corp., were sold to Ford Motor Co. in October 1989 for $3.35 billion.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 2'90	1989-90					
26⅝	32⅛-24	13	0.84	3.2%	B+	1.50

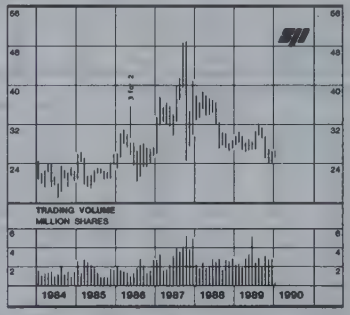
Summary

This company is a worldwide supplier of components for fluid power systems to a wide range of industrial, automotive and aerospace markets. Increased interest expense, lower margins, restructuring charges and higher taxes led to a decline in earnings in fiscal 1989. A forecasted modest gain in sales, improved margins, the probable absence of nonrecurring charges, stable interest costs and a level tax rate should result in higher earnings in fiscal 1990.

Current Outlook

Share earnings for the fiscal year ending June 30, 1990 are projected at $2.30, versus fiscal 1989's $2.11, which excludes a special credit of $0.44. The $0.21 quarterly dividend may be raised in 1990.

Revenues are expected to rise at a less rapid rate in fiscal 1990, reflecting slower growth in the industrial and automotive segments and continued strength in the dollar. Margins should improve, as PH benefits from declining raw material costs while still having raw material surcharges in place. Also, aerospace margins will expand following PH's absorption of costs on new aircraft programs in fiscal 1989. Assuming stable interest costs, the probable absence of restructuring charges and a level tax rate, earnings should rise.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	611	596	513	444
Dec.	---	613	550	446
Mar.	---	654	574	471
Jun.	---	658	615	516
	---	2,520	2,252	1,877

Sales for the three months ended September 30, 1989 rose 2.5%, year to year, primarily reflecting gains in the industrial segment. Gross margins were adversely affected by increased aerospace contract reserves and operating income declined fractionally. Penalized further by higher interest expense and lower nonoperating income, pretax income fell 10%. After taxes at 40.0%, versus 40.3%, net income decreased 9.8%. Share earnings were $0.48, versus $0.54.

	E2.30	2.11	2.20	1.88

Important Developments

Dec. '89— PH sold its three automotive aftermarket divisions for approximately $80 million in cash. The company said that the sale would result in a modest gain and that proceeds would be used principally to retire debt. PH said that it planned to focus its automotive efforts on its traditional product lines, such as hose, connectors and air conditioning components.

Aug. '89— The company completed the repurchase of 2.5 million common shares on the open market at an average cost of $28 a share. The share repurchase was undertaken in connection with the establishment of a leveraged Employee Stock Ownership Plan. Under the ESOP, PH established a trust which borrowed $70 million to implement the purchase of PH's common shares for the ESOP.

Next earnings report expected in late January.

Business Summary

Parker Hannifin designs and manufactures devices to control, confine, and utilize the flow of fluids. Contributions by business segment in fiscal 1989:

	Sales	Profits
Industrial	62%	63%
Aviation/Space/Marine	28%	28%
Automotive	10%	9%

Repair and replacement components account for about half of total sales. Foreign operations accounted for 21% of sales and 24% of profits in fiscal 1989.

Industrial products include a broad line of fluid power systems and components, including cylinders, pumps, and valves. These products are used in industrial, agricultural, construction, and other operations.

The aviation group manufactures sophisticated high-precision components for military and commercial aircraft, space, marine, and other uses. Products include flight controls, fueling systems, and actuators.

Automotive products consist of air conditioning components, and lubrication pumps sold primarily to original equipment manufacturers. PH sold its three automotive aftermarket divisions in late 1989.

Biomedical operations (begun in 1981) include external and implantable programmable drug delivery pumps and plasma therapy products such as pumps, controls, filters and separators.

Dividend Data

Dividends have been paid since 1949. A "poison pill" stock purchase right was adopted in 1987.

24 1/2	28 3/8-22 7/8	10	0.40	1.6%	B-	0.51

Summary

Penn Central's core businesses are in the telecommunications and defense industries. PC also has significant real estate holdings. As part of an asset redeployment program, PC has sold major businesses over the past three years. PC entered the insurance business in March, 1989 through an acquisition, and additional acquisitions were planned.

Business Summary

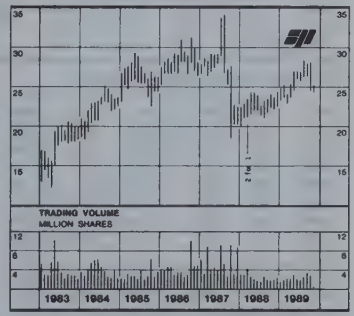
Penn Central manufactures products and supplies services primarily in the telecommunications and the defense industries. PC also has significant property holdings. Through the March, 1989 acquisition of Republic American, PC's businesses included a workers' compensation insurance company. Industry segment contributions in 1988:

	Revs.	Profits
Telecommunications	60%	55%
Federal systems	26%	20%
Diversified industries	14%	25%

Penn Central Telecommunications Co. is one of the largest copper wire and cable manufacturers in the U.S. Wire and cable products are used for the transmission of voice, data and electrical current. Other products include high performance connectors for commercial and defense applications, and the manufacture of aerial lift trucks for the telephone and electric utility industries.

The Federal Systems group provides systems and software engineering to the military, related primarily to ballistic and guided missiles, ship communications and air support systems. The group also designs, builds and installs computer-tracking radar and radar simulation systems throughout the world.

The diversified industries group include Marathon Manufacturing Co., and real estate and coal properties operations. Marathon is a worldwide competitor in the manufacture and sale of heavy-duty, off-road equipment, and also makes specialized batteries and jack-up offshore drilling rigs. Real estate operations include the marketing of real estate that related to former rail operations, transferable air rights in the New York City area, and coal properties and leases held principally in Illinois. In March, 1989 PC acquired Republic American Corp., which is engaged in the sale of workers' compensation insurance in California.



PC sold Gulf Energy Development Corp. in July, 1988. The electronics components business was spun off in August, 1987. Pipeline and gas distribution businesses were sold in December, 1986.

Important Developments

Aug. '89— PC offered for public sale $200 million of 9.75% subordinated notes, due August 1, 1999, through Shearson Lehman Hutton, Drexel Burnham Lambert Inc., and other underwriters. Net proceeds would be used for general corporate purposes, including possible acquisitions and investments. Under certain conditions, holders would have the option of requiring the company to repurchase the notes at par plus accrued interest.

Mar. '89— PC completed the acquisition of all the common stock of Republic American Corp. that it did not already own for $15.75 a share, or a total of about $249 million.

Next earnings report expected in late January.

Penney (J.C.)

NYSE Symbol JCP Options on ASE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 22'89	1989					
71⅛	73¼-50⅜	11	2.24	3.1%	A	1.13

Summary

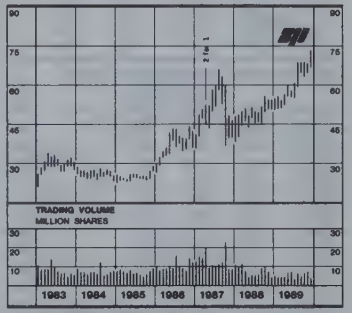
J.C. Penney is one of the largest retailers of general merchandise through its stores and catalog operations. In mid-1987 the company announced a major program to reposition its merchandising strategy, which would entail substantial expansion of its women's apparel line and discontinuance of some hard goods products. The repositioning coupled with cost cutting should enhance profitability in the next few years.

Current Outlook

Share earnings for the fiscal year ending January 31, 1991 are projected at $7.25, versus the $6.25 estimated for 1989-90.

An increase in the $0.56 quarterly dividend is anticipated.

Sales for fiscal 1990-1 will reflect moderate increases in comparable store sales and new store additions. Margins should benefit from the change in product mix, greater emphasis on apparel, and fewer markdowns and tight cost controls. Share earnings will reflect fewer shares outstanding. Acquisitions are possible.



Sales (Billion $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Apr.	3.34	3.17	3.22	3.05

Jan.	---	4.84	4.94	4.99
	---	14.83	15.33	14.74

Sales for the 39 weeks ended October 28, 1989 rose 8.5%, year to year. Gross margins widened slightly and SG&A expenses remained at the same percentage of sales. Following a decline in costs and expenses of other businesses and interest expense, pretax income advanced 15%. After taxes at 31.8%, versus 33.3%, net income rose 17%. Share earnings were $3.36 (on 8.6% fewer shares), versus $2.74.

	E6.25	6.02	4.11	3.53

Important Developments

Nov. '89— JCP said that promotional events launched in October contributed to the momentum which continues to build for the Christmas selling season. During the third quarter of fiscal 1989-90, gross profit declined as a percentage of sales, reflecting promotional activity; the SG&A ratio also declined as a percentage of sales. The company sold its property and casualty operations to Metropolitan Property and Casualty Insurance Co. JCP did not incur any significant gain or loss in the sale. In October, the company opened a store at Newport Center, Jersey City, N.J. and also planned to open a 139,000 sq. ft. store at Queens Center, Elmhurst, N.Y. in May, 1990. During the first half of fiscal 1989-90, the company purchased 10 million under a 15 million share buyback program authorized in 1988.

Next earnings report expected in mid-February.

Business Summary

J. C. Penney is one of the largest retailers of family apparel, home furnishings and leisure lines operating through 1,789 stores in 50 states and Puerto Rico at the end of fiscal 1988-9 and its catalog mail order operations. JCP sold its Belgian retail operations in 1987.

At January 31, 1989 JCP had 698 metropolitan market department stores with sales per square foot in fiscal 1988-9 of $118. The metropolitan market stores are primarily in premier regional shopping centers in the suburbs. There were 657 geographic market stores with sales per square foot of $113 located in nonmetropolitan areas and in satellite towns. Catalog sales totaled $2.9 billion in fiscal 1988-9, 20% of total retail sales. The company operated 1,879 catalog sales facilities, located in J.C.Penney stores, selected drug stores, and in free standing facilities.

Drug stores, operating under the Thrift and The Treasury Drug Center names, totaled 434 stores at fiscal 1988-9 year-end. Together, these units accounted for 6.6% of company fiscal 1988-9 sales.

J.C. Penney Life Insurance Co. markets life, health and credit insurance through direct response. During the third quarter of fiscal 1989-90 the company sold its J.C. Penney Casualty Insurance Co. unit. JCP Realty had interests in more than 80 projects at fiscal 1988-9 year-end, primarily regional shopping centers.

Dividend Data

Dividends have been paid since 1922. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 8'89	1989					
79⅝	86-71⅝	13	3.00	3.8%	B-	0.29

Summary

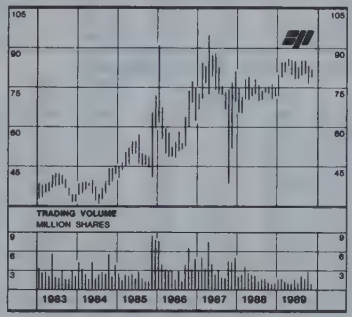
Pennzoil is a diversified oil and gas company with interests in sulphur mining and filtration products. In April, 1988 PZL received a $3 billion litigation settlement from Texaco Inc. arising out of TX's acquisition of Getty Oil Co. Following the receipt of the settlement, PZL has been restructuring its oil and gas operations in order to enhance its domestic reserve base and to widen the distribution of its leading branded products. PZL is expected to reinvest the settlement proceeds by year-end 1990 in oil and gas equity interests that would broaden the company's integrated energy operations.

Current Outlook

Share earnings for 1990 are projected at $4.20, versus 1989's estimated $5.90, which includes a projected net nonrecurring gain of $1.35.

The $0.75 quarterly dividend, raised 36% in early 1988, is the minimum expectation.

Revenues for 1990 will be limited by the absence of a gain from the sale of PZL's investment in Burlington Resources Inc. Earnings comparisons will be further restricted by the expected dilution from the planned acquisition of the 51.3% of Proven Properties Inc. that PZL doesn't already own.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	673	485	445	514
Jun.	791	548	443	485
Sep.	644	617	450	426
Dec.	---	625	499	497
	---	2,274	1,836	1,921

Revenues for the nine months ended September 30, 1989 rose 28%, year to year, due to a gain on the sale of Burlington Resources common stock and greater investment income. In the absence of the 1988 period's restructuring charges, net income was $206.0 million ($5.36 a share), versus a loss of $223.0 million ($5.93, excluding a gain on the Texaco settlement of $42.00).

	E5.90	d5.22	0.69	1.28

Important Developments

Nov. '89— Operating earnings of the oil and gas business in 1989's third quarter were up sharply, year to year, due to higher crude oil price and lower exploration expenses; profits in the motor oil and automobile products segment fell due to higher crude oil prices. Third quarter 1989 profits in the sulphur unit were restricted by higher operating costs, offset in part by increased sales volumes. Results in the filtration segment were impaired by eroding margins. In 1989's first nine months PZL incurred a $13.5 million provision for losses on marketing assets associated with the quick lube industry. Other income was up substantially in 1989's first nine months, versus a year earlier, due to investment income. Also, PZL recorded a gain on the sale of common stock of Burlington Resources Inc. in 1989's second quarter.

Next earnings report expected in late January.

Business Summary

Pennzoil Co. is a natural resources company with five wholly-owned major subsidiaries. The exploration and production company is engaged in crude oil and natural gas development. The products company manufactures and markets a broad range of refined products, including PZL's leading brand of motor oils. PZL explores for and produces sulphur. Facet Enterprises manufactures and markets filters and other equipment. Richland Development Corp. manages the company's real estate and gold mining interests. PZL also has a 48.7% interest in Proven Properties Inc., which was formed to acquire and operate producing oil and gas properties. Profits in recent years:

Oper. profits	1988	1987
Oil & gas production	18%	32%
Petr. ref. & mkt.	46%	44%
Sulphur	33%	24%
Filtration products	3%	---

In 1988 net crude oil, condensate, and natural gas liquids production averaged 30,544 barrels a day, natural gas produced for sale 355.1 million cubic feet a day, refinery runs, 58,523 b/d, and petroleum product sales 78,152 b/d.

Net proved reserves at 1988 year-end were 150 million barrels of oil, condensate and natural gas liquids and 967 billion cubic feet of natural gas. In 1988, PZL replaced 100% of its crude and liquids production and 132% of its gas production.

Following the April, 1988 receipt of its $3 billion settlement from Texaco Inc., PZL implemented a major restructuring that included a $489 million asset writedown. In order to defer the gain attributable to the settlement, PZL must acquire replacement property before 1991.

Dividend Data

Dividends have been paid since 1925. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

Summary

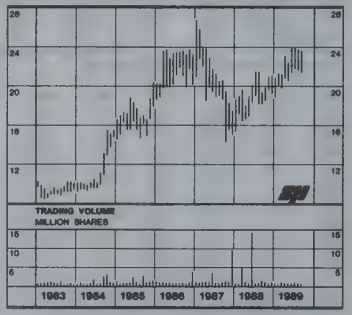
This holding company operates two natural gas distribution utilities in Illinois, serving about one million customers in Chicago and 56 communities in the northeastern part of the state. PGL has an excellent gas supply, and modest rate base growth is expected due to a growing residential and commercial customer base. Earnings for the first nine months of fiscal 1989 declined on higher operating expenses.

Current Outlook

Share earnings for the fiscal year ending September 30, 1990 are projected at $2.45, up from the $2.35 estimated for fiscal 1989.

Dividends are expected to continue at $0.40 quarterly.

Assuming normal weather conditions, gas utility profits for fiscal 1990 are expected to rise, reflecting expected small growth in the number of residential and commercial customers served by North Shore Gas and Peoples Gas Light and Coke. Long-term prospects are enhanced by expected development of new gas markets, including the market where gas is used for environmental reasons.



Operating Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	292	275	331	397

Important Developments

Aug. '89— The Illinois legislature passed a bill under which no assistance is to be provided to participants under the Illinois Residential Affordable Payment Program (IRAPP) after October 31, 1989. This bill also established an energy assistance program in lieu of IRAPP. The Illinois Commerce Commission (ICC) determined the reimbursable shortfalls incurred by PEL under the IRAPP program were $4,825,000.

May '89— PGL and Trunkline Gas Co., a Panhandle Eastern Corp. pipeline unit reached an agreement whereby Trunkline would construct a 24-mile pipeline extension from its mainline near Tuscola, Ill. to PGL's facilities. The connection would allow for delivery of up to 270 million cubic feet of gas per day, and is expected to be useable during the 1989-90 heating season.

Next earnings report expected early November.

Business Summary

Peoples Energy Corp.'s operations consist of two gas distribution utilities located in Illinois. Revenues in the past two fiscal years were derived as follows:

	1988	1987
Residential	69%	67%
Commercial	18%	21%
Industrial	7%	10%
Other	6%	2%

The Peoples Gas Light and Coke Co. subsidiary distributes natural and synthetic gas to approximately 845,000 residential, commercial and industrial customers within Chicago. The utility also operates a synthetic gas production plant, a gas storage field, and a liquefied natural gas plant.

The North Shore Gas Co. unit serves more than 110,000 residential, commercial and industrial customers in 56 communities in northeastern Illinois.

Gas volumes sold and transported in fiscal 1988 totaled 284,611 MMcf, versus 259,030 MMcf a year earlier.

The company obtains most of its gas supply from Natural Gas Pipeline Co. of America (formerly a subsidiary, but now a unit of MidCon Corp.) under long-term contract. Supplementary sources, including synthetic natural gas, are used to meet peak seasonal requirements.

The Peoples Gas Light and Coke Co. and North Shore Gas Co. units are subject to regulation by the Illinois Commerce Commission.

Dividend Data

Dividends have been paid since the 1981 restructuring. A dividend reinvestment plan is available.

Summary

This major soft drink company is also a leading operator and franchisor of restaurants, with its Kentucky Fried Chicken, Pizza Hut and Taco Bell chains. In addition, PEP's Frito-Lay snack food unit is a dominant force in the U.S. and a major presence overseas. In 1989, PEP has spent about $3.1 billion on the acquisition of additional soft drink bottling operations and two major snack food companies in the United Kingdom.

Current Outlook

Earnings for 1990 are estimated at $4.00 a share, up from the $3.42 expected for 1989.

The dividend was raised 19%, to $0.25 quarterly with the June, 1989 payment.

Further broad-based profit growth is expected in 1990. Pizza Hut's improvement will be fueled by its delivery business, while Taco Bell's emphasis on a lower-priced menu is expected to continue generating strong results. Recent weakness in PEP's domestic Kentucky Fried Chicken business is of some concern, but lower chicken prices, operational improvements, and menu additions are expected to help 1990 results. New products and international growth are expected to help boost snack food results, while aggressive marketing is expected to help keep soft drink demand at high levels.

Important Developments

Oct. '89— PEP said that full-year 1989 earnings would be more than 15% above 1988's $2.90 a share, despite about $0.40 dilution from key acquisitions. Recent acquisitions diluted third quarter earnings by $0.10 a share. In July, 1989 PEP acquired two leading snack food companies in the United Kingdom— Walkers Crisps and Smiths Crisps— from French company BSN, for $1.34 billion. In March, PEP acquired most of General Cinema's soft drink bottling operations for $1.77 billion. On a pro forma basis, including these acquisitions, in the first 36 weeks of 1989 PEP had net sales of $10.83 billion and earnings of $2.48 a share. Meanwhile, in 1989's third quarter, operating profit from the Pizza Hut and Taco Bell businesses each rose more than 40%, year to year, but the profit from Kentucky Fried Chicken's declined.

Next earnings report expected in early February.

Business Summary

PepsiCo's diversified interests include soft drinks, snack foods (Frito-Lay), and food service (fast-food restaurants).

1988	Revs.	Profits
Soft drinks	36%	31%
Snack foods	27%	43%
Restaurants	37%	26%

Foreign operations accounted for 19% of sales and 12% of operating profits in 1988.

Soft drink operations include the production and distribution (to franchised bottlers) of concentrates and syrups. Principal brands include Pepsi-Cola, Diet Pepsi, Pepsi Light, Pepsi Free, Diet Pepsi Free, Teem, Patio, Slice, Diet Slice and Mountain Dew. Products are available in roughly 150 countries and territories. PEP is also a major bottler of these products. In 1986, PEP acquired the international business of The Seven-Up Company for $246 million.

Food products operations are conducted domestically through Frito-Lay, which produces the nation's best-selling line of salty snacks, including potato chips and corn chips, and packaged cookies.

Restaurant chains include Kentucky Fried Chicken, which was acquired for $841 million from RJR Nabisco in October 1986; Pizza Hut and Taco Bell. At 1988 year-end the three chains had 17,353 units, including 10,457 franchise restaurants, 6,271 company units and 625 joint venture units. Of the total 3,798 were located outside the U.S.

Sep. 22'89	1989					
27	28¾–21⅜	25	0.68	2.5%	B–	1.30

Summary

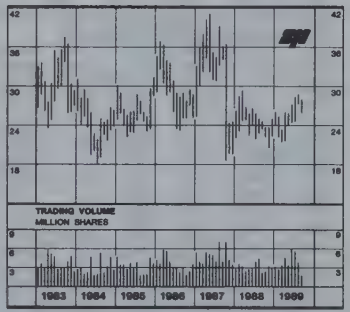
This high technology firm has embarked on a major restructuring in order to focus its efforts on analytical instruments and materials and surface technology. Proceeds from the sale of its semiconductor production equipment, aerospace electro-optical systems and avionic instruments businesses will primarily be used to repurchase common stock and/or make a cash distribution to shareholders. An 82% interest in Concurrent Computer Corp. was sold in 1988. Excluding a large loss on the restructuring, earnings from continuing operations rose substantially in fiscal 1989. Slower earnings growth is likely in fiscal 1990.

Current Outlook

Earnings from continuing operations for the fiscal year ending July 31, 1990 should rise to $1.40 a share from the $1.08 reported from continuing operations in fiscal 1989.

The $0.17 quarterly dividend could be augmented by a special dividend resulting from the restructuring.

Sales from continuing operations for fiscal 1990 are expected to increase only moderately, led by strong growth of materials and surface technology. Instrument sales growth has recently slowed and it is likely to be substantially less than the rapid growth of recent years. Margins should benefit from the higher volume and a continuing program of cost reductions. Interest expense should decline substantially as cash is received from the sale of divested businesses. Share repurchases would boost per-share earnings further.



Net Sales (Million $)

Quarter:	1989–90	1988–9	1987–8	1986–7
Oct.	---	---	257	312

Business Summary

Perkin-Elmer manufactures technology-based products. Contributions by segment:

Fiscal 1988	Sales	Profits
Instruments	41%	43%
Semiconductor equipment	17%	2%
Materials and surface technology	15%	20%
Bodenseewerk Geraetetechnik	14%	25%
Government systems	13%	10%

Foreign sales accounted for 49% of sales and 59% of operating income from continuing operations in fiscal 1988.

Analytical instruments made by PKN are used in determining the composition and molecular structure of chemical substances and measuring the concentration of materials in a sample.

The materials and surface technology group produces combustion, electric arc, and plasma thermal spray equipment and supplies.

The company's other operations were classified as discontinued in the third quarter of fiscal 1989 and are being held for sale. The semiconductor production equipment group is the largest supplier of that type of gear. Products include microlithography equipment, sputters and plasma processing systems. Bodenseewerk Geraetetechnik, the company's West German affiliate, produces avionic instruments for military and commercial use. Government systems include electro-optical systems and components.

Dividend Data

Dividends were initiated in 1971. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Dec. 26'89	1989					
21⅞	26¾-16⅜	33	0.20	0.9%	B	1.63

Summary

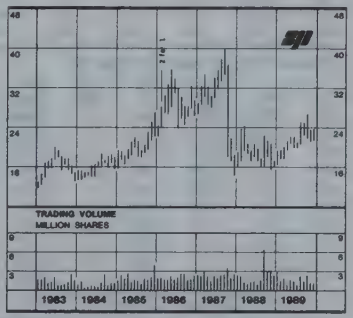
This retailer operates several moderate-price women's apparel chains in 48 states. The conversion in 1988 of almost $350 million of called PST debentures into Toys "R" Us common stock held by PST has lowered the company's long-term debt significantly while reducing its interest on TOY to about 14% from 25%. Earnings were hurt in the third quarter of fiscal 1989-90 by the effects of a hurricane in the Caribbean; comparisons should improve in fiscal 1990-1. Milton Petrie owns some 61% of the shares.

Current Outlook

Share earnings for the fiscal year ending January 31, 1991 are projected at $1.00, versus the estimated $0.70 of fiscal 1989-90.

The dividend should remain at $0.05 quarterly.

Sales in fiscal 1990-1 should reflect modest improvement in comparable store sales and some store expansion. Gross margins should widen slightly with fewer markdowns and improved volume, and expense ratios remain about level. Acquisitions are a possibility.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	279	261	282	262
Jul.	294	285	303	266
Oct.	297	287	300	291
Jan.	---	386	356	379
	---	1,218	1,242	1,198

Sales for the nine months ended October 28, 1989 rose 4.4%, year to year. Pretax income from operations declined 6.7%, but in the absence of some $3.0 million of equity earnings from Toys "R" US, total pretax net fell 18%. After taxes at 40.9%, versus 37.7%, net income was down 22%, to $0.27 a share from $0.35, which excludes a special credit of $1.22 from the extinguishment of debt.

Important Developments

Nov. '89— The company said that as a result of hurricane Hugo it suffered losses in Puerto Rico and the Virgin Islands equal to approximately $0.04 a share after taxes in the third quarter of fiscal 1989-90. Separately, PST said in May that it had been hurt by the nationwide recession in the women's retail fashion apparel industry that began in 1987 and continued through the early months of 1988. In light of this, PST reduced its capital expenses, closed a number of unprofitable or marginally profitable stores, and slowed its expansion program. Improvement began in the third quarter of fiscal 1988-9. Capital expenses for fiscal 1989-90 were budgeted at $30 million; plans call for the opening of 60 new stores.

Next earnings report expected in late February.

Business Summary

Petrie Stores is a leading operator of women's specialty apparel stores with representation in the field materially enlarged by acquisitions since late in 1983. Petrie also holds about 14% of the shares of Toys "R" Us, Inc. and about 24% of the shares of Paul Harris Stores, Inc.

The company specializes in retailing a full selection of women's apparel at moderate prices to teen, junior and contemporary miss customers. Petrie operated 1,580 stores as of April 7, 1989 in 48 states, Puerto Rico, the Virgin Islands and the District of Columbia. Stores operate under the trade names of Petrie's, Marianne, Stuarts, G&G, Hartfield's, Winkelman's, Jean Nicole, M.J. Carroll and Rave.

The Miller-Wohl chain of some 400 stores throughout the U.S. was acquired in June, 1984. In February, 1985 PST acquired 30% of stock of Winkelman's Stores, Inc. that it did not already own, and in June, 1986 PST acquired 32 former Lerner Stores located in Puerto Rico and the Virgin Islands from The Limited, Inc.

At January 28, 1989 the company had a 23.5% equity stake in Paul Harris Stores, Inc.

Dividend Data

Dividends have been paid since 1968.

Next dividend meeting: mid-Mar.'90.

Finances

In March and July, 1988 PST exchanged some 14.2 million Toys "R" Us common shares it held for its called $350 million of 7.5% and 8% subordinated debentures, reducing its stake in TOY to about 14%. The exchanges resulted in an after-tax gain of $57.1 million. As of May 1, 1988 the company ceased accounting for its investment in the common stock of Toys "R" Us on the equity method.

Capitalization

Summary

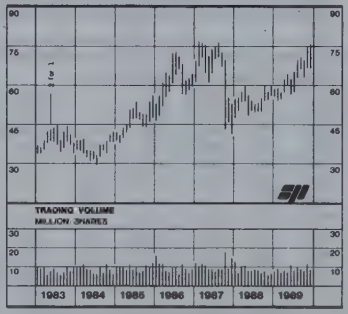
This company is a leading ethical drug producer, and also has important positions in hospital products, animal health items, specialty chemicals, consumer products, and materials science products. Earnings for 1990 should rebound from the depressed $4.30 a share likely for 1989, aided by contributions from new drug products and cost economies.

Current Outlook

Earnings for 1990 are expected to rebound to the $4.80 a share area, following the modest decline to $4.30 estimated for 1989.

An increase in the $0.55 quarterly dividend is likely.

Sales for 1990 are expected to post further growth, aided by gains in established pharmaceuticals, medical devices and consumer products. New drug products, including Procardia XL and Cardura cardiovasculars, Unasyn and a number of other anti-infectives and several central nervous system agents, should also contribute to the gain. Margins should benefit from the better volume and cost efficiencies.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,436	1,298	1,120	1,032
Jun.	1,303	1,336	1,227	1,118

Important Developments

Dec. '89— The company said that it anticipated a modest decline in fourth quarter earnings. As a result, profits for the full year 1989 were expected to show a decline of almost 10% as compared with 1988. Negative factors continuing to impact earnings included the stronger dollar, unfavorable conditions in certain businesses, delays in regulatory approvals for new drugs and heavy R&D and new product introduction costs. The company also announced an agreement to sell its 30% interest in the DeKalb-Pfizer Genetics seed partnership to DeKalb Genetics for $80 million. In September the FDA approved Procardia XL, a once-a-day formulation of PFE's Procardia cardiovascular drug. Other new drugs include Diflucan antifungal; Cardura, Minipress XL and Norvasc cardiovasculars; and Unasyn and Sulperazon anti-infectives.

Next earnings report expected in mid-January.

Business Summary

Pfizer's business segment contributions in 1988:

	Sales	Profits
Health care	64%	81%
Animal health	10%	5%
Specialty chemicals	10%	4%
Consumer	9%	7%
Materials science	7%	3%

International operations contributed some 46% of sales and 38% of operating profits in 1988.

Health care products include antibiotics (14% of 1988 sales) such as Unasyn, Sulperazon, Cefobid, Terramycin and Vibramycin; cardiovasculars (12%), including Procardia and Minipress; and anti-inflammatories (12%) such as Feldene antiarthritic. Other compounds include Sinequan psychotherapeutic, and Diabinese and Glucotrol antidiabetes agents. A number of hospital products are also sold, including orthopedic, surgical and cardiac devices.

Animal health products encompass a broad range of antibiotics, feed additives and anthelmintics.

PFE chemicals are sold primarily to the food, beverage and pharmaceutical industries and include bulk antibiotics, citric acid and vitamins.

Important consumer products are Ben-Gay ointment, Visine eye drops, Desitin ointment, Pacquin hand cream and cosmetics, Coty fragrances and Plax dental plaque removing rinse. Materials science items include specialty minerals, pigments and monolithic refractories.

Dividend Data

Dividends have been paid since 1901. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Phelps Dodge

NYSE Symbol PD Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 26'89	1989					
58½	78⅜-51⅜	4	[4]3.00	[4]5.1%	B-	1.38

Summary

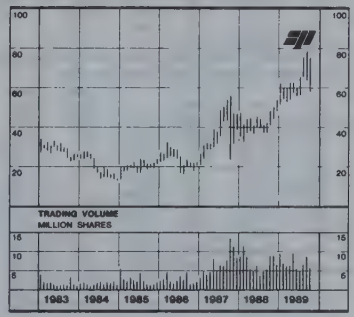
Phelps Dodge is the largest U.S. copper producer and, through subsidiaries, is also the major North American producer of truck wheels and rims, and the world's second-ranking producer of carbon black. Expanded application of a very low-cost copper production process will further reduce PD's already low costs. After a strong recovery by the copper market in 1987-89, earnings for 1990 may decline on sluggish economic growth. PD paid a special dividend of $10 a share in October, 1989.

Current Outlook

Earnings for 1990 are tentatively projected at $10.50 a share, down from 1989's estimated $14.75.

Regular dividends should continue at $0.75 quarterly; a $10 special dividend was paid October, 1989.

Sales for 1990 may decline significantly, as expected lower average annual copper prices outweigh anticipated little change in output. Manufacturing and specialty chemicals income will probably decrease moderately. Along with the diminished copper sales and expected much reduced interest income (reflecting payment of the special dividend), share earnings should fall, despite anticipated fewer shares outstanding.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	693	589	373	231

Dec.	E3.17	4.46	2.68	0.16
	E14.75	13.15	4.62	1.06

Important Developments

Oct. '89— PD paid a special dividend of $10 a share, mainly from available cash. During the 1989 third quarter, PD repurchased 126,800 of its common shares under its new 2,000,000-share buyback program begun in September, 1989. Earlier, PD called all of its convertible preference shares for redemption on April 1, 1989; 1,249,001 preference shares were converted into 6,404,800 common shares.

Dec. '88— At year-end PD had delineated over 125 million tons grading 1.25% copper at a significant copper deposit in northern Chile near its existing operations. The bulk of the deposit appeared amenable to open pit mining, and drilling and testing of this discovery was expected to continue through 1989.

Next earnings report expected in late January.

Business Summary

The largest U.S. copper producer, PD accounted for about 33% of domestic mine output in 1988. PD is also a major producer of magnet wire, carbon black, and truck wheels and rims, and has interests in foreign mining companies.

PD's share of copper mine output in 1988 was 494,500 tons. About 51% of the copper was from the 85%-owned Morenci, Ariz. mine (including 42,700 tons from the very low-cost solvent extraction/electrowinning-SX/EW-method of production), 32% from the Tyrone, N.M. mine (including 40,100 tons from SX/EW), 16% from 67%-owned Chino Mines (N.M.), and 1% from other sources. A 45,000-ton SX/EW plant at Chino, which started up in August 1988, produced 6,300 tons for PD's account in 1988; and an in-pit crush/convey system at Morenci began operation in early 1989. In August, 1989 PD announced a $112-million project to expand the Morenci SX-EW plant's annual capacity by 70,000 tons, beginning in mid-1991 and continuing through the end of the decade.

Output from PD's smelters was 271,100 tons of copper, including copper from PD's own mines and copper smelted under contract. PD refines its mined copper, as well as material refined under contract. Refined copper production totaled 426,900 tons in 1988.

Phelps Dodge Magnet Wire produces insulated magnet wire for use in electric and electrical devices; Phelps Dodge International oversees investments in companies that produce wire and cable in 14 foreign nations. PD's Columbian Chemicals is the world's second largest producer of carbon black for the rubber industry. In March, 1988 PD acquired ACCURIDE Corp., a major producer of truck wheels and rims, for $135 million cash.

Dividend Data

Dividends were resumed in late 1987. A "poison pill" stock purchase right was adopted in 1988.

Philadelphia Electric

NYSE Symbol PE Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 4'90	1989-90					
22⅞	24½-19⅛	10	2.20	9.6%	A-	0.39

Summary

This electric and gas utility owns and operates the two unit Limerick nuclear facility. Limerick 1 entered service in January, 1986 and Limerick 2 is expected to enter commercial operation by mid-January, 1990. The company also has a 42.5% interest in the two unit Peach Bottom nuclear station. PE, which was severely criticized for mismanagement at the Peach Bottom facility, returned both units to service by year-end 1989. The company's longer-term outlook is materially improved owing to its completed nuclear construction program, as well as favorable regulatory and financial prospects.

Current Outlook

Share earnings for 1990 are projected at $2.60, up from the $2.30 estimated for 1989.

The $0.55 quarterly dividend can be maintained provided the rate relief for Limerick 2 is reasonably supportive.

Share earnings for 1990 should benefit from higher sales, increased rates, and lowered production costs on the full commercial operation of the company's nuclear facilities. Longer-term prospects are strengthened by PE's completed construction program and a good regulatory environment.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	890	851	889	869
Jun.	778	700	735	675
Sep.	895	899	839	804
Dec.	---	779	738	743
	---	3,229	3,181	3,091

Revenues for the nine months ended September 30, 1989 rose 4.6%, year to year, owing to higher rates for the Limerick 1 nuclear plant and increased sales. An increase in fuel and energy interchange costs was offset by lower taxes, and operating income advanced 5.5%. However, after higher interest costs, net income declined 2.2%. Following preferred dividend requirements, share earnings were $1.85 on 4.0% more shares, compared with $1.98.

Common Share Earnings ($)

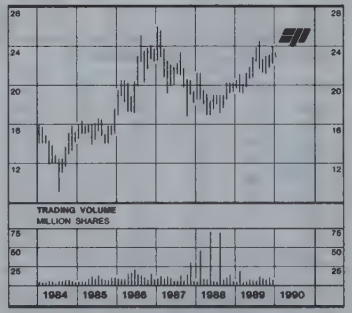
Dec.	E0.45	0.36	0.46	0.42
	E2.30	2.33	2.33	2.59



Important Developments

Dec. '89— Following the December 12 start-up of its Peach Bottom Unit 3, PE stated that all four of its nuclear units were in service and were expected to be at full power by early 1990. On October 5 the NRC released the company from the terms and conditions of the NRC's March, 1987 shutdown order with respect to the Peach Bottom units, permitting PE to run Unit 2 and Unit 3 at 100% capacity. Peach Bottom Unit 2 was restarted in April, 1989. Separately, in July, 1989 PE filed with the Pennsylvania PUC a rate request for the Limerick 2 nuclear plant. The company is seeking to recover plant expenditures through a $549.0 million rate increase phased in over a 10 year period. The final rate order is expected on April 20, 1990. Limerick 2, which is projected to reach full commercial operation by mid-January, 1990, completes PE's base load construction program for the foreseeable future.

Next earnings report expected in late January.

Other	5%	5%	5%	6%

Sources of generation in 1988 were nuclear 35%, coal 23%, oil 6%, and other including purchased power 36%. Peak demand in 1988 was 6,826 mw and system capability totaled 7,762 mw, for a capacity margin of 12%.

In February, 1986 PE's Limerick 1 nuclear unit entered operation. In 1988's first quarter PE wrote off some $463.3 million ($1.59 a share) of disallowed Limerick 1 costs, retroactive to 1986. PE completed construction of the Limerick 2 nuclear plant, which reached full power in November, 1989. The company agreed to a cost cap for the plant of $3.2 billion. The unit is under budget and scheduled for commercial operation in mid-January, 1990. PE has a 42.5% interest in and operates the Peach Bottom nuclear station which was restarted in late 1989, following its shutdown by the NRC in March, 1987. Auditors noted in their report on the company's 1988 financial statements legal actions related to the Peach Bottom outage.

Dividend Data

Dividends have been paid since 1902. A dividend reinvestment plan is available.

Oct. 27'89	1989					
41⅜	45¾-25	16	1.375	3.3%	A+	1.10

Summary

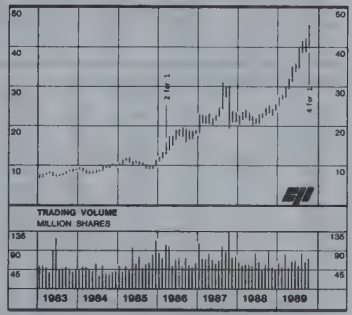
Philip Morris is the largest cigarette company in the U.S., the second largest brewer with Miller Brewing Co., and through the acquisition of General Foods (1985) and Kraft (1988) is also a major producer of branded food products. Earnings for 1990 are expected to remain in a good uptrend, reflecting continued margin expansion on cigarettes and growing contributions from consolidation of General Foods and Kraft. The stock was split 4-for-1 in October, 1989, and the dividend was raised 22%.

Current Outlook

Earnings for 1990 may rise to $3.60 a share from the $3.00 estimated for 1989, after giving effect to the 4-for-1 split.

The dividend was raised 22%, to $0.34¾ quarterly from $0.28½ (both adjusted), with the October, 1989 payment.

Tobacco profits for 1990 should continue to benefit from acceleration of cigarette prices in the U.S., and rising volume and market share. Comparisons on international tobacco sales may be less robust, but good growth should continue. Miller Brewing operations may be limited by pricing pressures, but continued cost cutting in the food business, along with higher volume from new products and debt reductions should keep profits in a strong uptrend.



Sales[1] (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	10.77	7.42	6.55
Jun.	---	11.60	7.94	7.11
Sep.	---	11.25	7.74	6.97
Dec.	---	---	8.64	7.06
	---	---	31.74	27.70

Revenues for the nine months ended September 30, 1989 rose 45%, year to year, due largely to the Kraft acquisition. Operating income advanced 43%, but sharply higher interest expense held the gain in pretax income to 16%. After taxes at 41.8%, versus 44.2%, net income was up 22%, to $2.25 a share from $1.84 (adjusted), which excludes a $0.29 special credit.

Dec.	E0.90	E0.74	0.37	0.51
	E3.60	E3.00	2.22	1.94

Important Developments

Oct. '89— MO said that U.S., international and export cigarette volumes increased 8.5% in the 1989 third quarter and 7.6% for the nine months. Market share also improved in these periods, as did volume for Miller Brewing Co. In the food businesses, strong volume gains were seen for Oscar Mayer Foods, which includes Louis Rich turkey products.

Dec. '88— MO acquired Kraft, Inc. (KRA) via a tender offer of $106 a share, or approximately $12.9 billion in cash. KRA had revenues estimated at approximately $11 billion in 1988. The company expected the acquisition to dilute earnings due to goodwill amortization and acquisition financing costs until 1990.

Next earnings report expected in late January.

Business Summary

Philip Morris is the largest cigarette company in the U.S., and is a major food and beer producers. Contributions in 1988 were:

	Revs.	Oper. Profits
Tobacco	52%	76%
Food	36%	17%
Brewing	10%	4%
Financial and real estate	2%	3%

International operations accounted for 34% of sales and 10% of operating profits in 1988.

Philip Morris U.S.A., with 39% of the U.S. cigarette market, accounted for 27% of tobacco sales and 61% of tobacco profits in 1988. Major brands include Marlboro, Benson & Hedges, Merit, Virginia Slims and Cambridge. MO is a defendant in a number of product-liability suits related to cigarettes. Philip Morris International markets cigarettes in more than 107 countries abroad.

Miller Brewing (No. 2 U.S. brewer) holds 21% of the domestic beer market. Brands include High Life, Lite, Lowenbrau, Meister Brau, Milwaukee's Best, Genuine Draft and Matilda Bay wine cooler.

General Foods (acquired 1985) makes Post cereals, Entenmann and Hostess sweet baked goods, Jell-O desserts, Bird's Eye frozen foods, Maxwell House coffee and Oscar Mayer and Louis Rich processed meats. Kraft, Inc. (acquired 1988 for $12.9 billion) food products include Kraft and Velveeta cheese, Parkay and Chiffon margarines, Kraft mayonnaise and Miracle Whip and Sealtest, Light'n Lively, Meadow-Gold, Frusen-Gladje and Breyers dairy products. Finance units include Mission Viejo Realty.

Dividend Data

Dividends have been paid since 1928. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Philips Industries

NYSE Symbol PHL Options on Phila (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 9'89	1989					
24½	25¼-18⅛	15	2---	2---	A	1.37

Summary

On September 25, 1989 the PHL board of directors approved an agreement for a management-led leveraged buyout. Under the agreement, Philips would merge with MLPI Holdings Inc., a unit of Merrill Lynch Capital Partners Inc. Shareholders would receive $25.50 a share in cash. The buyout is subject to approval by shareholders and the receipt of sufficient financing. Chairman Jesse Philips has announced his intention to vote his shares (about 6.6% of total common stock) in favor of the transaction.

Current Outlook

Earnings for the fiscal year ending March 31, 1990 (for the company as now constituted) are estimated at $1.85 a share, compared with the $1.61 of fiscal 1988-9.

The quarterly dividend was raised 15%, to $0.15 from $0.13, effective with the August, 1989 payment.

Sales for fiscal 1989-90 are expected to show good gains, based on acquisitions and further penetration of selected markets. Margins will be hurt by rapidly rising raw materials costs.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	255.9	225.3	173.3	152.9

Acquisition Agreement

Sep. '89— The company announced on September 25 that its board of directors had approved a management-led buyout agreement for $25.50 a share in cash. If the proposal is approved by a majority of shareholders, Philips would merge with MLPI Holdings Inc., a unit of Merrill Lynch Capital Partners Inc., in a $750 million transaction. Jesse Philips, founder and chairman of the company, said that he strongly supported the transaction and that he intended to vote his shares (approximately 6.6% of total common shares outstanding) in favor of the merger. The transaction was subject to, among other things, the receipt of sufficient financing.

Next earnings report expected in early November.

Business Summary

Philips Industries manufactures components for the construction industry, including both manufactured and on-site residential housing, and industrial and commercial buildings. It also produces components for recreational vehicles, and air handling and treatment equipment. Business segment contributions in fiscal 1988-9:

	Sales	Profits
Air distribution products	24%	29%
Shelter products	17%	14%
Molded plastic products	17%	26%
Transportation products	20%	16%
Industrial components	22%	15%

Air distribution products include centrifugal blowers and components, which are sold to manufacturers of furnaces, air conditioners and heaters.

PHL's shelter products division is a leading manufacturer of aluminum windows, doors and vents for the manufactured housing and recreational vehicle markets.

PHL manufactures three types of molded plastic products: fiberglass/acrylic bath fixtures, including bathtubs and showers; fiberglass panels used in garage doors, skylights, patio covers and room dividers; and plastic pipe fittings.

Transportation products consist of axles and wheels for the general utility, manufactured housing and recreational vehicle markets.

Dividend Data

Dividends have been paid in each year since being resumed in 1977.

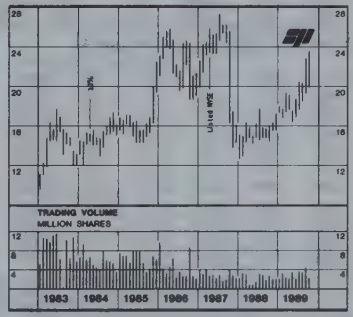
Summary

This Netherlands company is a world leader in the electrical and electronics field. The broad line of products ranges from light bulbs, TV sets and domestic appliances to medical, telecommunication and defense systems. In Janurary, 1989 PHG completed the sale of a 53% interest in a joint venture consisting of its Major Domestic Appliance division to Whirlpool Corp. for Dfl 1 billion. Earnings for the first half of 1989 were aided by strength in the Consumer Products and Lighting sectors, which outweighed weakness in Professional Products and Systems and the Components segment.

Business Summary

Philips N.V. is the holding company for Philips Industries, itself the holding company for various subsidiaries and affiliates in more than 60 countries, comprising one of the world's largest manufacturers of electronic and electrical products. Sales, profit and asset distributions in 1988:

	Sales	Profits	Assets
Netherlands	6%	11%	24%
Other Europe	55%	47%	44%
U.S. & Canada	22%	1%	16%
Other countries	17%	41%	16%



•Lighting (12% of sales in 1988; 32% of profits). Products include general lighting service lamps, gas discharge and special lamps, fixtures, special projects and batteries.

•Consumer electronics (33%; 11%). Major products include audio and video receivers, monitors, recorders and playback equipment, camera recorders, home office equipment, audio and video cassettes, hearing aids and sound carriers, including CDs.

•Domestic appliances (12%; 23%). Major domestic appliances include refrigerators, freezers, washing machines, dryers, dishwashers, cookers, and microwave ovens. Other products include vacuum cleaners and kitchen appliances, and shavers and other personal care products.

•Professional products and systems (27%; 15%). Products include X-Ray, ultrasound and magnetic resonance systems, electronic test and measuring equipment, analytical instruments including electron microscopes and spectrometers, mobile radio and business communication and computer systems, and radar and other defense systems.

•Components (14%; 14%). Include picture tubes, integrated circuits, discrete semiconductors, resistors, capacitors, and magnetic and ceramic materials.

•Miscellaneous (2%; 5%). Includes packaging, garage door openers and toothbrushes.

Important Developments

Aug. '89— Management said that PHG's results for the first half of 1989 were in line with forecasts for the year as a whole. In February PHG announced that it expected to record sales of Dfl 54 billion in 1989, an increase of some 6% over 1988, and achieve a substantial improvement in net income.

Next earnings report expected in early November.

Net Sales (Billion $)

Period:	1989	1988	1987	1986
3 Mos. Mar.	5.92	6.68	5.77	---
6 Mos. Jun.	11.92	12.45	---	---
9 Mos. Sep.		18.42	17.71	---
12 Mos. Dec.		28.01	29.83	25.33

Sales (in Dutch guilders) for the six months ended June 30, 1989 rose 2.9%, year to year, as increases in all product sectors outweighed deconsolidation of the major domestic appliance business. Despite strength in the Lighting and Consumer Products segments, margins were restricted by a less favorable product mix and price competition in the Professional Products and Systems sector, and high development costs in the Components sector. Following lower finance charges, pretax income was off 0.7%. After taxes at 39.9% versus 35.0%, and higher equity earnings, net income rose 24%. Share earnings were $0.74 (before a $0.07 extraordinary credit), versus $0.60, both translated at the June 30, 1989 exchange rate of Dfl 1 = $0.455.

Finances

In January, 1989 the company announced that it had completed its joint venture transaction with Whirlpool Corp., under which Whirlpool acquired, for Dfl 1 billion, a 53% interest in a joint venture formed by the two companies to develop, manufacture, market, sell and service major appliances under the Philips' brand names. The venture consists of PHG's Major Domestic Appliance division, which has annual sales of about $2 billion.

Summary

Phillips Petroleum is an integrated petroleum and chemical company. On October 23, 1989 the company's polyethylene facilities at its Houston Chemical Complex were destroyed by an explosion and fire. P expects to have about 40% of its polyethylene capacity back on line by year-end 1990. Property insurance is expected to exceed the book value of the destroyed facilities while business interruption insurance will enable P to maintain chemical earnings. Casualty insurance coverage has not been disclosed. Over the longer term, P is well positioned to expand its petroleum and chemical businesses.

Current Outlook

Share earnings for 1990 are projected at $2.55, before a possible nonrecurring gain from the insurance settlement related to the Houston Chemical Complex. Share earnings for 1989 are estimated at $2.35.

Dividends should continue at $0.25 quarterly.

Revenues for 1990 are expected to strengthen due to increased gas volumes. Profits will be enhanced by improved marketing margins. Property insurance for the Houston complex is at market while the facilities were valued at book, which is projected to result in a nonrecurring gain.

Operating Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	3.05	2.86	2.49	3.07
Jun.	3.26	2.84	2.61	2.30
Sep.	3.03	2.79	2.76	2.12
Dec.		2.81	2.86	2.30
		11.30	10.72	9.79

Revenues for the nine months ended September 30, 1989 rose 10%, year to year, reflecting higher crude oil prices and increased natural gas volumes. As a result of softening margins, pretax income was down 1.1%. After taxes at 43.6%, versus 39.3%, net income dropped 8.0%. Earnings were equal to $1.95 a share on 4.9% more shares, compared with $2.17.

Important Developments

Nov. '89— The company announced that it expects to be producing about 600 million pounds of polyethylene a year at its Houston Chemical Complex by year-end 1990. The announcement came two weeks after the polyethylene facilities at the complex were destroyed by an explosion and fire on October 23, 1989. Total capacity of the destroyed facilities was about 1.6 billion pounds a year. The company said that studies were well under way to determine how it could restore its U. S. polyethylene capacity to at least the former level. Production of K-resin, neohexene and polypropylene have been resumed at the Houston complex. Combined coverage of property and business interruption insurance is $1.3 billion which excludes a $70 million deductible. Casualty insurance coverage has not been disclosed.

Next earnings report expected in late January.

Business Summary

Phillips is engaged in petroleum exploration and production on a worldwide basis, and petroleum refining and marketing in the U.S. It is the largest producer of natural gas liquids (NGLs) in the U.S. and a major producer of chemicals.

Operating Profits (Million $)	1988	1987
Expl. & prod.	$526	$381
Ref., mkt. & trans.	471	201
Gas & gas liquids	15	39
Worldwide chemicals	911	482
Other	46	12

In 1988 crude oil production averaged 222,000 barrels a day (218,000 in 1987), natural gas production 1.2 billion cubic feet a day (1.1), natural gas liquids 186,000 b/d (182,000), crude oil refined (U.S.) 301,000 b/d (302,000), and petroleum products sold 585,000 b/d (555,000).

Net proved reserves at 1988 year-end stood at 775 million barrels of crude oil (744), 169 million barrels of natural gas liquids (165), and 5,509 (5,285) billion cubic feet of natural gas.

Since 1985, when the company sharply increased its leverage in order to ward off takeover efforts, P has been paring down its debt and P anticipates further debt reductions. In October, 1989 P reported it was reducing its 1990 capital spending budget to roughly equal the $1-$1.1 billion to be spent in 1989. The company also stated that it was interested in acquiring new reserves and that it was looking at Texas Oil and Gas Corp. a subsidiary of USX Corp.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1989.

Summary

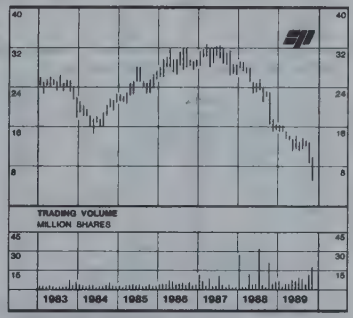
On December 1, 1989 PacifiCorp (PPW) offered to acquire this Arizona-based utility holding company through an exchange of 0.18 PPW common share for each PNW common share outstanding, subject to the prior sale of PNW's troubled MeraBank unit. In November, 1989 the Office of Thrift Supervision ordered PNW to increase MeraBank's tangible capital to 3% of total assets. PNW said at that time that it would consider bankruptcy proceedings if talks concerning MeraBank were unsuccessful.

Current Outlook

Share earnings for 1990 are projected at $0.20, before possible substantial nonrecurring charges related to PNW's MeraBank unit. The estimated loss per share for 1989 is $1.83, as MeraBank is expected to post significant losses in the fourth quarter.

The common dividend was omitted in October, 1989 owing to uncertainties with MeraBank and earnings difficulties with other subsidiaries.

Earnings for 1990 will be restricted by ongoing problems at Palo Verde, and poor economic conditions in Arizona. Also, PNW will likely incur substantial charges related to MeraBank.



Utility Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	332	313	290	275
Jun.	360	337	327	295
Sep.	459	469	393	392
Dec.	---	323	304	288
	---	1,442	1,313	1,250

Utility revenues for the nine months ended September 30, 1989 rose 2.8%, year to year. Following lower deferred items and increased interest charges, utility income was down 18%. After a 45% increase in interest expense at MeraBank and sustantially higher provision for loan and real estate losses, net income fell 89%. Share earnings were $0.17, versus $1.50.

Important Developments

Dec. '89— On December 1 PacifiCorp (PPW) revised its attempt to acquire PNW's Arizona Public Service Co. (APS) unit by offering to acquire PNW itself through an exchange of 0.18 PPW comon share (valued at about $8.00) for each PNW common share outstanding; PPW would either exchange comparable preferred stock or pay cash for outstanding APS preferred. The new offer, which followed an earlier proposal by PPW to acquire APS for $1.7 billion cash, required that PNW's troubled MeraBank unit be sold prior to closing after having received a capital infusion of $510 million from PNW, and that PNW's other assets (excluding APS) have a net value of $300 million. On November 10 the Office of Thrift Supervision (OTS) imposed an updated minimum capital requirement on PNW's MeraBank unit, requiring the thrift to increase its tangible capital to 3% of total assets, effective immediately.

Next earnings report expected in late January.

Business Summary

Pinnacle West Capital (previously AZP Group) is a utility holding company whose main subsidiary, Arizona Public Service Co., provides electricity to nearly half the population of Arizona. PNW owns MeraBank, the state's second largest financial institution. PNW also has major holdings in real estate, resource development, and venture capital. Due to changes in accounting requirements, PNW prepared its 1988 financial statements on a full consolidation basis, versus an equity basis in earlier years. Contributions in 1988 (million $):

Segments	Revs.	Net Inc.
Utility	$1,442.0	$237.9
Savings bank	643.7	-208.6
Other	48.0	-25.1
Net income (after subsid. pfd. dividends)	---	4.2

PNW's entire diversification program has been hurt by the soft Arizona economy. In 1988 MeraBank added some $180 million (pretax) to its loan loss reserves, PNW's SunCor real estate development unit established a $75 million (pretax) reserve, and Malapai Resources, the company's uranium mining subsidiary, incurred a $15 million (pretax) charge.

PNW has access to 29.1% of the three unit Palo Verde nuclear project. The rate structure for units 1 and 2 are finalized subject to prudency. Rates for unit 3 may be finalized in 1990.

Dividend Data

Common dividends were omitted in October, 1989 after having been paid since 1920. Subsidiary preferred dividends (Arizona Public Service Co.) were maintained. A "poison pill" stock purchase right was adopted in 1989.

Pitney Bowes

NYSE Symbol PBI Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 24'89	1989					
49¼	54¾-40⅞	15	1.04	2.1%	A+	1.31

Summary

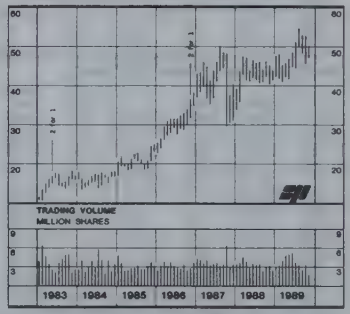
Pitney Bowes is the world's largest manufacturer of postage meters and related mailing equipment. It also manufactures dictation systems and markets copiers, facsimile machines and retail labeling equipment, and sells business supplies through catalogs. PBI also provides lease financing for its products and other financial services. Earnings are expected to advance moderately in 1990, benefiting from new products and improved operational efficiencies. PBI enhanced its mailroom management business with the recent acquisition of Pandick Technologies, Inc. for $100 million in cash.

Current Outlook

Earnings for 1990 are projected at $3.80 a share, up from the $3.40 estimated for 1989.

Dividends are likely to be raised from the current $0.26 quarterly rate in early 1990.

Revenues for 1990 are projected to rise about 10%. Equipment sales will continue to be boosted by shipments of new products. The company's mailroom management business will be enhanced by the October, 1989 acquisition of Pandick Technologies. Rental and financing revenues should have good growth from additions to the rental base of postage meters, facsimile machines and copiers, and from growth in the financing business. Support services will benefit from new maintenance agreements. Gross margins could improve slightly, aided by greater manufacturing efficiencies, but selling, service and administrative expenses, and research and development spending are not anticipated to decline significantly as a percentage of revenues.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	670	594	505	442
Jun.	704	659	552	486
Sep.	735	651	550	495
Dec.	---	746	643	563
	---	2,649	2,251	1,987

Revenues for the nine months ended September 30, 1989 rose 11%, year to year. Sales rose 4.7%, rentals and financing revenues (including revenues from financial services) advanced 18%, and support services revenues were up 16%. Operating expenses were essentially in line with revenue growth, but higher interest expense held the gain in pretax income to 9.5%. After taxes at 33.9%, versus 35.4%, net income was up 12%. Share earnings were $2.24, versus $2.01, which excludes income from discontinued operations of $0.08.

Dec.	E1.16	0.99	0.87	0.68
	E3.40	3.00	2.53	2.10

Important Developments

Oct. '89— PBI acquired Pandick Technologies, Inc. for about $100 million in cash. Pandick, a provider of on-site contract services for reprographics and mailroom management, had revenues of about $100 million for its fiscal year ended August 31, 1989. Separately, PBI announced plans to seek a buyer for its Wheeler Group subsidiary. Wheeler, which had revenues of $75 million in 1988, markets business supplies through direct mail catalogs and telemarketing.

Next earnings report expected in late January.

Business Summary

Pitney Bowes operates in three industry segments, whose contributions in 1988 were:

	Revs.	Profits
Business equipment	74%	60%
Business supplies & services	12%	12%
Financial services	14%	28%

Foreign operations contributed 21% of revenues and 21% of operating profits in 1988.

Business equipment includes postage meters (of which PBI is the largest manufacturer) and mailing, shipping and facsimile systems (53% of total sales in 1987), copiers and copier supplies (10%), and voice processing systems (10%), including dictating machines, automatic telephone answering systems, and voice communications recorders.

Business supplies and services include equipment and supplies used by retailers and their suppliers to encode price, content, item identification, and other merchandise information, and retail security systems as well as direct mail catalog sales of business forms and supplies, data processing supplies and pocket and desk calendars.

The financial services segment (consolidated since 1988 under FASB 94) provides lease financing for the company's products as well as financial services for the commercial and industrial markets.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

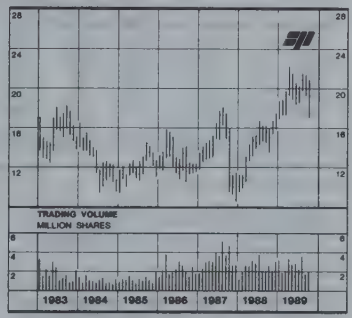
This company operates one of the nation's largest air freight carriers, is an important coal producer, and is a leader in armored car and home security services. A sharp earnings rebound is forecast for 1990, assuming the resolution of labor differences in coal operations and continued good gains for PCO's air freight unit. Dividend payments were resumed in June, 1989.

Current Outlook

Earnings for 1990 are projected at $1.25 a share, versus the $0.60 anticipated for 1989.

Dividend payments, resumed in mid-1989 at $0.05 quarterly, could be increased moderately in 1990.

A sharp profit rebound is anticipated for 1990, assuming a favorable settlement with striking coal miners early in the year. In addition to lost production, the miner's strike has been accompanied by heavy legal and security-related expenses. Air freight profits could advance moderately in 1990 after an estimated fivefold improvement in 1989, reflecting continued solid gains for international volumes and favorable shipment yields. Brink's could post lower profits, reflecting anticipated losses from the pending acquisition of Loomis Armored Inc., increasing competitive pressures and soft demand for air courier services. Home security services will continue to grow at a brisk pace.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	419	380	294	292
Jun.	413	392	292	307
Sep.	395	398	368	291
Dec.	---	413	387	300
	---	1,583	1,341	1,190

Revenues for 1989's first nine months rose 4.8%, year to year. Net income fell 31%, to $0.46 a share from $0.65, before special credits of $0.14, versus $0.22.

Important Developments

Oct. '89— Both PCO and the United Mine Workers (UMW) agreed to resume contract negotiations under the supervision of newly-appointed Federal mediator, William Usery. Some 1,700 UMW members have been on strike at PCO's coal operations in Virginia, West Virginia nad Kentucky since April after working for more than a year without a formal labor pact. PCO, which has suffered significant losses in its coal operations due to the strike, has predicted diminishing losses as productivity of newly-hired replacement workers improves. In a related matter, PCO reported that the UMW owes $4.8 million to the firm in strike-related fines.

Sep. '89— PCO agreed to acquire Loomis Armored Inc., a unit of Mayne Nickless Ltd., for an undisclosed amount. The acquisition of Loomis, which generates annual revenues of some $130 million, was subject to regulatory approval.

Next earnings report expected in late January.

Business Summary

Contributions (in million $) to operating profits by business segment in recent years:

	1988	1987	1986
Coal	$36.4	-$116.1	$6.7
Air freight	5.0	-19.1	-12.2
Armored cars	25.6	21.7	17.9
Home security	1.1	-1.7	-3.0

PCO produces coal primarily from underground mines in Virginia, West Virginia and eastern Kentucky. Pittston sold 16.0 million tons of coal in 1988 (including 2.1 million tons brokered), versus 16.2 million tons in 1987 (2.0 million). Some 38% of tonnage in 1988 was sold to domestic utilities and industrial customers; exports accounted for 45% of sales and domestic steel producers 17%. PCO also owns 25% of Dominion Terminal Associates, which operates a 15 million ton export coal facility in Virginia.

Burlington Air Express is one of the nation's largest air freight carriers. Operating a fleet of 23 leased aircraft, Burlington handled over 600 million pounds of freight in 1988, compared with 551 million pounds in 1987. The acquisition of WTC International N.V. in 1987 nearly doubled Burlington's export volumes, which generated 48% of revenues in 1988. Other services provided include customs brokerage and ocean freight forwarding.

Brink's is a leading provider of armored car services, operating worldwide with a fleet of 4,180 vehicles. Brink's also provides domestic and international air courier services, currency processing, coin wrapping services and maintains automated teller machines. Brink's Home Security, Inc. provides home security and medical alert services to 89,400 subscribers in 25 metropolitan areas.

Dividend Data

Dividend payments were resumed in June, 1989 after having been omitted in December, 1983. A "poison pill" stock purchase right was adopted in 1987.

Summary

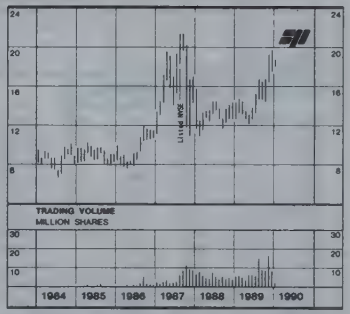
Canada's largest gold producer, this company projects its share of 1990 gold production at about 1.4 million ounces, up from 1989's more than 1.1 million. Gold properties are located in Canada, the U.S., the South Pacific and Chile. PDG is also a significant producer of silver, copper and molybdenum. In December, 1989 PDG was seeking buyers for its oil and gas assets, which had a book value of C$450 million before provisions of C$90 million for related minority-held preferred shares and bank debt.

Current Outlook

Excluding a gain on the planned sale of oil and gas assets, earnings for 1990 are projected at $0.60-$0.70 a share (Canadian), before a gain on planned sale of oil and gas assets, versus 1989's estimated C$0.50.

Dividends should continue at $0.07½ quarterly.

Sales for 1990 (from continuing operations) may advance significantly, on expected much heavier gold output and moderately higher gold quotes. In the first nine months of 1989 gold realizations averaged US$413 an ounce, down from US$459 in the prior-year period. Although high real (inflation-adjusted) interest rates may have a dampening effect on gold prices, increased financial concerns and possible stabilization of forward gold sales by producers should lead to a renewed uptrend for gold. However, base metals earnings are likely to decline sharply on anticipated significantly lower quotes. With greater gold receipts and expected slightly reduced unit gold costs partly offset by lower base metals prices, income should rise substantially. Sale of oil and gas activities would probably result in a nonrecurring gain.



Revenues (Million Can. $)

Quarter:	1989	1988	1987	[5]1986
Mar.	226	218	202	175
Jun.	229	187	200	184
Sep.	256	186	202	191
Dec.	---	197	231	168
		788	834	718

Sales for the first nine months of 1989 rose 20%, year to year, on increased gold sold. With lower gold prices, heavier unit costs and absence of a $132.3 million unusual gain in 1988, pretax income fell 37%. After taxes at 41.0%, versus 30.0%, equity in much reduced profits of associates, and smaller minority interests, net income was off 56%, to $0.38 a share from $0.91 (before a $0.05 tax credit).

	E0.50	1.16	0.73	0.48

Important Developments

Dec. '89— PDG was seeking buyers for its oil and gas operations, Prairie Producing Co. (with interests in the southern U.S.) and Placer CEGO Petroleum (with interests in western Canada). Estimated proven reserves of Prairie were 9.4 million barrels of oil, 2.7 million barrels of natural gas liquid and 95 billion cubic feet of natural gas. CEGO had proven reserves of 6.9 million bbls. of oil, 1.8 million bbls. of natural gas and condensate and 200 bcf. of natural gas.

Next earnings report expected in late February.

Business Summary

PDG and its subsidiaries are primarily engaged in exploration for and production of gold, and are also significant producers of silver, copper and molybdenum.

Its share of gold output in 1988 was 825,000 ounces. Properties include the Campbell Mine and the Dome Mine, both in Ontario, which produced 348,992 ounces in 1988; Golden Sunlight Mines (Mont.), 93,417 ounces; Bald Mountain (Nev.), 48,619 ounces; 56.7% of Kiena Gold Mines and 64.7% of Sigma Mines, both in Quebec, which were amalgamated with PDG in June, 1988, 120,414 ounces as their full share of production; and 50% of the Detour Lake Mine (Ont.), wholly owned since September, 1988, 109,518 ounces as its full share. PDG has a 53.1% interest in Kidston Gold Mines (Australia), which produced 109,512 ounces for PDG's account; and 39.6% of Cortez Gold Mines (Nev.), 16,760 ounces. PDG also owns some 15% of the common shares of U.S. Gold (Colo.). In February, 1989 the Dona Lake (Ont.) mine began producing gold. Output was estimated at a rate of 40,000 ounces a year. In July, 1989 PDG said that it would proceed with second-stage development of its 50%-owned La Coipa gold/silver mine (Chile). Construction cost was estimated at US$248 million, plus US$28 million in other expenses. Peak output would occur in the first two years (starting in 1991) at an expected 200,000 ozs. of gold a year.

Important gold projects are held by 75.8% owned Placer Pacific (PP). The Misima mine (20% owned by Papua New Guinea) was commissioned in the 1989 second quarter. PDG's share of output in the commissioning period and the six months to year-end 1989 was expected to be 90,000 ounces. In February, 1989 PP began production at the Big Bell gold property (Australia). A unit of PP has a 50% share of the project. The property was expected to produce some 115,000 ounces in 1989. In April, 1989 PP began development of its 60%-owned Granny Smith open pit gold mine (Aus.) with production of 235,000 ounces planned for the first full year starting February, 1990. As of October, 1989 construction was well underway at PP's 30%-owned Porgera Gold Project (P.N.G.). Output was expected to begin in the 1990 second half and average over 800,000 ounces annually in the first six years.

Other metals operations include the Endako molybdenum mine (B.C.); 68.1% owned Gibraltar Mines (B.C.), which produces copper concentrate, cathode copper and by-product molybdenum; 58.8% owned Equity Silver Mines (B.C.), which operates an open-pit silver-gold-copper mine; and 34% owned Minera Real de Angeles (to become 49% held), which owns a Mexican silver mine.

Dividend Data

Predecessor companies paid dividends since 1920. Payments by Placer Dome were initiated in mid-1987.

Polaroid Corp.

NYSE Symbol PRD Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 30'89	1989					
43¾	50⅜-34¾	NM	0.60	1.4%	B	1.41

Summary

In March, 1989 this leading photography company reached various agreements which ended a lengthy effort by Shamrock Acquisition III, Inc. to acquire control of PRD. Also, Polaroid is in the midst of a substantial restructuring, which has already included the repurchase of 19 million common shares, the issuance of preferred stock, and a large cost-cutting effort. Also, PRD may receive a sizable award or settlement from Eastman Kodak in relation to a patent infringement suit.

Current Outlook

Earnings for 1990 are estimated at $2.60 a share, up from the $1.75 expected for 1989, both of which exclude possible future lawsuit awards or settlements.

The dividend may remain at $0.15 quarterly.

Contributors to future sales growth are expected to include PRD's entry into the conventional (non-instant) film business. Earnings in 1990 are expected to benefit from the absence of a $41 million (pretax) restructuring-related charge. Cost-cutting efforts could bring further margin expansion, but the improvement is not expected to be as substantial as it has been in 1989.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	442	410	381	326
Jun.	487	483	448	396
Sep.	438	436	426	396
Dec.	---	533	509	511
	---	1,863	1,764	1,629

Sales for the nine months ended October 1, 1989 rose 2.8%, year to year. Operating margins widened, and there was a smaller adverse impact from restructuring charges. Although interest expense was up sharply, reflecting share repurchases, and there were preferred stock dividends only in 1989, earnings of $1.27 a share (on 8.1% fewer shares) contrasted with a loss of $0.23.

Important Developments

Oct. '89— In 1989's third quarter PRD's U.S. sales rose 5.6%, year to year, but international sales declined 7.5%, including an adverse impact from the currency fluctuations (i.e. a stronger U.S. dollar). Also, in 1989 PRD has repurchased more than 19 million of its common shares; authorization for further repurchases totaling roughly $165 million existed as of early October. Also, earlier in 1989 Shamrock Acquisition III, Inc. terminated a tender offer for PRD shares. Shamrock has agreed not to seek control of PRD for 10 years, and PRD agreed to make certain payments to Shamrock. PRD has made a commitment to distribute to PRD shareholders a portion of after-tax proceeds exceeding $750 million from a pending patent infringement suit against Eastman Kodak.

Next earnings report expected in early February.

Business Summary

Polaroid designs, manufactures and markets worldwide a variety of products, primarily in fields involving the recording of instant images. Products include instant photographic cameras and films, magnetic media, light polarizing filters and lenses, and diversified chemical, optical and commercial products. PRD introduced a new line of conventional (non-instant) film in 1989.

Foreign operations accounted for 44% of net sales in 1988, compared with 43% the year before.

Instant cameras include the Impulse line, introduced in 1988, the Spectra System, which debuted in 1986, and the 600 series line.

Industrial and professional products include instruments, camera packs, film holders and specialized equipment designed for a broad range of applications. PRD markets more than 40 film types and more than 100 imaging systems designed to provide a variety of users with the ability to record, document, analyze, inspect or present their work. In the area of magnetic products, PRD makes videotapes and flexible diskettes.

Dividend Data

Dividends have been paid since 1952. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Finances

In October, 1985 PRD won a patent infringement suit against Eastman Kodak. Subsequent appeal decisions have generally been favorable to PRD, and proceedings to determine damages, which began in May 1989, could result in a sizable award to PRD.

Summary

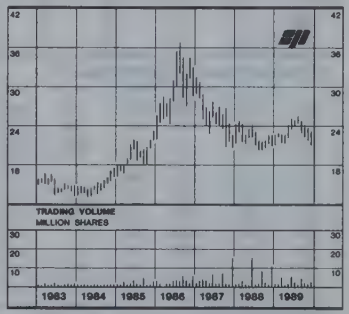
This holding company owns Portland General Electric, a utility which provides electric service to a population of about 1.2 million in a 3,170 square-mile area of Oregon. With completion of the Colstrip Unit 4 coal-fired facility in 1986, the company projects it has sufficient base load generating capacity through the mid-1990s. Auditors noted in their opinion on the company's 1988 financial statements that there were uncertainties regarding certain rate matters.

Current Outlook

Earnings for 1990 are estimated at $2.00 a share, up from the $1.60 expected for 1989.

In the event of unfavorable regulatory rulings, the $0.49 quarterly dividend could be reduced.

Earnings for 1990 are expected to increase, principally reflecting the absence of additional maintenance and operating and purchased power costs associated with the outage of the Trojan Nuclear Plant. A modest gain in electric kwh sales, due to a growing service territory, could also aid comparisons. The contribution from PGN's real estate unit is uncertain; new management has recently been installed. Regulatory treatment of a gain and certain investment tax credits could significantly alter the earnings outlook.



Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	221.1	209.8	212.4
Jun.	---	176.0	171.5	173.0
Sep.	---	187.6	176.6	175.9
Dec.	---	---	204.3	202.5
	---	---	762.2	763.8

Operating revenues for the nine months ended September 30, 1989 advanced 4.8%, year to year, reflecting cold winter weather and economic growth occurring in the region. Hurt by outages at the Trojan Nuclear Plant, pretax income fell 7.0%. After taxes at 41.3%, against 24.5% net income fell 28%. Share earnings were $0.91, against $1.26.

	E2.00	E1.60	2.11	1.69

Important Developments

Nov. '89— PGN said that unusually high levels of maintenance and replacement power costs incurred thus far in 1989 have depressed financial results. As a result, share earnings for the 12 months ended September 30 were below the company's annual common dividend. However, management had no present plans to change the dividend. The next review is planned for early 1990. PGN said that the dividend could be influenced by events such as an unfavorable outcome of regulatory issues, which significantly affect its common stock equity.

Oct. '89— Portland General said that the Nuclear Regulatory Commission (NRC) fined it for failing to have a water recirculation system in proper working order at the Trojan nuclear plant. The NRC has cited a need for PGN to improve management accountability and employee performance at Trojan.

Next earnings report expected in late January.

Business Summary

PGN is the holding company for Portland General Electric, an electric utility supplying a 3,170 square-mile area in Oregon, including Portland and Salem. Other activities include real estate development and energy and financial services.

Revenues	1988	1987	1986	1985
Residential	38%	35%	35%	34%
Commercial	34%	34%	33%	30%
Industrial	17%	17%	18%	17%
Other	11%	14%	14%	19%

The fuel mix in 1988 was 14% hydro, 28% nuclear, 16% coal and 42% purchased power, including 12% under non-firm contracts. Peak load in 1988 was 2,893 mw, and capacity at time of peak 4,386 mw, for a capacity margin of 34.0%.

With completion of the 700 mw Colstrip 4 coal-fired plant (20%-owned) in 1986, the company has adequate base load generating capacity through the mid-1990s. Utility capital expenditures for 1989 were estimated at about $110 million. The 1990-1991 program was estimated in the range of $250 to $270 million.

Dividend Data

Dividends have been paid since 1948. A dividend reinvestment plan is available.

NYSE Symbol PCH In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 2'89	1989					
34³/₄	38⅝-30¾	8	1.20	3.5%	B+	1.17

Summary

This integrated forest products concern is one of the largest U.S. lumber producers, and has interests in plywood, paper, bleached paperboard and consumer products. Although fluctuations in business activity will continue to influence operations, long-term prospects are enhanced by recent capital improvements and PCH's strong financial condition.

Current Outlook

Earnings for 1990 are projected at $4.50 a share, down slightly from the $4.65 estimated for 1989.

The quarterly dividend was raised 15%, to $0.30 from $0.26, with the September, 1989 declaration.

A modest sales gain is expected for 1990, with paperboard and printing papers remaining strong, while some weakness is likely to develop in pulp markets because of new industry capacity coming on stream. Wood products sales and earnings should benefit from a shortage of timber caused by environmental lawsuits. Recent mill modernizations should aid earnings.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	297	258	249
Jun.	---	296	267	244
Sep.	---	318	274	247
Dec.	---	---	285	253
	---	---	1,084	992

Sales for the nine months ended September 30, 1989 rose 14%, year to year, reflecting strong gains in the pulp and paper segments. Wood products sales were also up. Margins widened for pulp-based products, and pretax earnings increased 18%. After taxes at 36.0%, versus 38.0%, net income was up 22%. Per-share earnings were $3.41 on 5.7% more shares outstanding, compared with $2.85.

Common Share Earnings ($)

Quarter:	1990	1989	1988	1987

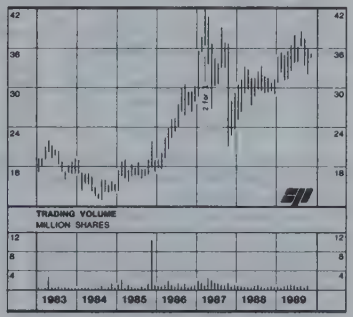
Dec.	E1.05	E1.24	1.19	0.89
	E4.50	E4.65	4.04	3.13



Important Developments

Oct. '89— PCH said that third quarter operating income in the wood products segment rose to $6.5 million from $2.5 million a year earlier, despite continuing operating problems at the Lewiston mill. Profits were helped by higher prices stemming from reduced timber availability in the industry caused by environmental lawsuits.

May '89— The company announced plans to spend $25 million to increase chlorine dioxide bleaching capacity at pulp mills in Idaho and Arkansas. Besides improving product quality and lowering producting costs, the new systems will reduce trace amounts of dioxin.

Mar. '89— PCH called for redemption all of its Series B convertible exchangeable preferred stock at $52.625 per share. All but 6,897 of the approximately one million shares were converted to common stock on the basis of 1.8868 common shares for each preferred share.

Next earnings report expected in mid-January.

Business Summary

PCH is one of the largest U.S. lumber producers and has interests in paper and consumer products. Business segment contributions in 1988:

	Sales	Profits
Wood products	21%	1%
Printing papers	31%	36%
Other pulp-based products	48%	63%

In 1988 the company's wood products operation produced 326 million bd. ft. of lumber, 336 million sq. ft. of plywood, 452 million sq. ft. of oriented strandboard, and 73 million sq. ft. of particleboard. PCH operates seven sawmills and a number of other wood products plants located primarily in Arkansas, Idaho and Minnesota.

PCH produces quality coated and uncoated printing and business papers from two mills in Minnesota. In 1988 the company shipped 281,814 tons of paper from these mills.

Other pulp based products include bleached kraft paperboard, folding cartons, milk cartons and other liquid tight containers, tissue toweling and napkins. Bleached kraft paperboard is produced at mills in Lewiston, Ida. and McGhee, Ark. During 1988 PCH shipped 153,958 tons of pulp, 558,892 tons of paperboard, and 78,288 tons of tissue products. Potlatch owns some 1.47 million acres of timberland. Self-generated fuels supply about 70% of the company's energy requirements.

Dividend Data

Dividends have been paid since 1939. A dividend reinvestment plan is available.

Summary

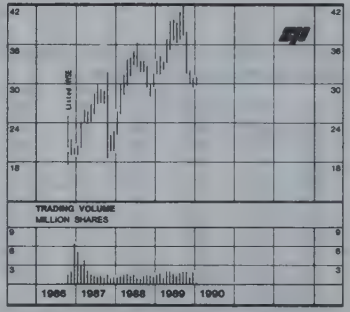
Premark International manufactures and sells Tupperware plastic products, commercial food equipment, and various consumer and decorative products. The company was spun off by Dart & Kraft in 1986. Higher manufacturing costs, more expensive raw materials, adverse foreign exchange rates, and an $18 million pretax charge in the fourth quarter to restructure the food equipment division will substantially hurt earnings in 1989; however, profits should rebound in 1990.

Current Outlook

Earnings for 1990 are projected at $3.00, up from the $2.17 estimated for 1989.

The quarterly dividend should remain at $0.21.

Sales for 1990 should rise 10%-12%, reflecting higher sales at the consumer and decorative products group which may be offset somewhat by continued slower sales at the Tupperware and food equipment divisions. Margins should begin widening by the second half, reflecting a turnaround at the food equipment division and more efficient operations at Tupperware. Interest expense may be slightly higher, but share earnings will benefit from fewer shares outstanding.



Net Sales (Million $)

Quarter:	1989	1988	1987	[1]1986
Mar.	621	588	501	412
Jun.	658	592	543	498
Sep.	616	565	531	499
Dec.	---	651	622	549
	---	2,397	2,197	1,959

Sales for the 39 weeks ended September 30, 1989 rose 8.5% from those of the 40-week year-earlier period. Margins narrowed, mainly on profit declines at the Tupperware and food equipment divisions. In the absence of a $0.44 a share tax benefit from sale of a facility and after higher taxes, net income fell 33%, to $1.70 a share (on 1.1% more shares) from $2.59, which excludes a special charge of $0.47.

Dec.	E0.47	0.91	0.77	d2.79
	E2.17	3.50	2.08	d2.87

Important Developments

Dec. '89— PMI said that it would take an $18 million pretax charge in the fourth quarter, reflecting a restructuring of the food equipment division. PMI also said it would repurchase 3.5 million of its common shares outstanding, or 10% of the total.

Oct. '89— PMI attributed the decline in net income for 1989's third quarter to a 22% profit decline at Tupperware and a 45% profit decline at the food equipment group, both resulting from higher manufacturing costs. Profits rose 14% at the consumer and decorative products group, however, due to the Tibbals acquisition and on improved performance at Ralph Wilson. PMI said it expected to report a significant earnings decline for 1989 as a result of continued adverse conditions at Tupperware and the food manufacturing division.

Next earnings report expected in late January.

Business Summary

Premark International is multinational manufacturer and marketer of leading consumer and commercial products sold under well-known brand names including Tupperware, Wilsonart, Hobart, West Bend, Vulcan, Foster, Hartco, and Precor. Dart & Kraft formed Premark in August, 1986 to acquire four of its businesses, and spun off Premark in November, 1986 to Dart & Kraft shareholders. Premark's business segment contributions in 1988:

	Sales	Profit
Tupperware	40%	50%
Food equipment	37%	25%
Consumer and decorative products	23%	25%

Foreign business accounted for 41% of sales in 1988, versus 38% in 1987.

Tupperware manufactures and sells (directly to the consumer through independent distributors) a broad line of molded plastic food storage and service containers, as well as educational toys, personal care and home products, and a line of high-heat resistant ovenware. Important products include Tupperware educational toys, Bell tumblers, Modular Mates stackable storage containers, Wonderlier and Servalier bowls and Counterparts Ultra Clear canisters.

The food equipment group, which includes Hobart and Vulcan-Hart, produces commercial food preparation equipment including food mixers, slicers and cutters; meat saws and grinders; weighing and wrapping equipment and related systems; cooking equipment such as ovens, ranges, fryers, griddles, and broilers; refrigeration equipment; warewashers; and waste disposal equipment.

Consumer and decorative products consist of the Ralph Wilson division (decorative plastic laminates which have various interior surfacing applications including wall paneling systems, countertops, vanities, store fixtures, and furniture); Tibbals Flooring (pre-finished oak flooring), which was acquired December, 1988; and the West Bend division (small electric appliances, stainless steel cookware and home physical fitness equipment.

Dividend Data

Dividends were initiated in 1987. A "poison pill" stock purchase right was adopted March, 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.15	Mar. 7	Mar. 16	Mar. 22	Apr. 7'89
0.21	May 3	Jun. 7	Jun. 13	Jul. 7'89
0.21	Aug. 2	Sep. 7	Sep. 13	Oct. 6'89
0.21	Nov. 2	Dec. 7	Dec. 13	Jan. 8'90

Next dividend meeting: early Mar. '90.

Finances

During the first quarter of 1988 PMI adopted FASB No. 96. Generally, the new standard requires companies to adjust deferred tax balances to reflect current tax rates and prohibits recognition of deferred tax assets in certain circumstances.

After incorporating Premark International as a wholly-owned subsidiary in August, 1986, Dart & Kraft transferred certain of its businesses (Tupperware, Food Equipment, The West Bend Company, and Ralph Wilson Plastics Co.) to Premark. On November 21, 1986 Dart & Kraft distributed Premark common stock to its shareholders of record October 31 on the basis of one share of PMI for every four Dart shares held.

Summary

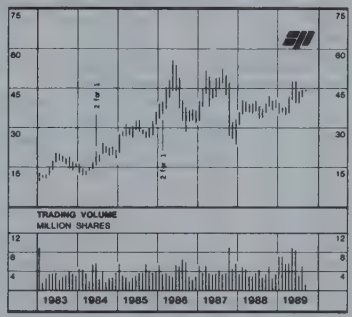
Price is a leading operator of cash-and-carry membership wholesale clubs, principally on the West Coast and, more recently, in the eastern U.S. The clubs sell a variety of basic merchandise to businesses that buy for their own use or for resale and to selected groups of retail customers. Earnings growth should remain strong as the company expands into new market and new product areas.

Current Outlook

Earnings for the fiscal year ending August 31, 1990, are projected to reach $2.75 a share, up from the estimated $2.30 of fiscal 1989.

A one-time cash dividend of $1.50 per share was paid in July, 1989.

Sales for fiscal 1990 should increase about 20%, benefiting from new warehouse openings. With consumers becoming more cost-conscious, the company's sharp pricing policy should strengthen its market position, particularly as the warehouse format gains acceptance on the East Coast. Margins may narrow slightly, reflecting modestly higher expense ratios. Interest expense should increase.



Sales (Million $)

Important Developments

May '89— PCLB said that in lieu of its previously announced proposal to distribute a dividend-bearing convertible preferred stock to its shareholders, a one-time special cash dividend of $1.50 a share was declared. The total amount of the dividend would be about $75 million, or about 14% of the company's net worth. The dividend was not expected to affect the company's operations, rate of expansion or plans. In March, PCLB was operating 41 Price Clubs in the U.S. and four in Canada (through a 50/50 joint venture). In February, the company authorized the expenditure of up to $50 million for the repurchase of any of its outstanding securities. In late 1988, PCLB opened two new Price Clubs—one in Virginia and one in California. More clubs were planned for fiscal 1989, including units in New York, California, Phoenix and Tucson.

Next earnings report expected in early October.

Business Summary

The Price Company operates "Price Club" cash-and-carry membership wholesale outlets, primarily in California and other western states and, more recently, on the East Coast. These warehouse outlets offer a variety of food and general merchandise to businesses that purchase for resale and for their own use and to selected groups of retail customers.

Contributions to sales by merchandise in recent fiscal years were:

	1987–8	1986–7	1985–6
Appliances & hardware	19%	20%	20%
Food	26%	26%	25%
Hardlines	12%	12%	13%
Liquor	4%	5%	5%
Softgoods	8%	7%	7%
Sundries	31%	30%	30%

At the end of fiscal 1988, the company was operating 39 Price Club units, in California (24), Arizona (5), Virginia (3), Maryland (3) and New Mexico, Connecticut, New York and New Jersey. Price Club Canada, a joint venture in which the company has a 50% interest, was operating four warehouses as of late 1988.

The warehouse clubs, which are open only to members, range between 96,000 sq. ft. and 135,000 sq. ft. In fiscal 1988, there were two kinds of membership: "Business" and "Gold Star."

Businesses or individuals with a resale or business license, professional license or other proof of business existence may become Business members by paying an annual $25 membership fee.

Gold Star membership is available to employees of federal, state or local governments, banks, credit unions, savings and loan associations, certain corporations, certain utility and transportation companies, certain hospitals, as well as members of credit unions and other organizations. Gold Star membership requires a $25-a-year membership fee.

As of August 31, 1988, there were approximately 880,000 Business members and about 1.5 million Gold Star members.

Dividend Data

A special one-time cash dividend of $1.50 a share was paid July 28, 1989 to holders of record May 31. Prior to this no cash payments had been made.

Finances

During fiscal 1988, $200 million of 5.5% debentures were issued, convertible into common stock at $50.625 a share.

Capitalization

Long Term Debt: $213,345,000 (3/12/89); incl. $198 million of conv. debs. (see Finances).

Common Stock: 49,440,000 shs. (no par).
Officers & directors own about 20%.
Institutions hold about 57%.
Shareholders: About 5,213 of record (11/88).

Summary

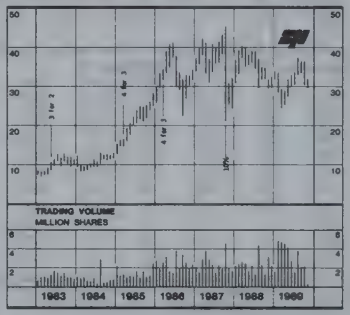
This company owns, operates or manages more than 100 lodging properties under various lodging brands, and is also the franchisor of more than 400 Howard Johnson lodging properties. Sizable expansion of the Howard Johnson franchise system is expected. Also, PDQ has agreed to acquire certain lodging assets of Ramada, Inc.; however, completion of the transaction was recently delayed.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $2.50 a share, up from fiscal 1989's $2.35.

The $0.02 quarterly dividend may be raised, possibly through a stock distribution.

PDQ's revenue mix is expected to become increasingly weighted toward contributions from managing, franchising and development of lodging properties, with a lower relative contribution from operation of owned and leased facilities. Earnings growth could accelerate in fiscal 1991, aided by benefits from the expected acquisition of certain Ramada, Inc. assets and PDQ's development of new Howard Johnson properties.



Total Revenues (Million $)

Important Developments

Nov. '89— An extension until February 28, 1990 had been agreed upon for completion of a transaction which is expected to result in PDQ operating the Ramada, Inc. lodging franchise business. In return for an investment of about $180 million, PDQ is expected to receive rights to the Ramada Inn, Ramada Hotel and Rodeway franchise systems, which included about 632 properties and 95,000 guest rooms in the U.S.; rights to manage 14 properties; and some land. Other Ramada, Inc. lodging assets, including rights to Ramada Renaissance properties and international assets, would go to New World Development Co. Ltd. of Hong Kong; Ramada is not selling its U.S. casino/hotels. In November PDQ said that it had filed for a proposed public offering of up to $300 million principal amount of zero coupon convertible subordinated debentures.

Business Summary

Prime Motor Inns is an owner, operator, developer, and franchisor of lodging properties.

As of September, 1989 PDQ owned, leased or managed 131 hotels with about 18,750 rooms. This included 95 hotels with about 12,575 rooms which it operated and in which it had ownership or lease interests. These 95 properties included 55 Howard Johnson lodging facilities, 22 Holiday inns, nine Ramada inns, three Sheraton inns, three Days inns, and three independent hotels. PDQ also managed 29 properties with about 5,185 rooms which were owned or leased or others, and there were seven other properties in which PDQ had ownership interests, but were managed by or leased to others. Publicly owned Prime Motor Inns Limited Partnership, of which PDQ is the general partner, has interests in some properties leased and managed by PDQ.

PDQ also franchises Howard Johnson lodging properties. This lodging system contains more than 400 properties, and a substantial expansion is expected over the next five years. Seventeen inns acquired by PDQ in 1988 have been converted to the Wellesley Inns by Howard Johnson name.

In addition, PDQ is expected to acquire certain Ramada, Inc. hotel franchise businesses totaling more than 600 properties (see Important Developments).

Dividend Data

Cash dividends were resumed in 1981 after having been omitted since 1974.

Summary

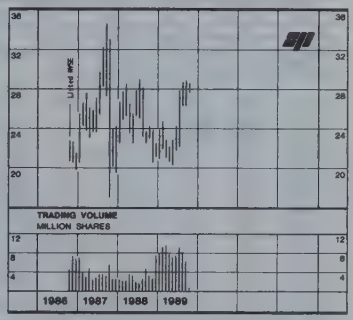
Primerica Corp. (formerly Commercial Credit Group) offers a variety of consumer financial services, including life and other insurance, consumer lending, and investment services. In December, 1988 Commercial Credit acquired Primerica Corp., a financial services and specialty retailing concern, in a $1.5 billion stock and cash transaction. Subsequently, Commercial Credit changed its name to Primerica Corp.

Current Outlook

Earnings for the merged corporation for 1989 are estimated at $2.40 a share. Earnings for 1990 could reach $3.00 a share. In 1988 Commercial Credit alone earned $3.61 a share, including a $0.76 gain from the sale of an insurance unit.

The minimum expectation is for dividends to continue at $0.07 quarterly.

The acquisition of "old Primerica" will result in a substantial increase in revenues and net income in 1989, but per share earnings will likely decline, as shares outstanding have more than doubled. Gains are expected from the consumer finance operations, as receivables should continue to grow. Property-casualty results will likely feel the effect of heightened competition, and underwriting performance will likely decline. The inclusion of A. L. Williams profits will lead to higher life insurance profits. Results at Smith Barney and American Capital's mutual fund operations are expected to remain under pressure, but a rebound is expected.



Review of Operations

Revenues for the six months ended June 30, 1989 rose 465%, year to year, to $2.6 billion from $467 million, reflecting the acqusition in December, 1988 of "old" Primerica. Following a 536% increase in expenses, pretax income expanded 149%. After taxes at 34.6% versus 28.6%, and minority interests in the 1989 period of $25 million, net income advanced 88%. Share earnings were $1.18 on 116% more shares, compared with $1.37.

Dec.	E0.62	1.51	0.66	d0.01
	E2.40	3.61	2.00	0.96

Important Developments

Sep. '89— PA noted that earnings for 1989's first half benefited from growth in all business segments, and from its efforts to streamline operations. To that end, PA agreed to sell its PennCorp Financial group of insurance companies to PCF Acquisition Corp. for some $300 million in cash. Proceeds would be used to reacquire shares or repurchase debt. In August, PA offered to acquire the approximately 30% of A. L. Williams Corp. (ALW) that it does not already own by issuing 0.82 of a PA common share for every ALW common share. The exchange ratio would increase to 0.85 of a PA common share if PA's stock trades below $25 when shareholders vote. Finally, since PA was unable to find a suitable buyer for its Fingerhut Companies direct mail consumer product unit, it has decided to retain this division. A restructuring of Fingerhut, aimed at cutting costs, is underway.

Next earnings report expected in late October.

Business Summary

Primerica Corp. (formerly Commercial Credit Group) is a diversified financial services holding company engaged, through subsidiaries, in consumer finance, insurance services, investment services and corporate and other activity. In December, 1988 the company acquired "old" Primerica Corp. for $1.54 billion in stock and cash (53.9 million common shares, $377.3 million cash, plus certain acquisition costs). Revenue and net income (in million $) of the merged corporation by segment for the quarter ended March 31, 1989:

	Revs.	Profits
Consumer finance	16%	$27.3
Insurance services	50%	46.1
Investment services	34%	13.5
Corporate & other	Nil	-35.5

The consumer finance business includes lending services, deposit taking and credit related insurance. Loans to consumers include secured and unsecured personal loans, home equity loans, and credit card loans. Consumer finance receivables at year-end 1988 amounted to $3.1 billion. PA markets credit life and credit health insurance services to its consumer finance customers.

Insurance services include non-participating individual, group and credit life and accident and health insurance, credit property and auto warranty insurance. PA has a 69.8% interest in A. L. Williams Corp., the leading underwriter of term life insurance. At December 31, 1988 individual life insurance in force amounted to $281 billion (97% term insurance). Gulf Insurance Co., offers property and casualty insurance. Net premiums written in 1988 totaled $195.7 million.

The investment services operations, which were acquired with the purchase of "old" Primerica, consist of Smith Barney Inc., an investment banking and securities brokerage firm, American Capital Management & Research, an 83% owned mutual fund manager, Margaretten & Co.,Inc., a mortgage banking firm, and a 99% interest in RCM Capital Management, which provides investment management services. Corporate and other activities include equipment leasing services, a 21.6% investment in Inter-Regional Financial Group, Inc., a regional securities brokerage, and real estate investments.

Dividend Data

Dividends were initiated in late 1986.

Summary

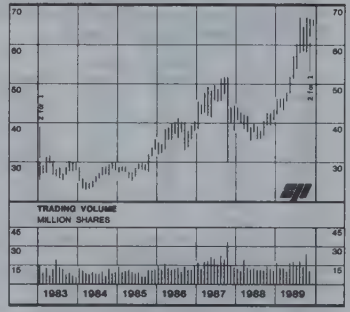
This leading household and personal care products firm has grown through internal development of new products and through important acquisitions such as Richardson Vicks Inc. and G.D. Searle's over-the-counter drug business. Product line extensions, expansion abroad, cost cutting and acquisitions should boost earnings in fiscal 1990. Entry into highly profitable cosmetics markets via the November, 1989 acquisition of Noxell Corp. bodes well for the future. The stock was recently split 2-for-1.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 may rise 24%, to $4.40 a share (including a $0.25 onetime gain) from 1989's $3.56, as adjusted for the November, 1989 2-for-1 split.

The quarterly dividend was raised 12.5%, to $0.45 from $0.40 (both adjusted), with the November, 1989 payment.

Sales for fiscal 1990 are expected to remain in a good uptrend, reflecting continued expansion abroad and successful new product introductions. Margins should expand on better price comparisons, growing production efficiencies and cost cuts. The level of advertising outlays will be important to earnings gains. Acquisition of Noxell may prove modestly dilutive over the near term.



Net Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	5.58	5.27	4.66	4.36

Important Developments

Nov. '89— PG entered markets for cosmetics with the acquisition of Noxell Corp. in an exchange of 0.544 PG common share for each of Noxell's 7.6 million shares. Noxell, which makes Cover Girl make up and Noxzema, had sales of $522 million in 1988. Separately, PG acquired Beatrice's $100 million Fischer Nut business. In October PG acquired Maryland Club, a Texas-based maker of coffee (Maryland Club and Butter-Nut brands) for foodservice markets.

Mar. '89— PG issued a new convertible preferred Class A stock to fund an Employee's Stock Ownership Plan. Proceeds were used to repurchase 16.8 million shares (adjusted) of a total 24 million (approximately 7% of total outstanding) to offset dilution from the new issue.

Next earnings report expected in late January.

Business Summary

Procter & Gamble markets a wide range of personal care and consumer household products. Contributions by business segment in fiscal 1989 (profits in million $, after nonrecurring charges):

	Sales	Profits
Laundry/cleaning products ..	33%	$754
Personal care products.....	46%	1,031
Food and beverage products	14%	-14
Pulp and chemicals	8%	362

Foreign business contributed 39% of sales and 31% of net income in fiscal 1989.

Among the more popular laundry and cleaning brands are Bounce, Cascade, Cheer, Comet, Dash, Downy, Era, Ivory Snow, Ivory Liquid, Mr. Clean, Solo, Spic and Span, Tide and Top Job. Personal care products include Camay, Ivory and Zest bar soaps, Bounty, Charmin, Puffs and White Cloud paper tissue products; Pampers and Luvs disposable diapers; Always feminine hygiene products; Sure and Secret deodorants; Crest toothpaste; Head & Shoulders, Prell, Ivory and Vidal Sasson hair care products; Oil of Olay and Clearasil skin care products; Pepto-Bismol and the Vicks line of cough and cold medicines; and pharmaceuticals. Disposable diapers accounted for 17% of total sales in fiscal 1989.

Food items include Crisco oil, Duncan Hines cake mixes, Folgers's coffee, Tender Leaf tea, Jif peanut butter, Pringle's potato chips, Crush, Hires and Sun Drop soft drinks, and Citrus Hill fruit juices. Other products include cellulose pulp and chemicals.

Summary

This electric and gas utility holding company serves much of New Jersey's industrial and commercial economy. Profitability since early 1987 has been restricted by the idled Peach Bottom nuclear facility (42.5%-owned). The two unit station, which is operated by Philadelphia Electric Co., was returned to service by 1989 year-end. PEG's longer-term outlook is enhanced by the diversified regional economy, strong cash flow, and completion of the company's construction program. The quarterly dividend was raised 2.0% with the December, 1989 payment.

Current Outlook

Share earnings for 1990 are projected at $2.75, up from the $2.65 estimated for 1989.

The dividend was raised 2.0%, to $0.52 quarterly from $0.51, with the December, 1989 payment.

Share earnings for 1990 should benefit from higher electric and gas sales, and lower costs associated with the two-unit Peach Bottom nuclear plant as both units were returned to service by 1989 year-end. Legal proceedings against Philadelphia Electric have been initiated.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	1,198	1,234	1,315
Jun.	[2]2,336	915	931	1,007
Sep.	1,152	1,127	1,005	1,058
Dec.	---	1,154	1,042	1,119
	---	4,395	4,211	4,498

Revenues for the nine months ended September 30, 1989 rose 8.7%, year to year (1988 restated), mostly reflecting higher gas sales and increased pass-through items. Costs were well controlled, and operating income was up 9.4%. However, following sharply lower accretion income and increased interest charges, net income declined fractionally (0.3%). Share earnings were unchanged at $2.16.

Common Share Earnings ($)

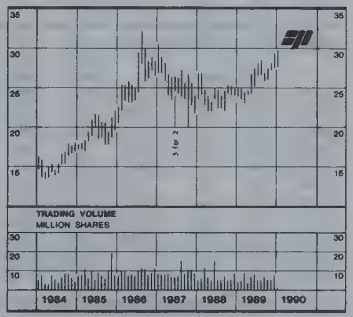
Dec.	E0.50	0.41	0.38	d0.45
	E2.65	2.57	2.55	1.90



Important Developments

Jan. '90— Units 2 and 3 of PEG's 42.5%-owned Peach Bottom nuclear station both reached 100% of capacity for the first time since the facility, which is operated by Philadelphia Electric Co., was removed from service on March 31, 1987.

Nov. '89— Energy Development Corp. (EDC), an indirect subsidiary of PEG, completed its purchase of the Houston-based Pelto Oil Co. for $319.3 million. The acquisiton of Pelto Oil from Southdown doubled EDC's proven reserves to about 350 Bcf of gas and 16 million bbls. of oil. Separately, PEG reported that kwh sales for the first nine months of 1989 were up 0.9%, year to year, as lower weather-related residential sales and the effect of fewer industrial customers, were offset by higher commercial sales due to a strong local economy.

Next earnings report expected in late January.

Business Summary

Public Service Enterprise Group is the holding company formed in 1986 by Public Service Electric and Gas (now its main subsidiary), which supplies electricity to a heavily populated industrialized territory in New Jersey. In 1988 electric sales provided 70% of revenues, gas 27% and other businesses 3%. Electric revenues:

Revenues	1988	1987	1986	1985
Residential	32%	32%	31%	31%
Commercial	43%	43%	42%	41%
Industrial	22%	23%	25%	26%
Other	3%	2%	2%	2%

Power sources in 1988 were nuclear 31%, coal 26%, oil and gas 16%, and purchased power 27%. Peak demand in 1988 was 8,745 mw and system capability was 10,064 mw for a capacity margin of 13%. Gas sales in 1988 were 2.28 billion therms, versus $2.18 billion therms in 1987.

In February, 1987 PEG's 95%-owned, 1,067 mw Hope Creek nuclear plant entered commercial operation. At that time the rate structure for the plant was completed and PEG wrote off $1.38 a share of disallowed costs, which it charged to 1986 earnings. The unit completes PEG's construction for some 20 years. PEG's future generation strategy will focus on load management and conservation. Power purchases are expected to represent a greater portion of capability.

Summary

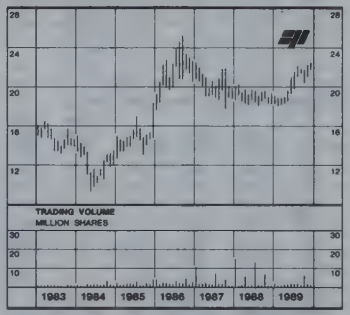
This moderate-sized utility serves a suburban and rural area in western Washington state. Hydro is the primary power source. A February, 1987 ruling from the Washington PSC approving the crediting of accumulated deferred investment tax credits to nonoperating income in 1987, 1988, 1989 and beyond should aid earnings, enhance the rate base, and help PSD keep its rates competitive.

Current Outlook

Earnings for 1990 are estimated at $2.35 a share, up from the $2.15 expected for 1989.

A February, 1987 Washington PSC order prohibits an increase in the $0.44 quarterly dividend.

Higher earnings for 1990 are expected to result from a combination of growth in the company's service territory associated with a robust economy, a return to more normal weather conditions, and the positive impact of a rate hike. The quality of earnings should improve considerably with the cessation of the accrual of non-cash deferred investment tax credits under a 1987 regulatory ruling. PSD enjoys the advantage of being a large purchaser of wholesale power in a region where substantial excess generating capacity exists.



Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	274.3	221.7	209.2
Jun.	---	186.7	173.9	162.3
Sep.	---	184.7	168.7	154.2
Dec.	---	---	227.2	203.7
	---	---	791.4	729.4

Operating revenues for the nine months ended September 30, 1989 rose 14%, year to year, reflecting cold weather, customer growth, and an energy cost adjustment clause. Operating income was up 14%. After lower other income and higher interest charges, net income increased 3.9%. Following higher preferred dividends, share earnings were $1.57 (on 3.0% more shares in 1989) in both periods.

	E2.35	E2.15	2.14	2.13

Important Developments

Nov. '89— The company said that a ruling on its request for a $70.5 million, or 9.1%, rate increase was expected in Janaury, 1990. PSD said that the request was critical to its financial performance and providing a competitive return to its investors. It was the first time in three and one-half years that the company had filed for a general rate increase. The Washington PSC's staff has recommended a rate increase that is about $45 million less than the company's request.

Oct. '89— PSD said that it signed a contract with another utility to receive up to 70 average mw of energy from that utility's share of power from a coal station. To meet growing demand, the company has added a total of nearly 400 average mw of new power supplies through contracts with other utilities and non-utility generators since April, 1988.

Next earnings report expected in early February.

Business Summary

Puget Sound Power & Light provides electricity to a population of more than 1,500,000 in a 4,500 square-mile area in Washington state. Contributions by customer class:

Revenues	1988	1987	1986	1985
Residential	52%	53%	55%	57%
Commercial	31%	32%	30%	30%
Industrial	13%	12%	12%	11%
Other	4%	3%	2%	2%

The fuel mix in 1988 was 56.8% hydroelectric, 31.6% coal, and 11.6% other. Peak load in 1988 was 3,638 mw and system capability was 4,127 mw, for a capacity margin of 11.8%.

Residential customers at December 31, 1988 numbered 615,730, up 3.3% from year-end 1987. Commercial customers increased 4.2%, to 72,121.

With the placement of the 700 mw coal-fired Colstrip unit 4 (25%-owned) into commercial operation in April, 1986, PSD has plans to build new generating facilities. An identical unit, Colstrip 3 (also 25% owned) was placed into commercial operation in 1984.

Dividend Data

Dividends have been paid since 1943. A dividend reinvestment plan is available.

Quaker Oats

1886

NYSE Symbol OAT Options on Phila (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 23'89	1989					
23⅜	68⅞-49⅝	23	1.40	2.2%	A	0.68

Summary

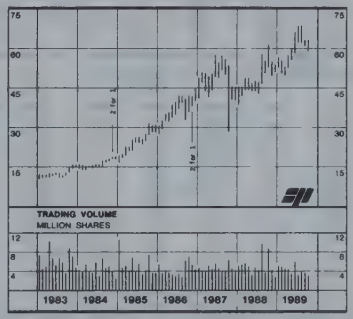
Quaker Oats is a major worldwide producer of brandname packaged foods and, since the 1986 acquisition of Anderson Clayton & Co. for $801 million, the nation's second largest pet food firm. OAT also makes Fisher-Price toys. Fiscal 1989 earnings were depressed by slower toy deliveries and restructuring costs, but greater emphasis on higher margin grocery products should allow better gains in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $4.25 a share, up from fiscal 1989's $2.56, which included a $1.20 restructuring charge.

The quarterly dividend was raised 16.7%, to $0.35 from $0.30, with the October, 1989 payment.

Profits should remain in a solid uptrend in fiscal 1990, assuming margins expand on lower commodity and other product costs. With marketing emphasis on higher margin hot and ready-to-eat cereals, pet foods, pasta and Gatorade, contributions from grocery products operations should continue to improve in the U.S. and abroad. International profits may be limited by a plateauing of business in Brazil, however, and better comparisons for Fisher-Price toys will be important to anticipated gains, along with favorable currency exchange rates. Share buybacks related to an expanded Employee Stock Ownership Plan should enhance per-share earnings.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	1,442	1,432	1,267	960
Dec.	---	1,350	1,228	1,084
Mar.	---	1,382	1,344	1,118
Jun.	---	1,562	1,490	1,259
	---	5,724	5,330	4,421

Sales for the three months ended September 30, 1989 were up less than 1%, year to year. Despite flat sales, operating income from U.S. and Canadian grocery products rose 66% on cost cutting programs. International grocery products profits were up 55% on higher volume for Brazil and pet foods, but contributions from Fisher-Price fell 32% due to product shortages. With lower interest expense and provision for taxes, net income advanced 24%.

Common Share Earnings ($)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	0.70	0.57	0.52	0.42
Dec.	E0.60	0.47	0.56	0.39
Mar.	E1.15	0.81	0.94	0.65
Jun.	E1.80	0.71	1.18	0.90
	E4.25	2.56	3.20	2.36

Important Developments

Oct.'89— In the fiscal 1990 first quarter, U. S. and Canadian grocery product volume fell 11% due to the impact of a cooler summer on Gatorade, and weak demand for canned and semi-moist pet foods. Unit volume in international grocery products rose 11%. Shortages of key products hurt Fisher-Price sales, but orders remained strong and OAT said that improved production should reduce order backlogs in time for the Christmas selling season.

Next earnings report expected in late January.

Business Summary

Quaker Oats is a leading human and pet foods processor, and also makes Fisher-Price toys. In fiscal 1987 OAT acquired Anderson Clayton & Co.'s Gaines Pet Foods and Golden Grain Macaroni. Segment contributions in fiscal 1989:

	Sales	Profits
U.S./Canada grocery prod.	63%	57%
Int'l grocery prod.	22%	21%
Fisher-Price	15%	22%

Food products include ready-to-eat cereals; hot cereals; pancake mixes and syrup (Aunt Jemima); pie crusts (Flako); frozen waffles, pancake batter and french toast (Aunt Jemima); corn meal, grits and flour tortilla; frozen pizza (Celeste); chili (Wolf Brand); pet foods and snacks (Gaine's, Ken-L-Ration, Puss'n Boots); canned beans (Stokely-Van Camp); Gatorade thirst quencher; and Golden Grain macaroni (Rice-A-Roni and Noodle-Roni).

Fisher-Price is a worldwide manufacturer of toy and non-toy products for infant and pre-school children.

Specialty retailing operations (including Brookstone, Jos. A Banks Clothiers, and Eyelab) were sold in December, 1986. In 1987 OAT sold Anderson Clayton & Co.'s food businesses and Ranger Insurance unit.

Dividend Data

Dividends have been paid since 1906. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

Quaker State is a major producer of branded motor oils. Through its Minit-Lube, Inc. and McQuik's Oilube, Inc. outlets (acquired in May, 1989), the company provides fast lube and car care services. KSF owns a coal mining subsidiary, a credit insurance company and a lighting equipment business. Near-term earnings prospects will be restricted by intensifying competition in the motor oil segment and discounting in the fast lube business. The coal industry is projected to be limited by overcapacity and profits in the insurance area and lighting segment may be impaired by softening auto sales.

Current Outlook

Share earnings for 1990 are projected at $0.35, down from 1989's estimated $0.45, which includes an approximate $0.23 nonrecurring gain.

The high payout ratio places the $0.20 quarterly dividend at some risk.

Revenues in 1990 will come under pressure from prospectively soft volumes in the branded motor oil business and discounting in the fast lube segment. Also, margin pressure will restrict the outlook for the coal industry and insurance business. Profit comparisons will be limited by the absence of 1989's nonrecurring gain.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	194.9	222.3	227.4	231.3
Jun.	211.8	232.4	222.5	242.2
Sep.	207.3	209.8	202.9	224.0
Dec.	---	204.6	195.1	201.6
	---	869.1	848.0	899.1

Operating revenues for the nine months ended September 30, 1989 fell 8.8%, year to year (1988 restated). Despite weak sales of branded motor oils and soft margins in the fast lube business, a nonrecurring gain for a coal contract settlement led to a 3.1% rise x gain. After taxes at 28.1%, versus 24.8%, net income was down 1.4%. Share earnings were unchanged at $0.35.

Important Developments

Nov. '89— Earnings in the petroleum segment for the three months ended September 30, 1989 were $4.1 million, versus $7.2 million a year earlier. Profits were limited by lower sales volume for branded motor oils and intense price discounting in the fast lube business. The company said that sales volumes for branded products were heavy in late 1988 as customers inventoried product in expectation of subsequent price increases in 1989. The coal business returned to profitability in 1989's third quarter, with an operating profit of $186,000, versus an operating loss of $418,000 in the 1988 period, reflecting increased production. The insurance group contributed $1.5 million in 1989's third quarter, approximately unchanged from a year earlier. In 1989's second quarter KSF recorded a nonrecurring gain of $9.7 million, reflecting settlement of a coal contract.

Next earnings report expected in late January.

Business Summary

Quaker State is primarily in the business of manufacturing and selling motor oils mainly under the Quaker State brand name. KSF also sells a variety of refined products and products for the automotive aftermarket. The company operates a nationwide network of quick lube centers which provide car care service including oil changes, filter replacement, and maintenance of power steering, brake and transmission fluids. KSF operates 444 Minit-Lube, Inc. and McQuik's Oilube, Inc. (acquired May, 1989) centers. Operating profits (in million $) in recent years:

	1988	1987	1986
Petroleum	$17.9	-$104.7	$79.8
Coal	6.9	0.8	12.9
Other	8.4	9.3	8.7
Insurance	5.7	5.2	7.7

Through its Valley Camp Coal Co., KSF markets coal to electric utilities. Coal operations produced 2.7 million tons in 1988; reserves were 356.8 million tons at year-end 1988.

The Heritage Insurance Group is a dealear-oriented credit insurance company. Truck-Lite Co., Inc. makes sealed and bulb-replaceable lights for trucks and other automotive parts.

KSF has minor oil and gas operations. Due to the company's decision in 1987 to cut back future exploration and development activites, supplemental oil and gas statistics are no longer presented.

Dividend Data

Dividends have been paid since 1931. A dividend reinvestment plan is available.

Nov. 9'89	1989					
33¾	106¾-29⅞	4	3.---	3.---	B+	1.08

Summary

This company is a leading producer of petrochemicals and the nation's largest marketer of propane. In October, 1989 CUE suspended its regular quarterly cash dividend due to debt convenants restricting dividends to 50% of cumulative earnings from January, 1989. Proceeds from the debt instruments had been used to finance the $50 a share special dividend paid in January, 1989. CUE is proceeding with its three-year, $1.3 billion capital spending program. Difficult plastic industry conditions may continue well into 1990.

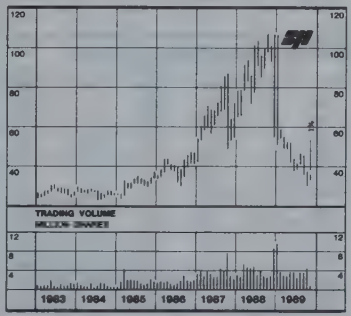
Current Outlook

Share earnings for 1990 are projected at about the $5.00 estimated for 1989.

Directors omitted the $0.75 quarterly cash dividend in October, 1989. CUE plans stock dividends in lieu of cash.

Earnings for 1990 are expected to be penalized by the sharp decline in polyethylene (PE) prices and margins during 1989. Prices for PE may stabilize somewhat, due to the recent explosion at a major competitor's PE plant and the ending of industry-wide inventory reductions. An aggressive capital spending program, including the startup of a new ethylene plant in late 1990, will restrict earnings.

The propane business should benefit from the full year inclusion of the Petrolane joint venture acquired in August, 1989.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	814	745	657	472
Jun.	673	648	551	359
Sep.	558	724	617	358
Dec.	---	807	742	541
	---	2,922	2,567	1,730

Sales for the first nine months of 1989 declined 3.4%, year to year, reflecting lower selling prices for polyethylene. With substantially higher interest expense and nonrecurring charges of about $2.71 a share (adjusted), income from continuing operations fell 64%, to $3.83 a share from $9.79 (both adjusted), excluding income from discontinued operations of $5.31 and $0.61, respectively.

Dec.	E1.18	3.85	2.10	0.89
	E5.00	13.57	4.34	1.52

Important Developments

Oct. '89— Directors declared a 1% stock dividend in lieu of the regular $0.75 quarterly dividend due to restrictive dividend covenants in the debt instruments used to finance the special $50 a share special dividend paid in January, 1989. Directors intend to declare a semiannual stock dividend of 2% at their April 26, 1990 meeting. Thereafter, based upon the earnings reserves and business prospects, CUE may continue the stock dividend or resume the payment of a cash dividend. The third quarter loss reflected reduced sales and margins for polyethylene. There were also charges of $0.88 a share (adjusted) for costs associated with the fires at its Morris, Ill. ethylene plant in June and September, and a $0.78 (adjusted) charge related to CUE's share of losses incurred by the newly formed Petrolane propane joint venture.

Next earnings report expected in late January.

Business Summary

Quantum Chemical (formerly National Distillers & Chemical) primarily has interests in chemicals and propane marketing. Segment contributions in 1988:

	Sales	Profits
Petrochemicals	76%	87%
Energy	23%	14%
Other	1%	-1%

Principal products of the USI Chemicals division are high-and-low density polyethylene, linear low-density polyethylene, polypropylene, ethyl alcohol, vinyl acetate and acetic acid. Other products include ethylene oxide/glycol, color concentrates, hot melt adhesive resins, barrier resins, and adhesive tie layers. CUE has production capacity of 2.2 billion pounds of ethylene and is building a 1.5 billion pound plant for start-up in late 1990. CUE is the nation's largest polyethylene producer with capacity of about 4 billion pounds and is adding about 700 million pounds of capacity by 1991.

Suburban Propane Gas is the largest retailer of propane, serving more than 1.2 million customers in 44 states from 433 sales and service centers concentrated on the East and West Coasts. Suburban sold 806 million gallons of propane in 1988. Oil and gas exploration and production interests were sold in October, 1988.

In April, 1989 CUE sold Emery Industries, a producer of fatty acids and specialty chemicals, to Henkel KGaA of Germany for $480 million.

Dividend Data

Directors omitted the cash dividend in October, 1989. Dividends have been paid since 1935. An amended "poison pill" stock purchase right was adopted in 1989.

Summary

This diversified holding company is engaged in natural gas transmission, distribution and storage primarily in Utah, Wyoming and Colorado, oil and gas exploration and production in the western U.S., and in the ceramics and property management businesses. Earnings for the first nine months of 1989 rose on colder weather and the absence of a large writedown of oil and gas properties. In October, 1989 directors raised the dividend 2.1%.

Current Outlook

Share earnings for 1990 are projected at $2.65, up from the $2.50 estimated for 1989.

Dividends were raised 2.1%, to $0.48 quarterly from $0.47, with the December, 1989 payment.

Gas distribution profits for 1990 are expected to rise slightly, assuming normal weather conditions, no reduction in rates in Utah, and continued growth in the number of residential customers. Gas transmission profits should benefit from the expansion of STR's pipeline system. Income from oil and gas exploration and production operations should benefit from higher average gas prices.

	---	486.0	492.6	528.3

Revenues for the nine months ended September 30, 1989 rose 0.6%, year to year, reflecting higher transmission volumes. Benefiting from colder weather and the absence of a $19.9 million after-tax ($1.03 a share) writedown of oil and gas properties, net income advanced to $33.7 million ($1.71 a share) from $11.7 million ($0.56).

Important Developments

Oct. '89— Directors raised the quarterly dividend 2.1%, to $0.48 quarterly from $0.47, with the December, 1989 payment. Separately, the Public Service Commission of Utah said it would review the reasonableness of the current rates and charges of STR. In September, STR, B.C. Gas (Canada), and Sulzer Brothers Ltd. (Switzerland) entered into a joint venture to market a new appliance that would allow natural-gas powered vehicles to be refueled at home or wherever gas service is available.

Jun. '89— STR sold about 1 million common shares to the trustee of the company's Employee Stock Purchase Plan. Separately, directors authorized the repurchase of up to 1.6 million common shares on the open market.

Next earnings report expected in early February.

Business Summary

Questar is a holding company whose subsidiaries are engaged in the natural gas, oil, ceramics, telecommunications, and property development businesses in the western U.S. Contributions by business segment in 1988 (profits in million $):

	Revs.	Profits
Gas distribution	51%	$42.5
Gas transmission	33%	37.9
Expl. & prod.	12%	-16.2
Other	4%	Nil

Natural gas distribution operations are conducted by Mountain Fuel Supply and served 476,500 customers in Utah and southwestern Wyoming at 1988 year-end.

Oil and gas exploration and production operations are conducted through Wexpro Co. in the Rocky Mountain region, Celsius Energy Co. throughout the U.S., and Universal Resources Corp. in Oklahoma, Texas, and other Midcontinent areas. Total proved reserves at year-end 1988 was 13.9 million bbls. of oil and liquids and 99.9 Bcf of gas.

Questar Pipeline Co. owns and operates interstate pipeline systems in Utah, Wyoming and Colorado, and gas storage facilities. It also has an 18% interest in and operates the 88-mile Overthrust segment of the 800-mile Trailblazer Pipeline running between Wyoming and Nebraska.

Other units include Interstate Brick Co., Questar Development Corp., Questar Telecom Inc., and Questar Service Corp.

Dividend Data

Dividends have been paid since 1935. A "poison pill" stock purchase right was adopted in 1986.

ummary

AL's asset restructurings since 1986 have included acquisition of Continental Baking (the nation's larg-st wholesaler baker and maker of Wonder Bread) and Union Carbide's $1.2 billion battery products usiness. In line with its greater focus on value added consumer products, it has also divested commod-y businesses, including the 1988 sale of "Chicken-of-the-Sea" for $260 million. Lower commodity rices and share repurchases should help lift earnings per share in fiscal 1989.

urrent Outlook

arnings from continuing operations for the fiscal ear ending September 30, 1990 may rise to 5.50 a share from fiscal 1989's estimated $5.70, hich excludes $1.11 from discontinued opera-ons.

he quarterly dividend was raised 10%, to 0.41¼, with the March, 1989 payment.

arnings for fiscal 1990 are expected to increase 2%, assuming pricing for batteries improves. ower costs for basic grain commodities used in akery and cereal items will be important to the dvance. Contributions from pet food should also enefit from lower commodity costs. Per share arnings would advance on continued share repur-hases. Acquisition of Beech-Nut baby foods hould add to earnings and cash generation rowth.

Important Developments

Sep. '89— The company agreed to acquire Nestle S. A.'s Beech-Nut Nutrition Corp., the nation's second largest maker of baby food. Beech Nut Nutrition had annual sales of $150 million in 1988, but has been unprofitable for several years.

Jan. '89— RAL repurchased 5.5 million of its common shares at $84 each via a tender offer to satisfy expected conversions of a new Series A ESOP convertible preferred with annual dividends of 6.75% issued under a leveraged employee stock ownership plan as of February 1, 1989. In fiscal 1988 RAL repurchased 2,551,300 common for $172.8 million; after September 30, 1988 additional common shares were bought to complete a 3-million-share repurchase program. RAL has bought back 49.4 million shares since 1982.

Next earnings report expected early November.

Business Summary

Ralston Purina is a broad-based food and other consumer products manufacturer. In 1986 it acquired Union Carbide's Eveready and Energizer batteries business. Sales and operating profit contributions by business segment in fiscal 1988:

	Sales	Profits
Human and pet foods	64%	72%
Other consumer products	23%	23%
Agricultural products	13%	5%

Foreign continuing operations contributed 24% of sales and 17% of operating income in fiscal 1988.

Grocery products include bakery products, dog and cat foods, ready-to-eat and hot cereals, and cookies and crackers. In late 1984 RAL bought Continental Baking Co. for $475 million (Wonder Bread and Hostess cakes). In fiscal 1987 it sold Drake Bakeries (acquired in fiscal 1986) for $176 million and in fiscal 1989 sold the Chicken-of-the-Sea canned tuna and salmon unit for some $260 million.

Other consumer products include Eveready and Energizer batteries and flashlights, isolated soy protein and industrial polymer products, and an all-season resort.

Agricultural products consist primarily of foreign animal feed operations since the late 1986 sale of Purina Mills, Inc. for $377 million, which consisted of the U.S. feed business and the early 1985 divestiture of soybean processing operations.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

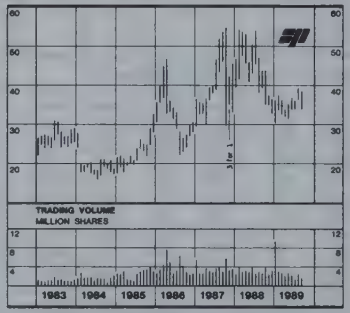
This company primarily produces high performance plastic and elastomer products and systems for the aerospace, automotive, construction, electronics, power, process and telecommunication industries. Foreign operations account for more than half of sales. A stronger dollar, restructuring charges and a large loss in a new fiber optics telecommunication business, as well as a much higher tax rate, caused a sharp decline in earnings in fiscal 1989. Substantially higher earnings are likely in fiscal 1990.

Current Outlook

Share earnings for the fiscal year ending June 30, 1990 are projected at about $2.25, versus the $1.04 reported for fiscal 1989.

Dividends should continue at $0.08 quarterly.

Sales for fiscal 1990 should advance about 5%, despite the stronger dollar. The higher volume, recent cost reductions and the absence of restructuring charges are likely to allow margins to widen, despite an increase in the pretax loss on Raynet Corp. to $80 million from $55 million, which the company projected in its fiscal 1989 Annual Report. Substantial revenues from systems sales are not expected for approximately two years. The tax rate is expected to decline as profitability is restored in the United States.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Sep.	235	226	202	175
Dec.	277	278	230	200
Mar.	270	276	237	200
Jun.	301	315	276	222
	1,083	1,095	944	798

Sales for the the fiscal year ended June 30, 1989 declined 1.1% from those of the preceding year, reflecting lower revenues in all segments except telecommunications. Margins narrowed, and after a $55.1 million pretax loss at its Raynet Corp. fiber-optics subsidiary, versus a $3.8 million pretax profit, and a $11.5 million restructuring charge, pretax income declined 62%. Following an increase in the effective tax rate to 43.0%, from 26.0%, due to an operating loss incurred in the United States, net income declined 71%, to $1.04 a share from $3.69.

Important Developments

May '89— RYC said that fiscal 1989 pretax earnings would have decreased only 22% excluding the effects of Raynet Corp. and nonrecurring items. It said that the first technology trial of the Raynet fiber-optic distribution system was being conducted by New England Telephone Co.

Next earnings report expected in late October.

Business Summary

Raychem primarily manufactures high performance plastic and elastomeric insulation products and systems, the special properties of which are generally achieved through radiation chemistry. Business segment contributions (income in million $) in fiscal 1989:

	Sales	Income
Electronics	44%	$102.1
Industrial	29%	38.4
Telecommunication	25%	49.2
Ventures & other	2%	-73.4

Foreign operations accounted for 60% of sales in fiscal 1989 and $97.9 million of operating profits.

The electronics segment includes electrical and electronic interconnection systems, wire and cable, heat shrinkable insulation, circuit protection devices, connectors, fiber optics, heating devices and fluid fittings for the electronics, transportation, aerospace and defense markets.

The industrial segment consists of electric heat-tracing systems, power cable accessories, electric insulation products, heat shrinkable sleeves and coatings for pipeline protection, cathodic protection products, and leak detection systems.

The telecommunication segment includes telephone cable splice cases, aerial closure systems, cable repair sleeves and cable termination products, as well as products for splicing, connecting and protecting fiber optic and coaxial cables. The other segment includes thin film conductive coatings, liquid crystal displays, integrated circuits packages, touch screen systems, and the Raynet fiber optic based systems.

Dividend Data

Cash has been paid each year since 1977.

1900

NYSE Symbol RTN Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 18'89	1989					
80¾	84⅜–65⅝	10	2.20	2.7%	A+	0.85

Summary

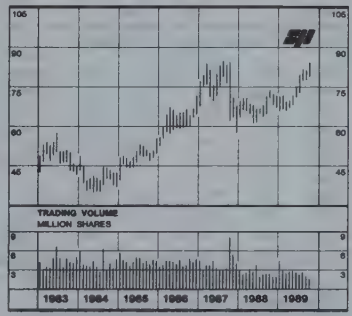
Raytheon is a leading factor in air defense missile and radar systems and other military electronics products, is involved in engineering and construction, and manufactures appliances and small planes. Newer contracts should expand RTN's important missiles/defense electronic business despite the general weakness in defense spending. Recent earnings gains reflect a recovery in energy and aircraft operations. Higher earnings are expected for 1989 and 1990.

Current Outlook

Earnings for 1990 are projected at $8.80 a share, up from the $8.05 estimated for 1989.

Dividends should continue at least at $0.55 quarterly.

Revenues for 1990 should increase approximately 8%. Electronics and missiles should continue as the principal source of improvement, reflecting new contract awards and an increasing total of second source business. Margins should be maintained. Beech Aircraft should extend its profits comeback and energy services should continue to improve. Appliance results could be flat.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	2,073	1,949	1,750	1,725
Jun.	2,290	2,041	1,917	1,828
Sep.	2,189	1,993	1,855	1,714
Dec.	---	2,209	2,137	2,041
	---	8,192	7,659	7,308

Sales for the first nine months of 1989 increased 9.5%, year to year. Primarily reflecting higher interest expense, the gain in net income was held to 8.2%. Share earnings were $5.94, compared with $5.43.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986

Dec.	E2.11	1.92	1.69	1.32
	E8.05	7.35	6.12	5.10

Important Developments

Oct. '89— The total backlog of $7.95 billion as of October 1 1989 was down 4.0%, year to year. The U.S. Government-funded portion of $5.91 billion was down 3.8%.

Sep. '89— Raytheon won the competition to develop the ground-launched version and was named second-source producer of the air-launched version of the Tacit Rainbow missile system.

Apr. '89— RTN repurchased 600,000 shares in the first quarter, bringing to 20.6 million the total purchased since mid-1984. An additional 4.4 million shares have been authorized for buyback.

Next earnings report expected in late January.

Business Summary

Raytheon is a diversified manufacturer of electronic equipment and components. Contributions to sales and pretax profits in 1988:

	Sales	Profits
Electronics	61%	82%
Aircraft products	11%	4%
Energy Services	9%	2%
Major appliances	12%	6%
Other lines	7%	6%

Sales to the U.S. Government accounted for 55% of total sales in 1988. Sales outside the U.S. accounted for 19% of total sales.

Beech Aircraft is a leading manufacturer of single-engine and twin-engine general aviation aircraft.

In defense electronics, RTN produces ground-based and airborne missiles (Patriot, Hawk, Sidewinder, Sparrow, Stinger, AMRAAM, Standard, Maverick), radar systems, electronic countermeasures, guidance and firecontrol systems, sonar, communications equipment and microwave components. Commercial electronics products include marine equipment and electronic components.

Through its Badger Co., United Engineers and Constructors Inc. and Seismograph Service Corp. subsidiaries, RTN constructs petroleum, petrochemical, chemical processing, utility power and industrial plants and conducts exploration for the oil and gas industries.

In major appliances, Raytheon produces Amana microwave ovens and refrigerators, Caloric gas ranges, and Speed Queen laundry equipment.

Dividend Data

Dividends have been paid since 1964. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Reebok International

1906F

NYSE Symbol RBK Options on ASE & Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 2'89	1989					
17⅞	18½-11⅛	14	0.30	1.7%	B	NA

Summary

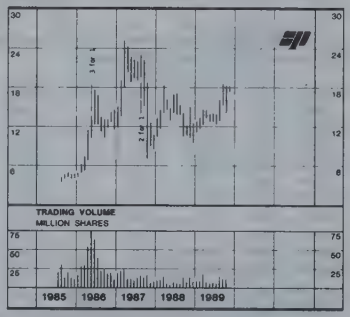
Reebok, a leading producer of athletic footwear, has been diversifying into other areas since 1987 through acquisitions of brand name footwear companies. In October, 1989 RBK acquired for $42 million Boston Whaler, a boat manufacturer. After a period of dramatic growth, earnings fell in 1988, reflecting increased competition and higher costs. However, earnings should rebound in 1989 and 1990, as RBK benefits from new products and cost controls. About 47% of the stock is closely held.

Current Outlook

Earnings for 1990 are projected at $1.75 a share, up from the $1.45 estimated for 1989.

Dividends should continue at $0.07½ quarterly.

Sales in 1990 should rise 10%-15%, reflecting favorable responses to new products including the "PUMP", more favorable response to shoes incorporating the "Energy Return System" of technology, athletic shoes using a light space-age material called Hexalite, as well as increased sales of existing products. Margins should remain about the same as benefits from the turnaround at Rockport and the international divisions, improved distribution channels and inventory controls are offset by slightly higher priced raw materials. Interest costs may equal or be slightly lower than 1989's.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	488	454	282	175
Jun.	432	462	359	216
Sep.	524	539	408	289
Dec.	---	331	340	240
	---	1,786	1,389	919

Sales for the nine months ended September 30, 1989 declined 0.8%, year to year. Margins widened, however, and after taxes, net income rose 7.5%. Share earnings were $1.23 (based on slightly more shares), compared with $1.14.

Dec.	E0.22	0.06	0.30	0.28
	E1.45	1.20	1.49	1.28

Important Developments

Oct. '89— RBK said it was pleased with its earnings performance during the third quarter and first nine months of 1989, and attributed the gains to cost controls and a more favorable product mix. RBK said that it expected to see major sales improvement in the future as a result of new products, including the "PUMP" basketball shoe and athletic shoes using Hexalite, a light space-age cushioning material, as well as higher sales of shoes with the "Energy Return System" of technology. RBK said that it was also pleased with the new sales and earnings highs at Rockport, and added that new product introductions would enhance Rockport's sales in the future. Separately, C. Joseph LaBonte resigned as president and was replaced by Paul Fireman, who is also chairman and CEO.

Next earnings report expected in late January.

Business Summary

Reebok designs, develops and markets quality footwear, apparel, and related apparel under the trademarks Reebok, Weebok, Metaphors, Avia, Ellessee, and Donner. As a result of a series of acquisitions in the recent years, RBK now has five major operating units: Reebok Brands (67% of total 1988 sales), Reebok International, Rockport, Avia and Ellessee (combined, 33%). In March, 1989 RBK sold its John A. Frye unit, which was purchased by The Rockport Company in May, 1987.

Reebok Brands includes the footwear division, which produces men's, women's, and children's footwear for aerobics, sports conditioning/cross-training, basketball, running, walking, tennis, volleyball /indoor court, golf and casual activities. The apparel division designs, develops and markets men's and women's performance wear and accessories. The Weebok division markets non-athletic shoes for infants and children, and the Metaphors division markets a line of casual women's footwear. The Reebok Canada division distributes Reebok brand shoes and apparel, as well as Weebok and Rockport brand shoes throughout Canada.

Reebok International, headquartered in the UK, markets Reebok products abroad, with subsidiaries in France, West Germany, Holland and Austria, and through distributors in over 50 other countries.

Rockport designs, develops and markets lightweight and comfortable casual, dress and fitness walking shoes for men and women. The Donner Mountain subsidiary markets walking shoes, casual footwear and hiking boots.

Avia (acquired 1987) designs, develops and markets high performance athletic footwear for aerobics, basketball, fitness/sports conditioning, tennis, running, cycling, exercise walking and volleyball.

Ellessee USA (acquired 1988) designs, develops and markets men's and women's sportswear and athletic footwear.

Approximately 81% of RBK's footwear was manufactured in South Korea and Taiwan during 1988. One customer, Foot Locker, accounted for 12.2% of total sales during 1988, versus 12.5% in 1987 and 18.7% in 1986.

Dividend Data

Dividends were initiated in 1987.

Summary

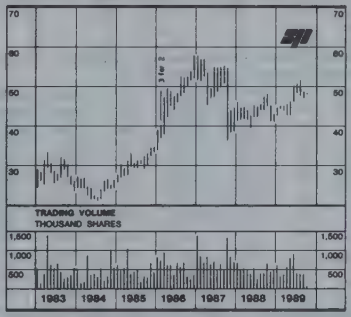
This holding company (33%-owned by Edmond Safra) is the parent of Republic National Bank of New York and Williamsburg Savings Bank, operating in the New York City area and abroad. RNB emphasizes deposit-taking services, including its niche business of providing private banking services for wealthy individuals, investing the major portion of funds collected in low-risk financial instruments. In 1988, it spun off its rapidly growing European private banking subsidiary, Safra Republic, retaining a 49% stake.

Current Outlook

Earnings for 1990 are projected at $5.60 a share, compared with the $5.20 estimated for 1989.

Dividends should continue at $0.32 quarterly.

RNB's primary focus should remain on deposit-taking and related services, and funds should continue to be mainly invested in low-risk assets. Deposits at non-European banks are expected to grow approximately 10% through 1990. RNB's reduced risk investment strategy will continue to result in narrow margins. The provision for loan losses should be low, as domestic loan quality is excellent and LDC loans are conservatively reserved for. Precious metals and bond trading income, dependent on market conditions, could be volatile. Foreign currency trading revenues should grow rapidly with the expansion of trading centers in London and Tokyo. While the spinoff of Safra Republic dilutes RNB's interest in its most rapidly-growing business, Safra Republic could develop more quickly as a European entity. Equity in earnings of Safra Republic could surpass $35 million in 1990.



Review of Operations

Net interest income for the six months ended June 30, 1989 fell 14%, year to year, primarily reflecting the equity basis accounting for Safra Republic stake, a 7.4% gain in earning assets, and a decline in the net interest margin to 1.74% from 2.11%. The provision for loan losses was 40% lower, at $6 million, reflecting improving domestic loan quality. Aided by gains in foreign exchange and precious metals trading, and the inclusion of $14.8 million of equity in earnings of Safra Republic, noninterest income advanced 32%. With noninterest expense growth held to 0.8% in the absence of the expenses of Safra Republic, pretax earnings were up 1.3%. After taxes at 15.0%, versus 18.6%, net income was up 5.7%.Following preferred dividends, share earnings were $2.45, compared with $2.40.

Important Developments

Jun. '89— RNB proposed a merger with Manhattan Savings Bank (MSB). The proposal offers eligible depositors of MSB the right to subscribe for newly issued RNB common shares at $44.69 a share. In October, 1989 RNB said that there had been no publicly disclosed response to the offer.

Next earnings report expected in mid-October.

Business Summary

This bank holding company is the parent of Republic National Bank of New York, the nation's 20th largest bank, and Williamsburg Savings Bank. It has 30 bank and 12 thrift branches in the New York City area, as well as offices in 20 foreign countries. In addition to retail banking and commercial lending, RNB is heavily engaged in private banking (services for wealthy individuals), including owning a 49% ($450 million) interest in Safra Republic, with banks in Geneva and other European locations. A high proportion of assets is held in more liquid investments rather than loans. Dealing in gold and silver is important. Factoring and currency trading operations are growing.

During 1988 average earning assets of $21.8 million (up 22% from 1987) were divided: domestic loans 23%, foreign loans 10%, investment securities 20%, and money market investments 47%. Average sources of funds were demand deposits 4%, domestic savings and time deposits 28%, foreign deposits 36% (total deposits were $17.1 billion, up 24% from 1987), short-term borrowings 6%, long-term debt 9%, equity 5% and other 12%.

At year-end 1988 nonperforming assets were $151 million (2.63% of loans and related assets; includes $133 million of LDC loans) up from $121 million (2.16%) a year earlier. The reserve for loan losses was 3.15% of loans, against 4.27%. Net charge-offs during 1988 were 1.29% of average loans (largely LDC-related), against 0.26% in 1987.

Reynolds Metals

1926

NYSE Symbol RLM Options on Pacific (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 23'89	1989					
51¾	62¾-49	5	1.80	3.5%	B-	1.19

Summary

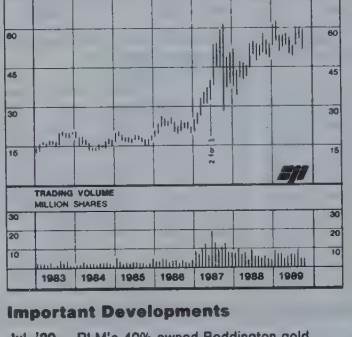
The second largest U.S. aluminum producer, Reynolds fabricates aluminum products for a wide variety of industries, and also has interests in two Australian gold mines. RLM is expanding its consumer products and precious metals businesses. Earnings for 1990 may decline moderately, reflecting expected sluggish economic growth. Nonetheless, dividends were recently raised 13%.

Current Outlook

Earnings for 1990 are projected at $7.00 a share, down from 1988's estimated $8.80.

Dividends were increased 13%, to $0.45 quarterly from $0.40, with the October, 1989 payment.

Sales for 1990 may decline slightly on expected modest decreases in average annual aluminum prices and aluminum shipments. Anticipated further growth of the containers/packaging market will probably be outweighed by weakness of the building/construction and automobile segments. With the lower aluminum sales, and negative operating leverage (the spreading of high fixed costs over fewer units of production), margins should narrow despite expected increased gold output.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,445	1,163	941	836
Jun.	1,649	1,469	1,060	1,028

Important Developments

Jul. '89— RLM's 40%-owned Boddington gold mine completed a second $30-million expansion, which raised ore processing capacity to 6 million tons a year from 4.5 million. In February, 1989 RLM announced additional gold discoveries at its 50%-owned Mt. Gibson mine and at Boddington. The discoveries increased initial gold reserves at Mt. Gibson from 266,000 ounces to 491,000, and at Boddington from 3,082,000 ounces to 3,846,800.

Mar. '89— RLM announced a C$500-million expansion of its Baie-Comeau (Quebec) primary aluminum plant that would increase the smelter's annual output to 400,000 metric tons. A new 120,000-metric-ton-a-year line was scheduled to reach full production in late 1991.

Next earnings report expected in late January.

Business Summary

Reynolds is a major integrated aluminum manufacturer, produces certain plastic and paper products and is involved in mineral properties development. Contributions by segment:

1988	Sales	Op. Prof.
Production & processing	57%	88%
Finished prod. & other	43%	12%

Total shipments of aluminum in 1988 were 1,321,900 metric tons. Production of primary and of reclaimed aluminum was 845,100 and 368,500 tons, respectively. At year-end 1988 total capacity (excluding 419,000 tons of reclaimed aluminum) was 840,000 tons of primary aluminum a year. RLM has long-term contracts to buy bauxite from sources in Australia, Brazil and Guinea. Electric power is largely purchased.

Finished products include aluminum cans, aluminum foil, plastic and wax paper wraps, paper baking materials, freezer paper, and aluminum and vinyl building items. In May, 1988 RLM acquired Presto Industries, a major producer of plastic bags and food wrap.

The Mt. Gibson (Australia) gold project (50%-owned) produced 55,400 ounces in 1988 and was expected to more than double its output in 1989. The Boddington (Aus.) gold mine (40%-owned) produced 282,000 ounces in 1988 and was expected to produce over 400,000 ounces in 1989. RLM's share of 1988 output from both mines was about 141,000 ounces and was projected at some 220,000 ounces for 1989.

Dividend Data

Dividends have been paid since 1942. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Jan. 5'90	1989-90					
34¼	41⅛-29½	17	0.90	2.6%	A	1.18

Summary

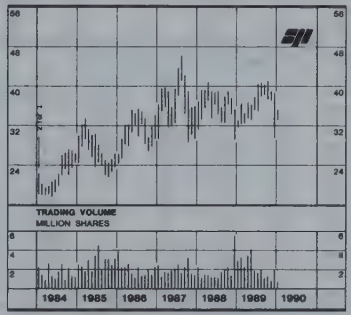
Rite Aid has continued to expand its chain of drug stores through acquisitions. Diversification into specialty retailing businesses with operational similarities has included the acquisitions of the ADAP automotive supply business and the Encore discount book chain. In the third quarter of fiscal 1989-90, the company eliminated its video rental departments and took a $0.32 a share charge. RAD sold its 47% interest in Super Rite Foods in September, 1989.

Current Outlook

Earnings for the fiscal year ending March 2, 1991 are projected at $2.75 a share, up from the $2.30 from continuing operations estimated for fiscal 1989-90.

The quarterly dividend has been raised 9.8%, to $0.22½ from $0.20½.

Sales for fiscal 1990-1 should reflect drug store acquisitions and strong prescription sales. Margins should expand, benefiting from the increased volume and the absence of video rental departments. Profitability at the ADAP division should improve. Acquisitions of drug stores in its market or contiguous areas are possible.



Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
May	755	678	532	419

Important Developments

Dec. '89— Income from continuing operations for the third quarter of fiscal 1989-90, excluding the $22 million pretax charge for video rental department closings, increased 10.7% from a year earlier. Revenues in the retail drug segment rose 13.7% in the third quarter. The division operated 2,340 stores at the end of the quarter, with a net addition of 47 units. The company's ADAP subsidiary posted a net loss of $427,000, versus income of $131,000 in the third quarter; year-to-date sales advanced 0.7%, to $46.7 million from $46.4 million and earnings declined to $56,000 from $330,000. RAD posted a gain of $18.4 million from the sale of its 46.8% interest in Super Rite Foods, Inc. In September, the company purchased 18 drugstores in south central New Jersey.

Next earnings report expected late March.

Business Summary

Rite Aid operates a large chain of drug stores, a medical services division and several specialty retail outlets. Contributions in fiscal 1988-9:

	Sales	Profits
Retail drug	95%	95%
Medical services	4%	3%
Specialty retailing	1%	2%

There were 2,270 discount drug stores in 22 Eastern and Southeastern states and the District of Columbia as of April 25, 1989, with the largest concentrations in Ohio ((349), Pennsylvania (303), New York (257), and Florida (190). Nearly 41.1% of drugstore revenues were from prescriptions filled. Third party transactions accounted for more than 41.5% of prescription sales. Private label products generate 15% of nonprescription volume.

Specialty operations include ADAP, a leading New England-based discount automotive supply chain (acquired March, 1984) with 70 units at fiscal 1988-9 year-end, and the Encore deep discount book chain (acquired July, 1984) with 47 units. Concord Custom Cleaners (acquired with the April, 1988 acquisition of Begley Co.) operates 153 dry cleaning outlets in 10 southeastern and mid-western states. The company's 28.2% stake in Super-drug Stores, plc. was sold in 1987.The 190-store Circus World toy chain was sold in August, 1985.

The medical services division (Sera-Tec) has 11 specialized plasmapheresis centers and is one of the largest suppliers of plasma.

In September, 1989 the company sold its wholesale and retail food operations conducted through 47%-owned Super Rite Foods.

Dividend Data

Dividends have been paid since 1968. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Roadway Services

5103

NASDAQ Symbol ROAD (Incl. in Nat'l Market) Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 25'89	1989					
38	40-27¾	15	1.10	2.9%	A-	1.24

Summary

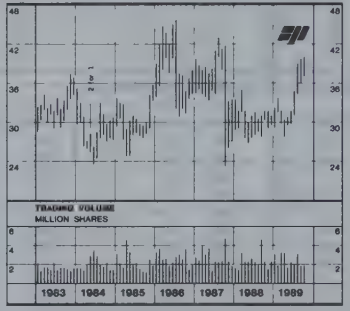
This transportation holding company operates the nation's third largest general freight motor carrier and provides regional trucking and specialized transportation services. In October 1988, Roadway acquired Viking Freight, Inc., a regional LTL carrier serving the West, for $126.5 million. Profits should continue to advance in 1990, primarily reflecting rising contributions from ROAD's fast-growing small package service and improving market share for Roadway Express.

Current Outlook

Profits for 1990 are estimated at $2.75 a share, versus the $2.50 anticipated for 1989.

Dividends, currently $0.27½-a-share quarterly, could be lifted moderately in 1990.

Roadway should extend its profit recovery into 1990, primarily reflecting sharp gains for ROAD's fast-growing small package service. Despite a slowing economy, Roadway Express should post moderate volume growth as it recoups some market share lost in recent years. While intensifying competition and costs related to the upgrading of computer systems will exert pressure on margins, offsetting will be improving terminal productivity. Roberts Express should continue to enjoy continued high growth for its expedited delivery services. Aiding comparisons will be increased interest income.



Revenues (Million $)

Weeks:	1989	1988	1987	1986
12 Mar.	563	468	414	399

Important Developments

Sep '89— During 1989's third quarter, Roadway Package System (RPS) completed the expansion of its hub facilities in Harrisburg, Pa., and Columbus, Ohio. In November, RPS was expected to finish the upgrading of its Chicago facility. In May, RPS expanded its service to 42 states with the opening of new terminals in Colorado, New Mexico, Oregon, Utah and Washington. RPS, which planned to open a total of 19 facilities in 1989 (compared with 23 in 1988), now offers service reaching nearly 75% of the U.S.

Dec. '88— ROAD repurchased a total of 958,424 (2.5%) of its common shares through 1988 year-end, at a cost of $28.4 million, under a $30 million buyback program authorized in November. ROAD said it would complete the program in 1989.

Next earnings report expected in late January.

Business Summary

Roadway Express, which accounted for 78% of Roadway Services' operating revenues in 1988, is the nation's third largest general freight motor carrier. Service is provided to all 50 states, Canada, Mexico and Puerto Rico through a network of more than 587 terminals. Some 77% of the division's tonnage, 89% of revenues and nearly 99% of shipments are generated from higher-rated less-than-truckload (LTL) freight.

Operating data for Roadway Express follow:

	1988	1987
Shipments (000s)	12,803	13,298
Tons handled (000s)	6,465	6,472
Average haul (miles)	1,192	1,186

Roadway provides short-haul LTL services through Spartan Express, which operates in 16 central and southern states through a network of 45 terminals. Viking Freight, acquired in late 1988 for $127 million, provides short-haul LTL services in 10 states, including intermodal service to Hawaii and Alaska. Viking also provides service to points in Australia and Guam and, through its VFS Transportation, Inc. division, offers nationwide truckload transportation. ROAD provides expedited delivery services for time-sensitive freight through its Roberts Express unit.

Roadway Package System, Inc. (accounting for 12% of revenues), established in 1985, transports shipments weighing under 100 pounds. At 1988 year-end, RPS was providing service to 36 states through a network of 130 terminals.

Summary

This electric-gas utility serves the city of Rochester, New York, and the surrounding agricultural area. Nuclear power is its primary fuel source. In 1987 the company wrote off $262 million (after taxes) for the disallowed costs of its investment in the Nine Mile Point Nuclear Station 2. The plant recently was operating at 100% of capacity, although the New York State Public Service Commission had not made a final determination of the unit's commercial operation date for regulatory purposes.

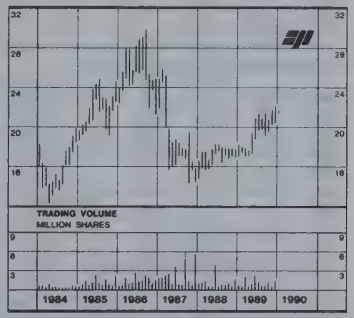
Business Summary

Rochester Gas & Electric supplies electric and gas service to an economically diversified nine county area centering around the city of Rochester, N.Y. The service area has a population of about 900,000. Electric sales accounted for 70% of revenues and 85% of net operating income in 1988; gas sales accounted for 30% and 15%, respectively. Contributions to electric revenues:

	1988	1987	1986	1985
Residential	35%	35%	34%	33%
Commercial	27%	28%	28%	26%
Industrial	22%	23%	24%	23%
Other	16%	14%	14%	18%

The fuel mix for electric generation in 1988 was nuclear 50%, fossil fuels 28% and purchased 22%. Peak load in 1988 was 1,275 mw and total system capability at time of peak was 1,598 mw, for a capacity margin of 20.2%.

RGS owns the 470 mw Ginna Nuclear Station (in service since 1970) and has a 14% share in the 1,080 mw Nine Mile Point Nuclear Station 2. Commercial operation of Nine Mile 2 (pursuant to Nuclear Regulatory Commission guidelines) was achieved in March, 1988, adding some 151 mw to capacity. Total cost of the plant was $4.2 billion, of which RGS' share was $591 million ($588 million expended at December 31, 1988). Pursuant to an October, 1986 agreement with the regulators, a cap of $4.16 billion was placed on recoverable costs for Nine Mile 2 or $582 million for RGS's share. In 1987 RGS took an after-tax write-off of $262 million to reflect disallowed costs for Nine Mile 2, assuming commercial operation per New York State guidelines in May, 1988. The New York State Public Service Commission has not yet made a final determination of the unit's commercial operation date for RGS for regulatory purposes. Management anticipated that the PSC would ultimately select April 5, 1988, the date it has fixed for Niagara Mohawk Power Corp. and Long Island Lighting Co., as the appropriate date for RGS. A variation from the commercial operation date previously assumed by RGS would result in additional income or loss of about $6 million per month (net of tax).



Construction expenditures for 1989 were estimated at $123 million. With the completion of Nine Mile 2, most of the expenditures were earmarked for upgrading the Ginna Station and other facilities.

Important Developments

Oct. '89— Manangement said that earnings for the first nine months of 1989 were penalized by costs associated with an unscheduled outage of about two weeks at the Ginna nuclear plant and the addition of personnel and the upgrading of programs and facilities to meet regulatory requirements at both the Ginna and Nine Mile Two plants.

Next earnings report expected in mid-February.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	244.9	236.6	231.3	254.2
Jun.	184.6	166.6	157.2	163.0
Sep.	183.2	172.8	165.3	150.8
Dec.		197.9	177.8	180.6
		774.0	731.5	748.6

Operating revenues for the nine months ended September 30, 1989 increased 5.2%, year to year (1988 restated), reflecting larger gas clause adjustment revenues, higher sales to other utilities, more net unbilled revenues and colder weather. Penalized by increased fuel expenses and costs associated with the Ginna and Nine Mile two nuclear plants, net income declined 24%. Share earnings were $1.45, versus $1.96.

Rockwell International

1943T

NYSE Symbol ROK Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 18'89	1989					
23	27⅛-19¾	8	0.78	3.4%	A+	1.17

Summary

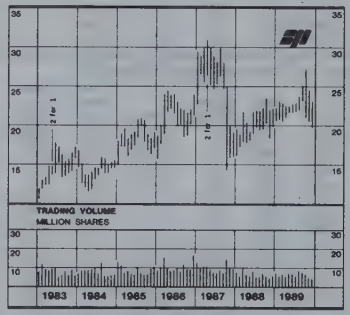
Rockwell International is a leading producer of space systems, including the Space Shuttle and rocket engines, makes electronics products such as defense systems, telecommunications, avionics and the Allen Bradley electrical and factory automation systems, and produces automotive products and graphics systems. The end of B-1B bomber production in 1988 reduced aircraft operations substantially, and ROK is focusing on other core businesses for long-term growth. Lower automotive sales are expected to retard earnings growth in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are estimated at $2.50 a share, compared with fiscal 1989's $2.87, which included a $0.40 capital gain.

Dividends should continue at least at the current $0.19½ quarterly rate.

Revenues for fiscal 1990 should advance moderately. Aerospace revenues are expected to rise slightly, reflecting an increase for space programs and a roughly unchanged total for aircraft, with margins steady. Electronics sales and operating profits should rise somewhat because of larger avionics and industrial sales. Automotive results will decline because of lower vehicle sales, but graphics profits should continue to improve.



Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Dec.	---	2.87	2.68	2.87

Important Developments

Dec. '89— ROK said that it expected its truck component sales to decline about 11% during fiscal 1990 because of an expected drop in North American truck production.

Nov. '89— At September 30 the total backlog of $12.6 billion was down 4.5%, year to year. Government funded backlog of $3.8 billion was about unchanged.

Apr. '89— ROK agreed to acquire Butler Polymet, a maker of automotive plastic systems with annual sales of $70 million. ROK completed purchase of Baker Perkins, maker of printing machinery, which has annual sales of about $120 million.

Jan. '89— ROK completed sale of its flow measurement division for $437 million. A net gain of $0.40 a share was included in March quarter earnings.

Next earnings report expected in late January.

Automotive	20%	15%
Graphics	9%	11%

Foreign units accounted for 18% of sales and 20% of profits in fiscal 1989. Sales to the U.S. Government were 44% of sales.

The company is prime contractor for the Space Shuttle Orbiter program and its main engine and provides parts and service for the B-1B bomber. Other involvements include a portion of the MX missile and NAVSTAR. Automotive components are sold for highway and off-highway vehicles and for passenger cars.

Electronics include military communications equipment and systems, guidance, control and navigation systems, telecommunications equipment, avionics and the Allen-Bradley electrical products and factory automation equipment.

The Graphics Group includes highspeed printing presses.

Dec. 19'89	1989					
25⅛	37½-31	11	1.20	3.7%	A	1.32

Summary

This company is an important producer of plastics and related products, coatings chemicals, pesticides, processing chemicals, and a variety of other specialty chemicals. Earnings in recent years strengthened with strong worldwide demand and the weak U.S. dollar, but in 1989 and 1990 profits will likely be restricted by the slowing economy and new plant start-up costs. Prospects are enhanced by ROH's expertise in polymer design and in the development of agricultural and industrial specialty chemicals.

Current Outlook

Share earnings for 1990 could exceed $3.00, up from the $2.80 expected for 1989.

Dividends should remain at $0.30 quarterly.

Earnings for 1990 are expected to benefit from contributions by new products and new and expanded production facilities resulting from an aggressive capital spending program. Volume gains, however, will be limited by slower growth in several geographic markets and product lines and tight capacity in several others. Profit margins are also expected to recover somewhat due to the recent decline in key chemical raw materials. The stronger U.S. dollar and continued heavy new plant start-up costs will likely continue to restrict profitability.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	680	621	533	541
Jun.	735	700	597	569
Sep.	623	620	541	489
Dec.	---	595	532	469
	---	2,535	2,203	2,067

Sales for the first nine months of 1989 rose 5.0%, year to year, reflecting a 4% volume gain and higher selling prices. Penalized by higher raw material, manufacturing, and new plant start-up costs, increased selling and research expenses, and adverse foreign currency changes, net income declined 17%, to $2.33 a share from $2.82.

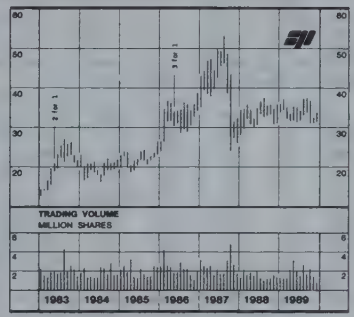
	E2.80	3.46	2.85	2.01



Important Developments

Nov. '89— ROH said that increased building costs, strained capacity for some products and slowing demand for others are trends expected to continue into 1990. As part of a three-year, $1-billion capital program begun in 1988, ROH said that $390 million would be spent in 1989. Capacity expansions include a 50% addition for acrylic acid, a 125 million lb. expansion of methacrylate monomer, and two acrylic resin plants. New products and modernization projects include plastics modifiers and acrylic resins. ROH amended its agreement to purchase shares from the William Penn Foundation, which holds about 15% of the outstanding shares. ROH will purchase 2.2 million shares from the foundation on April 1, 1991. The price will be based on the average market price of ROH shares during the period August, 1989 through March, 1995, with a minimum price of about $70 million.

Next earnings report expected in late January.

Business Summary

Rohm and Haas is a diversified producer of chemicals and allied products. Contributions in 1988:

	Sales	Profits
Polymers, resins & monomers	40%	55%
Plastics	21%	25%
Industrial chemicals	28%	16%
Agricultural chemicals	13%	4%

Foreign operations accounted for 43% of sales and 48% of operating profits in 1988.

Polymers, resins and monomers (including opaque polymers, emulsions, modifiers, and acrylate and methacrylate monomers) are produced for paints, finishes and coatings, inks, textile and paper coatings, binders and finishes, adhesives, nonwoven materials, construction products, caulks, polishes, cement, and leather treating chemicals.

The plastics group consists of additives, impact modifiers and processing aids for plastics, and Plexiglas acrylic resins, plastic sheeting, and molding powders.

Industrial chemicals include biocides, ion exchange and fluid process chemicals, chemical additives for petroleum products, surfactants and dispersants, specialty polymers, electronic chemicals, separations, and other specialty chemicals.

Agricultural includes fungicides, herbicides, miticides, and spray adjuvants, primarily for specialty crops and fruits and vegetables.

NYSE Symbol RHR Options on Phila (Mar-Jun-Sep-Dec)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 15'89	1989					
19½	37⅞-18⅞	24	None	None	B	1.23

Summary

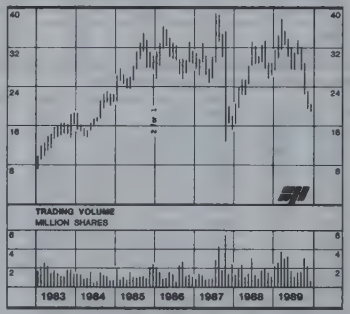
Earnings of this leading supplier of jet engine nacelle assemblies should decline in fiscal 1990, primarily reflecting problems with Government contracts and increased interest cost. The large backlog and the likelihood of continued expansion of commercial markets enhance longer-term earnings growth prospects.

Current Outlook

Earnings for the fiscal year ending July 31, 1990 are estimated at $1.00 a share, down from the $1.90 of fiscal 1989.

Resumption of cash dividends is not expected in the near future.

Revenues for fiscal 1990 should rise moderately. Deliveries will be increased on newer commercial programs such as the A320 and MD-11, but these will be partially offset by some programs completed in 1989. A loss in the first quarter primarily reflected government contract problems, but margins should improve later in the year as new facilities reach peak rates and productivity increases. Interest expense will be higher.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Oct.	234	225	203	159
Jan.	---	251	220	154
Apr.	---	264	231	150
Jul.	---	304	253	200
	---	1,045	907	663

Sales for the quarter ended October 29, 1989 increased 4.3%, year to year. Margins narrowed sharply, and with interest expense up 91%, there was a net loss of $11.4 million, in contrast to net income of $7.8 million.

Jul.	E0.59	0.47	0.52	0.40
	E1.00	1.90	1.85	1.53

Important Developments

Nov. '89— Rohr reported a loss for the first quarter of fiscal 1990 because of: (1) redefined acceptance criteria on Government contracts, which caused production interruptions; (2) production difficulties in new commercial contracts; (3) changes in program mix; and (4) increased interest cost from borrowing to finance inventory growth.

Nov. '89— The firm backlog at the end of October, 1989 was a record $2.3 billion, up 21.0% from a year earlier. In addition, there was $2.0 billion of anticipated backlog, representing orders with options that the company expects will be exercised.

May '89— Rohr signed a contract to provide the nacelle systems for the CFM56-5C2 engine for the Airbus Industrie A340 aircraft.

Next earnings report expected in late February.

Business Summary

Rohr Industries is primarily engaged in the manufacture of systems for commercial, military and business aircraft, and for space vehicles. Breakdown of sales and operating profits for fiscal 1989 was:

	Sales	Profits
Aircraft products	91%	88%
Space products	9%	12%

Boeing accounted for 18% of sales in fiscal 1989 (versus 21% in fiscal 1988), Lockheed for 7% (13%), General Electric for 11% (10%) and McDonnell Douglas for 11% (12%). Direct or indirect U.S. Government purchases (including some overlap with the above) provided 30% of sales (35%).

The manufacture of components for and the assembly of nacelles (pods that surround aircraft engines) and thrust reversers (which aid aircraft deceleration after landing) comprise the bulk of company sales. Complete nacelle systems, which usually include the cowling, nozzle systems and thrust reversers, are made for commercial, military and general aviation aircraft under contracts with major airframe and engine manufacturers. Other components produced include strut assemblies, ventral fins, engine cases, and acoustic liners.

Space operations consist primarily of the manufacture of solid rocket motor nozzles and insulated cases for the Titan Space Launch Vehicle and the machining of reusable rocket cases for the Space Shuttle.

Dividend Data

No cash dividends have been paid since October, 1975. A "poison pill" stock purchase right was adopted in 1986.

Finances

In April, 1989 Rohr negotiated a new $200 million credit agreement. This, together with other credit sources and internally generated cash, is expected by management to satisfy future financing needs.

Capitalization

Long Term Debt: $429,809,000.

NYSE Symbol REN Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 25'89	1989					
10⅝	13¼-9⅝	NM	0.08	0.8%	B	1.24

Summary

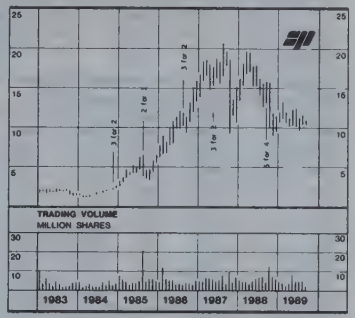
This hazardous waste management company's principal source of revenue is the operation of four incinerators that effectively destroy a variety of organic hazardous wastes. REN also cleans up contaminated sites operated by others. Earnings for fiscal 1990 are expected to recover partially from the loss foreseen for fiscal 1989, aided by higher demand, improved pricing, and capacity additions.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are expected to recover partially, to $0.35 a share, from the $0.25 loss expected for fiscal 1989, which includes a $0.52 nonrecurring charge.

Dividends should remain at $0.02 quarterly.

Revenues for fiscal 1990 are expected to be up moderately, reflecting continued high demand for incineration services, better prices, improved operating efficiency of the two new kilns, and contributions from the rotary reactor. Margins will benefit from the absence of start-up costs from the addition of the new incinerators. The tax rate should be about 36%. Long-term prospects appear favorable, reflecting REN's aggressive capital expansion program, more stringent governmental regulation, and greater public awareness of environmental contamination.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	---	50.7	39.5	29.8
Mar.	[2]78.2	52.6	41.3	30.9
Jun.	39.6	50.2	43.6	36.4
Sep.	---	52.8	49.2	39.8
	---	206.3	173.6	136.9

Revenues for the nine months ended June 30, 1989 fell 3.8% from the prior-year period's restated level, reflecting a sharp decline in landfill revenues, which outweighed gains for incineration and Chempak operations. Margins narrowed significantly, partly due to certain extra costs required to bring two new incinerators on stream and expenses incurred to remediate certain landfill areas. Following a $48.6 million nonrecurring pretax charge, there was a net loss of $20.4 million ($0.34 a share), in contrast to net income of $28.9 million ($0.48, adjusted). Results exclude losses from discontinued operations of $0.10 a share, versus less than $0.01.

	Ed0.25	0.55	0.48	0.32

Important Developments

Jul. '89— The company discontinued its field service business, which had not lived up to expectations, as it felt that resources being utilized by the operation could be better employed in its incineration and Chempak operations. REN also noted that its fiscal 1989 third quarter results include a nonrecurring pretax charge of $48.6 million ($0.52 a share after taxes), which included $38.6 million for various mandated orders requiring remediation or corrective action during the next few years at certain landfills.

Next earnings report expected in late October.

Business Summary

Rollins Environmental Services operates four high temperature incinerators (2,000°F plus) that effectively destroy organic hazardous wastes. It has a combined capacity greater than any other commercial operator. REN also cleans up abandoned hazardous waste sites, and disposes of aqueous wastes at a deep injection well. In June, 1989 the field service operation was discontinued. Contributions to revenues in recent years:

	1988	1987
Incineration	57.6%	58.2%
Field services	16.8%	16.9%
Transportation	11.2%	9.6%
Landfill	7.8%	9.1%
Other	6.6%	6.2%

REN's high temperature incinerators are located in Deer Park, Tex. (2), Bridgeport, N.J., and Baton Rouge, La. These incinerators eliminate organic wastes such as herbicides, plastics, halogenated solvents, pesticides, pharmaceuticals and refinery wastes, whether they are gases, liquids, sludges or solids. A rotary reactor, which processes low heat-content sludge wastes, began commercial operation in early fiscal 1989. Federal and state regulations require a destruction and removal efficiency of 99.99% for organic wastes and 99.9999% for polychlorinated biphenyl (PCB). REN's rotary kiln incinerators and rotary reactor meet or exceed these requirements.

REN also transports wastes to its plants and other waste disposal facilities for treatment and disposal and operates landfills at the Deer Park and Baton Rouge plants, in which it disposes of hazardous wastes. Through its Chempak unit, REN provides treatment and disposal services to small quantity generators of hazardous wastes.

In common with others in the hazardous waste disposal industry, the company has in the past and may in the future be subject to litigation by Government agencies and individuals alleging improper discharge or disposal of toxic substances.

Dividend Data

Dividends were initiated in late 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

44⅛	48-36⅛	22	0.80	1.8%	A-	1.17

Summary

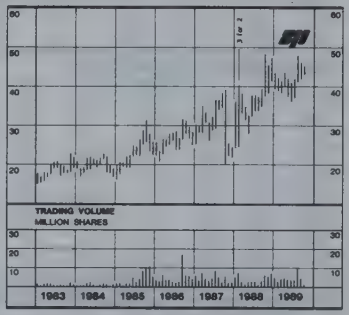
Rorer Group manufactures and markets prescription and over-the-counter pharmaceuticals, including Maalox antacids and various other analgesic, cardiovascular, hypersensitivity, bone metabolism, and plasma-related products. The company has been the subject of much takeover speculation in recent years.

Current Outlook

Earnings for 1990 are projected at about $2.50 a share, up from the $2.15 estimated for 1989.

An increase in the $0.20 quarterly dividend is likely soon.

Sales for 1990 are expected to show further growth, aided by continued gains Rorer drugs such as Lozol diuretic/antihypertensive, Slow-Bid and Azmacort respiratory products, Monoclate clotting factor, Frumil diuretic, Selectol beta blocker and Calcimar/Calsynar bone metabolism products. Maalox sales should also rise, helped by a recently expanded advertising campaign. Profitability should benefit from the better volume, cost efficiencies and possible improvement in foreign exchange.



Net Sales (Million $)

Important Developments

Oct. '89— The company granted Upjohn Co. rights to co-market or distribute two ROR cardiovascular drugs-Selectol, an antihypertensive, and Frumil, a diuretic. In July Rorer granted Upjohn the right to jointly market Selectol (under the name Selecor) in the U.S. after FDA approval for the product is received. Unlike other beta blockers, Selectol has been shown to reduce lipid levels and triglycerides. Besides Selectol, other Rorer pharmaceutical products presently awaiting FDA approval include DDAVP, a treatment for nocturnal bed wetting; Nasacort, a nasal treatment for allergic rhinitis; and IVGG, a replacement therapy for gamma globulin. In July ROR signed a joint venture agreement with Bolar Pharmaceutical to develop and markert diltiazem, a calcium channel blocker to treat hypertension.

Next earnings report expected in late October.

Business Summary

Rorer manufactures and markets prescription and over-the-counter pharmaceuticals worldwide. Its pharmaceutical business was significantly enlarged in January, 1986 with the purchase of Revlon's USV Pharmaceutical and Armour Pharmaceutical units for $690 million cash. Sales in recent years were divided as follows:

	1988	1987
Gastrointestinals	25%	25%
Plasma products	13%	13%
Cardiovasculars	12%	11%
Other products	50%	51%

Foreign operations accounted for about 47% of sales and 52% of profits in 1988.

Rorer is believed to be the world's largest producer of antacid products, principally through its Maalox line. Related products are Algicon, a treatment for reflux esophagitis; and Ascriptin, an analgesic which combines Maalox with aspirin. Plasma related products produced by Armour include blood fractions such as Albuminar, Monoclate and Factorate, which are sold to hospitals. Cardiovasculars consist of Lozol, an antihypertensive diuretic; Selectol, a beta blocker; and Frumil, Hygroton and Regroton diuretics.

Other products include Calcimar, a synthetic hormone for the treatment of metabolic bone disease; Slo-Bid and Azmacort for asthma and related disorders; and other medications.

Dividend Data

Dividends have been paid since 1939. A "poison pill" stock purchase right was adopted in 1985. A dividend reinvestment plan is available.

11/4	9⅞-5⅝	NM	None	None	C	1.40

Summary

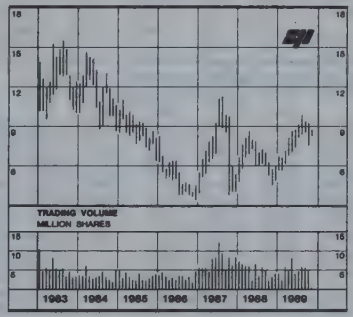
This company performs onshore and offshore contract drilling for the oil and gas industry, and operates a fleet of helicopters and aircraft primarily in Alaska. The company intends to expand its offshore drilling activities in the North Sea and the Gulf of Mexico in addition to sites in Southeast Asia. Prospective improvement in the gas industry's fundamentals, as well as further gains in the aircraft segment, may enable the company to return to profitability by late 1990.

Current Outlook

Another loss is projected for 1990, but it may narrow to $0.10 a share from the $0.40 a share loss estimated for 1989.

Early resumption of dividends is not likely.

Total revenues for 1990 should improve owing to continued gains in the aircraft operations. Drilling for natural gas is expected to strengthen, reflecting a prospective turn-around in the gas industry's fundamentals. Accordingly, margins on drilling should be stronger. Financing costs should decline, which will aid earnings comparisons.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	50.7	47.0	23.9	53.9
Jun.	60.6	52.4	29.7	40.9
Sep.	65.1	62.4	42.8	44.2
Dec.	---	54.8	46.8	28.2
	---	216.7	143.1	167.2

Revenues for the nine months ended September 30, 1989 rose 8.9%, year to year, owing to sharp gains at the aircraft operations. Costs again exceeded revenues, but lower costs in drilling activities narrowed the operating loss to $14.3 million from $30.2 million. After lower interest expense, and a nominal provision for taxes in both periods, the net loss was $21.4 million ($0.30 a share), versus a net loss of $42.1 million ($0.58).

Important Developments

Nov. '89— The company reported that the aviation division continued to be profitable in 1989's first nine months. Demand for general charter work was strong, as was scheduled airline services and general support services with offshore drilling. The drilling sector remained unprofitable in the 1989 period. North Sea drilling activity, although profitable during July and August, was unprofitable in September due to reduced rig acitivity. Gulf of Mexico drilling acitivity, weak in July and August, turned around in late September and was strong through October. RDC projected increased drilling revenues in the North Sea over the next six months due to greater rig utilization. The company added that it expected revenues to be enhanced by increased day rates in the Gulf of Mexico. Over the longer term, drilling in China and Southeast Asia is promising.

Next earnings report expected in mid-January.

Business Summary

Rowan provides primarily contract drilling services in offshore domestic and foreign waters and onshore in the U.S. It also provides contract and charter aviation services, primarily to oil and gas related operations. During 1988 RDC decided to withdraw from oil and gas exploration. Industry segment contributions in 1988 (profits in million $):

	Revs.	Profits
Domestic drilling	58%	-$30.1
Foreign drilling	4%	-5.7
Aviation operations	34%	0.8
Oil & gas operations	4%	2.4

RDC owns 23 off-shore rigs, including three heavy-duty Gorilla jack-ups, 17 deep water jack-ups, one semi-submersible and two submersible barge rigs. Work is done primarily in the Gulf of Mexico, the North Sea, and eastern Canada. Land drilling is conducted through six arctic rigs in Alaska and nine deep-well rigs in western Texas and Oklahoma. Offshore utilization averaged 81% in 1988; 65% in 1987, 52% in 1986. Only one of the company's six Alaskan land rigs worked until mid-year, resulting in 8% overall utilization, and none of the rigs in Texas or Oklahoma were active in 1988. Since late 1986 Rowan has priced rig services only slightly above incremental costs of labor and consumable supplies.

The company owns a fleet of 89 helicopters and 13 fixed-wing aircraft based in Alaska and in the Gulf of Mexico area. Services are provided primarily to oil and gas related industries.

Following the sale of substantially all its off-shore Gulf of Mexico leases, effective January 1989, which contained the bulk of its oil and gas reserves, Rowan retains a small working interest in 7 productive blocks in the Gulf of Mexico and several onshore fields.

On December 15, 1988 the Rowan Gorilla I jack-up rig capsized while being towed to the North Sea. The rig was fully insured. Insurance proceeds of $13.0 million were received in 1988 and $77.0 million were received in January, 1989. RDC recorded a gain from the proceeds of $24.4 million during fourth quarter of 1988.

Dividend Data

Common dividends were omitted in October, 1986 after having been paid since 1964. The most recent distribution was $0.01 on September 5, 1986.

Summary

The largest bank in Canada and North America's fourth largest, Royal has a network of more than 1,640 branches coast to coast and is also active internationally. A key subsidiary, RBC Dominion Securities Ltd., is Canada's leading investment dealer.

Business Summary

The Royal Bank of Canada is the largest of the Canadian chartered banks with assets of $110.1 billion at the end of fiscal 1988, and is the most active in multinational transactions. Some 1,640 branches were in operation at October 31, 1988, primarily located in Canada (the largest concentrations are in Ontario and Québec). Operations are also conducted in 33 foreign countries through branches, affiliates and subsidiaries.

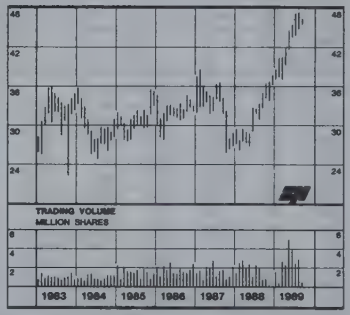
Total income in fiscal 1988 was derived as follows:

Interest on loans	72%
Noninterest income	13%
Interest on deposits with banks	7%
Interest on securities	7%
Interest on lease financing	1%

In fiscal 1987, the bank added $1.4 billion to the general provision for potential losses on loans to a group of 34 financially troubled countries. This resulted in an extraordinary charge of $800 million ($6.98 a share). At fiscal 1988 year-end the provision for loan losses was $750 million ($2,300 million a year earlier), or 1.0% of average loans (3.4%). The provision for domestic loans losses totaled $320 million in fiscal 1988, down from $675 million a year earlier, reflecting a major improvement in the loan portfolio particularly in the energy sector; the provision for international loan losses was $430 million, versus $1,625 million.

The yield on average interest-earning assets in fiscal 1988 was 10.35% (9.52% in the prior year), while the rate paid on interest-bearing liabilities was 6.97% (6.36%), for a net spread of 3.38% (3.16%).

Total deposits of $88.2 billion at fiscal 1988 year-end consisted of: 49% deposits held by individuals, 29% international deposits and 22% other deposits.



London-based Orion Royal Bank Ltd. (wholly owned) handles multinational underwriting, mergers and acquisitions, besides conducting leasing activities.

In March 1988, the bank acquired a 67% interest in Dominion Securities Limited, the largest securities dealer in Canada, for about $384 million. Royal Bank would increase its stake in that concern to 75% over a three-year period.

Important Developments

Sep. '89— The company completed the sale of its subsidiaries in France and Belgium, and its equities trading operations and Dusseldorf branch in Germany. In addition the bank sold its 70% interest in InchRoy Credit Corporation Limited, a consumer finance company based in Hong Kong. Separately, in August, the company offered $250 million 10.9% debentures due 1999.

Next earnings report due in December.

Review of Operations

Total interest income for the nine months to July 31, 1989, increased 27%, year to year (as restated), while total interest expense rose at a more rapid rate, leading to a 12% advance in net interest income. A 31% decline in the provision for loan losses and a 20% rise in noninterest income outweighed a 16% increase in noninterest expense; pretax income expanded 45%. After taxes at 39.0%, versus 39.9%, and minority interests, net income rose 47%, to $723,884,000 from $491,210,000. After preferred dividends, earnings per share were $4.83 (on 14% more average shares; $4.73 fully diluted), and $3.50 ($3.34), in the respective periods.

Royal Dutch Petroleum

1954

NYSE Symbol RD Options on ASE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 17'89	1989					
87	70⅛-56⅞	D	[1]2.82	[1]4.2%	A	0.58

Summary

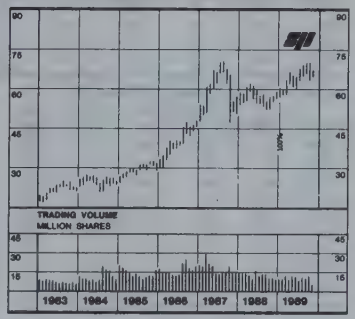
Royal Dutch holds a 60% interest in the Royal Dutch/Shell Group of companies, a worldwide petroleum and chemical enterprise. With the formation of the Single Internal European Market planned for 1992, the Group is well positioned to exploit marketing opportunities througout the Continent. RD can consider selected upstream (exploration and production) or downstream (refining and distribution) acquisitions that would strengthen its production and refining capacity and add to its retail market share.

Current Outlook

Earnings for 1990 per 5 guilder share are projected at $6.90, versus the $7.20 estimated for 1989, which includes $0.59 nonrecurring income.

Dividends paid from 1989 earnings should exceed the $2.82 paid from 1988 earnings, after 15% Netherlands tax.

Revenues (£) for 1990 will reflect rising crude and natural gas production. Profit comparisons will be restricted by the absence of 1989's nonrecurring gain on the sale of real estate. Profits are expected to reflect greater upstream volumes in addition to greater downstream market share.



Operating Revenues[2] (Billion £)

Quarter:	1989	1988	1987	1986
Mar.	11.37	10.81	11.44	12.89
Jun.	12.98	10.73	11.56	10.34
Sep.	12.95	11.30	12.52	9.84
Dec.	---	11.18	12.26	11.13
	---	44.00	47.78	44.21

Group revenues (£) for the nine months ended September 30, 1989 rose 14%, year to year, due mostly to higher crude oil prices and increased crude volumes. Margins were enhanced by the strength of the exploration and production segment and including the sale of real estate, net income advanced 31%. Earnings per 5 guilder share rose to $5.84 from $4.71 (adjusted).

Dec.	E1.36	1.56	1.81	1.15
	E7.20	6.27	5.66	4.33

Important Developments

Nov. '89— Group earnings from operations in 1989's third quarter were hurt primarily by weakness in the worldwide chemicals segment. Prices softened and feedstock costs were higher, which impaired margins. The worldwide exploration and production business recorded an increase in profitability, reflecting higher crude oil prices and increased crude production. Natural gas volumes declined. Manufacturing (refining), marine and marketing earnings were hurt by weakness in the U.S. sector. Refined product volumes and margins in the U.S. were lower than the year-earlier third quarter. Metals profits were limited by higher aluminium prices. Net earnings were further impaired by currency exchange losses stemming from the strength in the dollar. In 1989's first quarter, RD recorded a nonrecurring gain on the sale of real estate in France.

Next earnings report expected in early February.

Business Summary

This holding company owns 60% of the Royal Dutch/Shell Group, the other 40% being owned by Shell Transport & Trading Co. The Group ranks as the second largest factor in the world petroleum industry. Operations embrace all phases of the industry from production and transportation to refining and marketing, and include a strong position in petrochemicals. The Group also produces and trades in coal and metals; it also owns Shell Oil Co. (U.S.) and a 79% interest in Shell Canada.

Group Oper. Profits (£)	1988	1987	1986
Europe	37%	43%	51%
Other Eastern Hemis...	28%	29%	22%
U.S.A.	19%	21%	21%
Other Western Hemis...	16%	7%	6%

In 1988 the Group's crude oil supply averaged 5,708,000 barrels a day; natural gas sales 6.0 billion cubic feet a day; refinery processing intakes 3,379,000 b/d; and crude and oil product sales 7,456,000 b/d. Net proved reserves at the end of 1988 for the Group (including its share of reserves of associated companies) stood at 8,839 million barrels of crude oil and natural gas liquids (8,419 in 1987) and 38,687 (39,085) billion cubic feet of natural gas. In 1988 net additions to reserves of oil and gas were equivalent to 165% of crude oil and liquids production and 82% of natural gas production; in the past 10 years oil reserves have risen by 35%. Exploration acreage in 1988 was extended in 14 countries, including the Chukchi Sea off the coast of Alaska.

Dividend Data

Dividends have been paid since 1947. An interim dividend for each year is normally paid in October and a final dividend in June of the following year.

Summary

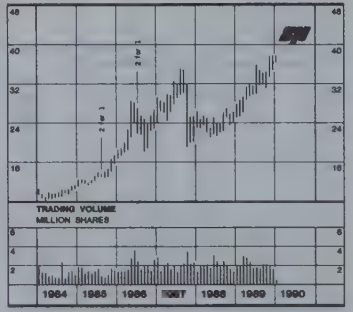
This company produces a broad line of plastic and rubber products for the home and commercial markets under the Rubbermaid, Con-Tact, Little Tikes, SECO, and Gott names. Dividends were increased in 1989 for the 35th consecutive year. Earnings for 1989 and 1990 should continue to advance on steady demand for existing products, new products, productivity improvements and cost controls. In January, 1990 RBD formed a joint venture to make and sell plastic and rubber housewares and furniture abroad.

Current Outlook

Earnings for 1990 are projected at $1.80 a share, up from the $1.56 estimated for 1989.

The quarterly dividend was increased 18.2%, to $0.13 from $0.11, with the December, 1989 payment.

Sales for 1990 should continue to advance substantially, reflecting demand for the company's extensive line of household and commercial rubber and plastic products, higher prices, and new product introductions. Sales should benefit from strong marketing efforts into the office and toy areas. Margins may improve slightly, reflecting increased productivity and various cost controls. Earnings should benefit from the European joint venture.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	349	302	238	189
Jun.	334	283	245	195
Sep.	352	320	276	216
Dec.	---	288	256	196
	---	1,194	1,015	795

Sales for the first nine months of 1989 rose 14%, year to year, reflecting new products and greater volume of existing products, combined with higher prices. Higher marketing costs were offset by lower raw material costs, better price realization, higher volume, increased productivity and cost controls. Pretax income advanced 17%. After taxes at 38.9%, versus 37.9%, net income increased 15.2%, to $1.22 a share from $1.06.

Important Developments

Jan. '90— RBD formed a joint venture with the Dutch chemical group, DSM, to manufacture and market plastic and rubber housewares and resin garden furniture in Europe, the Middle East, and North Africa. RBD owns about 40% of the joint venture; sales were expected to exceed $250 million for the first year of operations.

Oct. '89— RBD noted that the third quarter of 1989 represented its 35th consecutive quarter of year-to-year growth in sales and earnings. About 50% of the revenue gain was due to higher unit gains, and profits included a $0.06 goodwill and amortization charge associated with previous acquisitions. RBD said current order patterns reflected cautious buying and inventory controls; however, it expected to continue to report positive year-to-year comparisons.

Next earnings report expected in late January.

Business Summary

Rubbermaid operates exclusively in one industry, which is the manufacture and distribution of plastic and rubber products for the consumer (76% of 1987 sales; latest available) and commercial markets (24%). Foreign sales accounted for 11.9% of total sales in 1988,up from 10.8% in 1987, and 8.6% of operating earnings, versus 7.8%.

The houseware products division manufactures sinkware, space organizers, household containers, refuse containers, food preparation utensils and gadgets, microwave cookware, food storage products, bathware, rubber gloves, casual dinnerware, workshop organizers, Con-Tact brand decorative coverings, shelf liner and vacuum cleaner bags.

The specialty products division produces outdoor casual furniture, planters and bird feeders, and insulated ice chests, thermal jugs, water coolers, and fuel containers.

The Little Tykes Company manufactures various children's products and toys including juvenile furniture, see saws, scooters,and play trucks.The commercial products division manufacturers brooms, waste containers, food preparation and service items, floor signs, chairmats, and housekeeping carts sold to the sanitary maintenance, foodservice, office products, industrial markets.

The office products division include a wide assortment of desk top organizers, chairmats, fire-retardant wastebaskets and other office accessories. This division also produces the WorkManager Systme of computer workstation furniture.

The international division has offices throughout Europe, Hong Kong, and Canada.

Dividend Data

Nov. 8'89	1989					
23⅜	25⅜-15⅝	16	0.28	1.2%	A	0.90

Summary

Russell Corp. is a vertically integrated manufacturer and marketer of leisure apparel, athletic uniforms, and woven fabrics. In early 1987 RML embarked on a three-year, $150-$180 million expansion and modernization program. Earnings should advance in 1989 and 1990 on increased demand for all of RML's product lines and benefits from the extensive capital expenditure program.

Current Outlook

Earnings for 1990 are projected at $1.80 a share, up from the $1.55 estimated for 1989.

The $0.07 quarterly dividend should be increased in 1990.

Sales for 1990 should advance substantially, reflecting continued demand for all of the company's product lines and higher prices. Margins should widen, as efficiencies from the modernization and expansion program are realized. Interest costs will be higher.

Net Sales (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	146.9	118.4	109.4	97.8
Jun.	149.5	111.6	98.8	95.3
Sep.	187.7	149.7	139.1	126.1
Dec.	---	151.4	132.6	118.3
	---	531.1	479.9	437.5

Sales for the first nine months of 1989 rose 27%, year to year, reflecting the 1988 acquisition of Quality Mills and increased demand for all of the company's products. Margins were narrowed by plant start-up costs associated with the three-year expansion and modernization program begun in early 1987. Pretax income gained 17%. After taxes at 36.4%, versus 37.5%, net income rose 19%. Following preferred dividends in the 1989 period only, share earnings were $1.05 on 3.7% more shares, versus $0.92.

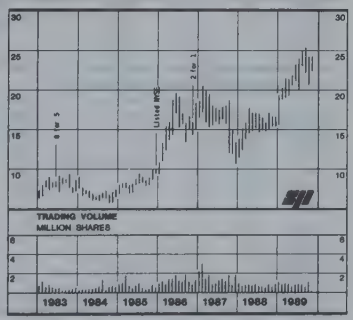
Dec.	E0.50	0.44	0.37	0.33
	E1.55	1.36	1.17	1.08



Important Developments

Oct. '89— RML said that its record earnings for the first nine months of 1989 were in line with expectations. RML attributed its performance to continued growth in its basic businesses, and said demand for t-shirts, better knit shirts, and sweats had remained strong throughout the year. RML said it would continue to build production to meet the increasing demand, and that its three-year $150-$180 capital expenditure program was proceeding as planned.

Oct. '89— RML announced that directors had adopted a shareholder rights plan. The plan was designed to deter coercive takeover attempts and would be exercisable only if certain events occur.

Aug. '89— RML said that it had reclassified $50.6 million of commercial paper from short-term to long-term debt because of a change in its revolving credit agreement.

Next earnings report expected in late January.

Business Summary

Russell Corp. (formerly Russell Mills) is a vertically integrated designer, manufacturer, and marketer of leisure apparel, athletic uniforms, and a comprehensive line of lightweight woven fabrics. Approximately 90% of the company's total revenues are derived from completed apparel, with the balance from woven fabrics.

Under the RUSSELL ATHLETIC label, the Athletic division, believed to be the largest U.S. manufacturer of athletic uniforms, supplies uniforms nationwide to professional, collegiate, high school and other teams as well as individuals. In addition, RML provides activewear. Marketing is conducted primarily to sporting goods dealers through six independent sales agents and company employees.

Under the JERZEES label and private labels, the Knit Apparel division produces a wide variety of knitted apparel, including fleece sportswear, such as shirts and pullovers, and lightweight sportswear for men, women and boys. Products are sold to mass merchandisers, wholesalers, discounters, chain stores, and screen printers throughout the U.S.

The Fabrics division designs and markets quality woven fabrics of cotton and blends of cotton and man-made fibers in a wide variety of patterns, colors, and constructions for sale primarily to manufacturers of men's, women's and children's apparel. Sales are made by the company's own marketing staff.

Quality Mills (acquired in 1988) designs and markets high quality knit products.

Dividend Data

Cash has been paid each year since 1963. A dividend reinvestment plan is available. A "poison pill" stock purchase rights was adopted in 1989.

Summary

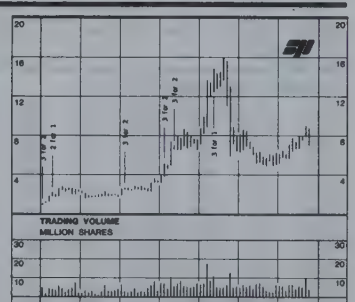
This South Carolina-based company owns and franchises Ryan's Family Steak House restaurants. During the past two years, comparable-unit sales were weak and margins narrowed. However, overall profitability is still quite strong, the company has no long-term debt and sales have improved recently. As of September 1989, RYAN operated 107 restaurants and was the franchisor of 30.

Current Outlook

Earnings for 1990 are estimated at $0.49 a share, up from the $0.42 expected for 1989.

Initiation of cash dividends is not expected.

Openings of new restaurants are expected to continue fueling revenue growth in 1990. Efforts to improve restaurant service through greater investments in labor appear to be helping sales. If this continues, the narrowing of profit margins that has occurred in recent periods may be halted and could be reversed somewhat. RYAN's profitability is still high relative to other restaurant businesses.



Total Revenues (Million $)

Important Developments

Oct. '89— In 1989's third quarter, RYAN's same-store sales were up 3.2%, year to year, following declines in 1988 and earlier in 1989. RYAN's profit margins weakened, reflecting higher payroll and benefit costs. However, pretax income rose for the third consecutive quarter, and RYAN's lengthy stretch of increases in quarterly earnings per share remained uninterrrupted. Also, RYAN said that three company-owned restaurants began operations in the third quarter, and three more units were scheduled to open in the fourth quarter. For all of 1989, 14 company-owned and six franchised units were slated to open, which would bring the totals in operation by year-end to 110 and 32, respectively. The addition of about 16 company-operated and four or five franchise units was expected in 1990.

Next earnings report expected in late January.

Business Summary

Ryan's Family Steak Houses is a fast-growing operator and franchisor of restaurants, located mainly in the southeastern U.S.

The following units were in operation at year-end:

	1988	1987	1986	1985
Company-owned	96	76	55	41
Franchised	26	19	15	12

Ryan's Family Steak House company-owned restaurants are freestanding units, generally located near residential areas. Seating capacity ranges from about 310 to 460 persons. The menu includes various cuts of steak and hamburgers, chicken, fish, salad, desserts and nonalcoholic beverages.

In 1985, the company began introducing the "Mega Bar"—a self-service food bar that includes salad, a variety of hot meats and vegetables, rolls, cheeses, fruits and desserts. The "Mega Bar" is currently available in all company-owned restaurants and in most franchised units. Also, in 1986 RYAN introduced a self-service ice cream bar, which is now in all its restaurants. In 1988, comparable average unit sales for company-owned restaurants declined about 6%, after rising 8.6% and 39% in 1987 and 1986, respectively. In 1988, systemwide sales for the RYAN chain totaled about $234 million, up from about $185 million the year before.

Current franchise agreements are for a period of 15 years, with two five-year renewal options. Terms provide for an initial franchise fee of $15,000 to $20,000 and a continuing royalty of 4% to 5% of gross receipts to be paid to RYAN. The company was expected to not enter into agreements with additional franchisees and to concentrate on the operation and development of company-owned restaurants.

Dividend Data

The company has indicated that it does not expect to pay cash dividends in the foreseeable future, retaining available funds for expansion.

Finances

In mid-1986, the company sold publicly 2,760,000 (adjusted) new common shares at $6.92 each. Net proceeds of $18,040,000 were earmarked primarily to fund 1987 expansion, with a portion used to retire all outstanding debt.

In November 1985, RYAN completed a private placement of 1,687,500 (adjusted) common shares to an institutional investor, resulting in net proceeds of about $5.2 million. This followed a private placement of 3,037,500 (adjusted) common shares with institutional investors in March 1985, which generated net proceeds of some $7.2 million.

Summary

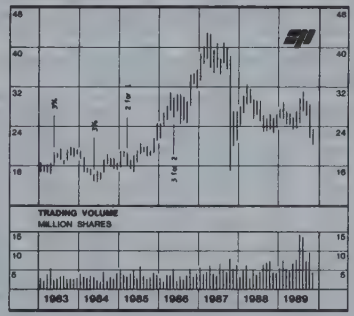
This company is the nation's largest lessor of trucks, the leading hauler of automobiles, and after a series of acquisitions, has emerged as an important factor in aviation services and a leading provider of school bus transportation. Profits should rebound in 1990, after being penalized in 1989 by a $90 million pretax charge covering the writedown of surplus assets, severance payments and workers' compensation claims.

Current Outlook

Earnings for 1990 are projected at $2.00 a share, versus 1989's estimated $0.75, which includes a onetime charge of $0.75.

Dividends should remain at $0.15 quarterly.

Profit comparisons in 1990 will benefit from the absence of 1989's charge for asset writedowns, employee severance and workers' compensation reserves. Steps to downsize commercial lease and consumer truck rental fleets will be offset by continued sluggish economic activity and pressure on rates. Soft demand also is expected for R's full-service truck lease business. Aviation services will benefit from greater commercial engine overhaul business, higher parts volume, and better inventory control. Auto hauling profits could be flat, as higher rates offset continued softness for new auto sales. Reduced capital requirements should lead to lower interest expense.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,223	1,162	1,076	853
Jun.	1,288	1,287	1,155	919

Important Developments

Oct. '89— Ryder charged $90 million against pretax income in 1989's third quarter ($0.75 a share after taxes) covering a variety of asset writedowns and special reserves. The largest item was $23 million for anticipated losses on the disposition of trucks. R also set up a $20 million reserve for past and anticipated workers' compensation claims. Ryder also wrote down by $7.5 million the value of certain inventories in its aviation services unit.

Oct. '89— Ryder agreed to sell its Insurance Management Services unit to Skandia International Ins. Corp., a Swedish concern, for an undisclosed sum. The transaction was part of a broad restructuring program established in February. As part of that plan, R repurchased through September 30 some 4,000,000 (5%) of its common shares under a 12 million (15%) share buyback program.

Next earnings report expected in early February.

Business Summary

Contributions to operating profits (in million $) by business segment in recent years:

	1988	1987
Vehicle leasing & services	$342.6	$366.7
Automotive carriers	48.0	55.0
Aviation services	105.7	112.5
Other	-3.2	9.5

With a fleet of 65,480 vehicles, Ryder is the world's largest full-service truck lessor. Ryder also is the nation's leader in commercial and consumer truck rental. Ryder's rental fleet of 69,308 vehicles is available at 7,350 locations in the U.S., Canada and the U.K. R also provides maintenance services for 25,951 customer-owned vehicles. Ryder also is one of the nation's largest contract carriers and provides refrigerated transportation services in the eastern U.S. Through a series of acquisitions R has emerged as one of the largest providers of school bus transportation services. At 1988 year-end R served 320 school districts in 15 states with a fleet of 6,900 vehicles and managed 5,600 buses for local mass transit authorities.

In 1988 Ryder transported 6,268,000 new automobiles and trucks, or about 36% of North American vehicle sales. GM accounts for 57% of the auto group's sales.

Aviation services involve the repair and overhaul of jet and turboprop engines for commercial and business aircraft, the distribution of aircraft components and supplies and the lease of 33 aircraft to commercial airlines.

Dividend Data

Dividends were resumed in 1976. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Dec. 18'89	1989					
24	29½-19⅞	15	0.60	2.5%	B+	0.93

Summary

Rykoff-Sexton distributes processed foods and related nonfood products to restaurants and institutions. Earnings for fiscal 1989-90 should benefit from internal expansion and cost-cutting programs. However, the April 1989 acquisition of Tone Brothers ($50 million in annual sales from spices) should be dilutive. The stock was split 5-for-4 in January, 1989.

Current Outlook

Share earnings for the fiscal year ending April 30, 1990 should rise to $1.85 from fiscal 1988-9's $1.75.

The quarterly dividend is expected to continue at $0.15.

Sales for fiscal 1989-90 should remain in a good uptrend, given increased marketing emphasis on more profitable self-manufactured products. Good contributions from equipment and supplies and niche businesses are also anticipated. However, higher debt costs from the Tone Brothers may limit earnings improvement over the short run.

Net Sales (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Jul.	345	310	274	267
Oct.	358	333	290	278
Jan.	---	317	279	259
Apr.	---	336	301	277
	---	1,296	1,143	1,082

Sales for the six months ended October 28, 1989 rose 9.5%, year to year, largely reflecting acquisitions. Operations were hurt by higher costs. Interest expense was up sharply, and pretax income declined 21%. After taxes at 40.0%, versus 41.0, net income was down 19%, to $0.73 a share from $0.90 (adjusted).

Important Developments

Dec. '89— Directors authorized the repurchase of up to 300,000 common shares through open market purchases from time to time.

May '89— RYK acquired Ziff Co.'s Burbank, Douglass division, a foodservice equipment and supply company, for undisclosed terms. The company also provides contract design services for restaurants, a business RYK has been expanding since the late 1988 acquisition of Aslesens/American Restaurant Supply, Inc. in St. Paul, Minn. for undisclosed terms. It also began manufacturing plastic knives, forks and spoons in 1988.

Apr. '89— RYK acquired Tone Brothers, Inc. a Midwestern packer of spices and other products with $50 million in annual sales, for $35.4 million.

Next earnings report expected mid-March.

Business Summary

Rykoff-Sexton (formerly S. E. Rykoff) distributes processed foods and related items to foodservice establishments, including restaurants, industrial cafeterias, health care facilities, schools and colleges, hotels and airlines throughout the U.S. Contributions in recent fiscal years:

	1988-9	1987-8	1986-7
Food products	66%	69%	71%
Janitorial and paper	14%	14%	14%
Equipment and supplies	20%	17%	15%

Food products include a full line of Rykoff or Sexton label items (some 65% of 1988-9 sales) and nationally branded domestic and imported items such as canned fruits and vegetables, tomato products, juices, pickles and condiments, syrups, baking supplies and frozen foods (including soups, entrees, fruits and vegetables). Products made by RYK (12.5% of sales in fiscal 1988-9) include mayonnaise, salad dressings and oils; shortenings; powdered desserts; vinegars; sauces and spices, pancake, waffle and biscuit mixes; soup and beverage bases; jams, jellies and relishes; and coffee and tea.

Janitorial supplies include RYK's own detergents and cleaning compounds, polyethylene refuse bags, electronic dispensers and paper goods. Equipment and supplies consist of cookware, glass and dinnerware, and the company's own low temperature dishwashers. It also offers restaurant design/engineering services and publishes a consumer mail order catalog that features RYK's food specialties and related products.

Dividend Data

Cash has been paid in each year since 1971. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Ryland Group

1957

NYSE Symbol RYL

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 20'89	1989					
19¼	25¾-18¼	7	0.60	3.1%	A-	1.94

Summary

This company is a major builder of moderately priced single-family homes in the central and mid-Atlantic sections of the U.S., as well as in Florida and the Southwest. Ryland is expanding its modular homes division. RYL's operations are supported by a strong balance sheet and conservative accounting practices. Effective September 15, 1989 RYL created an ESOP to which it has issued $40 million of convertible preferred stock.

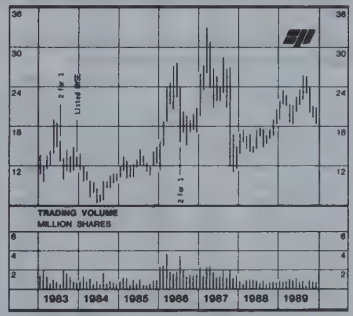
Business Summary

The Ryland Group is engaged in the construction and sale of single family mostly detached homes in the mid-Atlantic and central sections of the U.S., as well as in Florida and Texas. It is also a major producer of modular housing units. Home settlements by region broke down as follows in recent years:

	1988	1987	1986
Mid-Atlantic	26%	27%	35%
Central	19%	21%	24%
Southwest	8%	9%	9%
Florida	6%	6%	7%
West	5%	3%	3%
Modular homes	19%	19%	21%
Brock & joint ventures	17%	15%	---

The Ryland Homes division is divided into five areas: Mid-Atlantic, covering New Jersey to northern Virginia; Central, covering Richmond, Virginia, North and South Carolina, Georgia, Ohio and Indiana; Southwest covering Houston and Dallas, Texas; Florida, with operations in Orlando, Tampa and Boca Raton; and West, with operations in Phoenix, Arizona and Denver, Colorado. In 1988 settlements totaled 9,354 units, down 1.6% from 9,508 units in 1987. The unit prices in 1988 ranged from $52,000 to $500,000, including the cost of developed lots. Approximately 80% of the company's customers obtain mortgages through Ryland Mortgage Co., a wholly-owned mortgage banking subsidiary.

The Ryland Modular Homes operating division, builds modular homes at two plants in Maryland, and one in Virginia. Ryland Modular had 1,781 settlements in 1988, down 2.5% from 1987. The Brock division, acquired in 1986, builds homes in California.



Important Developments

Oct. '89— The backlog of outstanding contracts at September 30 totaled 4,254 units, up 6.0% from 4,013 units a year earlier. New contracts for the third quarter of 1989 numbered 2,304 units, up 3.3%, year to year. Third quarter settlements were 2,453 units, down 7.5% from the year before.

Sep. '89— Ryland created an employee stock ownership plan (ESOP) to which it issued $40 million of convertible preferred stock. The shares would be allocated to employees over a 10-year period. Ryland will repurchase up to 1.8 million shares of common stock to reduce the dilutive effect of the preferred stock on earnings per share.

Jan. '89— Ryland repurchased all $25 million of its 6⅞% convertible subordinated debentures.

Next earnings report expected in late January.

Summary

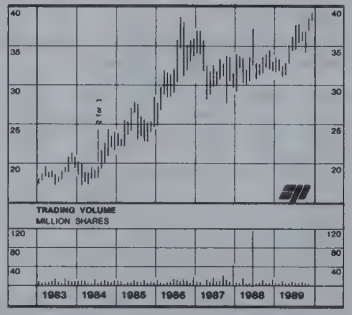
This utility holding company was formed in July, 1988 by Southern California Edison in a corporate restructuring. On November 30, 1988 SCE and San Diego Gas & Electric approved a definitive merger agreement, and shareholders of both companies approved the plan in April, 1989. The merger may be completed by late 1990. The two companies jointly own assets thoughout the Southwest. SCE's Southern California Edison serves a diversified industrial and commercial economy, while San Diego Gas & Electric provides service to one of the nation's fastest growing residential communities.

Current Outlook

Share earnings for 1990 are projected at $3.30, giving effect to the proposed merger, down from the $3.55 estimated for 1989.

The dividend, which was raised 3.2% with the July, 1989 payment, is expected to be maintained at $0.64 quarterly.

Share earnings for 1990 will reflect some dilution following the merger of San Diego Gas & Electric, expected late in the year. Operating efficiences and savings from the merger will enhance longer-term prospects.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,530	1,331	1,284	1,240
Jun.	1,572	1,353	1,332	1,211
Sep.	2,182	2,029	1,487	1,550
Dec.	---	1,539	1,390	1,311
	---	6,253	5,493	5,312

Revenues for the 12 months ended September 30, 1989 rose 11%, year to year, owing mostly to balancing account adjustments. After a more rapid increase in production costs, operating income was up 1.5%. Following lower AFUDC and higher interest charges, net income fell 7.2%. Share earnings were $3.51, compared with $3.78.

Important Developments

Oct. '89— The company reported that the pending merger of SCE and San Diego Gas & Electric (SDO) is on schedule for completion in late 1990, at which time both Federal and state regulators are expected to have given their approvals. Shareholders approved the merger in April, 1989. On November 30, 1988 SCE and SDO approved a definitive agreement to merge SDO into SCE's Southern California Edison utility subsidiary. Each SDO common share (some 55.9 million outstanding) would be exchanged for 1.3 common shares of SCE. Outstanding SDO preferred and preference stocks would be exchanged for similar SCE shares, except that the dividends on each series are projected to be increased by between 2.53% and 20.0%. The transaction would be valued at about $2.7 billion.

Next earnings report expected in late January.

Business Summary

SCEcorp is the holding company formed in July, 1988 by Southern California Edison, now its main subsidiary. SCE serves more than 10 million people. Electric sales in recent years:

Revenues	1988	1987	1986	1985
Residential	32%	30%	28%	28%
Commercial	35%	35%	33%	31%
Industrial	20%	22%	23%	23%
Other	13%	13%	16%	18%

Power sources in 1988 were gas/oil 25%, nuclear 15%, coal 10%, hydro 5%, and purchased 45%. Cogeneration and wholesale purchases will represent a greater portion of SCE's power sources in the future. Peak demand in 1988 was 15,987 mw and capability totaled 18,893 mw for a capacity margin of 15%.

SCE owns 80% of the San Onofre 1 nuclear unit and 75% of San Onofre 2 and 3. SCE also has a 15.8% interest in the three unit Palo Verde nuclear station. The disallowance for SONGS 2 and 3 and the Palo Verde project was finalized in 1987 and led to a $193 million ($0.89 a share) write-off which the company charged to 1986 earnings.

Year-to-year earnings comparisons in 1988 were distorted because of a CPUC order that required SCE to increase demand charges in the third quarter. The intent of the order was to reallocate load to lower peak periods.

Dividend Data

Dec. 19'89	1989					
28½	42-25	13	1.00	3.5%	B+	1.08

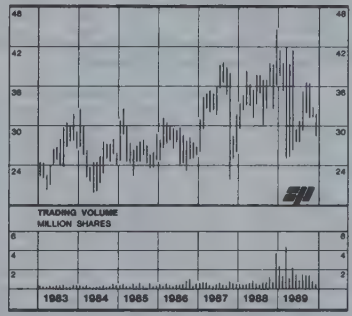
Summary

On May 30, 1989 SPX Corp. completed a restructuring by which it became solely a manufacturer and distributor of components and tools for the repair and maintenance of vehicles, and for industrial applications. SPW transferred its automotive original equipment business to a new partnership, Sealed Power Technologies, L. P., which is 49% owned by SPW and 51% owned by its partners. SPW received some $260 million in cash in the transfer, which was used to make a cash distribution of $13 a share to SPW shareholders and for debt reduction.

Current Outlook

Earnings for 1990 are expected to rise to about $2.25 a share from the $1.90 estimated for 1989. Following the restructuring, quarterly dividends have been maintained at $0.25.

Sales of aftermarket vehicle parts should rise in 1990, reflecting gains at Bear Automotive and strengthening demand for parts, particularly for import cars and high performance applications. Sales of freon recovery equipment should grow rapidly, but prospective earnings are limited by continuing losses at Bear and the sale of 51% of the original equipment operations, which will remain highly leveraged and may not contribute substantial equity earnings in 1990.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	164.0	213.3	179.0
Jun.	---	163.9	225.3	197.1
Sep.	---	154.7	212.9	195.3
Dec.	---	---	226.1	202.8
	---	---	877.7	774.2

Sales for the nine months ended September 30, 1989 advanced 16%, year to year (1988 restated). Following a 28% rise in selling, general and administrative costs, 51% higher interest expense and despite a gain of $6.2 million on the sale of businesses, pretax income decreased 7.7%. After taxes at 38.0%, against 39.0%, income from continuing operations was down 6.3%. Share earnings were $1.46 on 15% more shares, versus $1.80, before earnings from discontinued operations of $2.72, versus $1.06.

Common Share Earnings ($)

Quarter:	1990	1989	1988	1987
Mar.	E0.50	0.57	0.94	0.70
Jun.	E0.60	0.56	1.14	0.92
Sep.	E0.60	0.36	0.78	0.74
Dec.	E0.55	E0.41	0.78	d0.24
	E2.25	E1.90	3.64	2.12

Important Developments

Aug. '89— General Motors said that it would require all of its more than 10,000 dealers to install SPW's air conditioning refrigerant recovery and recycling system during the next year.

May '89— SPW completed a restructuring to complete its evolution into a manufacturer and distributor of components and tools for the automotive aftermarket and industrial applications. SPW transferred its original equipment business to a newly formed partnership, Sealed Power Technologies, L.P., which is 49% owned by SPW. SPW received about $260 million in cash for the 51% interest; funds were used for a $13 a share cash distribution to SPW shareholders and for debt reduction. SPW also formed an ESOP and planned the sale of several small businesses.

Next earnings report expected in mid-February.

Business Summary

SPX Corp. (formerly Sealed Power) manufactures and distributes broad lines of precision engineered products used in the maintenance and repair of vehicles and appliances, and in industrial applications. In May, 1989 SPW spun off its vehicular assembly business to a newly-formed partnership, Sealed Power Technologies, L.P. SPW retained a 49% interest in the partnership. Contributions to sales by market sector (before the spin-off):

	1988	1987
Maintenance & repair		
Replacement	28%	36%
Service	30%	20%
Vehicular assembly	28%	30%
Engineered components	14%	14%

SPW's Sealed Power unit makes and sells replacement parts, including piston and transmission rings, and valve tappets and guides. To complete its line, parts are purchased and sold to original equipment manufacturers (OEMs) for distribution to dealers. Kent-Moore, OTC and Bear Automotive make and sell specialized service tools and instruments, including engine diagnostic equipment and instrumentation, wheel balancers, wheel alignment systems and gear pullers.

Engineered components include window and door hardware for the residential and commercial construction industry; hydraulic rams, pumps and valves for the industrial marketplace; and mixing and dispensing equipment.

Vehicular Assembly, which formed the nucleus of 49%-owned Sealed Power Technologies, L.P., supplies components and assemblies to OEMs for installation on new vehicles. Engine parts include piston and transmission rings, valve tappets and guides, cylinder sleeves and transmission filters. Nonengine parts are used in rack and pinion and tilt steering, air and vacuum pumps, carburetors, clutches, transmissions and suspension systems.

Summary

Predominantly a property-casualty insurer, this holding company also engages in life, health and surety insurance, real estate, investment management and commercial credit services. Significant p-c underwriting losses offset enhanced life and health profits and reduced losses from real estate operations and limited earnings growth for 1989's first half.

Current Outlook

Net operating earnings for 1989, which exclude realized capital gains, are expected to increase to $3.65 a share, from 1988's $3.59. Earnings for 1990 could decline to $3.50 a share.

The quarterly dividend was raised 11%, to $0.30 a share, in May 1989.

A decline in property-casualty profits will likely overshadow an expected improvement in life and health results, and earnings growth for 1989 is expected to be modest. Competition in the p-c area is unlikely to abate near term, and premiums will probably exhibit only modest growth. As losses and expenses are estimated to grow at a faster pace, underwriting performance should falter. Offsetting the enlarged underwriting losses to a degree will be a moderate advance in investment income. Troubled hospital operations are expected to restrain real estate results. Share repurchases will aid comparisons.

Review of Operations

Total revenues for the six months ended June 30, 1989, rose 9.4%, year to year, largely reflecting gains of 4.1% in property-casualty premiums, a 13% increase in real estate revenues and a 25% advance in investment income (excluding realized gains). Total expenses rose more rapidly, and pretax operating income growth was held to 5.7%. By segment, p-c earnings fell 15%, life and health pretax profits more than doubled and credit operations advanced 34%, while losses from real estate operations narrowed to $1.3 million, from $3.8 million. Pretax realized capital gains fell 12%, and pretax income was up 2.5%. After taxes at 18.5%, versus 17.0%, net income was 1.0% higher. Share earnings were $2.20 (including $0.28 in realized capital gains), compared with $2.09 ($0.31).

Important Developments

Jul. '89— SAFECO noted that a deterioration of profits in most p-c lines offset a turnaround that had begun in the life-health unit. Of particular concern was the nonvoluntary (or assigned risk) personal auto line, where underwriting losses have been mounting. Commercial p-c lines continued to be impaired by weak pricing and unfavorable claims experience. Since 25% of its p-c premiums are written in California, SAFECO is vulnerable to any rate rollbacks mandated by Proposition 103, a consumer-sponsored bill.

Business Summary

SAFECO Corp. is a holding company whose subsidiaries engage in property-casualty, life and health insurance throughout the U.S. and Canada. Other interests include real estate, commercial credit and investment management. Contributions by business segment to operating income in recent years were:

	1988	1987
Property-casualty	81.5%	83.3%
Life & health	19.0%	16.1%
Real estate	-3.4%	-3.5%
SAFECO Credit	1.5%	1.1%
Corporate	1.4%	3.0%

Property-casualty insurance is the company's principal line of business. Through independent agents, most major lines of personal and commercial p-c coverage are offered in nearly all states and Canada. Gross p-c premiums written in 1988 amounted to $1.63 billion ($1.55 billion in 1987), of which personal auto accounted for 42%, homeowners 18%, other personal lines 5%, commercial lines 30%, surety 4% and other lines 3%.

The life and health companies provide a broad range of individual and group products, pension programs and annuities, offered through independent agents in all states except New York. In early 1987, the company sold its SAFECO Title Insurance Co. for $85 million.

SAFECO Properties Inc. is the parent of three real estate subsidiaries involved in the development and management of regional shopping centers and office buildings (Winmar Co.), medical care real estate (Safecare Co.) and healthcare management (Safecare Health Services). SAFECO Credit provides commercial credit, and two investment management subsidiaries manage the SAFECO family of mutual funds.

Summary

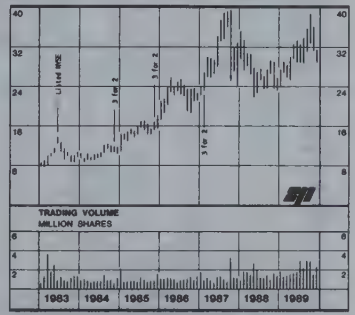
This company provides equipment and services to aid automotive service stations, manufacturers and other industries in the cleaning and maintenance of small parts and other equipment. Other operations include the recovery of oil and other fluids, the rerefining of lubricating oils, and the sale of paint refinishing products. Earnings have increased steadily in each of the past 18 years, and are expected to be higher in 1989 and 1990.

Current Outlook

Share earnings for 1990 are projected at $1.70, up from an estimated $1.40 for 1989.

The $0.09 quarterly dividend is expected to be raised in February, 1990.

Profits from parts cleaning services for 1990 are expected to advance, reflecting a continued rise in the number of parts cleaner units in service and slightly higher prices. Profits from newer services should benefit from higher margins at dry cleaner services and increased demand for oil recovery services. Consolidated earnings growth is expected to be restricted by increased interest expense.



Revenues (Million $)

16 Wks: Dec. ...	---	135.7	109.3	83.7
	---	417.2	333.6	255.4

Revenues for the 36 weeks ended September 9, 1989 rose 14%, year to year, reflecting increased service activity and higher prices at parts cleaner services operations. A less profitable profit mix held the gain in pretax income to 8.6%. After taxes at 36.4%, versus 37.7%, net income advanced 11%, to $0.91 a share from $0.83.

Important Developments

Sep. '89— SK publicly sold $100 million of long-term notes; proceeds were to be used to repay debt and possibly fund capital expenditures or future acquisitions. The company said that capital spending requirements to support anticipated future growth would continue to exceed cash generated from operations for about the next two years. SK stated the decline in the gross profit margin for the 36 weeks ended September 9, 1989 reflected rapid growth in oil recovery services which is a low margin business and added costs for waste disposal at dry cleaner services. Separately, prices for dry cleaner services were raised 17% at the beginning of the 1989 fourth quarter. In July SK increased prices on its domestic parts cleaner service by an average of 3.5%.

Next earnings report expected in early February.

Business Summary

Safety-Kleen provides services to almost 400,000 businesses that generate small quantities of hazardous waste fluids. In December, 1988 SK sold its restaurant services business. Contributions to revenues in recent years:

	1988	1987
Parts cleaner service.....	61%	65%
Newer services	39%	35%

Foreign operations (Canada and the United Kingdom) accounted for 13% of sales and 10% of net income in 1988.

Parts cleaning machines are placed in service stations, car and truck dealers, small engine repair shops, fleet maintenance shops, and industrial maintenance departments that need to clean parts. A sales representative returns regularly to clean and maintain the machine, and replace solvent used in the degreasing process. Customer-owned parts cleaning units are also serviced.

Other relatively newer service areas include the supply of materials and services to the automotive body repair and paint refinishing markets; the supply and recycling of chlorinated solvents to larger industrial users; the sale and collection of filter cartridges and cleaning solvents to dry cleaners; and the re-refining of used lubricating oils.

Dividend Data

Cash payments began in 1979. A new "poison pill" stock purchase right was adopted in 1988.

Summary

This company is the world's leading producer of mechanical heart valves. Sales and earnings have grown rapidly in recent years, aided by strong growth for heart valves and product diversification through acquisitions. A two-for-one stock split was effected in March 1989.

Business Summary

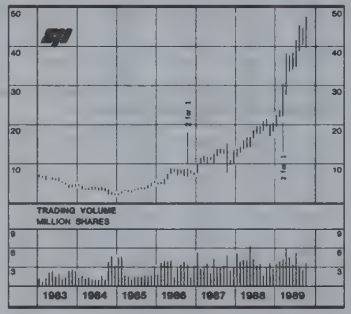
St. Jude Medical, Inc. designs, manufactures and markets medical devices for cardiovascular and vascular applications. Its principal product, an artificial heart valve, received FDA approval in late 1982 for general marketing in the U.S. The company believes it is the market-share leader in the mechanical segment of the global heart valve market. Sales in recent years were distributed geographically as follows:

	1988	1987	1986
U.S.	59%	55%	59%
Exports	41%	45%	41%

The company's leading product is a bileaflet pyrolytic carbon-coated prosthetic heart valve with four basic components: two leaflets, the valve body and the sewing cuff. The leaflets and the valve body substrate are made of graphite coated with pyrolytic carbon by CarboMedics Inc., Austin, Tex., the sole U.S. supplier of pyrolytic carbon. In 1983, CarboMedics halted shipments St. Jude, claiming that its research activities in carbon technology were infringing on certain CarboMedics patents. It brought suit on these charges in 1984; the dispute was resolved in 1985 through an agreement under which St. Jude will purchase mechanical heart valve components from CarboMedics through August 31, 1993, and will also produce a small quantity of its own valves under a limited license agreement with Intermedics, parent of CarboMedics.

At 1988 year-end, St. Jude had substantially completed conversion of its domestic sales force from a distributor-based organization to a direct employee-based sales force in order to deal directly with its customers. The company had 16 direct sales representatives engaged in the sale of its products in selected territories in the U.S. The international representatives purchase the valves and resell them to hospitals on the order of physicians performing the implant surgery.

In 1986, the company entered the tissue valve segment of the market through the acquisition of BioImplant Canada Inc. The low-profile porcine valve purchased from BioImplant is currently sold internationally, and in 1987 St. Jude filed with the FDA for permission to begin clinical trials in the U.S., however the request remains on hold and approval was not expected until 1990 at the earliest. Also in 1986, FDA approval was received to market BioPolyMeric Vascular Grafts, which are used to replace or repair diseased blood vessels in the lower extremities.



St. Jude added an intra-aortic balloon pump (IABP) to its product line through the late 1988 acquisition of Aries Medical, Inc. The IABP is used in a variety of clinical situtations in which a functioning heart requires additional support.

Important Developments

Apr. '89— St. Jude acquired the centrifugal blood pump system of Symbion Inc. for $6.7 million in cash, plus an additional consideration not to exceed $4 million. The system, which is used to maintain blood circulation during open heart procedures, has received initial authorization from the FDA, and product introduction is expected in early 1990.

Next earnings report expected in late January.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	38.8	27.2	19.0	16.2
Jun.	37.8	30.4	18.6	15.1
Sep.	35.5	27.6	19.0	15.5
Dec.		29.0	15.3	13.7
		114.1	71.8	60.5

Net sales for the nine months ended September 30, 1989, rose 32%, year to year, reflecting a significant increase in mechanical valve sales, price increases and the inclusion of Aries Medical. Margins widened on the higher volume, aided by improved manufacturing efficiencies and a more favorable product mix; pretax income was up 44%. After taxes at 28.1%, versus 33.2%, net income rose 55% to $38,158,000 ($1.61 a share), from $24,669,000 ($1.05, as adjusted).

Dividend Data

The company has not paid any cash dividends. A two-for-one stock split was declared on February 15, 1989, payable on March 15 to stockholders of record March 1.

Finances

In May, 1988, the U.S. Food and Drug Administration approved the company's mechanical heart valve assembly plant in Cagues, Puerto Rico. The plant is fully operational and began assembly of heart valves in early 1988.

As a result of its marketing force conversion (see Business Summary), St. Jude recorded a provision for inventory returns for 1987 that reduced net earnings by about $0.07 (adj.) per share.

The company's research efforts are directed toward the development of new and existing products, after historically being focused on carbon-coated components for its valves. In 1988, St. Jude's R&D expenditures totaled $2.7 million, up from $2.6 million the year before.

Capitalization

Summary

This holding company owns St. Paul Fire & Marine Insurance, the 17th-largest property-liability insurer in the U.S., and an investment banking unit, John Nuveen & Co. In the past several years, it sold its life insurance, mutual fund, consumer finance and title insurance operations and built the largest U.S. wholesale broker operation. In 1988, STPL acquired (for approximately $560 million) the 74% of London-based insurance broker Minet Holdings PLC that it did not already own.

Current Outlook

Net operating earnings for 1989 are expected to rise to $6.50 a share, from 1988's $6.47 (which excludes a $0.79 "fresh start" tax benefit). Earnings for 1990 could reach $7.20 a share.

The $0.55-a-share quarterly dividend is the minimum expectation.

Despite a greater reliance on specialty insurance, which should somewhat insulate STPL from increasing competition in the commercial marketplace, earnings growth is expected to be modest in 1989. STPL is the leading writer of medical malpractice insurance in the U.S. and, thus, should benefit from a greater degree of pricing control in this insurance line. However, pricing pressures will likely limit standard-line gains, and underwriting performance in the aggregate will likely suffer. Moderate gains are expected at the investment banking unit.

		7.26	6.76	3.33

Review of Operations

Revenues for the first six months of 1989 rose 6.7%, year to year (1988 restated), as increased contributions from net investment income, brokerage and investment banking operations and sharply higher realized capital gains offset sluggish premium growth. Total expenses advanced 5.2%, and pretax earnings were up 18%. Insurance operations posted a 15% increase in pretax profits, due to improved underwriting results. Investment banking profits increased 24%, reflecting increased sales of bond funds and growth in assets under management. After taxes at 19.0%, versus 18.1%, net income was up 17%. Share earnings were $3.97 (including realized investment gains of $0.50), against $3.43 ($0.11), before a $0.06 extraordinary credit in the 1988 interim.

Important Developments

Aug. '89— STPL noted that earnings for 1989's first half benefited from improved underwriting results, primarily in the medical services segment. The combined ratio of this segment was 92.7, versus 105.1 a year earlier (a combined ratio under 100 indicates an underwriting profit, while one above 100 indicates a loss). This offset a deterioration in the reinsurance, specialty risks and fidelity and surety bond operations. The total combined ratio was 103.5, versus 104.4 a year earlier.

Business Summary

St. Paul Companies is a management company engaged, through subsidiaries, in providing property-liability insurance and insurance-related products and services to commercial and personal customers. The company's principal subsidiary is St. Paul Fire & Marine Insurance Co., which ranks among the largest U.S. property-liability insurers.

Contributions to revenues and pretax operating income (in millions) for 1988 were:

	Revs.	Income
Property-liability	97%	$431.8
Investment banking	3%	36.6
Parent co. and other	Nil	-46.2

St. Paul Fire & Marine writes most lines of property-liability insurance. Of the $2.69 billion in written premiums in 1988 ($2.70 billion in 1987), medical services accounted for 32% (STPL is the largest medical liability insurer in the U.S.), commercial insurance 30%, reinsurance 12%, specialty risks, and pools 11%, personal insurance 9% and fidelity and surety 6%.

Swett & Crawford, a subsidiary of STPL, is the largest wholesale insurance brokerage network in the U.S. Reinsurance Facilities Corp. is an international reinsurance broker. In early 1988, STPL completed the acquisition of Minet Holdings PLC, a London-based international insurance broker. In 1988, STPL combined its wholesale, retail and reinsurance brokerage operations into the Minet organization, making STPL the seventh largest insurance broker in the world.

John Nuveen & Co., the company's investment banking unit, specializes in raising capital for public facilities. Nuveen has 15 offices in the U.S.

Salomon Inc

1977F

NYSE Symbol SB Options on Phila (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 29'89	1989					
25⅜	29⅜-23¼	17	0.64	2.5%	B	1.65

Summary

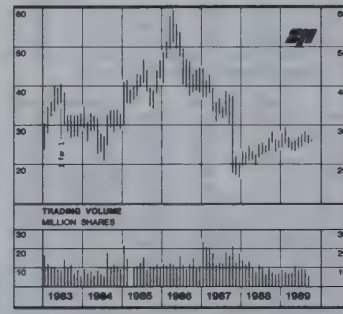
Salomon Inc is a holding company whose operating units are Salomon Brothers, a worldwide investment banker and market making firm; Philipp Brothers, an international marketer of industrial raw materials and provider of commercial financing; and Phibro Energy, a global trader of crude oil. While volatile market condition led to a loss in 1989's first quarter, strong volume resulted in record second quarter profits. Higher earnings are expected for 1989 and 1990.

Current Outlook

Net earnings for 1990 are expected to reach $3.00 a share, versus 1989's estimated $2.85.

The $0.16 quarterly dividend is the minimum expectation.

Earnings growth could be modest in 1990, reflecting a potential cooling in the previously red-hot M&A, and LBO business, an area where SB has placed added emphasis. SB's strategy is to build a diversified portfolio of equity investments (currently 13 investments carried at $195 million) and hold these stakes for 3-to-5 years, with the hope of realizing signicant gains upon their sale. Underwriting fees will likely remain under pressure, reflecting competition and slimmer margins. SB has trimmed staff and exited businesses which did not fit its longer-term strategy. These cost-cutting efforts should help SB weather the volatile nature of the securities business. The authorization in June, 1989 of a second, eight million share repurchase plan (the first has been substantially completed) should aid share earnings comparisons.



[1]Total Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	1.54	1.61	1.72	1.85
Jun.	2.33	1.43	1.39	1.62
Sep.	---	1.29	1.56	1.60
Dec.	---	1.81	1.33	1.73
	---	6.15	6.00	6.79

Net revenues for the six months ended June 30, 1989 rose 5.9%, year to year. Despite increased activity in the U.S. stock and bond markets during the second quarter, adverse trading conditions in the first quarter in the securities and commodities units led to an 11% decline in net income. Share earnings were $1.54, compared with $1.68.

Important Developments

Jul.'89— SB said industrywide improvements in volume in the U.S. bond and equity markets resulted in profits across virtually all product lines in 1989's second quarter. Securities operations posted a $390 million pretax profit in the quarter, versus a $79 million profit a year earlier. Energy segment profits rose 240%, while commodities profits fell 76%.

Next earnings report expected in late October.

Business Summary

The company operates through Salomon Brothers Inc, Philipp Brothers, Inc. and Phibro Energy, Inc. Pretax earnings (in million $; before corporate expense) by source in recent years:

	1988	1987
Salomon Bros.	$486	$261
Commercial finance	215	156
Phibro Energy	245	70
Phillips Brothers	57	67

Salomon Brothers is an international investment banking, market making and research firm serving corporations, state and local governments, sovereign and provincial governments and their agencies, supranational organizations, central banks and other financial institutions.

Philipp Brothers is a leading international merchant of industrial raw materials, agricultural products and precious metals. Its European-based commercial finance operations lend to international borrowers on a short-term basis, and facilitate Philipp's trading transactions with sovereign governments and European firms. Phibro Energy is a major force in global trading of crude oil and oil products, petrochemicals and plastics.

Dividend Data

Dividends have been paid since 1960. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

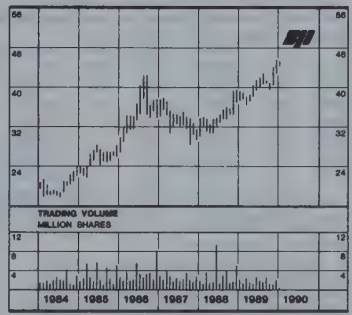
On November 30, 1988 SDO approved an agreement to merge into SCEcorp's Southern California Edison utility subsidiary. Under terms of the agreement, which is subject to regulatory approvals, each outstanding common share of SDO would be exchanged for 1.3 common shares of SCE. Shareholders of SDO and SCEcorp approved the plan in April, 1989 and the merger may be completed by early 1991. Over the longer term, the merged company should benefit from financial synergies and the ability of combined utility operations to access surplus power throughout the Western portion of the nation.

Current Outlook

Share earnings for 1990 (for the company as now constituted) are projected at $3.25, up from the $3.15 estimated for 1989.

The $0.67½ quarterly dividend is expected to be raised some 3.0% with the April, 1990 payment.

Share earnings for 1990 should benefit from higher electric and gas sales. Regulatory proceedings and legal challenges to the merger may be contentious but are not expected to prevent the combination.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	499	517	443	434
Jun.	504	494	456	399
Sep.	501	539	475	392
Dec.	---	526	530	407
	---	2,076	1,904	1,633

Revenues for the nine months ended September 30, 1989 fell 2.9%, year to year, owing primarily to lower sales volume for diversified operations. Increased electric fuel and purchase power expense was more than offset by substantially lower cost of gas and oil for resale, and operating income was up 5.9%. However, after an increase in certain merger-related expenses, net income fell 6.6%. Share earnings were $2.22, versus $2.38.

Dec.	E0.93	0.80	0.84	0.83
	E3.15	3.18	2.96	3.42

Merger Agreement

Dec. '89— SDO stated that the pending merger with SCEcorp (SCE) is expected to be complete by early 1991, at which time both Federal and state regulators are expected to have given their approvals. Shareholders of SDO and SCE approved the plan in April, 1989. SDO directors on November 30, 1988 approved the agreement which provides for the merger of SDO into SCEcorp's Southern California Edison utility subsidiary. Terms call for each SDO common share outstanding to be exchanged for 1.3 SCE common shares. SDO preferred stock would be exchanged for SCE shares with similar provisions, except that the dividends of each series would be increased by between 2.53% and 20.0%. Share earnings for SCE alone for 1990 are projected at $3.55 ($3.30 if the merger were effected), versus the $3.55 estimated for 1989.

Next earnings report expected in late January.

Business Summary

San Diego Gas & Electric supplies electricity to some 1,030,000 customers and provides gas service to about 640,000 customers in southern California. In 1988, electricity accounted for 63% of operating revenues, gas 14%, and diversified businesses 23%. Contributions to electric revenues:

	1988	1987	1986	1985
Residential	41%	39%	37%	39%
Commercial-industrial	54%	59%	60%	61%
Other	5%	2%	3%	3%

Sources of generation in 1988 were gas/oil 30%, nuclear 22%, and purchased 48%. Peak load in 1988 was 2,777 mw and capability totaled 3,149 mw for a capacity margin of 12%. Gas sales in 1988 were 583 million therms, versus 554 million therms in 1987.

SDO has a 20% interest in the three unit San Onofre nuclear facility which has been in operation since 1984. In 1988's first quarter, SDO wrote off $46.0 million ($0.82 a share) of disallowed San Onofre costs retroactive to December 31, 1986. SDO's Southwest Powerlink accesses power from the Palo Verde nuclear station in Arizona. In 1989's first quarter, SDO wrote off $25.0 million ($0.28) for SWPL expenditures.

Dividend Data

Dividends have been paid since 1909. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.67½	Feb. 27	Mar. 6	Mar. 10	Apr. 15'89

Summary

This transportation and natural resources firm (formerly Santa Fe Southern Pacific) radically restructured operations in 1988, paying out a $30 a share dividend in cash and debentures. SFX has reduced debt incurred in the restructuring through asset sales. SFX could raise an estimated $400 million from the proposed sale of a 20% stake in its real estate unit. In October, 1989 SFX petitioned the U.S. Appeals Court in New Orelans to overturn a $750 million judgement in a suit filed by a coal slurry pipeline.

Current Outlook

Profits for 1990 are estimated at $0.80 a share, versus the $0.40 anticipated for 1989.

Dividends are limited to $0.10 annually by certain credit agreements.

Rail profit comparisons in 1990 will benefit from the absence of 1989's addition to personal injury reserves. Traffic volumes should increase as gains for intermodal, coal and auto shipments, and a rebound for grain, offset softness for chemical movements and flat rates. While labor costs should ease, offsetting will be continued heavy litigation expense. While real estate profits will decline, reflecting the expected sale of a 20% stake in that unit, the resulting drop in interest expense will be more than offsetting. Pipeline and oil and gas profits will be flat. Mining income should post solid gains on expanded gold production. Earnings will benefit from a lower tax rate.

Revenues (Million $)

Important Developments

Oct. '89— SFX reported that it was negotiating the sale of a 20% stake in its Santa Fe Realty Corp. unit to the California Public Employees Retirement System. Completion of the transaction, estimated at some $400 million, was seen by 1989 year-end. Proceeds would be used to retire debt. Under terms of the agreement, SFX is required to take its real estate unit public by 1991 year-end.

Oct. '89— SFX petitioned the Fifth Circuit Court of Appeals in New Orleans to overturn the $750 million judgment awarded by a District Court in Texas in March to Energy Transportation Systems Inc. (ETSI), a coal slurry pipeline builder. Santa Fe was found guilty of conspiring with five other railroads to thwart ETSI's proposed coal slurry pipeline.

Next earnings report due in late January.

Business Summary

The transportation and natural resources firm adopted the name Santa Fe Pacific Corp. in April, 1989 reflecting the divestiture in late 1988 of Southern Pacific Transportation Co. Contributions (in million $) from continuing operations in recent years:

	1988	1987	1986
Real estate	$293.5	$204.9	$203.2
Railroad	219.0	176.8	170.8
Pipeline	89.3	60.6	86.7
Petroleum	-17.4	44.7	-157.0
Minerals	46.5	36.4	26.5

Santa Fe Pacific Realty Corp. manages and develops commercial, industrial and residential properties located primarily in California and Arizona. Rental properties at 1988 year-end aggregated over 11 million sq. ft. SFX also owns 2.8 million acres of land (95% of which are located in desert and mountain areas), including 39,000 acres of potentially developable properties and 90,000 acres of agricultural lands. In October, 1989 SFX agreed to sell a 20% stake in its real estate unit to the California Public Employees Retirement Service.

The Atchison, Topeka and Santa Fe Railway Co. operates over 11,652 miles in 13 midwestern and western states. The Santa Fe carried 77.8 billion ton-miles of freight in 1988 (72.0 billion in 1987) of which general merchandise (primarily piggyback) generated 18.7%. Food and farm products provided 18.4% of volume in 1988, followed by grain (18.2%), checmicals (10.9%) and coal (9.5%).

Santa Fe Pacific Pipelines, Inc. is the general partner for Santa Fe Pacific Pipeline Partners L.P. (44%-owned). The master limited partnership, formed in December, 1988 owns two refined petroleum product lines spanning 3,020 miles in six western and southern states.

Santa Fe Energy Co., a leading independent producer of oil and gas, had proved reserves at 1988 year-end of 183.7 million bbls. of oil (139.3 million in 1987) and 191.6 billion cubic feet of gas (217.2 billion cubic feet). The bulk of SFX's energy reserves are held by 85%-owned Santa Fe Energy Partners L.P.

Santa Fe Pacific Minerals Corp. explores and develops minerals from rights covering 8 million acres. SFX produces coal from its 100%-owned and operated Lee Ranch mine in New Mexico, collects royalties from leased properties containing 490 million tons of coal and has a 50% interest in the Trinity silver mine in Nevada.

Dividend Data

Financing agreements limit dividend payments to $16 million annually ($0.10 a share). A "poison pill" stock purchase right was adopted in 1986.

Summary

This diversified manufacturer of branded food products (specialty meats, frozen baked goods, coffee and foodservice products) also makes personal and household care products. Its 10-year record of consecutive annual earnings gains has been aided by strategic acquisitions and divestitures. Solid growth should continue in fiscal 1990. Directors recently declared a 2-for-1 split and a 16.7% dividend increase.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 may rise to $3.80 a share from fiscal 1989's $3.50 (both unadjusted for the pending 2-for-1 split).

The quarterly dividend was raised 16.7%, to the equivalent of $0.42 from $0.36 (both unadjusted), with the October, 1989 declaration.

Sales for fiscal 1990 should trend higher, reflecting acquisitions and greater unit volume in most product areas. Increases in food ingredient costs should be passed through to customers, while improved contributions from new businesses and investment in cost-saving facilities should allow good earnings progress. Expansion in Europe should also aid earnings growth.

Net Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	2.75	2.75	2.40	2.14
Dec.	---	3.08	2.64	2.39
Mar.	---	2.84	2.48	2.24
Jun.	---	2.91	2.90	2.38
	---	11.08	10.42	9.16

Sales for the three months ended September 30, 1989 were fractionally lower, largely on divestiture of foodservice operations which was nearly offset by a sharp rise in knitwear sales. Higher margins in personal products business helped drive net income up 24%. After preferred dividends, share earnings were $0.75 (based on more common shares), versus $0.65 (both unadjusted).

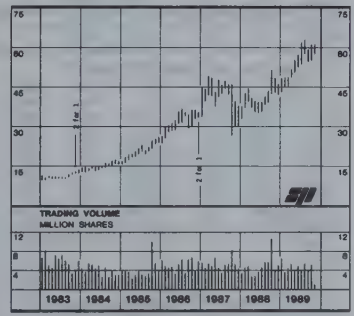
Jun.	E0.96	0.86	0.75	0.63
	E3.80	3.50	2.83	2.35



Important Developments

Oct. '89— Excluding fiscal 1989 acquisitions, unit volume for knit products advanced 27% during the fiscal 1990 first quarter, with the largest gains in underwear, printed T-shirts and fleecewear. Volume growth in packaged meats was up 6%; in bakery products, 5%; and in foodservice, 4%, excluding acquisitions and divestitures.

Jul. '89— SLE transferred some 50% of its food service business ($2.6 billion annual sales in fiscal 1989) to a 50-50 joint venture with Sandler Foods, a leading foodservice company in Virginia. In March SLE acquired Champion Products Inc., which makes recreational and athletic knitwear for $316 million. SLE also acquired Hygrade Food Products Corp., a leading manufacturer of beef and poultry frankfurters sold under the Ball Park name and other processed meats for $140 million.

Next earnings report expected in late January.

Business Summary

Sara Lee (formerly Consolidated Foods) makes branded foods and personal and household care products. Contributions in fiscal 1989:

	Sales	Op. Prof.
Packaged foods:		
Packaged meats & bakery	29%	25%
Coffee & grocery	15%	18%
Foodservice	22%	7%
Packaged consumer prod.:		
Personal products	24%	36%
Household & pers'l care	10%	14%

Packaged foods consist of meats (Kahn's, Jimmy Dean, Hillshire Farm) and frozen baked goods (Sara Lee and Chef Pierre). It also includes Douwe Egberts coffee and Jonkers Fris processed fruits, sold primarily in Europe.

Foodservice operations comprise Booth fisheries, Lyon's restaurants, and PYA/Monarch, which distributes food made by Sara Lee and other food processors to the restaurant industry.

Consumer products include such personal products as Hanes hosiery, underwear and knitwear; L'Eggs pantyhose; Aris isotoner gloves and slippers; Bali foundations; Coach leather goods; and Fuller brushes and other direct marketing lines. It also includes household and personal care items such as Nicholas Kiwi shoecare products.

Dividend Data

Dividends have been paid since 1946. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

SCANA Corp.

1984

NYSE Symbol SCG

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 19'89	1989					
34¾	35½-29⅝	11	2.46	7.1%	A-	0.47

Summary

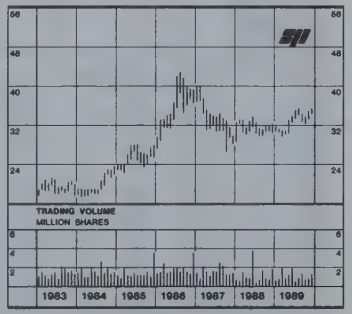
SCANA is the holding company for South Carolina Electric & Gas, which furnishes electric and gas service to a population of some 1.9 million located primarily in the southern half of South Carolina. With completion of SCG's only nuclear plant in 1984, no further plant additions are planned before the year 2000. A modest rise in earnings is expected for 1990 due to rate relief and continued growth in the service territory.

Current Outlook

Earnings for 1990 are estimated at $3.10 a share, up from the $2.95 likely for 1989.

Dividends at $0.61½ quarterly are the minimum expectation.

Slightly higher earnings are anticipated for 1990, principally reflecting modest gas and electric rate relief, growth in the cutomer base, cost cutting and an improved contribution from nonregulated subsidiaries, partially offset by the favorable contribution to earnings in 1989 of an unusually hot summer. Cash requirements for construction and nuclear fuel for 1989-1993 were estimated at approximately $1.1 billion.



Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	286	302	309
Jun.	---	253	227	258
Sep.	---	300	284	296
Dec.	---	---	270	252
	---	---	1,083	1,116

Operating revenues for the nine months ended September 30, 1989 rose 3.1%, year to year, reflecting warmer weather and an increase in the number of customers. Operating income advanced 5.0%. After higher other income and interest costs, net income was up 1.3%. Earnings per share were $2.49, compared with $2.46.

Common Share Earnings ($)

Quarter:	1990	1989	1988	1987

Dec.	E0.60	E0.46	0.54	0.41
	E3.10	E2.95	3.00	3.20

Important Developments

Nov. '89— The company said that the South Carolina PSC had approved a $10.1 million annual increase in its firm natural gas rates, effective November 30, 1989. The rates are based on a 12.75% return on common equity, the same return allowed in the company's last general natural gas rate increase.

Nov. '89— SCG said that it sustained significant damage to its electric transmission and distribution facilities as a result of Hurricane Hugo. It estimated that total expenditures for the damage related to the hurricane would be about $70 million, of which $16 million would be recoverable through insurance. Total kwh sales of electricity were up 2.6% in the third quarter, year to year.

Next earnings report expected early February.

Business Summary

SCANA Corp. is the holding company for South Carolina Electric & Gas, which provides electric service to the southern half of South Carolina and gas service to nearly 80% of the state. Urban bus service is provided in the metropolitan areas of Columbus and Charleston. Business segment contributions in 1988 (profits in million $):

	Revs.	Profit
Electric	72.7%	$186.7
Gas	26.9%	23.0
Transportation	0.4%	-5.0

The fuel mix in 1988 was 74% coal, 21% nuclear and 4% hydro and 1% natural gas. Peak load in 1988 was 3,021 mw and system capacity was 3,891 mw, for a capacity margin of 22.4%. Gas sales in 1988 totaled 677.6 therms, down 7.7% from 1987.

The 900 mw Summer nuclear unit (67% owned) was placed in commercial operation in March, 1984 at a total cost of $1.3 billion. During 1984 SCG completed the $128 million conversion of the 580 mw Williams oil-fired unit to a coal-fired unit. Additional base-load generating capacity should not be needed before 2000.

Dividend Data

Dividends have been paid since 1946. A dividend reinvestment plan is available.

Oct. 30'89	1989					
73½	79⅝-55⅜	18	1.80	2.5%	A	0.84

Summary

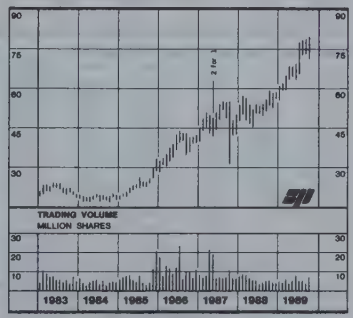
This company is a leading manufacturer of prescription and over-the-counter pharmaceuticals, with important interests in cosmetics, toiletries, vision care, animal health and foot care products. It is also one of the industry leaders in interferon-based research. Above-average growth prospects for major markets coupled with a steady stream of new products, especially in the high-margin ethical drug area, enhance SGP's longer-range outlook.

Current Outlook

Earnings for 1990 are estimated at about $4.90 a share, up from the $4.20 likely for 1989.

An increase in the $0.45 quarterly dividend is likely during the second quarter of 1990.

Sales for 1990 should post further growth. Despite anticipated initial generic competition in the Proventil anti-asthma line and the recent sale of certain cosmetics units, volume growth should reflect good gains in most of SGP's established pharmaceutical products lines. Anticipated FDA approvals for several new drugs would also bolster sales. Profitability should benefit from the better volume and productivity improvements.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

Oct. '89— R&D outlays for 1989 were estimated at about $340 million, up from $298 million in 1988. Important drugs now under FDA review include: Claritin, a non-sedating antihistamine; Unicard, an antihypertensive; and Uni-Dur, a once-a-day dosage form of SGP's Theo-Dur anti-asthma medication. Claritin and Unicard are each expected to generate over $200 million in sales when they are fully established in worldwide markets. A number of other promising compounds are also under development.

Sep. '89— A gain of about $70 million from the sale of European cosmetics units in the third quarter was offset by provisions related to the divestiture of a unit in Brazil and restructuring costs in the over-the-counter products division.

Next earnings report expected in late January.

Business Summary

Contributions by industry segment were as follows for Schering-Plough in 1988:

	Sales	Profits
Pharmaceutical products	74%	78%
Consumer products	26%	22%

Foreign operations contributed about 39% of sales and 31% to profits in 1988.

Pharmaceuticals include allergy, asthma and cold products (25% of total 1988 sales) such as Theo-Dur and Proventil bronchodilators, Vancenase nasal inhaler, Afrin nasal spray, Chlor-Trimeton allergy tablets and Drixoral and Coricidin cold medications; dermatological products (14%) such as Lotrisone antifungal and anti-inflammatory, and Diprosone and Diprolene steroids; anti-infectives and anticancer products (11%), which include Intron-A (alpha-2 interferon) and Eulexin; and cardiovasculars (5%), including Normodyne and Normozide antihypertensives and Nitro-Dur transdermal nitroglycerin patch. Other pharmaceutical products (12%) consist principally of Fibre Trim diet aid products, while other health care items (7%) comprise various vision care and animal health products.

Consumer products encompass the Maybelline cosmetics business (12%); proprietary medicines and toiletries (9%) such as Coppertone sun care products, Di-Gel antacid, St. Joseph aspirin and Correctol laxatives; and Dr. Scholl foot care products (5%).

Dividend Data

Dividends have been paid since 1952. A "poison pill" stock purchase right was adopted in 1985. A dividend reinvestment plan is available.

Schlumberger Ltd.

1985V

NYSE Symbol SLB Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 21'89	1989					
43⅝	45½-32	26	1.20	2.8%	A-	1.01

Summary

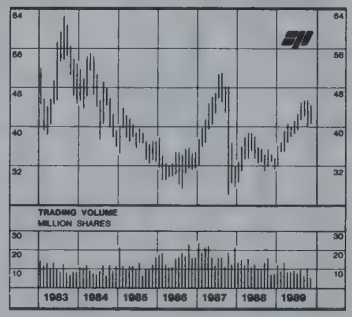
Schlumberger is a world leader in providing wellsite and contract drilling services to the oil industry. It also makes a variety of utility meters as well as computer aided engineering, design and manufacturing systems. A gradual recovery in oilfield activity coupled with comprehensive cost cutting measures should sustain near-term prospects. The longer-term outlook is enhanced by the company's expanding line of products and services and continued geographic expansion.

Current Outlook

Share earnings for 1990 could approximate $1.85, versus the $1.75 estimated for 1989.

Dividends should continue at $0.30 quarterly.

Revenues and profits in coming quarters should benefit from a gradual recovery in oilfield activity, paced by an increase in foreign drilling. Comprehensive cost cutting and a more favorable drilling mix should preserve margins. Longer term, SLB's international presence and more sophisticated products and services should strengthen its competitive position.



Sales & Services (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,182	1,246	1,031	1,355
Jun.	1,197	1,257	1,053	1,179
Sep.	1,106	1,181	1,089	1,008
Dec.	---	1,241	1,229	1,026
	---	4,925	4,402	4,568

Revenues for the nine months ended September 30, 1989 declined 5.4%, year to year, reflecting reduced oilfield activity. The impact of soft worldwide rig count was largely offset by demand for new services. After a nonrecurring gain of $13 million ($0.05 a share) in the 1989 interim, versus a gain of $35 million ($0.13) a year earlier, net earnings dropped 15%, to $1.27 a share (before a $0.09 extraordinary gain) on 12% fewer shares, from $1.32.

Common Share Earnings ($)

Dec.	E0.48	0.40	1.15	d6.60
	E1.75	1.72	1.81	d5.76

Important Developments

Oct. '89— SLB reported that oilfield acitivity was generally lower, year to year, in 1989's third quarter as the number of drilling rigs worldwide slipped 9%. The rig count in North America began a seasonal rise, reaching the level of a year before in the U.S. The company's Sedco Forex contract drilling unit reported its offshore utilization rates increased to 84% from 76% and rates for land rigs were slightly higher. Day rates were higher in the quarter. The meter business was relatively flat in 1989's third quarter. Electricity meters weakened in the U.S. and portions of Europe, while water and gas meters strengthened in North America. SLB's technology business was limited by reduced capital spending in the U.S. semiconductor industry. The company's nine month profits included a gain of $0.05 a share from the sale of the Defense Systems businesses.

Next earnings report expected in late January.

Business Summary

Schlumberger is a world leader in providing drilling services and fully computerized wireline and interpretation services to the petroleum industry. It also makes computer-aided systems and electronic products. The Sedco Forex unit operates 42 offshore and 35 land drilling rigs. Customers outside the U.S. provided 73% of revenues in 1988. In September, 1989 SLB sold its aerospace instrument business. Contributions in 1988:

	Revs.	Profits
Oilfield services	55%	65%
Measurement & Systems	45%	35%

Oil well logging services are provided worldwide through mobile laboratories which carry electronic equipment to measure subsurface geology. SLB has more than half the U.S. wireline services market and a substantially larger market share outside the U.S. SLB also offers measurement-while-drilling services, which permit the transmission of data to the surface without stopping drilling.

Schlumberger Industries makes electricity meters and equipment for electric power distribution; measuring transformers; network protection systems; water meters; and electronic payment systems. Schlumberger Technologies produces computer aided engineered, design and manufacturing systems, semiconductor testing systems, and various measurement instruments.

In early 1989 SLB predicted that the level of oilfield service activity would increase gradually, primarily reflecting greater drilling outside the U.S. The company has said that the shift to natural gas drilling within the U.S. would continue, but that the near-term outlook for U.S. crude oil drilling was not favorable. SLB said it did not anticipate any major political move to stimulate oil drilling in the U.S. in the near future.

In 1988 SLB repurchased 34.5 million common shares at a cost of $1.2 billion.

Summary

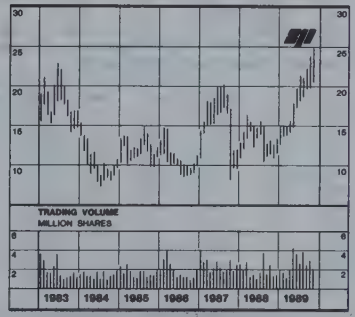
This company manufactures broadband communications equipment, test and measurement instruments, and defense electronic systems. Earnings have advanced in recent years, largely reflecting growing customer acceptance of newly introduced CATV products. In May, 1989 SFA announced the first commercially-available system for the delivery of high definition television.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $1.80 a share, compared with the $1.53 of fiscal 1989.

The quarterly dividend was raised 33%, to $0.04 from $0.03, with the September, 1989 payment.

Sales for fiscal 1990 are anticipated to increase moderately, primarily reflecting growth in the company's communications segment. Cable television equipment sales should continue to benefit from increased penetration of recently introduced products; in addition, growth is expected from the private networks business. Instrumentation sales and earnings could rise, including greater contributions from government sales.



Net Sales (Million $)

Important Developments

Nov. '89— SFA said that new orders in the fiscal 1990 first quarter were $147.5 million, up 14%, year to year. The backlog at September 30 was $225 million, up $2.5 million from the June quarter. SFA said that earnings for the first quarter of fiscal 1990 reflected greater shipments of broadband cable TV equipment; all product lines participated in the CATV performance, reflecting greater customer acceptance of newly introduced products. SFA noted that there was considerable interest in its current and planned CATV products in international markets. Network Systems continued to grow, aided by a $29 million Chilean contract, while instrumentation sales declined 7%. SFA also noted that the first commercially available HDTV satellite transmission system was delivered to Telesat Canada for acceptance testing.

Next earnings report expected in late January.

Business Summary

Scientific-Atlanta primarily makes broadband communications equipment, and makes test and measurement instruments and defense electronics systems. Contributions to sales and operating profits (in million $) in fiscal 1989:

	Sales	Profits
Communications	71%	$64.1
Instrumentation	29%	2.7

Foreign sales represented about 20% of total sales in fiscal 1989, versus 14% in fiscal 1988.

Communications equipment includes antennas, receivers, transmitters, modulators, demodulators, and other items. These devices are used in satellite earth stations and in cable television (CATV) receiving and distribution systems. The company markets its satellite-related equipment to domestic and international satellite communications networks (including private business communications systems) and to CATV operators.

Instrumentation products consist of spectrum analyzers and systems, instruments to test and measure the quality and performance of various types of telecommunications equipment, antenna test and measurement devices, and products that measure radar reflectivity. Also manufactured is the Optima line of cabinets for electronic laboratory, data processing, and medical instruments. For government use, the company manufactures products which include telemetry, electronic warfare, anti-submarine warfare and acoustic communications products and systems.

Dividend Data

Dividends were initiated in 1976. A "poison pill" stock purchase right was adopted in 1987.

50½	52½-38⅜	10	0.80	1.6%	A-	1.19

Summary

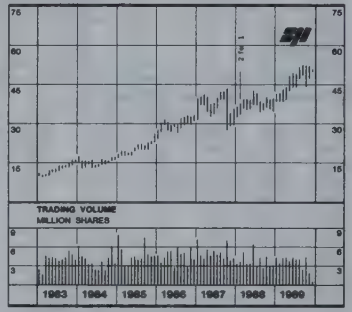
This company is the leading producer of toilet tissues and paper towels and napkins, and also maintains an important position in printing and fine papers. Although the consumer paper products area remains intensely competitive, SPP's strong pulp position and benefits from its major modernization program now underway brighten long-term prospects.

Current Outlook

Earnings for 1990 are projected at $4.80 a share, compared with the $5.20 estimated for 1989, which includes a net unusual credit of $0.97.

Dividends should remain at $0.20 quarterly.

Sales for 1990 are expected to show a moderate gain, based on continued strong markets for sanitary products and printing and publishing papers, unless the general economy begins to weaken. Margins could benefit if market pulp prices weaken, thereby lessening an important cost factor. Mexican sales and earnings may suffer due to price controls.



Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,269	1,126	957

Important Developments

Oct. '89— Earnings for the third quarter included a $1.68 per share gain on the sale of timberland decreased by asset restructuring and other special charges of $0.72. Earnings for the third quarter of 1988 included a gain of $1.53 a share from the sale of Scott's interest in Brunswick Pulp and Paper Co. minus an unusual charge of $0.31.

Oct. '89— Scott withdrew from a joint venture that had planned to build a wood pulp mill in Indonesia, citing lower anticipated need for eucalyptus pulp.

Jul. '89— Scott completed the sale of 194,000 acres of timberland in Washington state to Crown Pacific Ltd., for approximately $230 milion.

Jun. '89— Scott agreed to purchase the warrants for Scott common stock held by Brascan Ltd. for $200 million or $24.92 per warrant.

Next earnings report expected in mid-January.

Business Summary

Scott Paper is the largest producer of paper tissues, napkins and towels. Business segment contributions in 1988:

	Sales	Profits
Personal care & cleaning.....	73%	58%
Printing & publishing papers.	27%	42%

Personal care & cleaning products include toilet tissue, paper towels, towel holders, facial tissues, table napkins and sanitary tissues. These products are sold under the Scott name as well as other company tradenames. Industrial wipes, as well as other nonwoven fabrics are also produced.

The printing and publishing division produces commercial printing papers, book publishing papers, converting papers (for envelopes, wrappers and gummed labels), business and thin papers, and specialty papers.

Scott conducts international operations in Europe, Latin America and the Far East. These operations accounted for 26% of sales and 18% of pretax earnings in 1988.

SPP owns or controls some 2.9 million acres which supply more than 20% of pulpwood needs. Lumber and pulp are also sold to others.

Dividend Data

Dividends have been paid since 1915. A dividend reinvestment plan is available. A "poison pill" stock purchased right was adopted in 1986.

Summary

This 80%-owned subsidiary of E. W. Scripps Co. owns and operates nine television stations and five radio stations, which together accounted for 78% of total revenues in 1988; the remaining revenues were derived from cable television operations. Earnings rose strongly in the first half of 1989, benefiting from the completion of the Sacramento cable system.

Business Summary

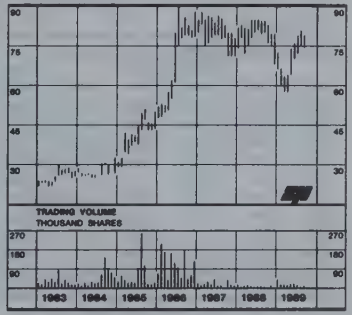
As of December 31, 1988, Scripps Howard Broadcasting Company owned nine television stations and five radio stations. The company also operates or holds investment interests in cable television systems. In 1988, revenues and income from operations (in 000s) were derived from:

	Revs.	Income
Broadcasting	78%	$58,882
Cable television	22%	4,444

Television stations (six VHF and three UHF) are located in Detroit, Mich. (WXYZ-acquired in January 1986); Tampa, Fla. (WFTS-acquired in January 1986); Cincinnati, Ohio (WCPO); Cleveland, Ohio (WEWS); Memphis, Tenn. (WMC); West Palm Beach, Fla. (WPTV); Tulsa, Okla. (KJRH); Kansas City, Mo. (KSHB); and Phoenix, Ariz. (KNXV). All six VHF stations are affiliated with national television networks while the three UHF stations recently joined the Fox Network. The E.W. Scripps Company, which through its Scripps Howard, Inc. subsidiary owns 80% of the company's stock, also owns daily newspapers in Cincinnati, Ohio and Memphis, Tennessee, where the company operates broadcast stations.

Scripps Howard owns radio stations in Memphis, Tenn. (WMC AM/FM); Portland, Ore. (KUPL AM/FM); and Baltimore, Md. (WBSB FM). All of the stations provide news and public affairs broadcasts, and all but one provide music and music-related programming.

Cable television systems are in Sacramento, California, the Colorado areas of Fort Lupton, Lafayette, Longmont, Louisville, Loveland, and Parachute/Battlement Mesa and the Florida communities of Lake County and Volusia County. As of February 28, 1989, the Sacramento cable system was largely complete, following three years of construction. At February 28, 1989, the company's cable systems passed approximately 421,000 homes and served some 216,000 (51% of homes passed) basic cable subscribers. In addition to basic cable service, substantially all of the Scripps Howard's cable systems offer at least three premium programming services.



Important Developments

Jul. '89— Scripps Howard said earnings in the first half of 1989, before depreciation, interest and taxes, increased 17%, to $72,807,000 ($7.05 a share), from $62,137,000 ($6.02). The improvement primarily reflected the completion of the Sacramento cable system. At June 30, 1989, the company had 222,000 basic subscribers (169,000 in Sacramento), up from 184,000 (134,000) a year earlier.

Next earnings report expected in mid-October.

Dec. 22'89	1989					
88	90⅜–60¼	12	[1]1.40	[1]1.6%	A	0.99

Summary

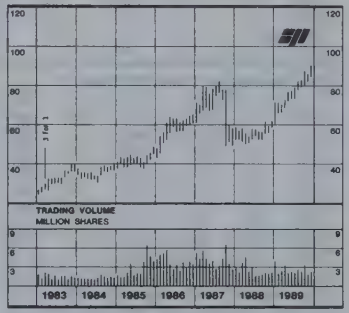
Seagram is one of the world's leading distilled spirits and wines producers, and owns 24% of E.I. du Pont de Nemours, the largest chemical company. In March, 1988 VO acquired Martell S.A., a leading worldwide cognac producer, for $732 million, and in April, 1988 it acquired Tropicana Products, a leading ready-to-serve orange juice producer for $1.2 billion. The acquisitions are likely to be dilutive in fiscal 1989-90 and beyond. Directors have authorized repurchase of up to 5% of the common shares.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are expected to rise to $8.15 a share from the $7.15 projected for fiscal 1989-90.

The $0.35 quarterly dividend is the minimum expected.

Revenues for fiscal 1990-1 should continue in a good uptrend, reflecting increased case sales outside the U.S. and volume growth at Tropicana. Profitability may continue to be limited by the Martell and Tropicana acquisition costs and higher advertising and marketing outlays, but a better product mix should sustain an upward trend in earnings. Rising dividends and equity contributions from the DuPont holding should remain important to earnings growth.



Gross Revenues[2] (Million U.S. $)

Quarter:	1990–11	1989–90	1988–9	1987–8
Apr.	---	1,228	937	832
Jul.	---	1,303	1,246	869
Oct.	---	1,362	1,307	927
Jan.	---	---	1,566	1,187
	---	---	5,056	3,815

Sales for the nine months ended October 31, 1989 rose 12%, year to year, largely reflecting the acquisition of Martell and Tropicana, and growth in international business. Operating income advanced 37%, and with dividend income rising 15% and interest expense up 34%, pretax net gained 27%. After taxes at 25.8%, versus 18.2%, income from beverage operations and DuPont dividends was up 15%, to $2.93 a share from $2.55. Including equity in unremitted DuPont earnings, net income increased 20%, to $5.84 a share from $4.91.

Jan.	E1.60	E1.31	1.21	1.26
	E8.15	E7.15	6.12	5.46

Important Developments

Dec. '89— VO attributed improvement in nine month operating earnings to the increased profitability of its international beverage business as well as improvement in both the U.S. and Canada. VO also said the addition of Martell and Tropicana aided results.

Next earnings report expected in early March.

Business Summary

Seagram Co. is the world's largest producer and marketer of distilled spirits and wines with subsidiaries and affiliates in 27 countries. Products include some 700 brands of distilled spirits, wines, champagnes, brandies, ports and sherries which are sold in over 150 nations. In 1988, Seagram acquired Tropicana Products (annual revenues of some $760 million) for $1.2 billion, and Martell S.A. (annual revenues of 1.8 billion French francs) for $732 million. Contributions by geographic segment in fiscal 1988-9 (profits in million $):

	Revs.	Profits
United States	49%	-$7
Europe	36%	248
Latin America & Asia-Pacific	11%	93
Canada	4%	91

The company owned as of January 31, 1989 some 54.7 million shares (22.9%) of E. I. du Pont de Nemours and Co. DuPont is the largest manufacturer of chemicals in the U. S., and owns the ninth largest domestic oil company (Conoco, Inc.). Dividend income and equity in unremited earnings in Du Pont contributed net income of $487 million in the fiscal year ended January 31, 1989, representing 83% of Seagram's total.

The company owns 1.4 trillion cubic feet of gross proved reserves of natural gas in the Gulf of Thailand. During fiscal 1985-6 VO sold its Canadian and North Sea oil and gas operations.

Summary

Sears is the largest retailer in the U.S., and has substantial insurance and other financial services operations. In a new strategy to revitalize its merchandising division, the company has changed its pricing policy from promotional to everyday low pricing and is rapidly developing specialty retail formats, such as Brand Central, and other specialty businesses. In the fourth quarter of 1988 Sears took a $442 million ($1.17 a share) charge for the restructuring of the merchandising group.

Current Outlook

Earnings for 1990 are projected at $5.00 a share, versus 1989's estimated $4.00.

The dividend should remain at $0.50 quarterly.

Revenues for 1990 should increase moderately in all divisions. Merchandise margins should widen, benefiting from increased emphasis on specialty businesses and cost-cutting programs. Discover Card should increase their profitability, and earnings at Allstate and Dean Witter should improve. Per share earnings will reflect fewer shares outstanding.

Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	12.16	10.96	10.48	9.39
Jun.	13.28	12.16	11.72	10.75
Sep.	13.18	12.57	12.19	11.17
Dec.	---	14.56	14.05	12.97
	---	50.25	48.44	44.28

Revenues for nine months ended September 30, 1989 advanced 6.4%, year to year. Merchandise group income declined 3%, reflecting the soft durable goods market and increased interest cost in the credit segment of the merchandise group. Due to damage claims from hurricane Hugo exceeding $250 million before reinsurance, income at Allstate fell 9.3%. Earnings at Dean Witter advanced 92% (income from Discover Card rose almost 5-fold). On a consolidated basis, net income declined 0.5%. Share earnings were $2.39 on 6.7% fewer shares, against $2.22, before income from discontinued operations of $0.17 versus a loss of $0.14, and a $1.44 special credit in 1988 from a change in accounting principles.

Important Developments

Oct. '89— Revenues for the Sears merchandise group rose 1.3% in the third quarter of 1989; revenues at Allstate increased 12.8% and a 3.6% rise in revenues was reported at Dean Witter. As part of Sears' major restructuring plan announced in October, 1988, it is developing specialty power formats, such as Brand Central, a home appliance and entertainment superstore within a store, featuring a greatly expanded product assortment. In addition, everyday low pricing was implemented on a nationwide basis on March 1 in an attempt to encourage customers to shop more often rather than wait for promotions. The plan also included cost cutting at all levels, the sale of the Sears Tower, and the repurchase of up to 40 million shares by mid-1989. Separately, in September the company offered $200 million 9% notes due September 15, 1996; net procceds were earmarked to reduce short-term debt.

Next earnings report expected in late October.

Business Summary

Sears operates four major retail and financial service businesses. Segment contributions in 1988:

	Revs.	Income
Sears	60%	23%
Allstate	30%	59%
Dean Witter	7%	10%
Coldwell Banker	3%	8%

Merchandising is conducted through 397 full-line stores (80 million sq. ft.), 367 medium-sized stores (32 million), 60 hard lines stores, 713 specialty stores and 112 catalog outlets (2.9 million). Credit operations accounted for 55% of group net income in 1988. Foreign operations are conducted in Canada and Mexico (116 stores combined).

Allstate Insurance Group is the second largest property-liability insurer in the U.S. The Coldwell Banker Real Estate group invests in, develops and operates real estate, and performs brokerage, mortgage guaranty insurance operations and other related services. Its Homart Development Co. subsidiary, develops and operates shopping centers, office buildings and other commercial properties. At year-end 1988 Homart owned, managed or was a partner in 30 regional malls.

The Dean Witter Financial Services group provides securities brokerage, investment banking, and other financial services. Discover Card offers traditional bank credit card and related services.

Jan. 8'90	1989-90					
40¼	54⅞-35½	7	2.28	5.7%	A	1.31

Summary

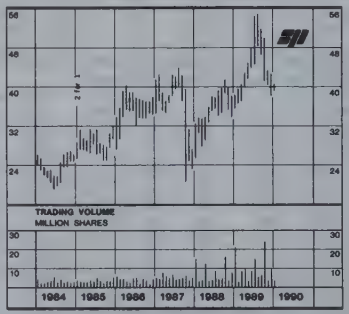
This bank holding company, the fifth largest in the country and second largest in California, has amassed an interstate banking presence throughout the West and Alaska through acquisitions. SPC has also diversified into other financial services, particularly securities trading, capital markets services, and commercial and consumer finance, which together account for a significant portion of profits. Cost-cutting efforts helped earnings to resume their uptrend in 1988 and should continue to benefit earnings through 1990.

Current Outlook

Earnings for 1990 could reach $6.90 a share, up from the $6.25 estimated for 1989.

The $0.57 quarterly dividend is the minimum expectation.

Loan growth is expected to slow to 7%-9% in 1990 from 12% posted through September, 1989, as the economy cools. International loans should decline relative to the portfolio, while domestic real estate and consumer loans increase. However, residential real estate loans are unlikely to register the advances posted in 1989 (up 33% year to date). Margins will likely continue under pressure as asset growth probably outstrips that of core deposits. The streamlining of the branch network along with the integration of recent acquisitions should contain costs. The weakness is in the Arizona bank, which is losing money due to mounting problem real estate loans. While loan quality is generally improving, except in Arizona real estate, loan loss reserves (at 66% of nonperforming loans) could be boosted. LDC loans are reserved at over 50%. Merchant banking should improve, reflecting the sale and elimination of low-return businesses. Pacific Rim trade financing business could aid long-term growth.



Review of Operations

Net interest income for the first nine months of 1989 advanced 12%, year to year, reflecting 11% growth of earning assets (including acquisitions). The provision for loan losses was 11% higher, at $338 million, partially reflecting a weak Arizona real estate market. Lower trading profits and securities-related fees were offset by higher service charges, rising fee income, and gains from the sale of equities; noninterest income rose 1.5%. With noninterest expense growth held to 3.5%, pretax earnings advanced 19%. After taxes at 36.8%, versus 35.6%, net income was up 18%. Share earnings were $4.67, versus $4.13.

Important Developments

Dec. '89— SPC agreed to acquire Mountain West Savings Bank, an Idaho-based savings bank with assets of $320 million, for $31.5 million. In June, SPC agreed to sell to Mitsui Bank, Ltd. a 5% equity interest in the consumer and commercial services groups of SPC's Financial Services System for about $100 million.

Next earnings report expected in mid-January.

Business Summary

This holding company owns the second largest bank in California, with 552 branches, and banks in Arizona, Washington, Oregon, Nevada and Alaska with 375 branches. Merchant banking, including worldwide securities trading and processing, other capital markets activities, and advisory services, is an important part of business, as are specialized financial services such as commercial and consumer finance (500 offices) and venture capital lending ($300 million invested). Contributions to net income (in million $; excluding special reserves against LDC loans in 1987):

	1988	1987
Retail banking	$242	$123
Business banking	112	60
Merchant banking	83	96
Interstate banking	60	102
Financial services	154	155
Developing country	2	-14

Foreign operations accounted for 20% of assets in 1988.

Average earning assets of $65.1 billion in 1988 were divided: commercial loans 45%, real estate loans 14%, consumer loans 20%, investment securities 6%, investment securities 6% and other 9%. Average sources of funds were interest-free deposits 13%, other deposits 47%, borrowed funds 29%, equity 5%, and other 6%.

At 1988 year-end nonperforming assets were $1.9 billion (3.4% of related assets), against $2.3 billion (4.4%) a year earlier. The reserve for loan losses was 2.05% of loans, down from 3.27%, as SPC charged off LDC loans. Net charge-offs during 1988 were 1.77% of average loans, versus 0.84%.

Dividend Data

Dividends have been paid since 1881. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

This company is the largest publicly-held funeral service/cemetery company in North America, operating some 502 funeral homes, 128 cemeteries, and 35 flower shops throughout the U.S. and Canada. In November, 1989 the company agreed to sell its funeral supply division for $62 million in cash and announced plans to sell its prearranged funeral business.

Current Outlook

Share earnings for 1990 are projected at $1.55, up from an estimated $1.25 for 1989.

Dividends should continue at $0.14 quarterly.

Profits from funeral services operations should improve slightly in 1990, reflecting a small increase in prices at both flower shops and for funeral services. However, a continuing decline in national mortality rates is expected to lead to a further decline in funeral case volume and apply some pressure to margins. Profits from cemetery operations are expected to rise slightly. Consolidated earnings should benefit from sharply higher nonoperating income.

Net Revenues[1] (Million $)

Quarter:	1989	1988	1987-8	1986-7
Mar.	196.0	---	126.7	68.8
Jun.	189.3	---	123.2	83.1

Dec.	---	---	153.8	126.2
	---	[2]462.6	540.0	386.6

Revenues for the nine months ended September 30, 1989 rose 9.2% from those for the nine months ended October 31, 1988 (the fiscal year-end has been changed to December 31 from April 30). Margins widened, and following higher nonoperating income, net income advanced to $44.8 million from $16.8 million. Share earnings were $0.83, against $0.35, which excludes a special charge of $0.34 from an accounting change.

Important Developments

Nov. '89— SRV reached an agreement to sell its funeral supply division to Hillenbrand Industries for $62 million in cash. The agreement was part of SRV's plan to discontinue involvement in the funeral supply and insurance funded prearranged funeral marketing businesses; the net assets of the businesses to be sold as of September 30, 1989 totaled about $280 million.

May '89— Directors raised the quarterly dividend 17%, to $0.14 from $0.12, with the July, 1989 payment. In April SRV's Canadian subsidiary sold publicly 1.5 million shares, reducing SRV's ownership interest to 70%; the sale resulted in an after-tax gain of $2.9 million. Proceeds were used by the subsidiary for reimbursement of SRV for certain Canadian acquisitions and partial payment for acquisition of a Canadian funeral firm.

Next earnings report expected in late January.

Business Summary

SRV is the largest publicly held funeral service/cemetery company in North America, with 502 funeral homes, 128 cemeteries, 20 funeral product and supply manufacturing plants, five casket distribution centers, and 35 flower shops. SRV also offered insurance and prearranged funeral programs (this business and SRV's funeral supply business are being held for sale). Contributions to revenues and profits by business segment in the eight month period of 1988 (operating profits in million $):

	Revs.	Profits
Funeral services	43%	$49.8
Prearranged funeral	19%	7.2
Cemetery	18%	15.3
Funeral supply	16%	-27.6
Other	4%	- 2.7

SRV's funeral homes perform all services relating to funerals. SRV also markets funeral prearrangement programs in the U.S. and Canada. The face amount of prearranged funeral contracts sold in the eight month period of 1988 was $163.5 million, and of prearranged cremations $5.7 million. Funeral supply operations include the manufacture and distribution of caskets and casket component and equipment to the entire funeral industry.

The cemetery division sells cemetery properties, mausoleum spaces, crypts and related merchandise, and performs interment and cemetery maintenance services.

SRV's flower shops design and sell funeral floral arrangements. SRV planned to dispose of those retail flower shops which are not associated with the funeral industry.

The company has acquired most of its operations and continues to review possible acquisitions of various related businesses.

Dividend Data

Dividends were initiated in 1973. A "poison pill" stock purchase right was adopted in 1988.

Summary

SME is one of the two largest catalog showroom merchandisers, and is also active in specialty retailing. Earning in 1989's first half were aided by higher sales, an improved product mix, and lower interest expense. In July, 1989 the company distributed a $10 a share special dividend as part of a recapitalization plan and discontinued its quarterly dividends. The shares were split 3-for-2 in March.

Business Summary

Service Merchandise is one of the two largest catalog showroom merchandisers in the U.S. Operations were substantially expanded by the 1985 acquisitions of H.J. Wilson Co. and Ellman's, Inc., which increased the company's total number of showrooms by 87, giving it 317 catalog showrooms as of December 31, 1988. The company also owns several specialty retailing units.

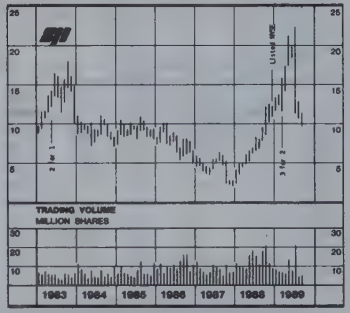
Showrooms (primarily leased) range in size from 20,000 to 80,000 square feet, averaging about 55,000. The showrooms sell jewelry, diamonds and brand-name hardgoods, including housewares, small appliances, giftware, silverware, luggage, cameras, radios, televisions and other electronic equipment and accessories, toys, sporting goods and home and garden equipment. In-store transactions account for most sales, with some mail-order business also conducted.

The company's catalog of about 490 pages, distributed by mail each fall, describes some 20,000 items and lists both manufacturers' suggested and the company's discounted prices. In addition, a 160-page supplementary catalog is published each spring, and flyers describing specials and seasonal items are mailed several times a year.

Although stocks of some items are maintained within showroom selling areas, most are warehoused in contiguous areas, and only samples are displayed. Customers select and pay for these items on the selling floor and take delivery at pickup counters.

Other specialty retailing operations include three Zimm's jewelry and giftware stores (as of December 31, 1988) and 11 Computer Shoppes, which sell small computers at retail. The Lingerie Store was closed in February, 1989.

In August, 1986 the company discontinued operations of its Mr. HOW subsidiary, which consisted of a group of 22 retail home improvement warehouses.



Important Developments

Aug. '89— Chemical Bank said that it had structured, syndicated and agented a $975 million senior recapitalization financing for SME. Of that amount, $500 million was in term loans and $475 million was revolving credit loans. The funds were used to pay the $10 a share special dividend in July, and were to be used to refinance certain existing debt, obtain necessary letters of credit, provide ongoing working capital, and pay fees and expenses related to the restructuring plan, which was adopted in May. SME said it expected to service such debt "without substantial modification" of its current expansion plans, but said that it would discontinue its quarterly cash dividend and take other steps to reduce costs and improve cash flow.

Jun. '89— SME announced an agreement to sell its 11 Computer Shoppes at about Computer Shoppe's net book value.

Next earnings report expected in mid-November.

Summary

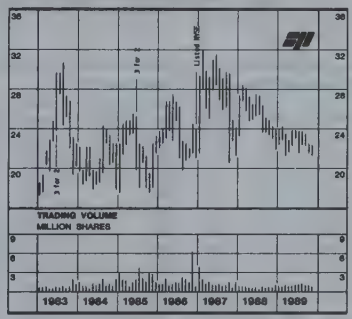
ServiceMaster L.P. provides housekeeping, maintenance and management services to health care facilities, as well as to residential, commercial, educational and industrial customers. In October, 1989 SVM acquired American Home Shield Corp., a provider of home service warranty contracts. Earnings for the first nine months of 1989 benefited from higher profits at both business segments.

Current Outlook

Share earnings for 1990 are projected at $2.25, up from the $2.10 estimated for 1989.

The $0.44 quarterly distribution is expected to be raised in December, 1989.

Profits from management services in 1990 are expected to rise slightly, reflecting more modest revenue growth, especially in services provided to the industrial facilities market. Consumer services profits should be higher on growth in radon testing services, an increase in the number of Merry Maids franchises, continued growth in demand for termite and pest control services, and favorable contributions from the October, 1989 acquisition of Amercian Home Shield.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	385	368	337	288
Jun.	401	382	359	276
Sep.	400	387	363	285
Dec.	---	394	367	294
	---	1,531	1,425	1,123

Revenues for the nine months ended September 30, 1989 rose 4.3%, year to year, reflecting growth at both business segments. Income from operations advanced 7.5%, but higher interest expense more than offset an increase in interest income, and net income was up 5.2%. Share earnings were $1.59 on 3.0% more shares, versus $1.55.

Important Developments

Oct. '89— A SVM subsidiary acquired the common stock of American Home Shield Corp. (AHS) for $9.50 per AHS share in cash plus the right to receive up to $3.50 per share based upon future performance of AHS; senior officers of AHS retained a 20% interest in AHS. AHS markets home service warranty contracts in 38 states and the District of Columbia, covering the repair and replacement of major home systems. SVM said that during the first nine months of 1989 it repurchased 503,815 of its common shares for a total cost of $11.5 million.

Jul. '89— SVM's Merry Maids subsidiary opened its first franchise operation in Osaka, Japan. SVM added that since acquiring Merry Maids in July, 1988, the number of Merry Maids home cleaning franchises has expanded to over 450.

Next earnings report expected in mid-February.

Business Summary

ServiceMaster Limited Partnership (formerly ServiceMaster Industries) provides management services to health care, educational and industrial customers, and a variety of consumer services and products to residential and commercial customers. Contributions by segment in 1988:

	Revs.	Profits
Management services	86%	72%
Consumer services & products	14%	28%

Management services provided include housekeeping, plant operation and maintenance, food service, laundry and linen care, grounds care, materials management, clinical equipment maintenance and home health care. As of December 31, 1988, SVM was providing management services to over 1,600 health care, educational, and industrial facilities in 47 states, the District of Columbia, Canada, and through affiliated companies in Japan and the Middle East.

Consumer services are provided through a network of independent franchisees, which perform lawn care services to residential and commercial customers, cleaning and housekeeping to the residential market under the ServiceMaster trademark, and termite and pest control services under the TERMINIX trademark. Consumer products include cleaning products for the home and automobile and products for pets.

Dec. 14'89	1989					
13⅜	19⅜-12	16	0.84	6.3%	A-	0.64

Summary

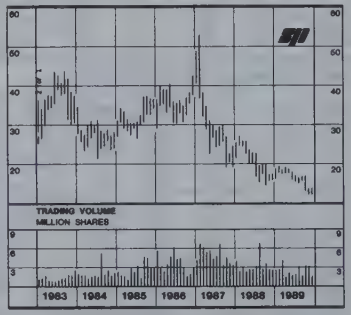
Shared Medical is a leading provider of computer-based information systems and related services to hospitals, clinics and physician groups. Depressed operating results in recent quarters reflected sales force problems and a more competitive and weaker healthcare information systems and automation market. Results through 1990 are expected to benefit from modestly higher revenues and slightly improved margins.

Current Outlook

Earnings for 1990 are projected at $1.00 a share, versus the $0.80 estimated for 1989 and the $1.25 reported for 1988.

A hike in the $0.21 a share quarterly dividend is not anticipated.

Revenues through 1990 are expected to increase modestly reflecting continued growth in the turnkey, physicians, international and lab products divisions (totaling 30% of revenues), which should outweigh lackluster hospital systems results (70%). The DRG legislation passed by Congress in 1983 resulted in strong competition and a declining growth rate in the healthcare market. Spending on information systems and the automation of activities by hospitals remains under pressure. Margins are expected to widen slightly on certain volume efficiencies and cost controls.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	95.5	95.4	96.6	87.3
Jun.	96.7	92.8	95.9	92.5
Sep.	96.9	95.0	99.1	96.4
Dec.	---	95.5	99.1	98.7
	---	378.7	390.7	374.9

Revenues for the nine months ended September 30, 1989, rose 2.0%, year to year, as increased hardware sales (reflecting a higher level of hardware content for systems installed) were offset by lower service and system fees. Margins narrowed, owing to significant nonrecurring general and administrative expenses associated with the creation of employee retirement and deferred compensation plans and higher personnel and equipment related costs, and pretax income declined 47%. After taxes at 33.0%, versus 35.0%, net income was off 45%, to $12,817,000 ($0.56 a share on 3.2% fewer shares), from $23,298,000 ($0.98). Results for the 1989 period exclude a $0.22-per-share credit from the cumulative effect of an accounting change.

Business Summary

Shared Medical Systems Corporation provides computer-based information systems and associated services to the healthcare industry.

The company's products are made available to hospitals, clinics and physician groups through integrated financial, administrative and patient management software systems that use diverse computing and networking technologies, ranging from remote processing, to distributed processing systems, to onsite turnkey systems. The company also provides a variety of professional services related to the information systems business, such as facilities management of data processing departments and physician group offices, systems installation, proprietary networking design, custom programming and education.

Shared Medical's markets are generally acute-care (short-stay) hospitals, primarily with more than 100 beds, and physicians groups. Historically, the company's primary market has been in the U.S., with hospital contracts in 47 states, the District of Columbia and Puerto Rico. Shared Medical also has contracts in Canada, the United Kingdom, Ireland, the Netherlands, West Germany and Spain. Although the number of acute-care hospital beds has not changed significantly in recent years, the demand for integrated information systems in the healthcare industry has grown with the increase in information required by the government and private insurers, additional medical services provided by hospitals and the need to control costs as prices, hospital budgets and government regulatory programs have increased.

Oct. 31'89	1989					
22⅞	29¾-22½	7	1.44	6.3%	NR	0.92

Summary

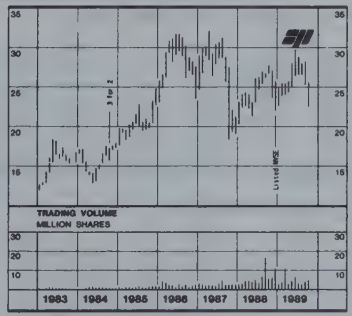
Formed through the early 1988 merger of Hartford National Corp. and Shawmut Corp., this superregional bank holding company, the 23rd largest in the nation, operates a branch network of 415 offices in Connecticut, Massachusetts and Rhode Island. Despite the slowing regional economy, and mounting problems in the real estate industry, earnings could continue to benefit from efficiencies resulting from integrating acquisitions.

Current Outlook

Earnings for 1990 could reach $3.95 a share, up from the $3.55 estimated for 1989.

The quarterly dividend was raised 5.9%, to $0.36 from $0.34, with the October, 1989 payment.

The New England economy is slowing, and loan growth may not surpass 5%-6% the coming year. Commercial real estate lending, which accounts for about 24% of the loan portfolio, should be slow, reflecting overbuilt conditions in local markets, particularly in the overdeveloped residential area. Real estate loan quality problems could accelerate leading to rising nonperforming assets. With reserves covering about 89% of non-accrual loans, provisions could rise moderately. LDC loans have been sharply reduced, and are reserved at about 60%. Competition among banks for consumer deposits is expected to continue, leading to higher funding costs and pressure on the net interest margin. Shawmut has been consolidating back office and other processing operations, as well as merging Hartford National's Massachusetts banks into Shawmut, and Shawmut's Connecticut banks into Hartford National. The resulting efficiencies could reduce overhead expenses and boost profitability.



Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.85	0.75	0.73	0.64
Jun.	0.88	0.80	d0.06	0.70

Dec.	E0.92	0.88	0.60	0.82
	E3.55	3.28	2.20	2.90

Review of Operations

Net interest income for the nine months ended September 30, 1989 declined 1.2% year to year, as a 3.9% growth in average earning assets was offset by a narrower net interest margin. The provision for loan losses was 49% lower, at $53.5 million, reflecting year-earlier LDC reserving. Noninterest income fell 18%, primarily due to the 1988 sale of SNC's 50% stake in its Boston headquarters. With noninterest expense declining 7.1%, pretax earnings increased 13%. After taxes at 26.2%, versus 25.7%, net income was up 12%. Share earnings were $2.63, versus $2.40.

Important Developments

Oct. '89— SNC said that third-quarter earnings were influenced by soft loan demand, fewer investment opportunities, and narrower spreads between earning assets and purchased funds and consumer deposits. During the quarter the net interest margin fell to 3.83% from 4.27% a year earlier.

Next earnings report expected in mid-January.

Business Summary

Shawmut National Corp., formed through the 1988 merger of Hartford National Corp. and Shawmut Corp., operates banks in Massachusets (with 227 branches), Connecticut (166 branches) and Rhode Island (12). It provides banking services to consumers and corporations, including a specialization in cash management services for insurance companies. Trust services are also important ($10 billion of assets under management). Shawmut also owns two mortgage banks.

During 1988 average earning assets were $23.8 billion (up 12% from 1987), and included $18.0 billion of loans (up 13% from 1987). Average sources of funds were core deposits 54%, purchased funds 29%, long-term debt 3%, equity 6% and other 17%.

At year-end 1988, the loan portfolio was divided: commercial loans 37%, commercial real estate 23%, residential real estate 26%, and consumer 14%.

At year-end 1988, nonperforming assets were $247 million (1.32% of loans and related assets), up from $216 million (1.24%). The reserve for loan losses was 1.51% of loans in both years. Net chargeoffs during 1988 were 0.57% of average loans, against 0.25% in 1987.

Summary

Formerly a wholly-owned subsidiary of American Express Co., SLH is one of the leading full-line securities brokerage and investment banking firms in the world. In April, 1988 the company completed the acquisition of the securities and investment banking firm E.F. Hutton Group for approximately $962 million in cash and notes. American Express controls about 61% of the voting power of SLH.

Business Summary

Shearson Lehman Hutton Holdings is a holding company which through Shearson Lehman Hutton and other subsidiaries is one of the largest securities brokerage and investment banking firms in the world. Based on total regulatory capital of $4.9 billion (as of December 31, 1988) SLH is one of the largest member firms of the NYSE. Prior to its initial public offering in May, 1987, SLH had been wholly owned by American Express.

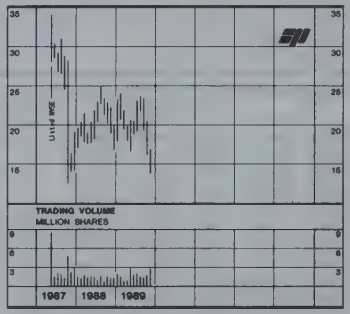
Revenues	1988	1987
Commissions	14%	17%
Investment banking	14%	12%
Principal transactions	11%	12%
Interest & dividends	53%	50%
Investment advisory	5%	6%
Mortgage banking	1%	1%
Other	2%	3%

The company engages in diverse investment banking activities for corporations, municipalities, and other governmental bodies both in the U.S. and internationally. SLH manages and underwrites public offerings of debt and equity, arranges project financings and private placements, and provides advisory and other services regarding mergers and acquisitions, divestitures, and financial restructurings.

SLH is a major dealer in corporate equity and fixed income securities, and is one of the 44 primary dealers in U.S. Government securities.

SLH provides investment advisory and counseling and administration to a wide range of institutional and individual clients. The company is engaged in real estate lending, syndication, development and property management.

At year-end 1988 SLH's private client group served 4.1 million active client accounts through approximately 11,000 financial consultants located in 575 domestic retail branch offices.



Important Developments

Oct. '89— Commenting on third quarter results SLH said the increase in quarterly earnings reflected higher commissions and revenues from market making and principal transactions. These improvements, together with an increase in net interest income, more than offset lower investment banking revenues and an increase in expenses, which were up despite a drop in fixed costs. Third quarter 1989 results included a pretax gain of $77 million ($37 million after-tax) from the sale of the institutional money management business of Lehman Management Co. The company added that firm-wide efforts to control fixed expenses were continuing, although some increases were anticipated in association with the opening of a new office facility in late 1989. Separately, in November, 1989 SLH announced it would reduce its headcount by up to 800 employees, or about 2.1%. of its workforce.

Next earnings report expected in late January.

Dec.		2.91	1.79	1.321
		10.53	6.75	4.600

Total revenues for the nine months ended September 30, 1989 rose 26%, year to year. Commissions rebounded 31%, largely reflecting a depressed retail environment a year earlier, while investment banking revenues declined 32% due to slower merger and acquisition and underwriting activity. Market making and principal transactions increased 9.8%, as strong fixed income results offset a first quarter $35.2 million writedown of MCorp securities. Investment advisory fees were up 7.4%. Total expenses were 26% higher, and pretax income advanced 22%. After taxes at 35.8%, versus 19.2%, net income declined 3.4%. Share earnings were $0.98 compared with $1.05.

		0.81	1.00	4.03

Finances

In January, 1988 SLH acquired E.F. Hutton Group Inc. SLH purchased 29.6 million EFH common shares at $29.25 per share in cash, and in April the remaining 3.3 million EFH common shares were converted into the right to receive $29.25 face amount of 10.75% senior subordinated debt.

On May 7, 1987 American Express reduced its stake in SLH to about 61% from 100%, via the sale of 18 million SLH common shares. AXP has agreed that, subject to certain conditions, until January 1, 1990 it will not reduce its ownership of SLH below 40%, without the consent of Nippon Life which owns the convertible preferred stock.

At June 30, 1989 SLH had net capital of $1.33 billion, or some $1.23 billion in excess of the NYSE minimum net capital requirement.

Summary

About 78% owned by the Royal Dutch/Shell Group, this company is one of the largest producer/refiners of petroleum products in Canada. Capital and exploration expenditures for 1989 are being concentrated in the resources segment. The cash dividend was increased 12½% in early 1989.

Business Summary

One of the largest integrated oil concerns in its country, Shell Canada Limited explores for, produces, transports, refines and markets petroleum products.

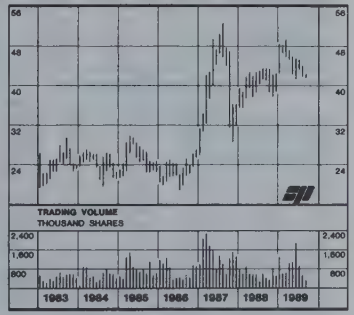
Revenues and operating profit for 1988 were derived as follows:

	Revs.	Profit
Resources	15%	31%
Oil products	64%	23%
Chemicals	19%	41%
Other	2%	5%

In 1988, gross production of crude oil and natural gas liquids averaged 10,700 gross cu. meters daily (8,600 net), compared with 11,200 (8,800 net) in 1987 (one cu. meter=6.29 bbl.). Natural gas produced and sold averaged 18.4 million gross cu. meters daily (14.5 million net), compared with 17.0 million (13.0 million net) in 1987 (one cu. meter=35.3 cu. ft.). Sulphur production averaged 3,600 tonnes daily, versus 3,400 tonnes in 1987 (one tonne=0.984 long ton). Clean coal production averaged 5,900 tonnes daily, versus 4,700. Crude oil processed by Shell refineries averaged 37,800 cu. meters per day (37,100 in 1987). Rated capacity of refineries was 43,100 cu. meters at year-end 1988, with an average utilization of 88%.

At December 31, 1988, net proved developed reserves were 14.2 million cu. meters of crude oil, 6.0 million cu. meters of natural gas liquids, 62.3 billion cu. meters of natural gas and 11.6 million tonnes of sulphur. In addition, oil sands synthetic crude potential reserves were placed at 800 million cu. meters recoverable by in-situ methods and 300 million cu. meters by mining.

Research and technology expenditures in 1988 were $61 million, up from $54 million in 1987.



Important Developments

Aug. '89— The company announced that it had agreed with Dow Chemical Canada Inc., a unit of Dow Chemical Co., to construct and operate a natural gas fractional facility on Dow Canada's Fort Saskatchewan, Alta., site. The installation, which was scheduled to start up in 1992, was estimated to cost approximately $120 million and would process approximately 70,000 barrels of natural gas daily. Shell also agreed in principle to sell ethane to Dow for the project.

Jul. '89— The company said that it had filed a project development application for a new gas plant for the Caroline natural gas field, with a planned daily capacity of processing 8.5 million cu. meters of raw gas. The plant would take about two years to construct and cost about $700 million.

Next earnings report expected in late October.

Finances

Effective June 1, 1989, the company reclassified its Class B shares as Class A shares on a four-for-one basis and deleted the Floating Rate Preferred shares as a series.

In May 1989, Shell Canada raised $125 million in international capital markets through the issue of 11% debentures due May 25, 1994. The company called for redemption U.S. $125 million of 14⅜% debentures, prior to maturity on May 15, 1989.

Shell Canada said capital expenditures in 1989 would be concentrated in the resources segment ($463 million), which management views as the key source of long-term growth in net income.

Summary

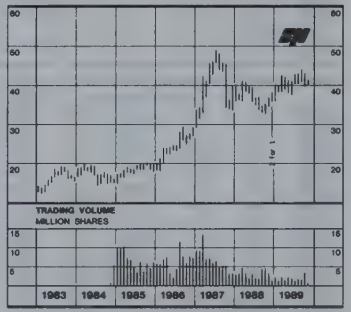
Shell Transport & Trading holds a 40% interest in the Royal Dutch/Shell Group of companies, a worldwide petroleum and chemical enterprise. With the formation of the Single Internal European Market planned for 1992, the Group is well positioned to exploit marketing opportunities throughout the Continent. SC can consider selected upstream (exploration and production) or downstream (refining and distribution) acquisitions that would strengthen its petroleum capacity and add to its retail market share.

Current Outlook

Earnings for 1990 per New York share are projected at $3.90, versus 1989's estimated $4.05, which includes $0.33 nonrecurring income.

Dividends paid from 1989 earnings should exceed the $1.97 a share (adjusted) paid from 1988 earnings, after 15% British Tax.

Revenues (£) for 1990 will reflect rising crude and natural gas production. Profit comparisons will be restricted by the absence of 1989's nonrecurring gain on the sale of real estate. Profits are expected to reflect greater upstream volumes in addition to greater downstream market share.



Operating Revenues[2] (Billion £)

Quarter:	1989	1988	1987	1986
Mar.	11.37	10.81	11.44	12.89
Jun.	12.98	10.73	11.56	10.34

Dec.	---	11.18	12.26	11.13
	---	44.00	47.78	44.21

Group revenues (£) for the nine months ended September 30, 1989 rose 14%, year to year, due mostly to higher crude oil prices and increased crude volumes. Margins were enhanced by the strength of the exploration and production segment, and including the sale of real estate, net income advanced 31%. Earnings per New York share rose to $3.25 from $2.63 (adjusted).

Dec.	E0.80	0.83	0.99	0.69
	E4.05	3.46	3.12	2.39

Important Developments

Nov. '89— Group earnings from operations in 1989's third quarter were hurt primarily by weakness in the worldwide chemicals segment. Prices softened and feedstock costs were higher, which impaired margins. The worldwide exploration and production business recorded an increase in profitability, reflecting higher crude oil prices and increased crude production. Natural gas volumes declined. Manufacturing (refining), marine and marketing earnings were hurt by weakness in the U.S. sector. Refined product volumes and margins in the U.S. were lower than in the year-earlier third quarter. Metals profits were limited by higher aluminium prices. Net earnings were further impaired by currency exchange losses stemming from the strength in the dollar. In 1989's first quarter SC recorded a nonrecurring gain on the sale of real estate in France.

Next earnings report expected in early February.

Business Summary

This holding company owns 40% of the Royal Dutch/Shell Group, the other 60% being owned by Royal Dutch Petroleum. The Group ranks as the second largest factor in the world petroleum industry. Operations embrace all phases of the industry, from production and transportation to refining and marketing, and include a strong position in petrochemicals. The Group also produces and trades in coal and metals; it also owns Shell Oil Co. (U.S.) and a 79% interest in Shell Canada.

Group Oper. Profits (£)	1988	1987	1986
Europe	37%	43%	51%
Other Eastern Hemis.	28%	29%	22%
U.S.A.	19%	21%	21%
Other Western Hemis.	16%	7%	6%

In 1988 the Group's crude oil supplies averaged 5,708,000 barrels a day; natural gas sales 6.0 billion cubic feet a day; refinery processing intakes 3,379,000 b/d; and crude and oil product sales 7,456,000 b/d. Net proved reserves at the end of 1988 for the Group (including its share of reserves of associated companies) stood at 8,839 million barrels of crude oil and natural gas liquids (8,419 in 1987) and 38,687 (39,085) billion cubic feet of natural gas. In 1988, net additions to reserves of oil and gas were equivalent to 165% of crude oil and liquids production and 82% of natural gas production; in the past 10 years oil reserves have risen by 35%. Exploration acreage in 1988 was extended in 14 countries, including the Chukchi Sea off the coast of Alaska.

Dividend Data

Dividends have been paid since 1898. An interim dividend for each year is normally paid in November and a final dividend in May of the following year.

2030

NYSE Symbol SHW Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 8'90	1989-90					
44½	35¾-25	14	0.70	2.0%	A	1.32

Summary

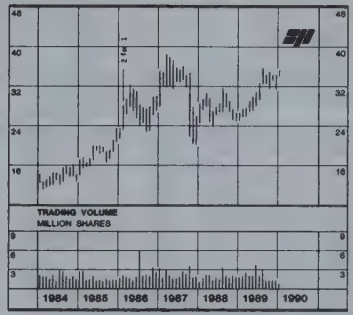
Sherwin-Williams is the largest producer of paints, wallcoverings and related products. Earnings through 1990 should benefit from higher sales, owing to more stores in operation, higher comparable store sales gains, and strength in markets served by its direct sales force. Margins are expected to be maintained, reflecting slower raw material cost increases and the acceptance of recent price hikes.

Current Outlook

Earnings for 1990 are projected at $2.80 a share, up from the $2.55 estimated for 1989.

An increase in the $0.17½ quarterly cash dividend is likely.

Sales through 1990 should show moderate improvement, aided by more stores in operation, higher comparable store sales, and by market share gains in markets served by the company's direct sales force such as the architectural, industrial maintenance and chemical coatings segments. Raw material shortages and cost increases should continue to abate and recently effected price increases should result in steady margins. Per-share earnings should be aided by a lower tax rate and a stock repurchase program.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	465	413	381	332
Jun.	584	544	492	432
Sep.	596	548	512	438
Dec.	---	445	408	350
	---	1,950	1,793	1,553

Sales for the nine months ended September 30, 1989 rose 9.2%, year to year, reflecting increases in both the paint store and coatings segments owing to market share gains and price increases. Margins narrowed slightly on higher SG&A expenses and following lower interest and other income (net), the gain in pretax profits was limited to 3.8%. After taxes at 36.0%, versus 38.6%, net income advanced 8.2%, to $2.07 a share (on 2.0% fewer shares) from $1.87.

	E2.55	2.30	2.09	2.09

Important Developments

Dec. '89— SHW reached a definitive agreement to purchase the Krylon aerosol paints and coatings business of Borden, Inc., for an undisclosed amount. In October, SHW discontinued negotiations toward an agreement to purchase Whittaker Corp.'s chemical coatings group.

Apr. '89— The company said that it planned to open about 50 new stores (net) during 1989.

Next earnings report expected in late February.

Business Summary

Sherwin-Williams is the largest producer and distributor of paints and varnishes, and also manufactures several allied products. Business segment contributions in 1988:

	Sales	Profit
Paint stores	64%	36%
Coatings	35%	61%
Other	1%	3%

At December 31, 1988 SHW operated 1,865 of its own stores, where paint and related products including industrial finishes, wallcoverings, floorcoverings, window treatments and assorted tools are sold to painting contractors, home builders, equipment manufacturers and the do-it-yourself market.

Coatings include paint, varnishes, lacquers and allied products, which are distributed to professional and do-it-yourself painters, industrial and government customers.

Other businesses are primarily conducted by the real estate group, which is engaged in acquiring, developing, leasing and managing property for the company and for others.

International operations are conducted through a direct sales force, distributors, jobbers, and company-operated stores in the Caribbean.

Dividend Data

Dividends were resumed in 1979. A "poison pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Summary

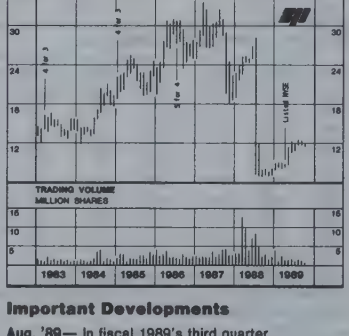
This restaurant company completed a recapitalization in mid-1988 that included payment of a special dividend to stockholders and issuance of stock options to employees. SHN's business includes the operation and franchising of Shoney's, Captain D's, and Lee's Famous Recipe Chicken restaurants. Although SHN's debt level has limited overall earnings in fiscal 1989, sales and (pre-interest) profits have grown impressively. SHN's shares began trading on the New York Stock Exchange in April, 1989.

Current Outlook

Earnings for the fiscal year ending October 31, 1990, are estimated at $0.55 a share, up from the $0.48 expected for fiscal 1989.

Resumption of quarterly dividends, omitted following the 1988 recapitalization, is not expected over the near term.

Sales growth is expected to slow in fiscal 1990, reflecting a lesser emphasis on the opening of new company-operated units and difficult comparisons against the robust improvements in sales of existing restaurants achieved in fiscal 1989. However, some further margin expansion is possible, aided by an incentive program which includes stock options and bonus plans.



Total Revenues (Million $)

Period:	1988-9	1987-8	1986-7	1985-6
16 Wks: Feb. ...	242.4	211.0	194.3	171.7

Important Developments

Aug. '89— In fiscal 1989's third quarter comparable restaurant sales rose 6.3% (a 2.6% real gain, adjusted for menu price increases). The biggest increases came from the Shoney's chain (7.0%; 3.2%), while nominal sales gains of between 5.0% and 6.8%, and real sales gains of between 1.4% and 1.8% were achieved by each of SHN's three other restaurant businesses. Also, through August 6, SHN had made $165 million of principal payments against the $585 million of bank borrowings used to finance its 1988 recapitalization. This included $41.2 million of scheduled repayments and $123.8 million of prepayments. In the second quarter SHN had sold publicly $201 million principal amount of zero coupon liquid yield option notes, due 2004, which may be converted into stock. Net proceeds of $55.5 million were used to prepay bank debt.

Next earning report expected in late December.

Business Summary

Shoney's, Inc. is an operator and franchiser of restaurants and inns. At February 19, 1989 SHN businesses included 1,543 restaurants, of which 683 were company-owned units and 860 were franchises. In fiscal 1988 there was a net addition of 24 company-owned restaurants and 30 franchised units.

Under the Shoney's name, there were 649 family restaurants, consisting of 275 company-owned units and 374 franchises. In addition, SHN's Captain D's chain had 598 restaurants, of which 347 were company owned and 251 were franch ises. A third chain, Lee's Famous Recipe Chicken, had 281 restaurants, of which 46 were company owned and 235 were franchises. Also, SHN operated 15 restaurants under the Pargo's and Fifth Quarter names.

As of August 1989, SHN's Lodging division included 51 facilities operated under the Shoney's Inn name. Most of the inns are operated by others, under licenses from SHN. SHN's strategy has been to place Shoney's Inns adjacent to or near a Shoney's Restaurants.

Other operations included Mike Rose Foods, Inc., a private label manufacturer of salad dressings, dry batter, biscuit mixes and condiments for the foodservice industry.

Dividend Data

Paid each year since 1971, dividends were discontinued following the large special distribution in mid-1988.

Finances

In mid-1988 SHN completed a recapitalization that included the payment of a special dividend ($16 a share in cash and $4 a share principal amount of 12% subordinated debentures due 2000) to stockholders. SHN's debt level increased substantially as a result of the recapitalization.

Oct. 25'89	1989					
14½	20¼-13⅞	11	0.48	3.3%	A-	0.93

Summary

Skyline is one of the largest producers of manufactured housing and of recreational vehicles. Sales and earnings are very sensitive to cyclical economic fluctuations and especially to the level of mortgage interest rates. Earnings in recent periods have been hurt by softening demand and intense pricing competition in both manufactured housing and recreational vehicles.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 are estimated at $1.10 a share, versus the $1.53 earned in fiscal 1988-9.

Dividends should continue at $0.12 quarterly.

Manufactured housing sales are likely to weaken somewhat as the 1989-90 fiscal year progresses, reflecting a soft industrywide trend. Recreational vehicle sales may remain weak until the general economic picture strengthens. Margins should come under some pressure from highly competitive pricing in both industries.

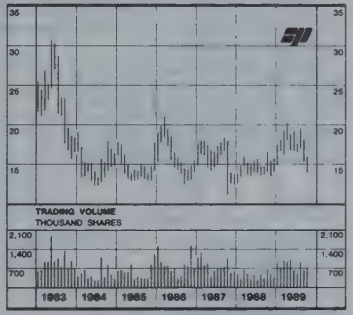
Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	93.1	97.2	84.7	81.6
Nov.	---	95.8	78.8	76.9
Feb.	---	82.8	61.9	64.4
May	---	107.9	97.5	89.6
	---	383.6	322.9	312.6

Sales for three months ended August 31, 1989 declined 4.2%, year to year, reflecting a sharp drop in recreational vehicle sales. Manufactured housing sales were up modestly. Margins narrowed on lower RV sales and increased costs, which were not offset by higher prices. Net income declined 39%. Per-share earnings were $0.25, compared with $0.41.

Common Share Earnings ($)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	0.25	0.41	0.36	0.28
Nov.	E0.30	0.36	0.28	0.25
Feb.	E0.20	0.27	0.11	0.13
May	E0.35	0.49	0.42	0.38
	E1.10	1.53	1.17	1.04



Important Developments

Sep. '89— The company said that manufactured housing sales for the first quarter of fiscal 1989-90 were $71.5 million, up 6.3%, year to year. Recreational vehicle sales were $21.5 million, down 28% from the year before. Management said that shipments of manufactured housing by Skyline remained stable during the quarter, but shipments by the industry as a whole continued to decline. Recreational vehicle sales reflected an industrywide softening of demand for many types of RVs, including travel trailers, SKY's principal RV product.

Sep. '89— Current assets at August 31 were $147.6 million and current liabilities $22 million, for a current ratio of 6.7 to 1.

Next earnings report expected late December.

Data as orig. reptd. d-Deficit. NM-Not Meaningful.

Business Summary

Skyline Corp. produces manufactured housing (mobile homes), and recreational vehicles including travel trailers, mini-motor homes, fifth wheels and van conversions. Contributions by industry segment to sales and operating profits in fiscal 1988-9:

	Sales	Profits
Manufactured housing	70%	62%
Recreational vehicles	30%	38%

Manufactured housing is produced in lengths ranging from 36 ft. to 80 ft., and in single widths (12 ft. to 18 ft.) and double wide widths (20 ft. to 28 ft.). SKY produced 15,884 manufactured homes in fiscal 1988-9, up 18% from a year earlier. Of these, 61% were single section homes and 39% multisection. The company was operating 23 manufactured housing plants at the end of May, 1989.

During fiscal 1988-9 the company delivered 10,187 travel trailers (10,422 in fiscal 1987-8). Of these, 2,860 were fifth wheel models (2,713) which are designed to be towed by a pick-up truck. Fifth wheel models have been gaining market share in recent years.

In May, 1989 ten recreational vehicle plants were in operation. Travel trailers and fifth wheels are sold under the Nomad, Layton and Aljo Aly names; mini-motor homes under Lindy and Jamee; and van conversions under Skyline Vans.

Finances

At May 31, 1989 SKY had $108,437,000 (61% of total assets) invested in treasury bills. Interest income in fiscal 1988-9 was $7,964,000.

Dividend Data

Dividends have been paid since 1960.

Summary

Formed through the July, 1989 merger of SmithKline Beckman with British drug maker Beecham Group p.l.c., SmithKline Beecham ranks as one the world's largest pharmaceutical and health care companies. Prior to the merger, SmithKline Beckman spun off to shareholders its Allergan and Beckman units. Substantial cost economies and synergies from the merger, coupled with new products from combined R & D efforts, enhance longer-range prospects.

Current Outlook

Earnings for 1990 for SmithKline Beecham may reach $3.40 per Equity Unit, up from the $2.90 estimated for 1989 (before restructuring charges).

In December, 1989 SBE declared a dividend of $0.1722 (approximate; before 15% British tax) on the ADS for the A Ordinary shares and $0.209 on the Equity Units for the five-month period from July 26 to December 31, 1989. A second interim dividend for the period ending December 31 is expected to be paid April 17, 1990.

Sales for 1990 are expected to surpass the $6.8 billion seen for 1989, aided by growth in most key drug and consumer product lines. Margins should be helped by the better volume and significant cost synergies from the merger.

12 Mos. Dec.		2.30

Important Developments

Jul. 26'89— SmithKline Beckman Corp. merged with the British drug company Beecham Group p.l.c, forming SmithKline Beecham, one of the world's largest pharmaceutical and health care products firms. Under terms of the merger, each SmithKline Beckman share was exchanged for one Equity Unit consisting of five B ordinary shares of SmithKline Beecham and one $2.25 preferred share of its U.S. subsidiary. Holders of SKB shares also received per SKB share a special cash dividend of $5.50 and a pro rata quarterly dividend of $0.225. The equity distribution made SKB holders equal owners with Beecham stockholders in the new company. Prior to the merger, SKB spun off to shareholders its Allergan and Beckman units.

Next earnings report expected in mid-March.

Business Summary

SmithKline Beecham was formed in July, 1989 through the merger of SmithKline Beckman Corp. and the British drug firm Beecham Group p.l.c., with the company now ranking as one the world's largest pharmaceutical and health care firms. Pro forma sales from continuing businesses for the combined company in calendar 1988 were divided:

	Sales
Ethical drug	51%
Over-the-counter medications	12%
Animal health	7%
Clinical laboratories	10%
Consumer products	20%

About 40% of sales are made in the U.S., 40% in Europe and 20% in Japan.

The most important drug in the SmithKline line is Tagamet, which is used to treat ulcers and other gastrointestinal diseases (sales of about $1.0 billion in calendar 1988). Tagamet sales have been impacted in recent years by competitive products, most notably Glaxo's Zantac. Other SmithKline ethical pharmaceuticals include diuretics such as Diazide for the treatment of hypertension and excessive water retention (diuretics had sales of $200 million in 1988), as well as cephalosporin antibiotics, antiarthritic products, vaccines, tranquilizers, cough-cold preparations, and ointments for a variety of applications.

Principal Beecham prescription medicines consist of oral broad spectrum antibiotics such as Amoxil (amoxycillin) and Augmentin (sales of these products represented about 82% of Beecham's prescription drug sales in fiscal 1988-9). Other Beecham drugs include Eminase, a thrombolytic (clot-dissolving) agent; Relifex, an antiarthritic compound; and Maxolon, a treatment for gastrointestinal disorders. New drug applications for Eminase, Relifex, Corlopam (an anti-hypertensive), and Engerix B (a hepatitis B vaccine) for marketing approval have been filed with the FDA. The combined worldwide pharmaceutical sales force of SmithKline and Beecham totals about 6,000.

Over-the-counter medications include Tums antacid; Contac cold medications; Sine-Off sinus remedies; Ecotrin coated aspirin; Oxy acne products; Sucrets, Venos and N'ice medications for sore throats and coughs; and Beecham Powders, Night Nurse and Day Nurse for colds and influenza.

Animal health products include veterinary formulations of antibiotics, other pharmaceuticals, vaccines, feed additives and various other animal health and nutrition items. Products are sold under the Stafac, Valbazen, Filaribits Plus, Leukocell and other names.

SmithKline Bio-Science Laboratories (SKBL) is the largest clinical laboratory network in North America. SKBL provides a broad range of clinical laboratory testing services, information and laboratory management expertise to over 50,000 physicians, hospitals and other clients.

Principal consumer products made by Beecham include Macleans and Aquafresh toothpaste, the Massengill line of feminine hygiene products, Odol mouthwashes and Silvikrin and Brylcreem hair products. A line of health-oriented drinks and various food products are also offered.

Dividend Data

On December 4, 1989 the company declared dividends of approximately $0.1722 (before 15% British tax to U. S. residents) per ADS for the A Ordinary shares and $0.209 per Equity Unit, payable January 23 and January 16, 1990, respectively, to holders of record December 21. The dividends covered the five-month period from July 26 to December 31, 1989. A second interim dividend is expected to be paid on April 17, 1990. The company plans to pay dividends on all shares which in the aggregate will equal about 40%-45% of annual net income.

Snap-on Tools

NYSE Symbol SNA Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 16'89	1989					
32	41⅞-31½	12	1.08	3.4%	A	1.20

Summary

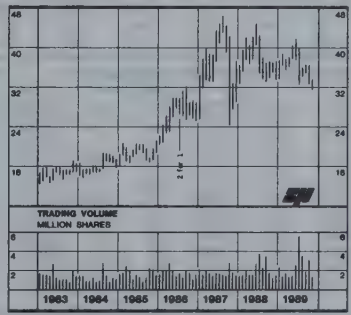
Snap-on Tools is the largest manufacturer and distributor of hand tools, storage units and diagnostic equipment for professional mechanics. Products are primarily distributed through some 4,900 independent dealers. Net income for 1989 will likely decline, reflecting a slower rate of dealership expansion, slower sales to new car dealer mechanics, and higher training and operating expenses. Slight improvement is expected in 1990.

Current Outlook

Earnings for 1990 could rise to $2.65 a share from 1989's estimated $2.55.

The $0.27 quarterly dividend should continue.

Sales for 1990 should benefit from improved foreign and industrial sales, but a slower rate of expansion of the domestic dealer network, sluggish sales to new car dealer mechanics, and a continued high level of training and operating expenses will limit earnings gains. A share repurchase program will boost share earnings. Positive demand factors for auto repair tools include an aging and increasingly complex car population, continued growth in the vehicle population, and increasing passenger vehicle miles driven.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	232.1	215.3	185.5	157.3
Jun.	226.4	219.2	184.6	168.6
Sep.	212.6	208.9	189.1	166.5
Dec.	---	211.3	195.1	177.7
	---	854.6	754.3	670.1

Sales for the nine months ended September 30, 1989 rose 4.3%, year to year, reflecting greater penetration of foreign markets. Hurt by a slowdown in sales to U.S. independent dealers and softer demand in the U.S. for industrial products, pretax income fell 6.8%. After taxes at 37.0%, against 38.3%, net income was down 4.8%. Share earnings were $2.00 on fewer shares, versus $2.06.

Common Share Earnings ($)

Dec.	E0.55	0.66	0.57	0.38
	E2.55	2.72	2.13	1.59

Important Developments

Oct. '89— The decline in second and third quarter earnings was attributed to softer sales to U.S. new car dealer mechanics, a rebalancing of inventories between SNA and its independent dealer network as a result of product delivery capability improvements, and higher training and operating expenses. SNA said that professional mechanics became more cautious as U.S. new car sales declined during 1989. The softer economy also slightly reduced sales from the U.S. industrial segment. International operations continued strong with gains in Canada, the U.K., and smaller operations in Europe and the Pacific. SNA expected continued sluggishness in the fourth quarter of 1989 and into the first half of 1990. Capital spending for 1989 was estimated at $60-$65 million primarily for expanding of facilities and new manufacturing equipment.

Next earnings report expected in mid-February.

Business Summary

Snap-on Tools manufactures high quality tools and equipment for use by professional mechanics and customers worldwide. Its principal products are hand tools, including wrenches, screwdrivers, hammers, and other similar products; pneumatic impact wrenches and chisels; power assisted drills; and wheel balancing and aligning equipment. Other products include tool chests and roll cabinets, and electronic automotive diagnostic equipment. Approximately 80% of sales are derived from hand tools.

Products are used primarily for automotive service and maintenance, but are also used in manufacturing and other repair and maintenance activities. In recent years SNA has begun developing and marketing autoclavable medical tools for surgeons.

Products are sold to approximately 4,900 independent dealers throughout the world. U.S. dealers accounted for about 67% of 1988 sales, versus 69% in 1987. Each dealer operates out of a walk-in display van or similar vehicle that carries an extensive inventory of products and parts. Sales to industrial customers (16% of 1988 revenues and 15% in 1987) are handled through company salesmen. Foreign sales accounted for 17% of consolidated sales in 1988 and 15% in 1987.

Dividend Data

Dividends have been paid since 1939. A "poison pill" stock purchase right was adopted in 1987.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Nov 16'89	1989					
43 1/4	44 7/8–28 5/8	18	2.00	4.6%	B+	1.04

Summary

This diversified energy company operates a natural gas pipeline serving seven Southeastern states and to a lesser extent is involved in oilfield services and oil and gas exploration and production. In December, 1988 SNT filed jointly with two other pipelines for FERC approval to construct a pipeline that would transport natural gas from the Mobile Bay area. Earnings for the first nine months of 1989 advanced, reflecting a nonrecurring gain. In August, SNT sold publicly sold $100 million of long-term debt.

Current Outlook

Share earnings for 1990 are projected at $2.25, down from 1989's estimated $2.60, which includes a nonrecurring gain of $0.83.

Dividends are expected to continue at $0.50 quarterly.

Pipeline profits for 1990 are expected to decline in absence of income from settlement of a rate case and a take-or-pay related filing, despite an expected increase in both gas transmission and gas sales volumes. Exploration and production profits should rise on higher average gas prices and an expected small increase in production. Oilfield services profits should rise on greater activity and a minor improvement in margins, but are likely to remain somewhat depressed. Share earnings growth will be restricted by higher interest expense.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	411	485	537	682

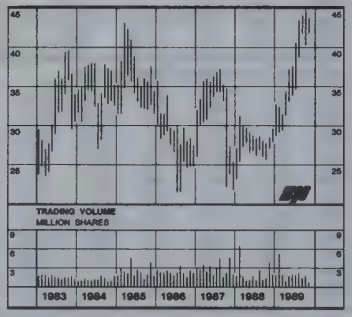
Dec.	E0.49	0.29	0.46	d8.90
	E2.60	2.09	1.95	d7.30



Important Developments

Aug. '89— SNT publicly sold $100 million of long-term notes. Net proceeds were to be used to repay short-term lines of credit and revolving credit agreements, and for general corporate purposes.

Jul. '89— SNT said that net income for the 1989 second quarter included $33.9 million, or $0.83 a share, from the settlement of Southern Natural Gas Co.'s rate case and a take-or-pay related filing. Separately, SNT filed for regulatory approval to use a natural gas supply reservation fee program.

Mar. '89— SNT and Peder Smedvig Aksjeselskap (Norway) formed a joint venture company called Teleco North Sea A/S, which would offer a complete range of directional drilling services and equipment.

Next earnings report expected in early February.

Business Summary

Contributions to revenues and operating profits (in million $) of this diversified energy and natural resource related company (formerly Southern Natural Resources) in 1988:

	Revs.	Profits
Pipeline	75%	$139.9
Oilfield services	16%	2.3
Exploration & production	9%	38.1
Other	Nil	-1.7

Southern Natural Gas Co. and 50%-owned Citrus Corp. operates a interstate pipeline system extending over 13,300 miles, which supplies gas to an eight states in the Southeast. Total combined gas sales volume in 1988 was 394 Bcf (417 Bcf in 1987); gas transported for others was 299 Bcf (284 Bcf). Transportation and sales to Atlanta Gas Light Co., Alabama Gas Corp., and South Carolina Pipeline Co. accounted for 31.0% of SNT's revenues in 1988 (9.8% in 1987).

Sonat Exploration is engaged in oil and gas exploration and production, with activities offshore in the Gulf of Mexico and onshore in the Southwest, the Southern coastal states, and West Virginia. Proved reserves at year-end 1988 were estimated at 7.0 million barrels of oil and 334.0 Bcf of gas.

Sonat Offshore Drilling is one of the largest contract drilling firms in the world. Teleco Oilfield Services (acquired 1984) provides measurement-while-drilling services to companies engaged in drilling oil and gas wells, directional drilling services, and leases mud motors.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

This well-known Japanese company manufactures a wide variety of consumer electronic equipment, notably color TV sets and videotape recorders. Product leadership and managerial resourcefulness have made the company a world leader in its field. In November, 1989 SNE acquired Columbia Pictures Entertainment, a major filmed entertainment company.

Business Summary

Sony Corp. is a world leader in the development, manufacture and sale of various electronic equipment, instruments and devices. Net sales, in Japanese yen, in recent fiscal years (ended March 31) came from the following product areas:

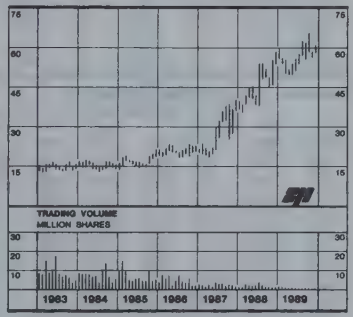
	1988-9	1987-8
Video equipment	27%	31%
Audio equipment	26%	28%
Televisions	16%	22%
Records	16%	---
Other products	15%	20%

Measured in yen, domestic (Japanese) sales accounted for 34% of total sales in fiscal 1988-9, U.S. sales 27%, European sales 23%, and other sales 15%.

During the past two years, SNE has substantially broadened its business beyond the sale of hardware equipment. In November, 1989 it acquired Columbia Pictures Entertainment, one of the world's leading filmed entertainment companies, for about $4.8 billion (including assumption of debt); and in January, 1988 it acquired CBS Records, a leading recorded music company, for about $2 billion.

SNE's video equipment includes the line of Betamax home videotape recorder-players (VTR), Betacam 1/2-inch video systems, one-inch VTRs, U-matic VTRs, and Handycam, an 8mm compact portable video camcorder and its companion compact video tape deck.

Television sets feature the Black Trinitron cathode ray tube which improves picture quality, while audio equipment includes high-fidelity stereo components and compact products such as the Walkman personal stereo cassette player and the Discman compact disc record player. Other products include electronic components, information processing equipment, and telecommunications systems.



Important Developments

Nov. '89— SNE completed the acquisition of Columbia Pictures Entertainment, Inc., one of the world's leading filmed entertainment companies, for about $4.8 billion, including the assumption of debt. In the fiscal year ended February 28, 1989, Columbia had revenues of $1.6 billion and net income of $8.6 million. The acquisition included a large library of movies and television shows, which could make it easier for SNE to successfully introduce new hardware technology on which such software could be played. A similar synergy is possible from SNE's 1988 acquisition of CBS Records. Meanwhile, in the first half of fiscal 1989-90, measured in yen, SNE's video equipment sales rose 23%, year to year, while sales of audio equipment and televisions were up 26% and 24%, respectively. Record sales increased 19%, and sales of other products advanced 26%.

Next earnings report expected in late February.

Finances

In fiscal 1988-9 SNE's number of common shares outstanding increased to 282.6 million, from 238.8 million, reflecting a public stock offering, conversion of convertible debt, and exercise of stock purchase warrants. Also, a public offering of 30 million shares was made in July 1989.

On January 5, 1988 SNE acquired CBS Inc.'s Record Group for about $2 billion. On a pro forma basis, assuming SNE owned CBS Records during all of fiscal 1987-8, SNE had net sales of $13.623 billion and earnings per ADR of $1.24 ($1.21 fully diluted).

NYSE Symbol STB

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
26⅛	29⅛-21½	7	1.12	4.3%	A-	0.88

Summary

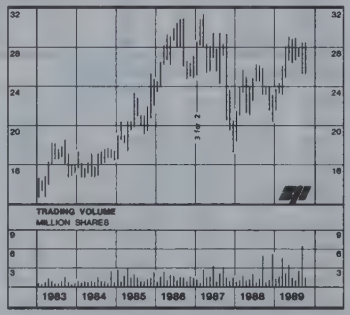
This bank holding company, is the second largest in Florida and the nation's 40th largest, with 216 offices statewide. Southeast's strength has traditionally been in commercial lending, but it is now increasing emphasis on retail banking. Despite a slowdown in the Florida real estate markets and rising problem loans, higher earnings are expected in 1989 and 1990.

Current Outlook

Earnings for 1990 could reach $4.10 a share ($3.90 fully diluted), up from the $3.80 ($3.60) estimated for 1989.

A modest increase in the $0.28 quarterly dividend is expected.

A cooling economy should result in a moderation of loan growth in 1990 to 10% from the 15% expected for 1989. STB is increasing its share of consumer loans, which could help offset some of the weakness in commercial real estate lending (24% of loan portfolio), due to the overbuilt condition of Florida markets. Fee income growth should continue to be sluggish. Loan quality has been weakening, with nonperforming assets on the rise. At September 31, 1989 NPAs were $345 million (3.2% of loans), up from $253 million (2.7%) a year ago. In addition, with the low level of reserves to problem loans (58%), the probability is rising that loan loss provisions will be raised. Startup costs for new branches and investment in technology could restrain advances near-term, although some cost savings should be realized from integrating the First Federal acquisition.



Review of Operations

Net interest income for the nine months ended September 30, 1989 rose 4.2%, year to year, reflecting 14% earning asset growth, partially offset by a narrower yield on those assets (3.91%, versus 4.29%). The provision for loan losses was 11% lower at $64.5 million, as STB used reserves to cover chargoffs that were 40% higher, at $72.4 million. Aided by a 23% rise in mortgage servicing fees and higher gains from the sale of investment securities, noninterest income rose 22%. With noninterest expense up 4.5%, pretax earnings rose 53%. After taxes at 11.9%, versus 29.1%, net income was up 99%. Following preferred dividends, share earnings were $2.96 ($2.79 fully diluted), versus with $1.56 ($1.52).

Common Share Earnings ($)

Dec.	E0.84	0.79	0.92	0.78
	E3.80	2.35	1.14	3.00

Important Developments

Oct. '89— Commenting on the third quarter, STB said that earnings were negatively impacted by a narrowing interest margin. In addition, a slowing regional economy led to a 17% rise in nonperforming assets ($345 million, up from $295 million at the end of the second quarter).

Next earnings report expected in mid-January.

Business Summary

Southeast Banking Corp. is the holding company for Southeast Bank, the largest bank in Florida and the nation's 23rd largest (based on assets) and First Federal Savings and Loan. Through 216 offices statewide it provides retail and commercial services, with emphasis on the latter. Nonbank subsidiaries include mortgage banking ($6.7 billion of servicing), discount brokerage, leasing, reinsurance and venture capital operations.

Average earning assets during 1988 of $12.4 billion (up 5.7% from 1987) were divided: commercial loans 24%, real estate loans 31%, consumer loans 18%, foreign loans 1%, investment securities 20%, money market assets 6%. Average sources of funds were demand and savings deposits 42%, time deposits 34% (total deposits averaged $10.8 billion), short term borrowings 14%, long term debt 2%, equity 5%, and other 3%.

At December 31, 1988 nonperforming assets were $260 million (2.6% of loans), up from $224 million (2.5%) a year earlier. The reserve for loan losses was 2.06% of loans, versus 1.89%. Net chargeoffs during 1988 were 0.68% of average loans, against 1.10% in 1987.

Dividend Data

Summary

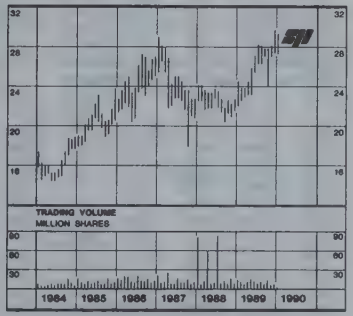
This major utility holding company, serving much of the nation's Southeast, is diversifying its power sources through its 45.7% interest in the two-unit Vogtle nuclear project. Unit 1 entered operation in May, 1987 and unit 2 was placed in operation in May, 1989. In their report on the company's 1988 financial statements, auditors noted the existence of uncertainties associated with SO's construction program in addition to an investigation into the company's tax accounting practices.

Current Outlook

Share earnings for 1990 are projected at $2.90, up from the $2.80 estimated for 1989, excluding potential Vogtle write-offs in both years.

The $0.53½ quarterly dividend is expected to be maintained.

Share earnings for 1990 (before potential non-recurring charges) will benefit from higher kwh sales and increased base rates. Completion of the Vogtle project will substantially improve cash flow and strengthen the regulatory climate. SO's ability to sell power into Florida enhances longer-term prospects.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,679	1,694	1,540	1,586
Jun.	1,882	1,773	1,767	1,668

Dec.	---	1,644	1,613	1,605
	---	7,235	7,010	6,847

Revenues for the nine months ended September 30, 1989 rose 2.2%, year to year, primarily reflecting higher kwh sales. Following lower production costs, operating income advanced 17%. However, after substantially lower AFUDC, the gain in net income narrowed to 6.3%. Share earnings were $2.35 on 1.8% more shares, versus $2.25.

	E2.80	2.72	1.92	3.17

Important Developments

Nov. '89— SO said that during the 1989 third quarter the Georgia PSC issued its decision on the company's $413 million rate request for recovery of its investment in Plant Vogtle Unit 2 and other costs of providing service. The commission recognized a need for $218 million of additional revenues over a phase-in period. The order, which took effect October 3, 1989, calls for a first-year increase in base rates of $75 million. The remainder of the increase is to be recovered over the next 10 years. The PSC's order that the company file a conventional rate case in April, 1991 remains in effect. SO has agreed not to appeal the rate decision. The company is, however, appealing a $155 million net disallowance for Vogtle 1. In April, 1989 the company agreed to an approximate $60 million net disallowance for Vogtle 2. Rates for Vogtle 1 are finalized.

Next earnings report expected in early February.

Business Summary

The Southern Company is a utility holding company whose subsidiaries, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Savannah Electric & Power (acquired March, 1988) serve much of the Southeast. Revenues by customer class in recent years:

Revenues	1988	1987	1986	1985
Residential	29%	28%	28%	26%
Commercial	25%	23%	23%	22%
Industrial	27%	26%	27%	27%
Other	19%	23%	22%	25%

Power requirements in 1988 were derived from coal 82%, nuclear 15%, hydro 2%, and oil/gas 1%. Peak load in 1988 was 23,841 mw and capability totaled 26,539 mw for a capacity margin of 11%.

The company owns 45.7% of the two unit Vogtle nuclear facility. Unit 1 entered service in May, 1987 and unit 2 was placed in service in May, 1989. In October, 1987 the Georgia PSC disallowed some $430 million ($1.48 a share) of the company's investment. SO charged off $229 million ($0.79 a share) of the disallowance retroactive to 1987's first quarter and is appealing the balance of the disallowance.

Dividend Data

Dividends have been paid since 1948. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.53½	Jan. 16	Jan. 31	Feb. 6	Mar. 6'89

Summary

The holding company for Southern New England Telephone, SNG provides telephone service to virtually all of Connecticut, and has moved into nonregulated telecommunications businesses. Nonregulated operations have incurred losses in recent years, reflecting substantial losses from the company's investment in the LIGHTNET joint venture, which was sold in April, 1989.

Current Outlook

Earnings for 1990 are projected at about $6.00 a share, versus the $6.15 estimated for 1989, which includes a $0.61 gain on sale of assets.

The $0.81 quarterly dividend is the minimum expectation.

Telephone revenues for 1990 should continue to moderately advance, due to growth in access lines and calling volumes. Revenues from nonregulated operations should increase at a rapid pace, reflecting continued strength in the company's cellular mobile phone and publishing operations and the absence of investment losses from LIGHTNET for the full year. Interest costs should decrease moderately. Shares outstanding may decline.

Revenues (Million $)

Quarter:	1989	1988	1987	1986

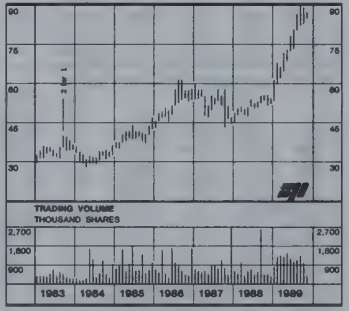
	E6.15	4.99	4.54	4.46



Important Developments

Oct. '89— SNG said that innovative marketing of its products and services contributed to the rise in revenues during the 1989 third quarter. Revenues from Yellow Pages sales reached $41.2 million, up 12%, and the cellular mobile phone cutomer base was up by nearly one-third since a year earlier. Steps being taken to strengthen SNG's finances included marketing efforts and aggressive cost controls.

Jul. '89— SNG noted that 1989 second quarter earnings included a net gain of $19 million ($0.61 a share) from the sale of its interest in the LIGHTNET fiber optic network. Sold on April 3, 1989 to Williams Telecommunications Group, Inc. for $365 million, LIGHTNET was a 50/50 partnership between SNG and CSX Corp. Earlier, directors authorized the repurchase of up to 1.5 million SNG common shares over a two-year period.

Next earnings report expected in mid-January.

Business Summary

Southern New England Telecommunications (formerly Southern New England Telephone) supplies telephone service throughout Connecticut, except for the main part of Greenwich and in a few small communities where another company operates. Contributions to revenues by type of service:

Revenues	1988	1987
Local service	28%	33%
Intrastate toll	23%	23%
Network access	22%	24%
Sales	14%	6%
Publishing & other	13%	14%

At 1988 year-end there were 1,839,000 access lines in service, up 3.4% from a year earlier.

In addition to providing telephone service, the company engages in various nonregulated telecommunications businesses through various subsidiaries including: SNET Systems, Inc., which distributes telecommunications equipment, and provides consulting, installation and maintenance services; SNET Cellular, Inc. operates cellular radio telephone systems in Hartford, New Haven and Bridgeport, Conn. SNET Fibercom, Inc. (sold in April, 1989), through the LIGHTNET joint venture with CSX Communications, operates a 4,500 mile fiber optic network connecting more than 38 major markets in the East. Nonregulated telecommunications subsidiaries, including SNET FiberCom, incurred a $4.8 million loss in 1988 on $215.8 million in sales.

Dividend Data

Dividends have been paid since 1891. A dividend reinvestment plan is available.

Summary

On June 15, 1989 Metro Mobile CTS, Inc. and this natural gas distributor serving about 391,000 customers in Texas, the Oklahoma panhandle and northern Arizona agreed to merge. Subsequently, a revised agreement was reached whereby a company to be spun-off by Metro Mobile would acquire Southern Union for $13.80 per SUG common share in cash, or approximately $140 million. The merger, subject to approvals by shareholders of SUG and Metro Mobile, as well as regulators, was expected to be completed in the 1989 fourth quarter.

Business Summary

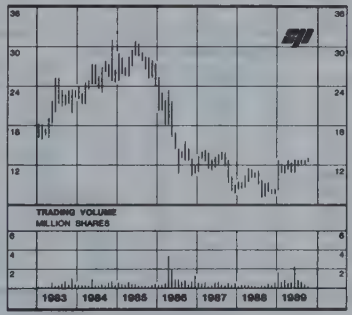
Southern Union primarily distributes natural gas through its Southern Union Gas Co. subsidiary. Other interests include oil and gas exploration and production activities, investments in real estate, and to a lesser extent the sale of appliances and operation of interstate natural gas pipeline systems. Profit contributions by business segment in recent years (in million $):

	1988	1987	1986
Gas utility	$18.3	$19.8	$10.8
Other	-15.4	-3.1	-3.6

Southern Union Gas Co. serves communities in Texas, including El Paso, Austin, Port Arthur and Galveston, and portions of northern Arizona and the Oklahoma panhandle. Gas sales volume in 1988 was 43.0 Bcf, up from 42.0 Bcf in 1987. Gas transported for others in 1988 amounted to 4.8 Bcf, up from 3.4 Bcf in 1987. Average customers served in 1988 totaled 391,254, up from 385,632 in 1987. Western Gas Interstate Co. operates small interstate pipeline systems in Texas and Oklahoma. The majority of 1988 gas requirements for utility operations was purchased under long-term contracts with El Paso Natural Gas Co., Valero Transmission Co., Houston Pipe Line Co., and United Texas Transmission Co.

Southern Union Exploration Co. conducts exploration and production activities in U.S., primarily in Arkansas, New Mexico, North Dakota, Oklahoma, and Texas. Proved reserves at year-end 1988 were 77.8 Bcf of gas and 2.1 million barrels of oil.

Southern Union Realty Co. holds real estate investments in Texas, including Forest Central Office Park, an apartment project, and undeveloped land.



Acquisition Agreement

Aug. '89— On June 15 SUG entered into a merger agreement with Metro Mobile CTS, Inc. (MM). Subsequently, a revised agreement was reached whereby a company which is to be spun off by MM will acquire SUG for $13.80 cash per common share, or approximately $140 million, and SUG's outstanding 10% preferred stock would be acquired for $108 per share, the redemption price of the preferred. Completion of the merger was subject to certain conditions, including approval by SUG's common and preferred shareholders and certain required regulatory approvals. SUG and MM expected the merger transaction to be completed in the 1989 fourth quarter. Under the agreement, SUG will not be permitted to pay its quarterly common stock dividend commencing with the 1989 third quarter.

Next earnings report expected in mid-November.

		191	192	200

Operating revenues for the six months ended June 30, 1989 declined 2.5%, year to year, reflecting warmer weather conditions. Penalized by a $3.4 million charge for settlement of litigation, net income from continuing operations was off 85%. After preferred dividends, the loss per share was $0.03, compared with share earnings of $0.46, which excludes a loss from discontinued operations of $0.20.

Nov. 29'89	1989					
22½	30¾-19⅝	9	0.14	0.6%	B+	1.03

Summary

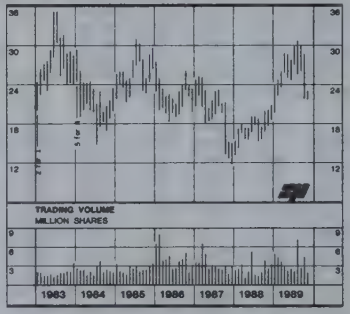
This former Texas intrastate airline has grown rapidly in recent years through expansion into new markets, primarily in the West and Midwest, which have lessened its dependence on the energy-related economy of the Southwest. Further expansion of the fleet is planned, and the company added two more cities to its route system in 1989. Slower traffic growth could hamper earnings improvement in 1990.

Current Outlook

Earnings for 1990 are projected at $2.25 a share, down from 1989's estimated $2.35.

Dividends should continue at least at the current $0.03½ quarterly rate.

Revenues for 1990 should rise moderately from the 1989 level. Traffic growth should be moderate at least in the first half, reflecting softness in the economy, despite further expansion of the route system. Twelve aircraft will be added during the year. The fare yield could decline, reflecting greater use of discounts and increased competition in major markets. Operating costs should come under better control during 1990.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	229.4	178.6	178.4	173.3
Jun.	263.6	216.9	205.3	193.9

Dec.	E0.26	0.51	0.28	0.28
	E2.35	1.84	0.63	1.55

Important Developments

Nov. '89— The company reported that it had completed the repurchase of one million shares of its common stock in recent periods and that directors had authorized the buyback of an additional one million shares.

Oct. '89— Management stated in the third-quarter interim report to shareholders that it expected a decline in earnings for the fourth quarter, year to year, because of a continued rise in operating expenses.

Apr. '89— LUV announced that service between Oakland and San Diego, Phoenix and Ontario would begin on May 15. Also, on April 3 service between Indianapolis and Detroit (City), St. Louis and Houston (Hobby) began.

Next earnings report expected in late January.

Business Summary

Southwest Airlines is a scheduled air carrier operating in Texas and several southwestern and midwestern states. In Texas it serves the cities of Dallas, Houston, San Antonio, Harlingen, (Rio Grande Valley), Corpus Christi, Midland-Odessa, Lubbock, El Paso, Amarillo, and Austin. Interstate service began in January, 1979; as of March, 1989 cities served included New Orleans, Tulsa, Oklahoma City, Albuquerque, Kansas City, Little Rock, Las Vegas, Phoenix, San Diego, Los Angeles, San Francisco, Ontario, St. Louis, Nashville, Birmingham, Detroit and Chicago (Midway).

The company offers frequent flights made possible by a short average hop and a quick turnaround of aircraft.

All flights provide a single class of service utilizing a peak/off peak coach fare structure. Two types of discount fares are also offered.

Southwest has maintained a competitive advantage by being able to utilize smaller airports closer to the city center in Houston and Dallas than those used by other carriers.

At the end of 1988 the Southwest fleet consisted of 46 737-200s and 39 737-300s. Nine 737-300s were scheduled for delivery in 1989 and three each in 1991 and 1992. Ten 737-500s are to be delivered in 1990 and five in 1991. On opti on were six 737-300s for 1993-4 and up to 35 737-500s for 1991-4.

Dividend Data

Dividends were initiated in 1976. A "poison pill" stock purchase right was adopted in 1986.

Summary

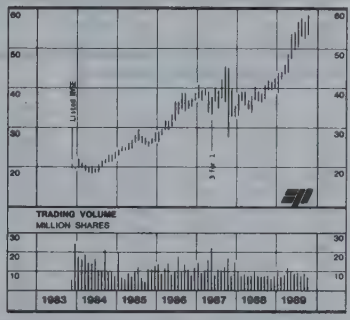
Southwestern Bell, spun off from AT&T in 1984, is the eighth largest telephone holding company in the U.S., providing local exchange telephone service in Texas, Missouri, and three other states. Earnings prospects are enhanced by investments in unregulated businesses, notably the 1987 acquisition of cellular and paging operations of Metromedia Inc. and others for some $1.38 billion.

Current Outlook

Earnings for 1990 are projected to reach $4.20 a share, versus the $3.80 estimated for 1989.

The $0.65 quarterly dividend is likely to be raised in early 1990.

Revenues for 1990 are anticipated to increase moderately. Telephone revenues should advance, reflecting some gains in access lines and calling volume; revenues from unregulated units, particularly cellular and paging operations, should advance rapidly. Margins could widen, reflecting ongoing expense control. Dilution from the Metromedia cellular acquisition should decrease.



Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.06	2.00	1.88	1.92
Jun.	2.14	2.03	1.89	2.01
Sep.	2.21	2.23	2.09	1.96
Dec.	---	2.19	2.15	2.01
	---	8.45	8.00	7.90

Revenues for the nine months ended September 30, 1989 increased 2.2%, year to year. Margins narrowed slightly, and operating income was up 2.0%. After a 2.4% decrease in interest expense and a 24% decrease in other income, pretax income advanced 2.5%. After taxes at 25.7%, versus 26.7%, net income increased 16%. Share earnings were $1.68, compared with $1.44.

Important Developments

Oct. '89— SBC said that 1989 third-quarter earnings comparisons were affected by a franchise tax refund in the 1988 interim; production of several Yellow Pages directories was shifted from the third to fourth quarters; a onetime adjustment to telephone revenues; and a Missouri rate refund. Excluding the tax refund and the revenue adjustment, which were nonrecurring, third-quarter net income exceeded that of a year ago. Earlier, Southwestern Bell Telephone (SWBT) and the Missouri PSC agreed to a revised $82 million rate reduction, versus a $101 million rate cut origonally proposed. Also, a three year trial regulation plan was implemented pursuant to which SWBT would retain 100% of its earnings up to a 14.1% ROE; 40% of earnings between an ROE of 14.11% to 14.5% would be retained (60% would be credited to customers); and earnings at an ROE of 14.51% and above would be divided equally.

Next earnings report expected in late January.

Business Summary

Southwestern is the eighth largest telephone holding company in the U.S., based on 1988 revenues. The company's telephone subsidiary, Southwestern Bell Telephone, furnishes exchange telecommunications and access service in Arkansas, Kansas, Missouri, Oklahoma, and Texas. As of June 30, 1989 the company had 11.5 million access lines in service, up 2.8% from a year earlier.

Southwestern Bell Mobile Systems (SBMS) markets cellular telephone service and equipment in nine states and the District of Columbia. The September, 1987 acquisition of properties owned primarily by Metromedia added six fully operational cellular systems, making SBC the nation's second largest supplier of cellular telephone service. As of June 30, 1989 SBMS operated systems serving 303,000 customers in 24 markets. Through its Metromedia Paging unit SBC is the largest supplier of paging services, with almost 803,000 pagers in 32 markets.

Southwestern Bell Publications, Inc. publishes and sells advertising for classified directories in U.S. and international markets. Within the company's five state area, SBC provides over 34 million copies of about 470 classified directories (i.e. Yellow Pages and White Pages).

Southwestern Bell Telecom markets a variety of telecommunications systems and products throughout the U.S., Canada and the U.K., ranging from single-line telephones to digital PBX systems.

The company jointly owns, with the six other regional Bell holding companies, Bell Communications Research, which provides technical assistance and consulting services to the companies.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

0.65	Jun. 30	Jul. 5	Jul. 11	Aug. '89
0.65	Sep. 29	Oct. 3	Oct. 10	Nov. '89

Next dividend meeting: mid-Dec.'89.

Finances

Construction and other capital expenditures totaled $1.22 billion in 1988, versus $1.45 billion in 1987. Such expenditures were budgeted at approximately $1.5 billion for 1989.

On September 30, 1987 SBC purchased certain cellular telephone and paging properties primarily from Metromedia Co. for $1.4 billion. Financing was provided through $1.2 billion in debt, including $366.0 million in short-term debt outstanding on December 31, 1987. Depending on certain factors, SBC may refinance a large portion of this debt through issuance of debt securities available under a $700 million shelf registration.

On January 1, 1984 AT&T spun-off its 22 Bell operating companies in the form of SBC and six other regional holding companies (RHCs). That action was taken pursuant to a divestiture agreement settling Federal antitrust action.

Summary

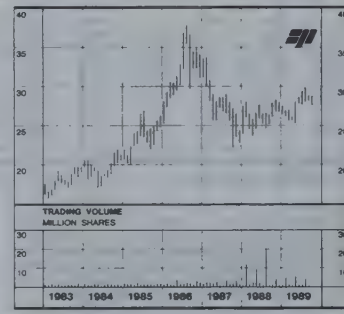
This utility supplies electricity to a population of about one million in a 52,000-square-mile area of the Panhandle and south plains of Texas and parts of New Mexico, Oklahoma and Kansas. With the completion of the Tolk Station 2 in June, 1985, no additional generating capacity should be required until after the mid-1990s. SPS is coping with weak economic conditions in its service territory by closely monitoring costs and attempting to increase sales to other utilities.

Current Outlook

Earnings for the fiscal year ending August 31, 1990 are estimated at $2.50 a share, up from the $2.45 posted for fiscal 1989.

Dividends at $0.55 quarterly are the minimum expectation.

Slightly higher earnings are anticipated for the fiscal year ending August 31, 1990 on the basis of a modest improvement in economic activity in the company's service territory, increased sales to other utilities and tight control of operating costs. One uncertainty is the amount of pre-1983 investment tax credits regulators will allow SPS to recognize in income.



Operating Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Nov.	---	184.0	187.3	183.2
Feb.	---	184.7	194.0	184.7

Aug.	---	226.8	224.3	217.3
	---	798.8	794.2	771.6

Operating revenues for the fiscal year ended August 31, 1989 (preliminary) increased 0.6%, year to year, aided by higher electric kwh sales. Hurt by lower rates, operating income was down 4.4%. After lower other income and interest charges, net income fell 1.8%. Share earnings were $2.45, versus $2.50.

Aug.	E0.80	0.79	0.81	0.77
	E2.50	2.45	2.50	2.18

Important Developments

Oct. '89— In its fiscal 1989 preliminary earnings release, Southwestern attributed the lower earnings primarily to rate reductions implmented during 1988, and certain increases in operation and maintenance expenses. The decreases in electric rates reflected lower Federal income tax rates on corporations as well as SPS' overall efficiency. The effect of reductions in electric rates was mitigated by franchise-tax refunds from the state of Texas that added $0.12 per common share to 1989 earnings as well as higher electric kwh sales.

Oct. '89— The company estimated fiscal 1990 construction expenditures at about $55.5 million, versus approximately $46 million in fiscal 1989.

Next earnings report expected in early January.

Business Summary

Southwestern Public Service provides electricity to a population of some one million in the Panhandle and south plains region of Texas (about 60% of revenues) and parts of Kansas, Oklahoma and New Mexico. Contributions by class of customer in recent fiscal years:

Revenues	1988	1987	1986	1985
Residential	20%	20%	20%	21%
Commercial	19%	20%	19%	20%
Industrial	35%	35%	33%	38%
Other	26%	25%	28%	21%

Some 23% of fiscal 1988 total revenues were derived from industrial customers engaged in oil and gas production and petroleum refining.

The fuel mix in 1988 was 84% coal, 15.8% gas, and 0.2% other. Peak load in 1988 was 2,992 mw and system capability was 4,260 mw, for a capacity margin of 29.8%. Sales of electricity totaled 17,009 mw, up 7.6% from 15,809 mw a year earlier.

The company does not expect that new base-load generating facilities will be needed until after the mid-1990s.

Dividend Data

Dividends have been paid since 1942. A dividend reinvestment plan is available.

Summary

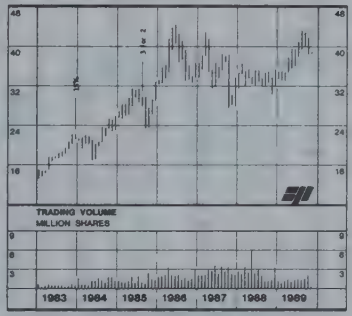
In September, 1989 Sovran Financial and Citizen and Southern Corp. (CTZ), a Georgia-based superregional bank holding company, agreed to combine under a new holding company, Avantor Financial Corp., in a tax-free exchange of stock. The transaction is expected to be completed in the first quarter of 1990. On a proforma basis, the new company would have assets of $47 billion, and would be the 14th largest bank holding company in the U.S.

Current Outlook

Earnings for 1990 (for SOV as now constituted) could rise to $5.00 a share from 1989's estimated $4.45. Share earnings for Avantor Financial Corp. are estimated at $4.15 for 1990.

The quarterly dividend was raised 18%, to $0.45 from $0.38, with the October, 1989 payment.

The merger of SOV and CTZ would create a huge superregional banking concern with assets of some $47 billion and a loan portfolio of over $31 billion. The merger will result in a strong banking franchise from Florida to Maryland, with solid representation in many of the markets. Loan growth for the new company is estimated at above 10%, reflecting the relative strength of the southeastern economy. Loan quality is solid with modest levels of nonperforming assets and strong reserves. Since the two companies now operate in separate markets, there is little overlap in banking operations; estimated cost savings of some $15 million will come from non-bank operations.



Review of Operations

Net interest income for the nine months ended September 30, 1989 rose 13%, year to year, on 9.7% growth in earning assets and wider net interest margins. Provision for loan losses was increased 22%, to $63.4 million. Aided by higher trust income and other service charges and fees, noninterest income rose 7.2%. With noninterest expense up 7.1%, pretax income advanced 20%. After taxes at 23.5%, versus 18.6%, net income was up 12%, to $3.28 a share from $2.94.

Merger Agreement

Sep. '89— SOV and Citizens & Southern Corp. (CTZ), a Georgia-based superregional bank holding company, announced a definitive agreement to merge and create a new holding company, Avantor Financial Corp. (AFC), in a tax-free exchange of stock. Completion of the transaction is expected in the first quarter of 1990. When completed, each of SOV's 59.8 million common shares outstanding will convert into 1.23 common shares of AFC, and each of CTZ's 62 million common shares will convert into one AFC common share. At September 30, 1989 CTZ had assets of about $23 billion, with 493 branch offices in Georgia, Florida and South Carolina. CTZ provides trust and other bank-related services in the Southeast. On a proforma basis, AFC will have total assets of $47 billion, making it the nation's 14th largest bank holding company.

Next earnings report expected in mid-January.

Business Summary

Sovran is the 32nd largest bank holding company in the nation. Headquartered in Virginia, it provides retail and corporate commercial banking and trust services through 276 offices in Virginia, 82 in Maryland, 10 in Washington, D.C., 110 in Tennessee, four in Kentucky, and a credit card bank in Delaware. Nonbank subsidiaries engage in mortgage banking (89 offices), servicing $7.8 billion of mortgages, as well as leasing, commercial finance, brokerage and insurance.

During 1988 average earning assets of $19.1 billion (up 6.8% from 1987) were divided: consumer loans 21%, real estate loans 22%, commercial and other loans 33%, investment securities 16% and money-market investments 8%. Average sources of funds were: noninterest-bearing deposits 15%, other core deposits 49%, other deposits 16%, short-term borrowings 10%, long-term debt 2%, equity 8% and other 2%.

At December 31, 1988, the reserve for loan losses was 1.18% of loans, unchanged from a year earlier. Nonperforming loans were 0.93% of loans, versus 0.63%. Net chargeoffs were 0.45% of average loans in 1988 against 0.40% in 1987.

Nov. 30'89	1989					
36⅜	45¼-30½	9	1.20	3.3%	B+	0.91

Summary

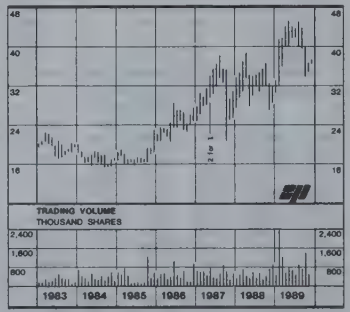
Springs is a major manufacturer of home furnishings, finished fabrics, and industrial fabrics. Earnings for 1988 were hurt by an $11.2 million ($0.63 a share) after-tax restructuring charge, but profits have rebounded sharply for the first nine months of 1989 and further gains are expected in 1990. Members of the Close family own or control about 45% of the total common shares or an approximate 77% voting interest.

Current Outlook

Earnings for 1990 are projected at $4.15, up from the $3.68 estimated for 1989.

The $0.30 quarterly dividend on Class A shares should be increased in 1990.

Despite weakness in the finished fabrics area, sales in 1990 should rise moderately on continued demand for home furnishings and industrial fabrics. Margins may narrow slightly in the first half of the year, reflecting continued restructuring in the finished fabrics business, and higher fiber costs and various start-up costs in the home furnishings area. However, overall margins should begin widening in the second half, as SMI benefits from its extensive restructuring and modernization program. Interest charges should approximate the 1989 level.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	472	426	380	370
Jun.	489	457	400	350
Sep.	463	458	424	377
Dec.	---	484	457	408
	---	1,825	1,661	1,505

Sales for the first nine months of 1989 rose 6.2%, year to year. In the absence of an $18 million restructuring charge, margins widened substantially, and pretax income rose 52%. After taxes at 37.2%, versus 38.3%, net income was up 54%. Share earnings were $2.54, versus $1.66.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986

Jun.	0.94	0.84	0.71	0.26
Sep.	0.74	0.23	0.99	0.42
Dec.	E1.14	1.32	0.92	0.89
	E3.68	2.98	3.13	1.83

Important Developments

Oct. '89— SMI said that third quarter results reflected differing conditions in its three product areas. Soft shipments in the finished fabrics area caused SMI some volume reductions, requiring curtailment in production and increased manufacturing costs. While home furnishings markets have remained firm, margins have been hurt by higher fiber costs and various expenses related to the start-up of a new fabricating plant and a modernization program. The domestic fiber business continued to show strength, offsetting some margin reduction in Europe and in some of the smaller industrial product lines. SMI added that its extensive program of consolidating its fabric production and equipment moderization in the home furnishings area would continue to hurt margins for a number of months, but would be beneficial over the long term.

Next earnings report expected in late January.

Business Summary

Springs Industries is a leading manufacturer of home furnishings, finished fabrics, and industrial fabrics. Major brand names include Springmaid, Wamsutta, Ultrasuede, Skinner, Pacific, Graber, Performance, Fashion Pleat, Custom Designs, and Pacific Silvercloth. Industry segment contributions in 1988 (profits in million $):

	Sales	Profits
Home furnishings	42%	$89.0
Finished fabrics	35%	-0.4
Industrial fabrics	23%	33.1

The home furnishings group produces sheets, pillowcases, bedspreads, comforters, draperies, towels, bath mat sets, bed and bath accessories, tufted area and scatter rugs, woven area rugs, ceramic bath accessories, table linens, shower curtains, drapery hardware, window shades and blinds. Most of the products are sold directly to retailers.

Finished fabrics consist of a broad range of woven and nonwoven fabrics sold to apparel manufacturers, decorative home furnishings, furniture and specialty markets.

Industrial fabrics include the manufacture of fiber glass industrial fabrics through the Clark-Schwebel subsidiary for use in printed electronic circuit boards, aircraft parts, sporting goods, reinforced plastic, dust filtration bags and electrical insulation. This division also produces aramid fabrics for antiballistic vests, protective helmets, reinforcement of aircraft parts and marine applications. A variety of other specialty fabrics for other markets is also produced.

Nov. 13'89	1989					
50⅝	62¾-47½	11	2.00	4.0%	B+	0.95

Summary

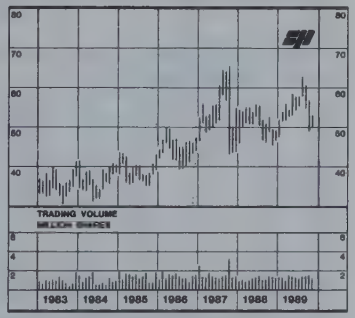
Square D is a well-established manufacturer of electrical equipment used in the distribution and control of electricity, and also makes electronic products. Following several years of earnings growth, lower profits are likely in 1989 due to a restructuring charge. High sales, productivity improvements and the absence of that charge should allow for a substantial increase in earnings in 1990. The company has a stock repurchase program.

Current Outlook

Earnings for 1990 should approximate $5.15 a share, up from 1989's estimated $4.05, which includes a $0.70 unusual charge.

A modest increase in the $0.50 quarterly dividend is likely in 1990.

Sales from continuing operations for 1990 should advance about 7%, aided by new product introductions. A projected increase in capital spending should assist the gain in electrical equipment. However, electronic products sales are likely to be only modestly higher due to minimal growth in the electronics industry. Although growth is expected in international sales in local currencies, the stronger dollar will restrain the gain once those sales are translated into dollars. Margins are expected to expand due to the higher volume, the impact of the recent restructuring, and the absence of the $0.70 a share charge associated with the restructuring. Fewer shares outstanding will boost per-share earnings.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	391	336	334
Jun.	[1]827	408	367	356
Sep.	411	431	401	364
Dec.	---	426	380	348
	---	1,657	1,484	1,403

Sales from continuing operations for the nine months ended September 30, 1989 rose 9.2%, year to year. Despite a 16% increase in operating income, pretax income advanced only 7.8% due to a 28% rise in interest expense resulting from debt incurred to repurchase common stock. After taxes at 37.3%, versus 35.9%, net income increased 5.4%, to $3.69 a share from $3.25, before a loss from discontinued operations of $0.08 a share, versus a gain of $0.19.

Important Developments

Nov. '89— SQD said that it had concluded letters of intent to sell its Yates Industries copper foil business that had sales of approximately $130 million in 1988. Earlier, SQD said it would incur a fourth-quarter after-tax charge of approximately $17.5 million ($0.70 a share) as part of a restructuring plan to improve profitability.

Next earnings report expected in late January.

Business Summary

Square D is a leading manufacturer of electrical equipment and also makes electronic products. Contributions by industry segment in 1988:

	Sales	Profits
Electrical equipment	83%	92%
Electronic products	17%	8%

Foreign operations accounted for 20% of sales and 24% of operating income in 1988.

The electrical equipment segment manufactures equipment for the distribution and control of electricity. Distribution products include circuit breakers, safety switches, panelboards, switchboards, switchgear, busways, transformers and wiring devices. Control products include electromechanical devices and other devices such as push-buttons, motor starters, relays, limit switches, pressure switches and vacuum switches. SQD also makes equipment used by electric utilities.

Electronic products consists of electro-deposited copper foil primarily used in printed circuit boards, power conditioning equipment and semiconductor devices.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

NYSE Symbol SMP

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 14'89	1989					
15½	20-13¾	13	0.32	2.1%	B+	1.18

Summary

Standard Motor Products derives the bulk of its sales from electrical, fuel system, brake, and air conditioner parts for the automotive aftermarket, demand from which should continue to grow. In 1988 SMP focused on the restructuring of its manufacturing operations to strengthen the company for the future. Earnings for the first nine months of 1989 rose sharply, as customer acquisition costs declined. In October SMP agreed to buy Wickes Companies' automotive distribution group.

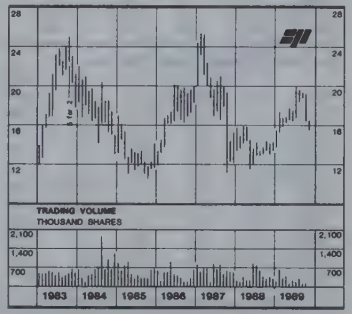
Business Summary

Standard Motor Products is primarily a manufacturer of replacement parts for the electrical, fuel, brake and temperature control systems of motor vehicles. Parts are used by cars, trucks, marine and industrial engines. Sales distribution in the past three years:

	1988	1987	1986
Ignition parts	34%	35%	44%
Battery cable and wire	12%	13%	14%
Fuel system	10%	11%	13%
"Champ" general service line	7%	7%	10%
Air conditioner parts	12%	11%	12%
Brake parts	25%	23%	8%

The company's manufactured parts are sold to distributors and jobbers under the brand names Standard, Blue Streak, Champ, Hygrade, Four Seasons, and EIS Brake Parts, and parts of other manufacturers are distributed. SMP sells replacement parts only and does not sell to automotive manufacturers. Export sales other than to Canada are small. Products are sold by about 500 persons to some 1,300 warehouse distributors who distribute at wholesale to approximately 50,000 retail jobber outlets.

Among the automotive ignition parts sold are parts for distributors, including point sets, condensors, heads, rotors, breaker arm leads, ground leads and vacuum controls, ignition coils, battery parts, generator parts, and voltage regulators. Ignition parts also are sold for use in small motors. EIS Brake Parts makes a complete line of brake system components for the automotive aftermarket. In 1988 SMP began offering replacement on-board computers for GM vehicles and in 1989 computers for Ford and Chrysler vehicles are to be added.



Export sales (primarily to Canada) accounted for 7.6% of total sales in 1988 and 6.2% in 1987.

In 1988 the company purchased its Long Island City, N.Y. headquarters, restructured and added to the capabilities of its Hong Kong and Puerto Rico manufacturing operations, and began construction of its largest distribution center in Virginia. The company also increased investment in the EIS Brake division to attempt to increase market share over several years.

Important Developments

Oct. '89— SMP agreed to buy Wickes Companies' automotive distribution group, including the Guaranteed Parts/Sorenson Division of Wickes Manufacturing and Wickes Guaranteed Parts Ltd.

Next earnings report expected in mid-February.

Summary

This company is a major factor in the production, both domestically and abroad, of hand tools for the construction, industrial and consumer markets, and also manufactures other household, builder and industrial products. The company has paid higher dividends for 22 consecutive years, including an increase of 12.5% in 1989.

Current Outlook

Earnings for 1990 are projected at $3.05 a share, compared with the $2.70 estimated for 1989.

The quarterly dividend was raised 12.5%, to $0.27 from $0.24, with the September, 1989 payment.

Sales for 1990 should continue to show modest progress, with gains expected from both the consumer and professional segments. The do-it-yourself market should continue to expand. Foreign sales and earnings should also grow.

Net Sales (Million $)

13 Weeks:	1990	1989	1988	1987

Important Developments

Oct. '89— Third-quarter earnings benefited from inventory reduction efforts that produced a LIFO gain of $0.06 per share. This was offset by environmental expenses ($0.02 per share), unfavorable foreign currency effects ($0.02) and a provision for a plant closing ($0.02).

Aug. '89— Stanley completed the purchase of Parker Group Inc. Parker is a maker of fastening products such as glue guns, staplers, riveters and soldering tools.

Jul. '89— Stanley purchased Rabone Chesterman, a measuring tool business in the United Kingdom, for $14 million. SWK also purchased Windsor Manufacturing, a door manufacturing busines in British Columbia, Canada.

Next earnings report expected in late January.

Business Summary

Stanley Works makes hand tools and other products for two basic markets. Contributions by industry segment in 1988 were:

	Sales	Profits
Home improvement & consumer	53%	54%
Industrial & professional	47%	46%

Sales outside the U.S. accounted for 28% of sales and 33% of operating income in 1988.

Home improvement and consumer products are primarily for the do-it-yourself market and are sold through hardware distributors, national chain stores and home improvement centers. These products consist primarily of hand tools and hardware items, automatic garage door openers, home automation products and equipment rental operations.

Industrial and professional products include industrial and mechanics tools, fastening tools and fasteners, air and hydraulic tools, power operated doors and gates and industrial storage systems.

Dividend Data

Dividends have been paid since 1877. A dividend reinvestment plan is available.

Summary

This bank holding company, the fifth largest in Massachusetts, provides commercial banking services and is the nation's leading mutual fund custodian, with more than 40% of the industry's assets in custody. It also offers master trust services to large pension funds and institutional investors. Fee income from a rapidly growing mutual funds industry fueled earnings gains in recent years. Further gains are expected in 1990.

Current Outlook

Earnings for 1990 could reach $3.10 a share ($3.00 fully diluted), up from the $2.85 ($2.75) projected for 1989.

A modest boost to the $0.15-a-share quarterly dividend is anticipated.

The company derives a large part of its profits from trust operations, particularly its mutual funds processing business. STBK's success in that business rests on the ability to process a high volume of transactions efficiently thanks to heavy and well-managed investments in technology. STBK is likely to continue to augment is leading market share as the industry consolidates and others fail to meet the heavy investment requirements. STBK also stands to benefit from the increasing complexity of pension benefit plans, which it has superior capability to administer. Fee income growth has slowed to about 15% annually, approximately one-half the pace registered before the 1987 stock market crash, but could accelerate as STBK focuses on a rapidly growing international marketplace. Loan growth could continue to be very modest in 1990, as STBK will likely maintain a highly liquid balance sheet (loans account for about 30% of total assets and money-market assets 55%). STBK's insistence on high loan quality should limit loan loss provisions.

	E2.85	2.51	2.23	1.97

Review of Operations

Net interest income for the nine months ended September 30, 1989, was up 4.8%, year to year, with earning-asset growth of 11% offset by a lower net interest margin, as funding costs rose faster than the yield on assets. The provision for loan losses was 7.2% higher, at $12.5 million. Aided by a 14% increase in fiduciary fees and a 25% gain from foreign exchange, noninterest income rose 11%. With noninterest expense up 7.9%, pretax earnings expanded 12%. After taxes at 36.4%, versus 36.3%, net income increased 12%. Share earnings were $2.08 ($2.01 fully diluted), compared with $1.83 ($1.76).

Important Developments

Oct. '89— STBK attributed the increase in third-quarter earnings to growth in fee revenue, which reflected higher fees from mutual fund services and new clients (particularly General Electric Investment Corp., which selected STBK as custodian for $27 billion in assets), and higher net interest revenue, partially offset by increased operating expenses and a higher provision for loan losses.

Next earnings report expected in mid-January.

Business Summary

State Street Boston Corp., the holding company for State Street Bank & Trust, is the fifth largest bank holding company in Massachusetts. It is the leading mutual fund custodian in the U.S., providing securities custody and recordkeeping services to approximately 1,450 mutual funds with assets totaling $400 billion at September 30, 1989 (up 16% from year-end 1988). Master trust and other services brought total assets in custody to $767 billion (up 23%). In addition, trust assets under management were $57 billion (up 50%). Boston Financial Services, a joint-venture company, provides recordkeeping services for shareholders.

During 1988, average earning assets of $6.1 billion (up 7.3% from 1987) were divided: commercial loans 20%, other loans 16%, investment securities 34%, money-market investments 20% and federal funds sold and securities purchased under resale agreements 10%. Average sources of funds were: noninterest-bearing deposits 29%, other domestic deposits 21%, other foreign deposits 11% (total deposits were $4;4 billion, unchanged from 1987), short-term borrowings 25%, long-term debt 2%, equity 7% and other 6%.

At year-end 1988, nonperforming loans were $9.7 million (0.44% of loans), down from $18.9 million (0.89%) a year earlier. The reserve for loan losses was 2.30%, versus 2.18%. Net chargeoffs during 1988 were 0.46% of average loans, against 0.92% in 1987.

Stone Container

NYSE Symbol STO Options on Pacific (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 20'89	1989					
23¼	36⅜-22⅝	4	0.72	3.1%	B	1.56

Summary

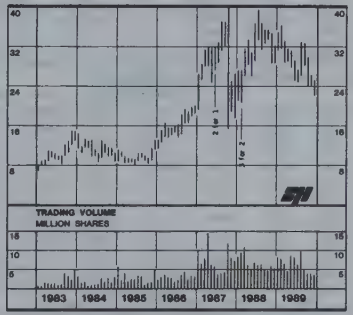
This company is primarily a producer of corrugated containers and also markets paperboard and corrugating medium to others. Earnings are extremely vulnerable to cyclical price fluctuations. STO has greatly expanded operations through a series of acquisitions, most recently Consolidated-Bathurst, a large Canadian newsprint producer. The Stone family owns about 25% of the stock.

Current Outlook

Earnings for 1990 are projected at $4.00 a share, compared with the $4.80 estimated for 1989.

Dividends should remain at $0.18 quarterly.

Sales for 1990 will grow more slowly than in recent years in the absence of further large acquisitions. Markets for bleached kraft and market pulp should remain strong. Linerboard shipments should hold up well as long as the general economy avoids a recession. Interest costs will remain high.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,127	881	586
Jun.	---	1,380	859	831
Sep.	---	1,373	1,022	907
Dec.	---	---	980	909
	---	---	3,742	3,233

Sales for the nine months ended September 30, 1989 rose 40%, year to year, reflecting acquisitions and higher prices. Shipments increased 38%. Margins narrowed, and pretax earnings declined 2.4%. After taxes at 39.7%, versus 38.0%, net income was down 5.0%. Per-share earnings were $3.68, compared with $3.87.

Dec.	E1.00	E1.12	1.82	0.97
	E4.00	E4.80	5.69	2.81

Important Developments

Nov. '89— STO said that it would open a new $16 million recycling facility at its Missoula, Montana mill in January as part of a $42 million capital program to increase recycling capacity. The facility will recycle used corrugated containers.

Jul. '89— The company reported excellent progress in integrating its Consolidated-Bathurst acquisition, but said newsprint price pressures would make the acquisition dilutive to 1989 earnings.

Mar. '89— STO completed a $2.2 billion tender offer for Consolidated-Bathurst, a large Canadian producer of newsprint, uncoated groundwood, linerboard and market pulp, making STO one of the world's largest paper companies.

Next earnings report expected in late January.

Business Summary

Stone Container manufactures corrugated containers, and sells paperboard and corrugating medium to others. The March, 1989 acquisition of Consolidated-Bathurst also makes Stone a major newsprint producer. Sales by business segment in 1988:

	Sales
Corrugated container	45%
Containerboard, paper & pulp	32%
Bag	20%
Other	3%

The company produces kraft linerboard and corrugating medium at 12 mills in the U.S., about 75% of which is combined and converted into corrugated board at STO's 87 corrugator plants. Most of the board is then processed further into corrugated containers and a lesser amount is sold as sheets.

In 1988 Stone produced 3.5 million tons of containerboard and shipped 34.5 billion sq. ft. of corrugated products. STO also shipped 780,000 tons of paper bags and sacks.

Through several subsidiaries and affiliates, STO also produces polyethylene film and bags, packaging machinery systems and wood chips and lumber.

Dividend Data

Dividends have been paid since 1947. A "poison pill" stock purchase right was adopted in 1988.

Summary

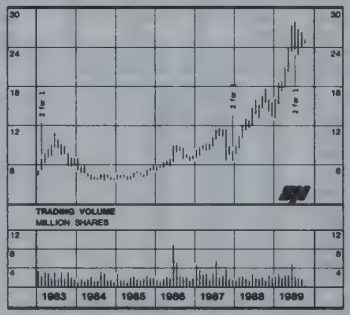
Stride Rite is a leading marketer of quality children's footwear in the U.S. and a major marketer of athletic, outdoor recreational and casual footwear for children and adults. Led by the Keds division, sales and earnings reached record levels in fiscal 1988 and in the first nine months of fiscal 1989. Further sales and earnings progress is expected for the fourth quarter of fiscal 1989 and for fiscal 1990. The shares were split 2-for-1 in July, 1989.

Current Outlook

Earnings for the fiscal year ending November 30, 1990 should equal $2.20 a share, up from the $1.80 estimated for fiscal 1989, giving effect to the July, 1989 2-for-1 stock split.

The quarterly dividend on the split shares was raised 33%, to $0.10 from $0.07½ (adjusted).

Sales for fiscal 1990 should rise substantially, reflecting higher prices, new product introductions, and continued demand for Keds products; higher sales of children's shoes; and increased demand for Sperry shoes. Margins may narrow slightly on higher manufacturing costs, but these costs should be largely offset by the higher selling prices.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	114.1	86.6	77.0	69.1
May	121.6	97.5	87.4	73.4
Aug.	128.5	106.1	83.2	73.9
Nov.	---	88.6	86.2	67.1
	---	378.8	333.7	283.5

Sales for the nine months ended September 1, 1989 rose 26%, year to year, reflecting increased demand for Keds and Sperry Top-Sider products. Margins widened, and net income from continuing operations rose 39%, to $1.41 a share (on 2.1% fewer shares) from $1.00 (adjusted). Results for the fiscal 1988 period exclude a loss of $0.07 a share from discontinued operations, and a $0.06 credit from a change in accounting principles.

	E1.80	1.27	0.80	0.57

Important Developments

Sep. '89— SRR said that all operating divisions contributed to the increased sales for the third quarter of fiscal 1989. The Keds division continued to be a major factor in SRR's favorable results, and were 29% higher in the third quarter than in fiscal 1988's third quarter. The Sperry Top-Sider division also enhanced consolidated results, with third quarter sales up 18% over the year-earlier level. SRR said that earnings also benefited from the absense of losses from the Overland Trading Co. division and the Joseph M. Herman division, which were discontinued in the fourth quarter of fiscal 1988.

Jun. '89— The company said that given the current backlog of orders and the rate of incoming orders for the fall season, it was expecting to meet its goals for the balance of the fiscal year.

Next earnings report expected in late January.

Business Summary

Stride Rite is the leading marketer of quality children's footwear in the U.S. and a major marketer of athletic, casual and outdoor recreational footwear for children and adults. The company manufactures products in its own facilities in the U.S. and Puerto Rico, and imports products from overseas. Footwear is distributed through independent retail stores and company-owned stores.

Children's footwear, primarily for the 6 months-12 year age range, includes dress and recreational shoes and boots, and sneakers, sold under the Stride Rite trademark.

Boating footwear and a portion of outdoor recreational footwear for children and adults are sold under the Sperry Top-Sider trademark. Products sold under that label also include sneakers for adults and children and espadrilles and sandals for women and children.

The company also markets sneakers and casual footwear for adults and children under the Keds trademark, and casual footwear and espadrilles for women under the Grasshoppers label.

As of fiscal 1988 year-end the retail division was operating a total of 293 outlets. These consisted of 201 Stride Rite Bootery stores and 67 leased shoe departments in department stores, both of which sell children's shoes, and 25 Overland Trading Co. stores. Overland, which was discontinued in January, 1989, sold portions of the company's adult footwear lines. In December, 1988 the company began operating a Sperry Top-Sider specialty store, stocked with Sperry Top-Sider footwear, apparel and giftware.

In January, 1989 SRR sold its Joseph M. Herman division, which had produced adult work shoes, boots, adult recreational shoes designed for rugged outdoor use, and lightweight hiking and casual shoes under the Herman and Herman Survivors names.

Dividend Data

Dividends have been paid since 1955. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Summary

The computer-graphics digitizing tablets manufactured by this company are used in computer-aided design, engineering and manufacturing, desktop publishing, architectural drawing, graphic design and illustration, cartography and general computing. Earnings increased sharply in recent years, with 1988-9 results bolstered by strength in the computer-aided design market and expansion of applications for the company's products.

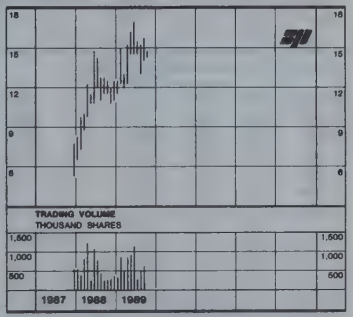
Business Summary

Summagraphics Corporation is a leading designer, manufacturer and marketer of digitizing tablets used with high-resolution computer graphics systems. Digitizers are input devices that translate graphic information into digital form so it can be processed by a computer. The company's products have a wide variety of applications, including computer-aided design, computer-aided manufacturing, computer-aided engineering, computer-aided publishing, construction costing, graphic design, cartography and general-purpose computing. Digitizers increase productivity in comparison with alternative input devices (such as keyboards and mice) in most graphics-intensive applications.

Digitizers are capable of determining the absolute location of a stylus or cursor within several thousandths of an inch on a grid of sensors imbedded in a tablet. Digitizer performance is measured principally by resolution, accuracy and the size of the active area. Summagraphics' digitizer products are based on higher-resolution electromagnetic technology, commercially introduced in fiscal 1984, and lower-cost electrostatic technology.

The company offers three series of digitizers: desktop, standard-accuracy tablets (MM), which accounted for 76% of 1988-9 sales; floor-standing, high-accuracy tablets (Microgrid or MG), contributing 19%; and low-cost desktop tablets, 2%. Digitizers are offered in standard configurations for the distribution market and are customized to meet specific OEM and foreign market requirements. All are supported by a wide range of accessory products, including styli, cursors, power supplies, cabling and software, and may be software-configured to meet various requirements.

Summagraphics' marketing strategy is to offer a broad line of computer graphics peripheral products and to develop strong brand recognition. Brand names include SummaSketch, Bit Pad and Microgrid. The company has developed an extensive sales network, including OEMs, distributors, manufacturers' representatives and direct sales offices in the U.S. and abroad. In 1988-9, distribution sales were about 77% of the total and sales to OEMs 23%. Sales outside the U.S. (primarily in Europe) accounted for about 39%.



Research and development expenses totaled $2,818,683 (6.5% of net sales) in 1988-9, compared with $2,271,642 (6.3%) the year before.

Important Developments

Jun. '89— Summagraphics attributed much of the strong gain in net income for 1988-9 to the booming computer-aided design market, as well as a rapid increase in new applications for its products in diverse disciplines. The company said that, given its strong cash position, it was continuing to pursue acquisitions of intelligent computer peripherals that would increase sales and earnings potential.

Next earnings report expected in late December.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	10.45	9.71	8.13	5.97
Nov.		10.75	8.74	6.43
Feb.		11.10	9.08	6.64
May		12.12	9.90	9.43
		43.68	35.84	28.47

For the quarter to August 31, 1989, net sales rose 7.6%, year to year, and pretax income was up 6.4%. After taxes at 22.0% (as Summagraphics triggered the limitation of its net operating loss carryforwards in March 1989—see Finances), versus 3.6%, net income retreated 14%, to $1,131,853 ($0.30 a share), from $1,315,617 ($0.35).

Net sales for the fiscal year ended May 31, 1989, advanced 22% from those of 1987-8. The gain principally reflected the successful introduction and continued penetration of electromagnetic digitizers into the distribution marketplace and strong demand for Summagraphics' products for use in desktop computer-aided design applications. Profitability benefited from the higher sales, lower-cost offshore manufacturing and reductions in overhead. Despite a 24% increase in R&D expenditures, the gain in pretax income was extended to 44%. Following taxes at 7.1%, against 4.0%, net income was up 40%, to $6,565,179, from $4,702,062. Earnings per share were $1.75, based on 14% more shares, versus $1.43.

1. Sum of quarters does not equal full-year amount, because of increase in shares. 2. Includes special credit.

Dividend Data

Summagraphics has never paid any cash dividends. It is the present policy of directors to retain all earning for use in the operation and expansion of the company's business.

Finances

In April 1989, Summagraphics entered into a $7.5 million demand line-of-credit agreement with one of its banks. Borrowings are secured by a portion of assets. As of May 31, 1989, there were no direct borrowings under this line of credit.

Cash and short-term investments totaled $14,711,000 (about $4 a share) as of May 31, 1989. Summagraphics intends to use a substantial portion of the proceeds from its September 1987 initial public offering and may use bank credit and other sources of capital to finance acquisitions.

As of May 31, 1989, Summagraphics had available net operating loss carryforwards (NOLs) of approximately $7,400,000 for financial reporting purposes and $5,000,000 for federal income tax purposes, expiring in varying amounts through 2002. In March 1989, as a result of changes in the stock ownership of the company, taking into account the initial public offering, Summagraphics triggered a limitation on the use of its NOLs. The effect of this limitation is to restrict the utilization of NOLs to about $2.5 million annually until the NOLs are fully utilized. This limitation reduced earnings for 1988-9 by $0.08 a share (all in the fourth quarter).

Summagraphics has agreements with three Far East companies under which they manufacture certain of its products.

Summary

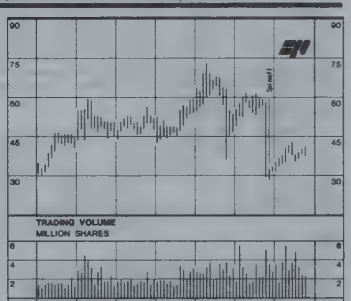
Sun Co. is a leading petroleum refining and marketing company serving much of the Northeast and the Midwest. In November, 1988 SUN implemented a comprehensive restructuring entailing the spin-off to stockholders of its domestic exploration and production operations as a separate, publicly-traded company, asset write-downs, and major cuts in overhead. Following the spin-off and the acquisition of the refining and marketing assets of Atlantic Petroleum Corp. in November, 1988, SUN is well positioned to exploit prospectively softening crude oil prices and tight North American refining capacity.

Current Outlook

Share earnings for 1990 are projected at $3.60, versus the $3.30 estimated for 1989.

The $0.45 quarterly dividend, reduced from $0.75 in December, 1988 to reflect the spin-off, is the minimum expectation.

Revenues for 1990 are expected to benefit from increased refining and marketing volumes. Potentially lower feedstock costs should leverage profits as the company purchases substantially all of its crude oil requirements. Profit comparisons will be enhanced by possible asset divestitures and greater retail penetration.



Sales & Operating Income[1] (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.61	2.33	2.21	3.27
Jun.	2.83	2.37	2.37	2.42

Dec.	---	2.65	2.47	2.04
	---	9.74	9.48	10.05

Total revenues for the nine months ended September 30, 1989 rose 14%, year to year. Operating profits benefited from improved pricing in the international exploration and production segment and Suncor's oil sands operation. In the absence of the 1988 domestic upstream contribution and a $297 million after-tax writedown, net income was $271 million ($2.54 a share), in contrast to a loss of $69 million ($0.66)

Important Developments

Oct. '89— Share earnings in 1989's third quarter benefited from a turnaround in SUN's Canadian subsidiary, Suncor. The unit recorded $11 million in earnings, versus a loss of $3 million in the 1988 period, reflecting mostly higher synthetic crude oil prices and increased production volumes. SUN's international exploration and production segment contributed $4 million to earnings, compared with a $4 million loss, owing to higher crude oil prices and increased production volumes. Much of the increased production was due to the Magnus Field in the North Sea in which SUN acquired a 5% interest in January, 1989. In 1989 SUN did not record results for domestic exploration and production, while in 1988 there was a $10 million loss. The refining and marketing segment recorded a $13 million decline in 1988, owing to lower refined product and chemical margins.

Next earnings report expected in late January.

Business Summary

SUN is primarily a petroleum refiner and marketer serving much of the Northeast and Midwest through its Sunoco brand of gasoline and petroleum products. In November, 1988 SUN implemented a comprehensive restructuring which included the divestiture of its U.S. exploration and production operations. SUN took an after-tax charge of $297 million in the 1988 second quarter in connection with its restructuring. Also, in November, 1988 SUN markedly increased its refining capacity and retail distribution system with the acquisition of Atlantic Petroleum Corp. SUN remains in international exploration and production.

Oper. Profits (Million $)	1988	1987
Ref. & mkt.	$277	$ 46
Expl.& prod.	16	237
Coal	53	50
Real estate/leasing	31	29
Suncor	-2	28

In 1988 Sun International's production averaged 41,200 barrels daily of crude and condensate (39,800 b/d in 1987) and 58 million cubic feet daily of natural gas (69 million cubic feet daily). Production at Suncor, SUN's 75%-owned Canadian subsidiary, averaged 10,700 b/d of crude and condensate and 64 million cubic feet a day of natural gas. Reserves at 1988 year-end included 123 million barrels of crude oil and natural gas liquids and 382 billion cubic feet of natural gas. Refining capacity at 1988 year-end totaled 590,000 b/d, excluding 130,000 b/d from the Atlantic acquisition. Refined product sales totaled 699.4 thousand barrels daily (before Suncor's 75.2 thousand barrels daily).

Summary

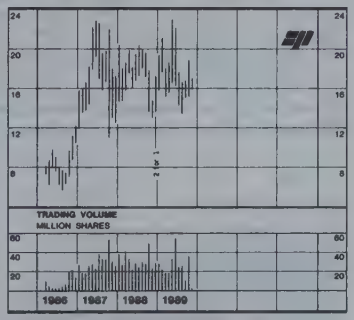
Sun is a leading supplier of high-performance computer workstations designed for the engineering, scientific, commercial and technical markets. Sun and AT&T are codeveloping the next version of AT&T's UNIX operating system, and AT&T's stake in Sun is currently about 17%. Earnings in the fiscal 1989 fourth quarter were impaired by a product line transition and a conversion to a new MIS system; however, demand for Sun's products remains strong and profitability should rebound in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $0.95 a share, versus fiscal 1989's $0.76.

Initiation of cash dividends is not expected.

Revenues in fiscal 1990 are expected to advance about 40%, reflecting strong demand for Sun's workstations and servers and wider availablity of new products announced in April 1989. Gross margins should improve throughout the year, reflecting volume efficiences from the ramp-up of new products, an increase in the sales mix of SPARC-based systems (which have higher margins), and the reduction of high component costs of inventory purchased in prior quarters. Improved performance of a recently installed management information system should enable Sun to react to shifts in product demand more effectively. Profitability should also benefit from expense and headcount controls.



Net Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	538.5	388.5	191.7	91.9
Dec.		448.3	235.1	116.5
Mar.		497.4	259.7	143.2
Jun.		431.2	365.1	185.9
		1,765.4	1,051.6	537.5

Revenues for the three months ended September 29, 1989, advanced 39%, year to year, reflecting new products, additional capacity and increased penetration of international markets. Gross margins narrowed substantially with higher component costs, but improved from the fiscal 1989 fourth quarter. R&D spending was up 29%, and selling, general and administrative expense rose 52%. Pretax income declined 77%. After taxes at 32.0%, versus 38.0%, net income was down 75%, to $5.2 million ($0.07 a share, on 12% more shares), from $20.6 million ($0.26).

Important Developments

Nov. '89— Sun completed its offering of $135 million of 6 3/8% subordinated debentures due October 15, 1999, convertible into common stock at $25 per share. Earlier, in the fiscal 1990 first quarter, Sun received about $125 million from a private placement of debt and warrants. Proceeds were earmarked for general corporate purposes, primarily to fund investments in property, plant and equipment, and to finance accounts receivable and inventories.

Business Summary

Sun Microsystems is a leading supplier of high-performance workstations, servers and networking software. Foreign operations accounted for 42% of fiscal 1989 sales. Revenue contributions by application in fiscal 1989 were:

Design Automation and Mfg	34%
Software Engineering	34%
Scientific Research	4%
Artificial Intelligence	6%
Electronic Publishing	6%
Finance	6%
Emerging Markets	10%

Sun's hardware consists of workstations, servers, board-level central processing units (CPUs), and peripherals. The workstations can be used in stand-alone or networked configurations which range from low-cost diskless nodes to high resolution color systems. Its servers can be used for file sharing, enabling users to access data distributed across multiple storage devices and networks, or as compute resources, to distribute compute-intensive applications across multiple processors. The UNIX operating system is the foundation for Sun's open systems approach.

The Sun-3 family (third generation) of workstations is based on the Motorola 680x0 line of microprocessors. Through fiscal 1989 year-end, approximately 84% of the 178,000 Sun workstations, servers and CPUs shipped in recent years were Sun-3 products.

In July 1987, Sun launched its fourth generation, Sun-4 family of workstations and servers based on Sun's own SPARC (Scalable Processor ARChitecture) microprocessor. In April 1989 Sun introduced the desktop SPARCstation 1, the SPARCstation 300 family and the SPARCserver 300 family. Sun is licensing SPARC to various microprocessor manufacturers in order to promote it as an industry standard. In the first quarter of fiscal 1990, SPARC-based products represented a majority of new product orders.

The Sun386i family, introduced in March 1988, is based on the Intel 80386 microprocessor and merges the UNIX environment with the industry standard DOS operating system.

Dividend Data

No cash dividends have been paid. A "poison pill" stock purchase right was adopted in May 1989.

Finances

In January 1988, American Telephone and Telegraph (AT&T) agreed to purchase, at Sun's option over a three-year period, newly issued common shares equal to up to 15% of Sun's outstanding common stock at a premium of 25% over the existing market price. Sun and AT&T are codeveloping the next-generation of AT&T's UNIX operating system.

Capitalization

Long-term Debt: Approximately $402,122,000, incl. $100 million of 5 1/4% sub. debs. due 2012, conv. into com. at $19.80 a sh. and $135 million of 6 3/8% sub. debs. due 1999, conv. into com. at $25 a sh.

Common Stock: 83,963,402 shs. ($0.00067 par). AT&T owns some 16.6%.
Institutions hold about 52%.

Summary

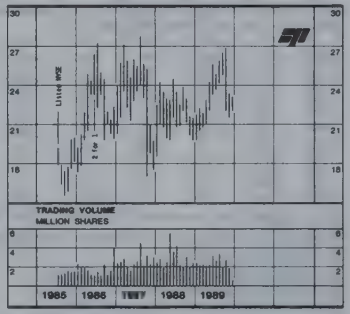
This holding company, formed through the 1985 merger of Sun Banks of Florida and Trust Co. of Georgia, subsequently acquired Third National, the second largest bank in Tennessee. STI now has 624 offices in the three states. While acquisitions have diluted share earnings over the past two years, and the Tennessee banks are encountering some loan quality problems, earnings growth in 1990 could be aided by continuing efficiencies, particularly in the Florida operations, in addition to the relative strength of the Southeastern economy.

Current Outlook

Earnings for 1990 could reach $2.85 a share, up from the $2.60 estimated for 1989.

The quarterly dividend was raised 11%, to $0.21 from $0.19, with the December, 1989 payment.

Loan growth could slow to about a 5%-6% rate through 1990, as the sluggish economy of Tennessee offsets relative strength in the Southeast. The net interest margin is narrowing with declining rates and increased competition. Loan quality is very good except in Tennessee, where weakness in real estate markets has led to an uptrend in problem loans, which have doubled to $125 million in the past year. Problem real estate loans could continue to rise. While reserves of the Georgia and Florida banks are in excess on nonperformers, the coverage of the Tennessee unit is about 71%, which could lead to higher loan loss provisions in 1990 (reserves are 119% on a consolidated basis). STI has negligible levels of developing country loans ($6 million remains of an original $116 million). Growth of the trust business and other efforts to enhance revenues could result in improving profitability in the Florida banks. The Georgia banks are already extremely profitable, but some further efficiencies from the consolidation of computer systems could benefit profitability.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 7.5%, year to year, primarily reflecting earning asset growth of 7.3%. The net interest margin narrowed slightly to 5.08% from 5.11%, due to a less favorable funding mix. The provision for loan losses was 6.4% lower, at $124 million, despite rising nonperforming loans and chargeoffs. Aided by a 16% gain in trust income, noninterest income increased 9.6%. With noninterest expense up 6.0%, pretax earnings rose 21%. After taxes at 23.4%, versus 15.7% (including a $10 million tax reduction related to a lawsuit in 1988), net income advanced 10%, to $1.95 a share from $1.77.

Business Summary

SunTrust Banks, was formed through the July, 1985 merger of Sun Banks (Orlando, Fla.) and Trust Co. of Georgia, and subsequently acquired Third National Corp, Tennessee. It is the second largest bank holding company in the Southeast and the 20th largest in the nation, with 21 banks and 332 offices in Florida, 18 banks and 181 offices in Georgia, and 14 banks and 112 offices in Tennessee. Trust operations ($20 billion of assets under management) are the largest in the Southeast. Mortgage banking includes a mortgage servicing portfolio of $3.7 billion.

Contributions of the subsidiary banks in 1988 were:

	Revs.	Net Inc.	Assets
Sun Banks	48%	43%	48%
Trust Co.	33%	43%	32%
Third Nat'l	19%	13%	20%
Other	-	1%	-

Average earning assets during 1988 of $24.2 billion (up 7.3% from 1987) were divided: loans 80%, investment securities 16%, money market assets 4%. Average sources of funds were demand deposits 28%, savings deposits 23%, time deposits 32% (average deposits of $22.6 billion were up 7.8%) short-term borrowings 7%, long-term debt 2%, equity 6%, and other 2%.

At year-end 1988 loans were divided: commercial loans 35%, commercial real estate 22%, residential real estate 19%, consumer loans 24%.

At year-end 1988 nonperforming assets were $196 million (0.97% of loans), unchanged from a year earlier (1.06%). The reserve for loan losses was 1.50% of loans, versus 1.58%. Domestic net chargeoffs during 1988 were 0.67% of average loans, against 0.48% in 1987.

Dividend Data

Dividends were initiated in 1985. A dividend reinvestment plan is available.

VU is the nation's largest food wholesaler, serving some 3,000 principally independent food stores in 2 states. Other operations include retail supermarkets and the ShopKo general merchandise chain. ew store openings by the company and independent retailers and increased sales from ShopKo stores ould boost earnings in fiscal 1989-90.

urrent Outlook

hare earnings for the fiscal year ending February 5, 1990 could approximate $1.95, up from the 1.81 of fiscal 1988-9. Earnings for fiscal 1990-91 ould reach $2.30 a share.

he quarterly dividend was raised 20%, to $0.15 om $0.12½, with the September, 1989 payment.

ales in fiscal 1989-90 should reflect the steady xpansion of store space by company-operated tailers and independents. Wholesaling margins and to benefit from operational efficiencies.

verall profitability should reflect increasing contri- utions from Shopko. Over the longer term, the ex- ansion into hypermarket formats should benefit arnings growth.

Important Developments

Sep. '89— SVU said that retail support operations were satisfactory in the second quarter of fiscal 1989-90. The company's overall margins, however, were not up to expectations, reflecting an aggressive everday low pricing policy introduced this summer at the company's ShopKo general merchandise division. ShopKo added four new stores in the second quarter, bringing its total to 91; seven additional stores are slated to open in the third quarter. Construction of the company's second hypermarket is on schedule; opening is planned for early spring in Euclid, Ohio. The company opened Twin Valu, a 180,000 sq. ft. hypermarket in Cleveland, last February. SVU opened two Cub Foods stores during the second quarter, bringing the total to 74; six additional stores are scheduled to open this fiscal year.

Next earnings report expected in early January.

Business Summary

Super Valu is the nation's largest food wholesaler, serving over 3,000 independent stores in 32 states, primarily in the central U.S. At fiscal 1988-9 year-end the company was operating 68 supermarkets and 87 ShopKo general merchandise department stores. Contributions by business segment in 1988-9 (operating profits in million $):

	Sales	Oper. Earns.
Wholesale foods	76%	$217.8
Retail foods	13%	-$3.4
ShopKo	11%	$76.4

Wholesale operations include sales to independently owned and operated food stores, sales to food stores owned by the company and several allied service operations.

Retail food supermarkets and superstores operate primarily under the names Hornbacher's, Great Scot, Sunflower, County Market and Cub Foods. During 1986 the company acquired Food Giant, a retail chain in Atlanta, Ga. SVU currently has 42 franchised Cub discount warehouse stores.

ShopKo units sell assorted general merchandise in mid-size cities in Wisconsin, Minnesota, South Dakota, Michigan, Iowa, Idaho, Montana and Nebraska.

Risk Planners, Inc., a subsidiary, provides comprehensive insurance programs to the company's affiliated retailers.

Dividend Data

Dividends have been paid since 1936. A new "poison pill" stock purchase right was adopted in 1989.

Summary

This West Coast-based manufacturer of prescription pharmaceuticals and diagnostic products derives over half of its sales and earnings from its Naprosyn and Anaprox antiarthritic drugs, which have recently been impacted by maturation of their overall market and new competition. Longer-range prospects hinge importantly upon the success of new drug products spawned from SYN's ambitious R & D program.

Current Outlook

Earnings for the fiscal year ending July 31, 1990 are projected at about $3.00 a share, up from the $2.67 reported for fiscal 1989.

Dividends should continue at $0.37½ quarterly.

Sales for fiscal 1990 should show further progress, aided by contributions from new products, line extensions to the Naprosyn line, and gains in diagnostic sales. These factors should more than offset maturation of the overall antiarthritic drug market and greater competition from Voltaren and Ansaid antiarthritics. Profitability should benefit from cost economies, and share profits will be helped by fewer average shares outstanding.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Oct.	---	350	306	263
Jan.	---	331	310	291
Apr.	---	348	324	287
Jul.	---	321	331	289
		1,349	1,272	1,129

Sales for the fiscal year ended July 31, 1989 (preliminary) rose 6.1%, year to year. Profitability was hurt by lower Naprosyn sales in the fourth quarter, and pretax income fell 1.2%. After taxes at 10.0%, against 13.0%, net income was up 2.2%. Share profits were $2.67, versus $2.51.

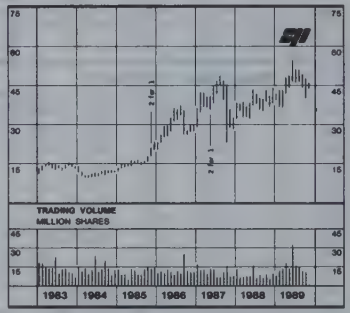
Jul.	E0.72	0.46	0.57	0.47
	E3.00	2.67	2.51	2.07

Next earnings report expected in late November.



Important Developments

Jul. '89— Naproxyn/naproxen sodium sales fell 7.2% in the fourth quarter fiscal 1989, reflecting added competition and a slowing market in the U.S. and generic competition and unfavorable exchange rates in certain foreign markets.

Jun. '89— The FDA approved SYN's Cytovene drug for the treatment of cytomegalovirus retinitis in AIDS patients. Also in June, the company submitted a New Drug Application for approval to market ticlopidine hydrochloride for use in preventing strokes in stroke-prone patients. Other SYN drugs now under review by the FDA include Synarel, a new treatment for endometriosis, and Toradol, a potent, non-narcotic analgesic. In March, SYN began marketing Cardene, a calcium-channel blocker drug for hypertension and chronic stable angina.

Business Summary

Contributions by business segment in fiscal 1989 were as follows:

	Sales	Profits
Pharmaceuticals	89%	93%
Diagnostics	11%	7%

Operations outside of the U.S. and Puerto Rico accounted for about 34% of sales and 63% of operating profits in fiscal 1989.

The single most important Syntex drugs are Naprosyn (naproxen) and Anaprox (naproxen sodium) nonsteroidal treatments for arthritis, other inflammations and pain. Sales of these products accounted for about 55% of total sales in fiscal 1989. Other products include steroids for the treatment of inflammatory skin diseases and related ailments (8%); oral contraceptives (8%); and animal health products (5%), which include Synanthic, an anthelmintic drug used to treat cattle, sheep and other animals for internal parasites; and Synovex cattle growth stimulants. Other pharmaceutical products include cardiovascular and gastrointestinal drugs, respiratory products, chemicals and antifungal products.

Diagnostic products (11% of fiscal 1989 sales) consist of the Emit series of therapeutic drug monitoring and toxicology systems used to measure and analyze the level of various drugs in humans; and the Microtrak line of monoclonal antibody tests for sexually transmissible diseases.

Dividend Data

The company has paid dividends since 1963.

Summary

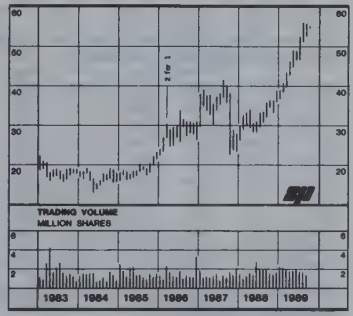
This company is the largest distributor of food and related products to restaurants, fast food chains, hotels, schools, hospitals and other foodservice customers. SYY acquired Staley Continental's foodservice business (annual revenues of $2.5 billion) in August, 1988. A long-term uptrend in sales and earnings, aided by acquisitions and increased market penetration, is expected to continue in fiscal 1990. A 2-for-1 stock split has been declared and the quarterly dividend has been increased 11%.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are expected to rise to $2.90 a share from the $2.39 of fiscal 1989, before giving effect to a 2-for-1 stock split payable October 27, 1989.

The quarterly dividend has been raised 11.1%, to the equivalent of $0.10 on the presplit shares from $0.09, with the November 11, 1989 payment.

Sales for fiscal 1990 are likely to rise 15%-20%, due to expansion in new and existing markets. Contributions from the CFS Continental acquisition should accelerate, as consolidation of plant and procurement efforts leads to a more efficient distribution network.



Total Sales (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Sep.	---	1,558	1,044	878
Dec.	---	1,734	1,071	902
Mar.	---	1,718	1,045	896
Jun.	---	1,842	1,224	980
	---	6,851	4,385	3,656

Sales for the 52-week fiscal year ended July 1, 1989 (preliminary) rose 56% from the preceding year (53 weeks), due largely to the Staley acquisition. Operations benefited from marketing efficiencies and productivity gains but a steep rise in interest expense limited the gain in net income to 35%. Earnings increased to $2.39 a share from $1.79, excluding a $0.15 special credit in fiscal 1988.

	E2.90	2.39	1.79	1.40

Important Developments

Sep. '89— Directors declared a 2-for-1 stock split payable October 27, and raised the quarterly dividend 11.1%, to the equivalent of $0.10 (on the presplit shares) with the November 17 payment.

Sep. '89— SYY said that it expected to expand capital expenditures for fiscal 1990 some 25%, to an estimated $200 million, to upgrade facilities and for ongoing consolidation of the Staley Continental foodservice distribution business (acquired in August, 1988 for approximately $475 million). The company merged Staley Continental's Atlanta distribution facilities with its own in August, 1989 into a recently purchased complex, and expanded distribution centers in Miami and Orlando to accommodate consolidated operations.

Next earnings report expected in mid-October.

Business Summary

Sysco Corp. distributes a wide range of food and related products to the foodservice or "away-from-home-eating" industry throughout the U.S. Consumer-sized frozen products are also distributed to the retail food industry in selected areas. Sales contributions in recent fiscal years:

	1989	1988	1987	1986
Traditional foodservice	87%	90%	89%	89%
Quick-service	8%	8%	3%	2%
Consumer-sized frozen	5%	7%	8%	9%

Foodservice products encompass a full line of frozen foods including meats; fully-prepared entrees; fruits, vegetables, and desserts; and a full line of canned and dry goods. In addition, a wide variety of nonfood items are distributed including paper products (disposable napkins, plates and cups); tableware (china and silverware); restaurant and kitchen equipment and supplies; and cleaning supplies. Products include both nationally-branded merchandise and items packed under Sysco's private label. Based on company estimates, food-service sales by customer in fiscal 1988 were: restaurants 56%; hospitals and nursing homes 13%; schools and colleges 11%, hotels and motels 7%; and all other 13%.

Quick-service sales consist of widely varied food products sold to restaurant chains chains.

Consumer-sized frozen products include vegetables, meats, beverages, bakery products, fruits and prepared dinners sold primarily in the New York and San Francisco metropolitan areas.

Dividend Data

Dividends have been paid since 1970. A "poison pill" stock purchase right was adopted in 1986.

TDK Corp.

NYSE Symbol TDK

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 26'89	1989					
39⅛	46¼-30¼	27	¹0.209	¹0.5%	NR	0.46

Summary

This Japanese company manufactures electronic materials and components, magnetic recording tapes, and other recording media. In recent years electronic materials and components have accounted for an increasing percentage of total sales. In May, 1989 TDK acquired Silicon Systems for about $210 million. The American Depositary Shares (ADS) were split 2-for-1 in July, 1989 and now represent one TDK common share per ADS. TDK has changed its fiscal year-end to March 31 from November 30.

Business Summary

TDK Corp. (formerly TDK Electronics Co., Ltd) produces electronic materials and components, magnetic recording tapes and other recording media. Sales contributions by business segment in recent fiscal years (ended November 30):

	1988	1987	1986
Electronic materials & components	64%	60%	57%
Magnetic recording media	36%	40%	43%

Electronic materials and components includes ferrite cores and magnets, coil and assembled components, ceramic components, and other items.

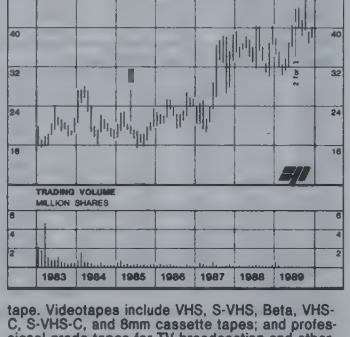
Ferrite cores are used in home entertainment products, communications equipment, and measuring devices. Ferrite magnets are found in consumer and industrial electrical products, such as speakers, motors, auto components, and machine tools. Rare earth cobalt magnets are used in electronic watches and audio components.

Coil and assembled components include coils and transformers (used in many consumer and industrial electronic products), filters (used in electronic products for suppressing noise), and switching power supplies (used in computer peripherals and measuring instruments).

Ceramic components include ceramic capacitors; ceramic filters, resonators, and other piezoelectric transducers; thermistors; varistors; and multilayer hybrid circuits.

Other operations include Avimount and Avisert machinery for precision mounting and inserting of printed circuit board components.

The magnetic recording media segment includes audio tapes, video tapes, and floppy disks. Audio tapes includes the normal, high, and metal tapes; digital audio tape (DAT) cassettes; and reel-to-reel tape. Videotapes include VHS, S-VHS, Beta, VHS-C, S-VHS-C, and 8mm cassette tapes; and professional grade tapes for TV broadcasting and other commercial applications.



Floppy disks and other includes 8", 5 ¼", and 3½" floppy disks; computer tape cartridges; parabolic antennas for reception of satellite broadcasts; and head cleaners and demagnetizers.

Important Developments

Nov. '89— TDK projected that its nonconsolidated operations would register net sales of $2.75 billion for fiscal 1989-90 and net income of $153.6 million. TDK does not issue a projection for consolidated operations. TDK also said that during the six months ended September 30, 1989 it experienced continued healthy sales of components and improved sales of recording media. Efforts to cut costs were said to have been effective.

Next earnings report expected in late February.

Summary

TJX is a leading national retailer which operates an off-price apparel specialty business through its T.J. Maxx and Hit or Miss chains and its Chadwick's of Boston mail order catalog. In June, 1989 Zayre Corp. acquired the minority interest in its 83%-owned TJX Companies as part of a major restructuring, and changed its name to TJX Companies.

Current Outlook

Share earnings for the fiscal year ending January 31, 1990 are estimated at $1.40, versus 1988-9's $0.98, which excludes a $3.95 loss related to discontinued operations. Earnings should approximate $1.50 a share in fiscal 1990-1.

Dividends should remain at $0.10 quarterly.

Sales of off-price specialty stores should continue to increase about 15% in fiscal 1989-90, boosted by new store openings. Gross margins could widen slightly on the higher volume; expense ratios should improve, reflecting lower corporate overhead. Interest expense will be higher.

Net Sales (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Apr.	466	397	1,296	1,045

	---	1,921	6,186	5,351

Sales from continuing operations for the 26 weeks ended July 29, 1989 rose 16%, year to year. Gross margins narrowed and expense ratios improved. Following interest and dividend income of $14.6 million from an investment in Ames Department Stores, Inc., pretax income increased 15%. After taxes at 38.4% versus 39.9%, and minority interest, net income rose 50%, to $0.54 a share (before an $0.11 gain from discontinued operations) from $0.38 (before a $0.69 loss from discontinued operations).

Important Developments

Sep. '89— Management said that during the second quarter of fiscal 1989-90, sales rose 15%. T. J. Maxx achieved operating profit growth in the second quarter, but experienced continued softness in sales of moderate sportswear; sales of better and junior sportswear rose. Domestics and fashion shoe departments had exceptional performances. A substantial rise in profitability at Hit or Miss reflected strong comparable sales growth; average annualized new store sales rose 25% during the first half of fiscal 1989-90. Performance at Chadwick's of Boston fell somewhat below expectations but did not have a material impact on the company's profitability. During the second quarter of fiscal 1989-90, TJX opened eight T. J. Maxx stores and 12 Hit or Miss stores.

Next earnings report expected in mid-November.

Business Summary

TJX Companies is comprised of T.J. Maxx, Hit or Miss and Chadwick's of Boston. In June, 1989 the company changed its name to The TJX Companies, Inc. from Zayre Corp. following the completion of a major restructuring which included the acquisition by Zayre of the minority interest in its 83%-owned TJX Companies unit. The restructuring consisted of the spin-off of the warehouse division and a payment of a $3.50 special dividend to shareholders.

The T.J. Maxx chain operated 308 stores in 39 states at year-end fiscal 1988-9. T.J.Maxx sells a broad range of brand name women's, men's, children's apparel, related accessories, women's shoes, domestics and giftware at prices generally 20% to 60% below department and specialty store prices. Units average approximately 25,000 sq. ft. Stores are located in suburban strip shopping centers.

The Hit or Miss off-price women's apparel chain operated 506 stores in 33 states at fiscal 1988-9 year-end. The stores average about 4,000 sq. ft. The largest portion of the merchandise sold is nationally advertised brand name merchandise at prices below original wholesale prices. Hit or Miss also sells private label merchandise.

Chadwick's of Boston, an off-price mail order company. During fiscal 1988-9, Chadwicks's mailed nine primary catalogs and one focus catalog, featuring some of the best selling items from the primary catalogs. During fiscal 1989-90, the company planned to increase catalog mailings by 25% from the preceding year to 49 million.

In October, 1988 the company (then called Zayre Corp.) completed the sale of the 388-unit Zayre discount department store division to Ames Department Stores for $438.3 million in cash, a $200 million note and convertible preferred stock of Ames valued at $140 million.

Dec. 15'89	1989					
49½	49⅞-41¼	12	1.72	3.5%	A	1.14

Summary

TRW provides high technology products and services to the space and defense, automotive and information systems markets. In 1989 TRW expanded its information services operations with the addition of Chilton Corp. and acquired Talley Industries' inflatable passive restraint business. Favorable earnings comparisons are expected in 1990 on strong growth in sales of inflatable passive restraints.

Current Outlook

Earnings for 1990 may rise to $4.25 a share from the $4.00 estimated for 1989.

The quarterly dividend should continue at $0.43.

Automotive sales should improve considerably in 1990, as demand for inflatable passive restraint systems and valves continues to grow. Profits at the automotive segment should rise, as production volumes increase and unit production costs decline. Although sales of the space and defense operations are not expected to rise substantially, moderate earnings gains are expected. Results at information systems should decline, reflecting costs related to the integration of Chilton. Earnings gains will be limited by higher interest expense and taxes.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,785	1,799	1,687	1,488
Jun.	1,844	1,817	1,693	1,565

Important Developments

Oct. '89— In the third quarter of 1989 TRW recognized income of $16 million ($0.11 a share after taxes) from reversal of part of 1988's $43 million charge for recall of heavy-duty truck steering gears.

Apr. '89— TRW acquired Talley Industries' inflatable passive restraint business for $85 million in cash, $12.8 million for intercompany indebtedness, and royalties to be paid over 12 years.

Mar. '89— TRW acquired Chilton Corp. for $360 million. Chilton operates consumer credit reporting, accounts receivable management, and related businesses.

Next earnings report expected in mid-February.

Business Summary

This diversified company is a leading supplier of space and defense systems, auto parts, and information systems. Segment contributions in 1988:

	Sales	Profits
Space & defense	46%	34%
Car & truck parts	44%	35%
Information systems	8%	4%
Other	2%	27%

Space & defense includes spacecraft; propulsion systems; electro-optical and instrument systems; spacecraft payloads; lasers; space and defense mission software and systems engineering support services; communications systems, avionics systems, and other electronic technologies for space and defense applications.

TRW designs, manufactures and sells four major automotive product lines for cars, trucks, buses, and off-highway vehicles: occupant restraint systems; steering and suspension systems; engine valves and valvetrain parts; and electrical and electronic products and controls. Parts are sold to the original and replacement markets.

Information systems includes consumer credit information, real estate information and services, electronic equipment maintenance, and information systems engineering. Other includes electronic components which are being divested.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A new "poison pill" preferred stock purchase right was adopted in 1988.

Nov. 10'89	1989					
64¾	76½-52⅝	19	2.16	3.3%	A	0.95

Summary

This company is the nation's leading producer of tampons, with its Tampax line accounting for about 60% of the domestic market. Tampon products are also sold abroad in some 135 countries. TMB also markets feminine protection external napkins under the Maxithins name. The company is considering the sale of its unprofitable lines of home diagnostic pregnancy and ovulation predictor test products and hypoallergenic cosmetics.

Current Outlook

Earnings for 1990 are projected at about $4.40 a share, up from 1989's estimated $3.40, which includes a onetime charge of $0.22.

Dividends were raised 5.9%, to $0.54 quarterly from $0.51, with the October, 1989 declaration.

Despite the probable sale of the diagnostics and hypoallergenic cosmetics businesses, sales should show further growth in 1990, aided by continued strong gains in the overseas tampon business and contributions from new tampon products. Margins should benefit from the better volume, the elimination of the unprofitable diagnostic and cosmetics operations and various other cost efficiencies.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	129.9	132.9	120.5	114.4
Jun.	166.1	149.9	142.9	127.5

Dec.	---	134.9	133.4	115.7
	---	563.3	538.9	486.6

Sales for the nine months ended September 30, 1989 rose 4.9%, year to year. Profit comparisons, were hurt by losses in nonfeminine-protection lines and a net nonrecurring charge of $0.22 a share associated with the sale of a Spanish joint venture. Net income declined 14%, to $2.72 a share from $3.17.

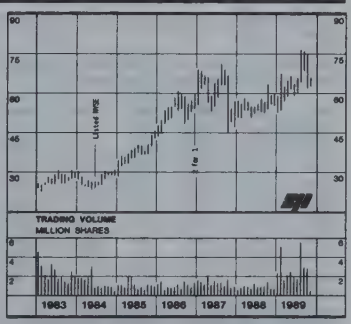
	E3.40	3.83	3.45	3.12



Important Developments

Sep. '89— The company said that it was considering the sale of its First Response home diagnostics and hypoallergenic cosmetics businesses. Operating losses from those units, which have aggregate annual sales of about $37 million, were indicated at about $0.36 a share for 1989. Earnings for the third quarter of 1989 included a charge of $0.22 a share associated with the sale of TMB's share of a joint venture in Spain. Tambrands now has full control of the Tampax tampon business in Spain and Portugal. New tampon products include the Tampax Compak tampon, an all-plastic compact applicator; a new douche product; and a deodorant flushable tampon, which was introduced in May, 1989. TMB projected that over the next five years, it expected to increase its share of the U.S. tampon market to 65% from the present 60%.

Next earnings report expected in mid-February.

Business Summary

Tambrands Inc. (formerly Tampax Inc.) manufactures and markets feminine hygiene products both in the U.S. and abroad.

Sales and allocable net earnings by geographic area in 1988 were derived as follows:

	Sales	Profits
U.S.	62%	75%
Europe	24%	19%
Other foreign	14%	6%

Tampax, a cotton tampon worn internally for menstrual protection, is the company's principal product. It is sold throughout the United States and in some 135 other countries. Tampax is believed to account for approximately 60% of the domestic tampon market. The company and a subsidiary also manufacture external pads and panty shields for menstrual protection which they sell in the United States, Puerto Rico and Canada under the Maxithins trademark.

Home diagnostic pregnancy tests and home diagnostic ovulation predictor tests are sold in the U.S. under the trademark First Response. A subsidiary also manufactures hypo-allergenic cosmetics which are marketed in the U.S. under the name Physicians Formula (TMB is considering the sale of these diagnostics and cosmetics units).

TMB's foreign subsidiaries and joint ventures operate in Brazil, Canada, England, Ireland, France, Spain, Mexico, Turkey, the U.S.S.R. and The People's Republic of China.

Dividend Data

Dividends have been paid since 1942. A new "poison pill" stock purchase right was adopted in 1989. A dividend reinvestment plan is available.

Tandem Computers

2190M

NYSE Symbol TDM Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 15'89	1989					
21	26⅜-14¾	18	None	None	B+	1.70

Summary

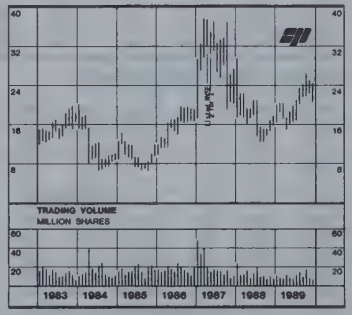
Tandem manufactures fault-tolerant computer systems and supplies networks for on-line transaction processing applications. Its Ungermann-Bass subsidiary, acquired in June, 1988, produces general purpose local area networks. Earnings for fiscal 1990 are expected to benefit from several new products, including a recently introduced high-end system and an expected UNIX-based product.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are estimated at $1.50 a share, versus fiscal 1989's $1.17.

Cash dividends are not anticipated.

Revenues in fiscal 1990 are estimated to grow at about 22%, benefiting from the availability of the recently introduced high-end Cyclone system, continued strong demand for the low-end CLX, and the anticipated introduction of a UNIX-based fault-tolerant product. Gross margins could stay under pressure with the shift in mix to low-end CLX systems, as well as increased competition. R&D spending should remain high but could come down slightly as a percentage of revenues, and marketing, general and administrative expenses are expected to be tightly controled, resulting in improved operating margins. Although the underlying growth rate of the company is accelerating, earnings in the first quarter of fiscal 1990 will likely be lower, year to year. Subsequent to this transitional quarter, growth should accelerate throughout the year on the expected strong product momentum.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Dec.	---	392	282	238
Mar.	---	383	309	242
Jun.	---	421	339	264
Sep.	---	456	384	291
	---	1,633	1,315	1,035

Revenues for the fiscal year ended September 30, 1989 (preliminary) rose 24% from those of the preceding year. Product revenue was up 26%; service and other revenue advanced 18%. Product gross margins narrowed sharply, but service margins improved and other expenses were well controled. In the absence of a charge for settlement of litigation of $9.4 million, pretax earnings were up 28%. After taxes at 36.5%, versus 35.0%, net income rose 25%.

Sep.	E0.48	0.38	0.31	0.31
	E1.50	1.17	0.96	1.08

Important Developments

Oct. '89— TDM introduced a NonStop online mainframe system, named Cyclone, that provides IBM 3090 mainframe class performance at less than half the cost. The system runs under TDM's GUARDIAN operating system. General availability will be by the end of 1989. Prices range from $2 million to $10 million.

Next earnings report expected in mid-January.

Business Summary

Tandem Computers designs and manufactures computer systems and networks for the on-line transaction processing (OLTP) marketplace. Tandem's systems are used in the banking, financial services, manufacturing, communications, wholesale and distribution, point-of-sale, transportation, medical services, printing and publishing, computer services and utilities industries. Foreign operations provided 41% of total revenues and 48% of pretax profits in fiscal 1988.

Tandem's NonStop systems are designed to provide continuous operation, distributed processing, data integrity, and modular expandability. They feature multiple independent processors and non-shared memory. The company's proprietary operating system software, GUARDIAN 90, is designed to keep applications running through any single failure. For example, if a processor fails, work is automatically redirected to other processors in the system.

The NonStop VLX is the company's top-of-the-line transaction processing mainframe intended for very high volume applications and the TXP is a mid-range system. The NonStop EXT10 and NonStop EXT 25 are departmental systems that can operate outside of a computer room either as stand-alone systems or part of a TDM network. The NonStop CLX is a low-cost departmental system which plugs into dedicated wall sockets, is user-serviceable and can be diagnosed remotely. The LXN system is TDM's UNIX-based departmental computer.

The V80 and XL80 storage products are designed specifically for OLTP applications and feature up to eight high-speed disk drives in a cabinet. The 653x and 652x terminals are also designed for transaction processing. TDM's PSX MS-DOS-based workstations function either as standalone units or terminals. TDM also resells Apple Computer's Macintosh computers.

Up to 255 geographically dispersed locations can be interconnected in a network using TDM's EXPAND software. In June, 1988 TDM acquired Ungermann-Bass (UB) for about $260 million. UB makes general-purpose local area networks for interconnecting heterogeneous information processing systems, and earned $6.6 million on revenues of $144 million in 1987.

Dividend Data

No dividends have ever been paid. A "poison pill" stock purchase right was adopted in 1985.

40⅞	48¾-37	11	0.60	1.5%	B+	1.15

Summary

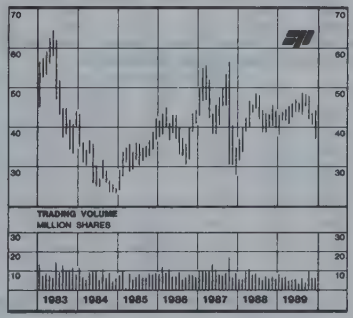
Tandy Corp. is a leading retailer of a broad range of consumer electronic products, with some 4,812 owned and 2,233 franchised Radio Shack and other outlets; it is also an important manufacturer of microcomputers. TAN is a member of a group of personal computer vendors supporting an alternative to IBM's Micro Channel architecture. Although Radio Shack's consumer electronics business is weak, share earnings for fiscal 1990 should benefit from a full year of shipments of personal computers to Digital Equipment and Panasonic, steady improvement in name brand operations, and a share repurchase program.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are projected at $3.85 a share, up from fiscal 1989's $3.64.

The dividend should remain at $0.15 quarterly.

Sales growth for fiscal 1990 is expected to be under 10%. Although demand for low-end personal computers is expected to remain weak, that market will be a substantially smaller portion of sales. High-end personal computer sales should be strong and sales to Digital Equipment and Panasonic, which began in the third quarter of fiscal 1989, will have a significant impact. Name-brand operations should continue to benefit from improved in-store merchandising and be profitable for the year. Although the product mix is shifting toward lower-margin OEM sales, selling and general expenses will continue to decline as a percent of revenues with the shift in mix to alternative selling channels. The tax rate is expected to remain essentially unchanged. A share repurchase program, initiated in January, 1989, will have a positive effect on per-share earnings.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	986	937	838	743
Dec.	---	1,403	1,303	1,196
Mar.	---	944	839	777
Jun.	---	897	813	737
	---	4,181	3,794	3,452

Revenues for the three months ended September 30, 1989 rose 5.2%, year to year, aided by strong growth in Tandy Marketing Companies and other outside sales. Gross margins narrowed, and although other expenses were well controlled and net interest income was higher, pretax income was down 3.0%. After taxes at 38.7%, versus 38.5%, net income decreased 3.3%; however, share earnings increased to $0.73 from $0.72, reflecting 4.1% fewer average shares outstanding.

Jun.	E0.71	0.66	0.64	0.49
	E3.85	3.64	3.54	2.70

Important Developments

Dec. '89— TAN acquired from Datatronics AB of Stockholm, Sweden, its Victor microcomputer and Micronic hand-held computer subsidiaries in Europe. During 1988 sales of Victor and Micronic computer products exceeded $200 million. The transaction should strengthen TAN's presence in Europe in anticipation of a unified European market in 1992.

Next earnings report expected in mid-January.

Business Summary

Tandy Corp. is a leading consumer electronics retailer and manufacturer. The company sells through its Radio Shack stores and name-brand retail outlets (VideoConcepts and McDuff Electronics). Tandy also distributes its products through other distribution channels. Sales by distribution channel in recent years:

	1989	1988
Radio Shack-U.S.	72%	77%
Tandy Name Brand Retail	8%	9%
Tandy Marketing Companies	12%	8%
Other outside sales	8%	6%

The Radio Shack catalogue contains over 2,900 products, including audio and video equipment, cellular and conventional telephones, radios, scanning receivers, marine and citizens band equipment, security devices, electronic kits and games, clocks, antennas and parts. Radio Shack Computer Centers market the full line of Tandy computer products with selected computer products also being offered through the regular Radio Shack stores. In July, 1988 TAN acquired GRiD Systems, a portable computer manufacturer. About one-third of the products in the Radio Shack catalogs are manufactured by Tandy. Radio Shack stores exceed 7,000, with 4,812 company owned and some 2,233 operating as dealer/franchise outlets.

The name-brand operations consist of 292 company-owned VideoConcepts and McDuff Electronics stores selling major name-brand audio/video products. The larger McDuff Electronics and Appliance Supercenters also carry a full line of leading appliances.

Dividend Data

Directors reinstituted cash dividends in November, 1986 after omission since 1959. A "poison pill" stock purchase right was adopted in 1986.

TECO Energy

NYSE Symbol TE

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
26⅞	27½-22	12	1.52	5.7%	A	0.27

Summary

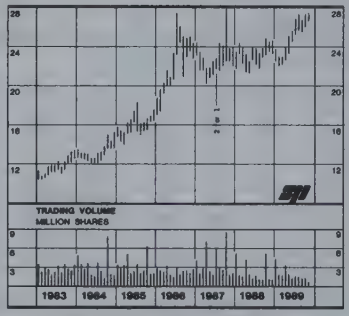
This diversified electric utility holding company serves the rapidly growing Tampa Bay region of Florida. Near-term earnings prospects are benefiting from the strength of the local economy and a greater contribution from TE's nonregulated bulk commodity transportation subsidiary and coal mining unit. The longer-term outlook is enhanced by excellent cash flow, constructive regulation, and the growing Tampa economy.

Current Outlook

Share earnings for 1990 are projected at $2.40, up from the $2.33 estimated for 1989.

An increase in the $0.38 quarterly dividend is likely in the first half of 1990.

Share earnings for 1990 will benefit from higher kwh sales and continued gains in the transport unit and coal mining business. Longer-term prospects are enhanced by excellent cash flow, supportive regulation and the strength of the local economy.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	249	248	220	206
Jun.	265	253	235	216
Sep.	290	284	277	257
Dec.	---	249	238	223
	---	1,034	970	902

Revenues for the nine months ended September 30, 1989 rose 1.4%, year to year, as increased revenues from the nonutility businesses more than offset lower electric sales. After a fractional (0.6%) decline in production costs, operating income was up 7.6%. Other income increased 94%, and pretax net gained 11%. Following taxes at 34.4%, against 33.6%, net income advanced 10%. Share earnings were $1.91, compared with $1.74.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.49	0.51	0.41	0.40
Jun.	0.62	0.58	0.53	0.39

Dec.	E0.42	0.39	0.30	0.40
	E2.33	2.13	1.95	1.73

Important Developments

Oct. '89— TE reported that electric sales in 1989's third quarter were down 2.8%, year to year, owing primarily to sharply reduced sales for resale. While electric sales to phosphate customers declined 10%, residential sales were up 6.8% and commercial sales rose 5.4%.

Jul. '89— TE's TECO Power Services entered into contracts with Seminole Electric Cooperative and Tampa Electric to provide generating capacity over a 20-year period starting in 1993. Pursuant to the agreement, TECO Power Services will construct 295 mw of combined cycle and combustion turbine capacity by late 1992 for an estimated $195 million. Sharing these facilities with Seminole allows Tampa Electric to defer adding capacity until the mid to late 1990s.

Next earnings report expected in mid-January.

Business Summary

TECO Energy is the holding company for Tampa Electric, which serves a population of some one million in Tampa, Fla. and adjacent communities. TE has diversified extensively into nonregulated businesses, including transport services, coal mining, and most recently real estate, alternative energy production and investment management. The transport subsidiary transports, stores and transfers coal and other bulk commodities. TE's coal unit operates surface and underground mines in Kentucky and Tennessee. Revenues and operating income (as reported on a nonconsolidated basis) in 1988 were derived as follows:

	Revs.	Profits
Electric	77%	89%
Transport, coal mining & other	23%	11%

Nearly all of TE's power requirements were derived from coal. The company may have some vulnerability to severe acid rain legislation. Peak retail demand in 1988 was 2,620 mw and capability totaled 3,082 mw for a capacity margin of 15%.

The diversified Tampa economy is becoming a commercial center in finance, law and tourism. The region's economic diversification is aiding the company's commercial and residential kwh sales. TE's dependence on industrial kwh sales and specifically the phosphate industry is lessening due to the emergence of the service businesses. TE has reported that the general economic conditons in the phosphate industry have been improving due to reduced inventories and the drought in 1988.

Dividend Data

Dividends have been paid since 1900. The dividend reinvestment plan was discontinued in 1985.

Tektronix, Inc.

NYSE Symbol TEK Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 23'89	1989					
18⅝	24¼-16¾	NM	0.60	3.2%	B	0.93

Summary

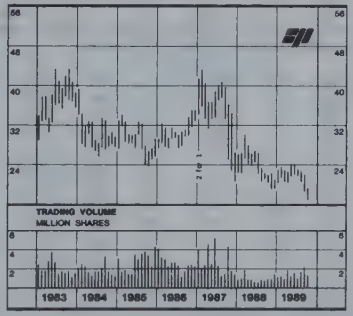
Tektronix, a major factor in the electronic test and measurement instruments industry, is the world's leading producer of oscilloscopes. It also has a position in computer graphics and communications products. Following a loss in fiscal 1987-8, only limited profitability was restored in fiscal 1988-9, reflecting modest sales growth and the absence of nonrecurring charges. Earnings growth is likely in fiscal 1989-90, aided by successful new product introductions and well controlled costs.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 should reach $0.90 a share, up from the $0.66 of fiscal 1988-9.

Dividends should continue at $0.15 quarterly.

Sales for fiscal 1989-90 are expected to rise moderately, reflecting the impact of new product introductions, the ramping up of production of products successfully introduced in fiscal 1988-9, and a continuing rebound in technology-related capital spending. While a possible slowing of the economy will restrain this growth, its impact should be relatively limited. Margins should benefit from the higher volume, increased manufacturing efficiencies, and recent cost reductions, although start-up costs will be restraining. Long-term prospects are enhanced by TEK's renewed emphasis on more fully exploiting its technological base through new product introductions and its high operating leverage.



Net Sales (Million $)

Period:	1989-90	1988-9	1987-8	1986-7
12 Wks. Aug. ...	294	301	300	305
12 Wks. Nov. ...	---	336	319	320
16 Wks. Mar. ...	---	434	433	415
12 Wks. May	---	362	361	355
	---	1,433	1,412	1,396

Sales for the 12 weeks ended Aug. 19, 1989 declined 2.3%, year to year. Primarily due to the lower volume, start-up costs on new products and a stronger dollar, margins narrowed significantly. A pretax loss of $3.7 million was incurred, versus pretax income of $15.7 million. After tax items, the net loss was $1.9 million ($0.06 a share), versus net income of $7.4 million ($0.26).

12 Wks. May	E0.42	d0.08	d0.56	0.02
	E0.90	0.66	d0.55	1.33

Important Developments

Sep. '89— TEK said that the first quarter decline in sales reflected the fact that it entered the quarter with its lowest backlog since the first quarter of 1979, and because many important new products were only beginning to be shipped to customers.

Next earnings report expected in early December.

Business Summary

Tektronix is a major producer of test and measurement instruments, and the world's leading manufacturer of oscilloscopes. Sales by product line in the past two fiscal years:

	1988-9	1987-8
Test and measurement	60%	63%
Information display	19%	20%
Communications	21%	17%

Foreign business accounted for 28% of revenues and 44% of operating income in fiscal 1988-9.

Instrument sales include oscilloscopes, and plug-in units for them. Other products include probes, attenuators and specially equipped cameras.

The design automation and information display group produces graphic computing systems, color graphic computer terminals, display monitors, logic analyzers, microcomputer development products, semiconductor test systems, hard copy units, ink jet printers and plotters.

Communications products include television waveform and picture monitors used to analyze video-signal transmission quality, and special effects systems used for TV. Spectrum and data comm analyzers, and electrical and optical cable testers are also produced.

In March, 1988 TEK agreed to sell certain computer-aided engineering technologies and its computer-aided software engineering division to Mentor Graphics for $5 million in cash. They also formed an electronic design and test alliance.

Dividend Data

Dividends have been paid since 1972.

Summary

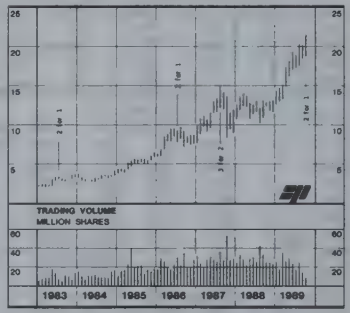
TCI is the largest operator of cable television systems in the U.S. Its subscriber levels and cash flow are continuing their rapid growth, largely through acquisitions. In May 1989, 41%-owned United Cable Television and 65%-owned United Artists Communications completed a reorganization and merger into a new company, 56%-owned United Artists Entertainment. The shares were recently split two for one.

Current Outlook

The loss anticipated for 1990 is expected to widen to $0.80 a share, from the $0.65 deficit estimated for 1989.

No cash dividend has been paid, and none is likely within the next several years. The shares were recently split two for one.

Revenues and cash flow for 1990 will benefit from acquisitions, growth in subscription levels and higher monthly rates for cable service. Although the company is actively reducing its average cost of borrowing (largely through overseas refinancings), a heavier debt load associated with acquisition funding and higher depreciation and amortization charges will lead to wider losses. Due to the capital-intensive nature of the cable industry, cash flow is a more important determinant of profitability than net earnings.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	655	494	376	151
Jun.	726	551	395	162
Sep.	---	634	474	163
Dec.	---	603	464	171
	---	2,282	1,709	646

Revenues for 1989's first half advanced 32%, year to year. Cash flow (depreciation and amortization charges added back to operating income) rose 22%. After other items, including a $118 million increase in interest expense and $43 million higher other costs, the net loss widened to $115.0 million ($0.33 a share, as adjusted), from $29.2 million ($0.09).

Important Developments

Sep. '89— TCI agreed to acquire the 25% of WestMarc Communications that it does not already own for a sweetened $238.7 million. WestMarc owns cable systems serving nearly 550,000 subscribers.

Jul. '89— TCI planned to acquire about 200,000 cable subscribers as part of a consortium that agreed to acquire the cable assets of Cooke Cablevision and 1st Cablevision Inc. for $1.6 billion. The assets include about 660,000 subscribers in 20 states.

May '89— United Cable Television (UCTV) and United Artists Communications (UAC) completed a reorganization and merger whereby UCTV became a wholly owned subsidiary of United Artists Entertainment (UAE) and UAC was liquidated by merger into UAE. TCI, which owned about 65% of UAC and 41% of UCTV just prior to the merger, now owns roughly 56% of UAE.

Next earnings report expected in mid-November.

Business Summary

Tele-Communications, Inc. (TCI) and its subsidiaries and affiliates operate cable television systems in 47 states. The company has significant investments in a number of cable TV programming services. TCI also participates in the acquisition, operation and development of cable systems through more than 25 affiliate relationships. Through its 56% interest in United Artists Entertainment, TCI operated 686 theaters with an aggregate of 2,677 screens as of year-end 1988. Cable accounted for 75% of consolidated revenues and 90% of operating income in 1988, while theaters represented 25% and 10%, respectively.

The company is the largest cable system operator in the U.S. At the end of December 1988, TCI and its consolidated subsidiaries and affiliates owned systems serving 6,160,000 basic and 4,564,000 pay cable subscribers. The company's minority-owned firms owned systems serving 2,984,000 basic and 2,700,000 pay subscribers at December 31, 1988. TCI grew rapidly through acquisitions in the three years through 1988, having added more than 3.35 million subscribers during that period.

Dividend Data

No cash dividends have been paid. The shares (both classes) were split two for one in October 1989, three for two in August 1987 and two for one in July 1986.

Finances

As of December 31, 1988, net operating loss carryforwards of about $494 million were available to offset future tax liabilities; at the same date, TCI had remaining available investment tax credits of about $74.4 million.

At year-end 1988, there were 64,214,314 (adjusted) Class A and 2,400,000 Class B shares of TCI common stock reserved for issuance under exercise privileges related to options, warrants and convertible debt.

In November 1988, directors authorized an increase in the stock repurchase program to 40 million (adjusted) shares of either class of common stock, from the 20 million initially approved in October 1987.

2197

NYSE Symbol TDY Options on CBOE & Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 20'89	1989					
353¾	380¾-331⅝	13	4.00	1.1%	B+	0.90

Summary

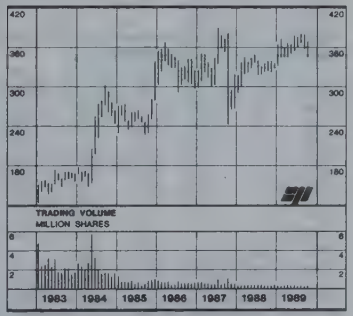
Teledyne is a diversified producer of industrial and aviation engines, machine tools, aviation and electronics equipment, specialty metals and consumer products, and owns life, liability and health and casualty insurance companies. It also holds stakes in publicly traded Curtiss-Wright (45%) and Litton Industries (28%). Share earnings are usually affected by significant gains from sales of investments. TDY is considering the spin-off of its insurance and finance subsidiaries in late 1989.

Current Outlook

Earnings (for TDY as now constituted) for 1989 are projected at $25.00 a share, versus 1988's $34.03, which includes a gain of $10.55 on sale of investments. For 1990 share earnings are estimated at $29.00.

Cash dividends should continue at $1.00 quarterly. TDY is considering a spin-off of its insurance and finance subsidiaries in the form of a stock dividend.

Revenues in 1989 for the company as presently constituted should advance moderately, largely reflecting gains for specialty metals. Margins, however, have narrowed because of declines for electronics and aviation and underwriting losses for the insurance segment. Profits from investment sales are likely to be smaller. For 1990 improved earnings should reflect likely gains for the insurance group.



Total Revenues[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,135	1,114	822	806
Jun.	1,178	1,129	781	834
Sep.	1,147	1,108	806	787
Dec.	---	1,247	808	835
	---	4,598	3,217	3,241

Total revenues for the first nine months of 1989 rose 3.3%, year to year. Operating margins narrowed due to a decline in aviation and electronics segment profits and insurance underwriting losses. With gains on sale of investments substantially smaller, pretax income was down 38.5%. After taxes at 34.0%, against 34.5%, and larger equity in investments, net income declined 33.2%, to $17.64 a share from $25 36.

Common Share Earnings[2] ($)

Dec.	E7.35	8.68	13.60	4.01
	E25.00	34.03	32.25	20.35

Important Developments

Jun. '89— TDY reported that it was considering a spin-off of its insurance and finance subsidiaries to shareholders. These units accounted for about one-fourth of total company revenues in 1988. If approved, the spin-off would be consummated in the fourth quarter of 1989 and TDY shareholders would receive shares in the new company.

Next earnings report expected in late January.

Business Summary

Teledyne is a conglomerate with widely diversified interests. Business segment contributions in 1988:

	Sales	Profits
Aviation and electronics	34%	28%
Industrial	17%	17%
Specialty metals	19%	22%
Consumer	7%	7%
Insurance	21%	22%
Other	2%	4%

Aviation and electronics products include aircraft engines (TDY makes half of the general aviation piston engines in the U.S.), airframe structures, remotely-piloted vehicles, drone systems, spacecraft, and avionics. Other products include semiconductors, relays, aircraft-monitoring and control systems and military electronic equipment.

The major product of the industrial segment is internal combustion engines, including the manufacture of air and water cooled, gasoline and diesel fueled engines. Other industrial products include machine tools, dies and consumable tooling, various automated production equipment, and a variety of analytical instruments.

Specialty metals include zirconium, high-speed and alloy steels, tungsten and molybdenum.

Consumer products include shower massages, water filters and high fidelity speakers

Insurance subsidiaries primarily offer casualty insurance and life, accident and health insurance. Investments (and approximate voting percentage) accounted for by the equity method include Curtiss Wright (45%) and Litton Industries (28%).

Dividend Data

Cash dividends were initiated in early 1987.

Summary

On November 8, 1989 Dow Jones & Co., owner of about 67% of TLR's common shares outstanding, amended its cash tender offer for all remaining shares to $21 a share from $18 after a special committee of TLR's independent directors determined that the original offer was inadequate. The revised offer, which has been approved by TLR's independent directors and is not contingent upon any minimum number of shares being tendered, expires on November 22, 1989, unless extended.

Business Summary

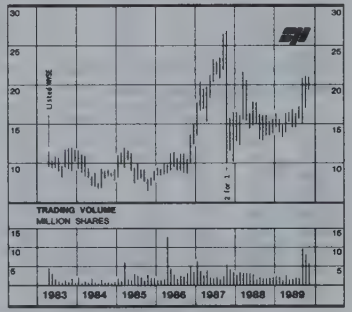
Telerate provides financial market data through its worldwide computerized information system, the Telerate Financial Information Network. Operations are conducted through three major operating subsidiaries: Telerate Systems Inc. (which operates the business in the U.S.); CMQ Communications Inc. (Canada); and Telerate International Co. (outside of North America).

Financial market data are provided to securities firms, banks, corporations, and other financial institutions through video display screens located at subscribers' premises throughout the world. Input for the network is provided from more than 1,900 banks and other financial institutions, including leading brokers and dealers in the relevant markets, as well as financial news services.

The network provides over 60,000 video pages of prices, rates, market data and news covering major financial markets, including U.S. Treasury and Federal agency securities, money market instruments, foreign exchange, U.S. mortgage backed securities, precious metals, financial futures and energy, quotes for publicly traded equity securities, as well as financial news services, market commentary and analysis. The system also offers services provided by third parties, including quotes for publicly traded securities from Quotron, Standard & Poor's Municipal Bond Service, the Dow Jones and Bond Buyer newswires, and money market commentary from independent analysts and services.

The network provides data through over 75,700 video display screens, of which over 50,000 are owned by the company. As of December 31, 1988 about 60% of the display screens were located in North America, and the balance throughout the rest of the world.

Business outside North America, conducted through Telerate International Co. (formerly AP-Dow Jones/Telerate Co.) accounted for 46% of revenues and 52% of operating income in 1988, compared with 44% of revenues and 38% of operating income in 1987.



Cash Tender Offer

Nov. '89— Dow Jones & Co., holder of some 63,609,170 TLR common shares (about 67% of those outstanding) amended its cash tender offer for all remaining TLR shares to $21 a share, from the $18 offered on September 26, after a committee of TLR's independent directors determined that the original offer was inadequate. The revised offer, which has been approved by TLR's independent directors and is not contingent upon any minimum number of shares being tendered, would expire at midnight November 22, unless extended. The merger is expected to be completed by January 2, 1990.

Next earnings report expected in early February.

Revenues[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	122.7	104.6	72.8	50.1
Jun.	126.7	109.4	79.8	54.3
Sep.	127.8	112.3	86.0	61.0
Dec.		114.0	97.2	66.9
		440.4	335.8	232.3

Revenues for the nine months ended September 30, 1989 rose 16%, year to year, reflecting continued subscription growth to the company's services. Margins narrowed, reflecting higher operating expenses and increased general and administration costs associated with international expansion. Following higher equity in the losses of associated companies, pretax profits was off 10.5%. After taxes at 40.9%, versus 40.7%, net income declined 10.8%, to $0.66 a share from $0.75.

Dec. 26'89	1989					
54⅝	68¼-46¾	9	1.16	1.8%	NR	1.14

Summary

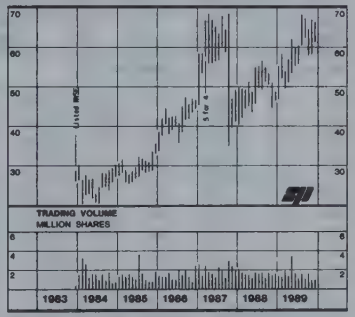
This forest products company is a major factor in corrugated containers and containerboard, and also produces market pulp, paperboard and building products. TIN has large holdings of timberlands in Texas, Louisiana and Georgia. Through acquisitions, TIN has expanded into various financial services operations. Sales and earnings are sensitive to cyclical economic fluctuations. The outlook for 1990 is excellent.

Current Outlook

Earnings for 1990 are projected at $8.50 a share, compared with the $7.85 estimated for 1989.

The $0.29 quarterly dividend will likely be raised early in 1990.

Sales for 1990 should continue strong, based on good demand and firm prices for pulp, containerboard and paperboard. Building products sales should benefit from strong lumber prices. Further earnings gains are likely as long as the general economy holds strong.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	463	426	391
Jun.	---	477	449	395
Sep.	---	480	455	419
Dec.	---	---	445	398
	---	---	1,774	1,603

Sales for the nine months ended September 30, 1989 rose 6.8%, year to year, reflecting higher shipments and prices in the paper groups. Margins widened on the higher pulp and paper prices, and pretax earnings increased 7.8%. After taxes at 34.0%, versus 33.8%, net income was up 7.4%. Share earnings were $5.89, compared with $5.44.

Common Share Earnings ($)

Dec.	E2.20	E1.96	1.71	1.19
	E8.50	E7.85	7.15	4.69

Important Developments

Nov. '89— The company announced $200 million of capital projects for its Inland Container subsidiary. Included were $160 million for a new recycled containerboard mill, $25 million for a new linerboard product line at the Orange, Texas mill, and $15 million to build a new corrugated box plant near Richmond, Va.

Jul. '89— Second quarter earnings were adversely affected by a $0.13 a share write-off resulting from the sale of National Fidelity Life Insurance Co., which was deemed too small to achieve a low cost mode of operation.

Feb. '89— The company adopted a preferred stock purchase rights plan as an anti-takeover move.

Next earnings report expected in late January.

Business Summary

Temple-Inland is a forest resource company with major interests in paper, packaging, building products, mortgage banking and insurance. The company was spun-off by Time, Inc. in 1984. Business segment contributions in 1988 (profits in million $):

	Sales	Profits
Container and containerboard	52%	$221
Pulp and paperboard	16%	83
Building products	15%	25
Other activities	2%	1
Financial services	16%	-6

Temple-Inland produced 1,836,000 tons of containerboard and 599,000 tons of bleached paperboard at its seven mills in 1988. Most of the containerboard is converted into corrugated shipping containers at 32 TIN box plants.

Building products include lumber, plywood, particleboard, gypsum wallboard, rigid foam insulation, hardboard siding, fiberboard insulation sheathing, and oriented strandboard.

Financial services operations are involved primarily in mortgage banking, real estate development, insurance, and savings and loan activities.

Temple-Inland owns nearly 1.8 million acres of timberland, principally in East Texas, Louisiana and Georgia.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Summary

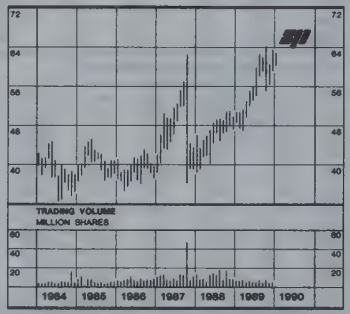
This holding company is involved in natural gas pipeline operations, construction, farm equipment, shipbuilding, agriculture and land development, automotive components, and packaging. In June, 1989 TGT began to restructure its automotive parts unit and redeploy funds into areas that have greater potential. Earnings have recovered in 1989, reflecting higher gas pipeline profits and a stronger agricultural market. Further gains are expected in 1990.

Current Outlook

Share earnings for 1990 are projected at $5.00, up from an estimated $4.40 for 1989.

Dividends should continue at $0.76 quarterly.

Pipeline profits for 1990 should increase slightly on higher throughput. Farm and equipment profits are expected to make a small advance, reflecting continued improvement in the agricultural market. Automotive parts and packaging profits should benefit from wider margins, but shipbuilding profits should decline on lower margins. Long-term prospects are strongly enhanced by pipeline operations serving markets which should show strong demand growth for gas for environmental reasons.



Operating Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	3.32	3.29	3.63	3.94

Dec.	---	3.60	3.97	3.62
	---	13.23	14.79	14.53

Revenues for the nine months ended September 30, 1989 rose 5.8%, year to year. Benefiting from higher pipeline profits, a stronger agricultural market, and cost reduction efforts at farm and construction equipment operations, net income advanced to $379 million ($2.88 a share, on 14% fewer shares) from $176 million ($1.06), which excludes income from discontinued operations of $48 million ($0.33).

Important Developments

Dec. '89— TGT acquired the assets of C.M. Brake, a Canadian manufacturer of heavy duty friction brakes. Separately, TGT said that Union Pacific Resources Co. signed an agreement to transport 50 million cubic feet per day of natural gas. In November TGT entered into a joint venture with Noise Cancellation Technologies, Inc. to produce and market electronic mufflers for the automotive industry. In October TGT said that it planned to spend up to $300 million over the next 15 months for repurchase of its common shares.

Sep. '89— TGT completed the divestiture of its retail automotive business by selling its 723 muffler shops to a group of Canadian investors; proceeds were used to acquire a ride-control company in the United Kingdom and a brake manufacturing plant.

Next earnings report expected in early February.

Business Summary

Contributions to revenues (before elimination of intergroup sales) and operating income of this diversified energy company in 1988:

	Revs.	Profits
Pipelines	23%	12%
Farm & construction equip.	32%	-6%
Automotive	13%	21%
Shipbuilding	13%	18%
Packaging	10%	22%
Chemicals & minerals	9%	6%
Other	Nil	27%

Tennessee Gas Inc. transports and sells gas through a 18,000-mile interstate pipeline system, primarily to or for other gas transmission or distribution companies for resale in the Mid-Atlantic, New England and upper Midwest regions of the U.S. Gas sales and transportation volumes in 1988 were 2,180 Bcf, versus 2,008 Bcf a year earlier.

The farm and construction equipment operation, conducted primarily through J.I. Case Co., manufactures and sells worldwide a full line of farm equipment and light and medium-sized construction equipment

Walker Manufacturing Co. and Monroe Auto Equipment Co. conduct automotive parts operations.

Newport News Shipbuilding and Dry Dock Co. constructs, repairs and reconditions vessels, primarily for the Navy. Other subsidiaries include Packaging Corp. of America, Albright & Wilson Ltd., Tenneco Minerals, and Tenneco Credit Corp.

Dividend Data

Dividends have been paid since 1948. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Teradyne, Inc.

NYSE Symbol TER Options on Pacific (Jan-Apr-Jul-Oct)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 7'89	1989					
11½	14¾-10¾	NM	None	None	C	1.70

Summary

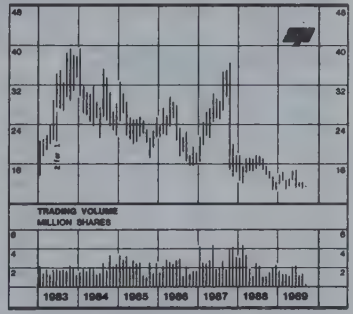
Teradyne is a leading manufacturer of automatic test equipment for the semiconductor, printed circuit board and telecommunications industries, and makes backplane connectors. Following two years of losses, the probable absence of nonrecurring charges and savings from a restructuring should lead to meaningful earnings in 1989 despite a substantial slowing of growth in the electronics industry. Further progress is likely in 1990 even though only modest growth is projected for the electronics industry.

Current Outlook

Earnings for 1990 should reach $0.80 a share, up from the $0.60 projected for 1989.

Cash dividends have never been paid.

Revenues for 1990 are projected to increase more than 10% due to new product introductions and well maintained capital spending by the electronics industry. Despite a continuation of the slowing growth that the industry experienced in 1989, capital spending by electronics companies is likely to be relatively strong due to cautious ordering during the industry's rebound over the past several years and continuing technological advances. Generally healthy finances at electronics companies should further facilitate equipment purchases. Profitability should benefit from the higher volume, limited increases in spending, and cost savings. Long term prospects appear bright due to a likely period of increased capital spending by the electronics industry.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	121.2	108.3	91.4	75.2
Jun.	128.3	108.5	94.6	74.3
Sep.	---	119.0	95.6	83.0
Dec.	---	126.6	96.1	73.6
	---	462.3	377.7	306.1

Sales for the six months ended July 1, 1989 increased 15%, year to year, despite a substantial slowing of growth in the electronics industry. The higher volume and well controlled costs, including savings from the 1988 restructuring, allowed margins to widened significantly, and pretax income more than tripled. After taxes at 31.5%, versus 34.0%, net income advanced to $0.32 a share from $0.08.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986

Dec.	E0.22	d0.32	d0.40	Nil
	E0.60	d0.11	d0.76	0.01

Important Developments

Jul. '89— TER said that the sales increase for the first half reflected greater demand from the semiconductor and computer industries. It noted that the wider margins primarily resulted from only a slight increase in engineering and development and selling and administrative expenses.

Next earnings report expected in late October.

Business Summary

Teradyne, Inc. is a manufacturer of electronic systems and software and backplane connection systems used in the electronics and telecommunications industries. Contributions (profits in million $) by industry segment in 1988 were:

	Sales	Profits
Electronic systems and software	85%	-$0.3
Backplane connection systems	15%	7.9

Exports contributed 46% of total sales in 1988, compared with 39% in 1987.

The company designs, manufactures, markets, and services electronic systems and software used by component manufacturers in the design and testing of their products and by electronic manufacturers for the incoming inspection of components and for the design and testing of circuit boards and other assemblies. The compoany's electronic systems and software are also used by telephone operating companies for maintenance of their subscriber telephone lines and related equipment.

Electronic systems and software produced by the company include: test systems for a wide variety of semiconductors, including digital and analog integrated circuits, test systems for circuit boards and other assemblies, test systems for telephone lines and networks, and computer-aided engineering software used in the design of electronic components and assemblies. Systems are computer-controlled and require extensive software support by both the customer and Teradyne. Prices range from less than $100,000 to over $2 million, while software prices typically range from $10,000 to $500,000.

Teradyne also makes backplane connection systems, principally for the military/aerospace, telecommunications, and computer industries.

Engineering and development expenditures amounted to 13.3% of sales in 1988, compared with 16.3% the year before.

Dividend Data

No cash dividends have ever been paid.

Summary

This small energy company engages primarily in crude oil refining, marketing and transportation. TSO also has minor exposure in exploration and production as well as oil field services. Since 1985 results have been impaired by reduced volumes and an unfavorable pricing environment. Common dividends were omitted in 1986, and in May, 1989 directors deferred payment of preferred dividends. In August, 1989 Harken Energy Corp. proposed to acquire TSO for $11.75 in cash for each TSO common share.

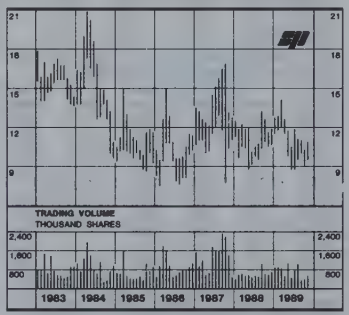
Business Summary

Tesoro Petroleum is a natural resource company engaged primarily in the refining, marketing, and transportation of crude oil products. Other activities include oil field services and exploration for crude oil and natural gas. In fiscal 1988, TSO sold substantially all of its domestic onshore and offshore oil and gas producing properties as well as its crude oil gathering and transportation assets, except those relating to its Alaskan operations. The transactions resulted in a pretax gain of $39.2 million. Offsetting these gains were a $20.6 million charge related to the Internal Revenue Service and a $27.0 million settlement related to Federal petroleum price and allocation regulations. Contributions to profits by industry segments in recent years (in million $):

	1988	1987
Ref., mkting & crude supply	$65.9	$31.1
Exploration & production	18.0	8.1
Oilfield services	-7.1	-10.0

The company's Kenai, Alaska Refinery, has a crude oil processing capacity of 72,000 b/d; throughput in fiscal 1988 averaged 71,784 bbls. a day, or 99.7% of capacity. The refinery is designed to run 100% Alaskan North Slope crude and produces a full range of petroleum products. Wholesale refined products are sold in the bulk market and through 21 terminals, primarily on the West Coast. In fiscal 1988, these marketing operations sold about 40,000 b/d. Oil field services consisted of equipment rentals and the supply of lubricants, fuels and specialty petroleum products. Unprofitable contract drilling operations were discontinued in fiscal 1988.

Net production in fiscal 1988 was 4,266 bbls. per day of crude (60% from Indonesia) and 12,421 Mcf a day of natural gas (from the U.S.). Net proved reserves at the fiscal 1988 year-end were 4,000 barrels of oil (3,748,000 in fiscal 1987) and 208 million cf of natural gas (52.6 Bcf), reflecting TSO's fiscal 1988 sale of substantially all of its domestic oil and gas producing properties.



Important Developments

Oct. '89— Harken Energy Corp. (HEC: NYSE) received an extension of its financing commitment for the planned acquisition of TSO. Harken said Bankers Trust Co., from which HEC had obtained a commitment to provide the necessary financing, had extended until December 15, 1989 its financing commitment. In August, 1989 Harken submitted a proposal to acquire TSO through an exchange of $11.75 in cash for each TSO common share. TSO had about 14.1 million common shares outstanding and preferred shares convertible into 2.3 million common. The offer was valued at about $190.0 million. Harken said if TSO had not entered into a merger agreement by December 15, HEC's offer would be withdrawn.

Next earnings report expected in early February.

Gross Oper. Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	143	336	297	500
Mar.	178	328	338	366
Jun.	223	280	313	330
Sep.	219	180	366	277
	763	1,124	1,314	1,473

Revenues for the fiscal year ended September 30, 1989 (preliminary) fell 32%, year to year, owing mostly to the sale of of TSO's oil and gas properties in fiscal 1988. As a result of lower margins in the refining business, and nonrecurring charges of $30.7 million versus $8.4 million, there was a net loss of $30.5 million, compared with a loss of $19.4 million a year earlier. After the accrual of preferred dividends, the per share loss in fiscal 1989 was $2.83, compared with $2.04 a year before.

Dividend Data

Common dividends were omitted in September, 1986 after being resumed in 1980. In May, 1989 TSO deferred dividends on the outstanding cumulative preferred stocks. As of June 30, 1989 preferred arrearages amounted to approximately $2,294,000. A "poison pill" stock purchase right was adopted in 1985.

Finances

In their report on TSO's fiscal 1988 financial statements auditors noted the existence of uncertainties with contracts with the State of Alaska for the purchase of State royalty crude oil for the company's refining operations. TSO is unable to predict the outcome of its contractual dispute with the State.

Summary

This international petroleum and chemical concern has been engaged in an extensive restructuring program. The restructuring was designed to strengthen TX's financial position and to enhance its market competitiveness following the company's $3.0 billion settlement payment to Pennzoil Co. and emergence from bankruptcy in early 1988. The restructuring enabled the company to pay two special dividends valued at $4 each in 1989. The restructured Texaco is positioned to expand its exploration and production activities and to exploit refining and marketing opportunities worldwide.

Current Outlook

Share earnings for 1990 are projected at $4.95, versus 1989's estimated $9.60, which includes a net nonrecurring gain of $4.87.

The $0.75 quarterly dividend, reinstated with the June, 1988 payment, is the minimum expectation.

Revenues for 1990 are projected to show some modest improvement, reflecting higher gas prices and increased gas production. Worldwide upstream operations will be limited by volatile crude prices. Downstream margins are projected to benefit from greater demand and possibly increased market share. Profit comparisons will be limited by absence of 1988's nonrecurring gain.

Gross Oper. Income (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	7.23	8.42	8.27	9.31
Jun.	8.15	8.69	8.27	7.60

Dec.	---	8.07	9.10	7.61
	---	33.54	34.37	31.61

Revenues for the nine months ended September 30, 1989 fell 8.0%, year to year, excluding the operations of Texaco Canada, Deutsche Texaco, and the Star Enterprise joint venture. Owing mostly to a $1.2 billion net gain primarily on the sale of the Canadian unit, net income was $2.1 billion ($8.19 a share on 4.8% more shares), versus $1.0 billion ($4.14).

Important Developments

Oct. '89— TX entered into an agreement to acquire oil and gas assets from Tana Production Corp. for $476.5 million, consisting of $95.1 million in cash and $381.4 million in shares of a new, nonvoting variable rate preferred stock. The properties are located in south Texas and contain recoverable reserves of 435 Bcf of natural gas and approximately 4 million barrels of oil. The acquisition is expected to be closed by year-end 1989. The purchase is part of TX's broader strategy to increase its reserve base through aggressive exploration and acquisitions. The purchase strengthens the company's position as a producer and distributor of natural gas. Through September 30, 1989 TX had expensed some $1.4 billion in capital and exploratory expenditures, compared with $1.9 billion in 1988.

Next earnings report expected in late January.

Business Summary

Texaco is a major integrated international oil company. TX has been engaged in an extensive restructuring program following its Chapter 11 bankruptcy filing (April 12, 1987 to April 7, 1988) and the 1988 $3.0 billion settlement with Pennzoil Co. In December, 1988 TX formed a joint venture with the Saudi Arabian Oil Co. (Star Enterprise) entailing the sale of a 50% stake in its refining and marketing operations in 23 East and Gulf Coast states. In June, 1988 TX sold its German unit and in February, 1989 the company sold its Canadian subsidiary. As part of the restructuring, TX concluded an agreement with financier Carl Icahn who sold his 17.3% interest in TX in June, 1989.

Oper. Profits	1988	1987
Refining & marketing	52%	11%
Exploration & production	35%	84%
Petrochemical	12%	6%
Marine transportation	1%	-3%

In 1988 net production of crude oil and natural gas liquids (including interests in non-subsidiary companies) averaged 990,000 barrels a day (1,056,000 b/d in 1987), natural gas sales 3.3 billion cubic feet a day (2.8 Bcf), refinery input 1,877,000 (1,892,000 b/d), and petroleum product sales 2,787,000 b/d (2,734,000 b/d).

Net proved reserves at the end of 1988 were 2,992 million barrels of crude oil and natural gas liquids (3,089 million bbls. in 1987) and 7,238 billion cubic feet of natural gas (7,847 Bcf).

Dividend Data

The $0.75 quarterly dividend, suspended when TX entered bankruptcy in April, 1987, was reinstated in mid-1988. A revised "poison pill" stock purchase right was adopted in 1989. Payments in the past six months:

Oct. 31'89	1989					
31⅞	46¾-30⅜	8	0.72	2.3%	B+	1.42

Summary

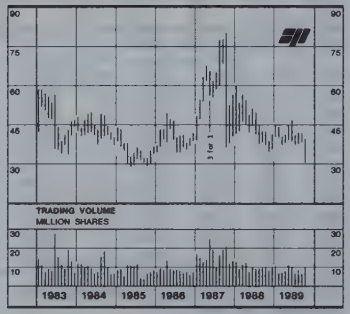
Texas Instruments is one of the world's largest producers of semiconductors. It also derives over half of its revenues from defense electronics, computers, terminals and calculators. A 40% interest is held in a seismic services company. Following several years of sharply higher profits, lower earnings are anticipated for 1989 due to slowing growth in the semiconductor industry, pressure on defense electronics profits, and continuing losses in the digital segment. A partial recovery appears likely in 1990.

Current Outlook

Earnings for 1990 should approximate $3.80 a share, up from the $3.50 a share projected for 1989.

Continuation of the $0.18 quarterly dividend is expected.

Sales for 1990 are expected to increase approximately 5%. The gain is likely to be restricted by only minimal growth in the semiconductor industry and continuing pressure on prices. Defense electronic operations are also projected to experience only limited sales growth as well due to continuing pressures on the defense budget. The digital products segment is likely to grow more rapidly after several years of declining sales. Despite recent employment reductions and other efforts to reduce costs, margins are likely to widen. The company's strong commitment to maintaining its technological lead augurs well for the longer term.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,561	1,467	1,272	1,145
Jun.	1,564	1,558	1,372	1,244
Sep.	1,539	1,577	1,416	1,249
Dec.	---	1,692	1,535	1,336
	---	6,295	5,595	4,974

Sales for the nine months ended September 30, 1989 increased 1.3%, year to year. Due primarily to lower prices for semiconductor memory devices, reduced royalty income on semiconductors and higher depreciation in semiconductors, margins narrowed. Pretax income declined 13%. After taxes at 22.0%, versus 28.5%, net income was 5.6% lower. Following preferred stock dividends, share earnings were $2.70, versus $3.01.

Common Share Earnings ($)

Dec.	E0.79	1.05	0.85	0.30
	E3.50	4.05	2.96	0.38

Important Developments

Oct. '89— TXN said that the lower third quarter earnings primarily reflected continued slowing of the worldwide semiconductor growth rate. Cost increases on fixed-priced development programs and a $10 million nonrecurring charge caused defense electronics earnings to decline, while digital products continued to operate at a loss.

Next earnings report expected in late January.

Business Summary

Texas Instruments produces a variety of electrical and electronics products for industrial, consumer and government markets. Contributions (profits in million $) by industry segment in 1988:

	Sales	Profits
Components	48%	$424
Defense electronics	34%	217
Digital products	15%	-53
Metallurgical materials	3%	8

Foreign sales were 32% of revenues and 18% of operating income in 1988. Sales to the U.S. Government (primarily defense electronics) were 24% of the total.

Components include semiconductor integrated circuits, semiconductor discrete devices, assembled modules, and electrical and electronic control devices.

Defense electronics products include radar infrared surveillance systems and missile guidance and control systems.

Digital products include minicomputers, electronic data terminals and peripherals, geophysical and scientific equipment, electronic calculators, learning aids and other products.

Metallurgical materials primarily involve clad metals which are used in variety of applications.

Petroleum-exploration related services are performed by a 40%-owned subsidiary.

Dividend Data

Dividends have been paid since 1962. A "poison pill" stock purchase right was adopted in 1988.

Texas Utilities

NYSE Symbol TXU Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 10'90	1989-90					
34⅞	37½-27¾	9	2.92	8.4%	A	0.53

Summary

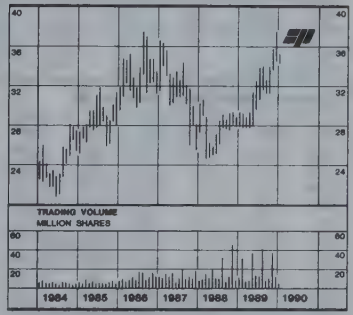
This Dallas-based utility holding company owns the two-unit Comanche Peak nuclear project. Unit 1 is scheduled for commercial operation in 1990's second quarter and Unit 2 is planned for commercial service in early 1992. The plant's prudency audit and initial estimate of a disallowance may be completed in 1990. Rate proceedings for Comanche Peak could result in a substantial write-off of disallowed costs.

Current Outlook

Share earnings for 1990 are projected at $4.65, up from the $4.37 estimated for 1989.

The $0.73 quarterly dividend may be increased 1% with the February, 1990 declaration. However, regulatory uncertainties concerning the Comanche Peak nuclear project may preclude an increase in the dividend for the next few years.

Share earnings for 1990 should benefit from higher sales and increased AFUDC associated with Unit 2 of the Comanche Peak station. The longer-term outlook may be limited by substantial disallowances as the company seeks recovery of its investment in rates.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	983	943	871	830
Jun.	1,006	944	1,011	942
Sep.	1,295	1,312	1,270	1,248
Dec.	---	954	932	911
	---	4,154	4,083	3,932

Revenues for the 12 months ended September 30, 1989 rose 2.6%, year to year, owing to higher sales and pass through items. Due primarily to lower taxes, operating income was up 7.0%. Higher AFUDC partly offset increased intereat charges, and following a 13% increase in subsidiary preferred dividends, net income advanced 3.2%. Share earnings were $4.05 on 9.8% more shares, versus $4.31.

Dec.	E0.93	0.60	0.87	0.95
	E4.37	4.00	4.55	4.45

Important Developments

Jan. '90— The company reported that construction and preoperational testing of Unit 1 of the Comanche Peak nuclear plant are complete. TXU has notified the Nuclear Regulatory Commission that Unit 1 is ready for a low-power license. Unit 1 is scheduled to load fuel by March, 1990, and commercial operation is expected prior to 1990's summer peak. TXU plans to file for an increase of about 10% in electric revenues in late January, 1990. The company last received a rate increase from the Texas PUC in early 1984 and since then has reduced rates twice due to declining fuel costs. Separately, in September, 1989 TXU resumed accrual of AFUDC on Comanche Unit 2, which is scheduled for commercial operation in 1992. At about the time Unit 2 loads fuel, TXU is planning to file a second 10% rate request. TXU's current rates are among the lowest in the nation. The prudency audit for the project is expected to be part of the rate cases.

Next earnings report expected in mid-February.

Business Summary

Texas Utilities is a holding company whose main subsidiary is Texas Utilities Electric Co. TXU provides electric service to the north central, eastern and western parts of the state with a population of about 5.2 million. The company serves the cities of Dallas, Fort Worth and Midland. Electric revenues in recent years:

	1988	1987	1986	1985
Residential	41%	39%	39%	40%
Commercial	30%	29%	29%	29%
Industrial	20%	20%	21%	22%
Other	9%	12%	11%	9%

Sources of power in 1988 were lignite coal 44%, gas 41%, and purchased power and other 15%. Peak demand in 1988 was 17,620 mw and capability totaled 20,115 mw for a capacity margin of 12%. TXU is adding to its capacity nuclear capability through its two unit 2,300 mw Comanche Peak facility. The two unit plant is projected to cost about $9.9 billion ($4,300 per kw). The project's prudency audit may be released by mid-1990. Construction financing will include new equity offerings of approximately 12 million shares in 1989 and possibly 5 to 10 million shares in 1990.

TXU's service territory is a regional center in banking and insurance and also has interests in electronics, aerospace and petrochemicals. The oil and gas industry represents about 5.0% of TXU's total revenues. The depressed conditions in financial services, real estate and the oil and gas industry have not materially impacted sales.

Dividend Data

Dividends have been paid since 1917. A dividend reinvestment plan is available.

Summary

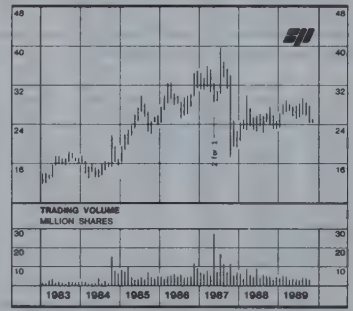
Textron is a diversified aerospace/technology manufacturer which also produces commercial products and provides financial services. Following several years of limited earnings increases, profits are likely to decline slightly in 1989 due to higher interest expense caused by the early 1989 acquisition of a business that a preliminary injunction by the Federal Trade Commission prohibits Textron from controlling or consolidating its earnings. The anticipated resolution of that issue and well controlled costs should allow earnings to rise in 1990 despite continuing pressure on the defense budget.

Current Outlook

Earnings for 1990 should approximate $3.15 a share, up from the $2.95 projected for 1989.

The dividend should continue at $0.25 quarterly.

Revenues are projected to grow modestly in 1990, led by the financial services segment that should benefit from aggressive marketing. Only a limited increase in the commercial products segment is likely due to lower shipments to the automotive industry. Aerospace technology sales should increase only modestly. Margins should widen due to the higher volume and aggressive efforts to control costs. However, if TXT is not able to reassume control over its Avdel unit, earnings will be flat due to unabsorbed interest expense connected with the acquisition.



Revenues[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	1,793	1,368	1,015
Jun.	[5]3,672	1,785	1,353	1,128
Sep.	1,735	1,717	1,286	1,339
Dec.	---	1,984	1,383	1,541
	---	7,279	5,388	5,023

Revenues for the nine months ended September 30, 1989 rose 2.1%, year to year, as higher commercial products and financial and other services revenues more than offset lower aerospace/technology sales. Despite a 1.4% increase in operating income and a 2.4% decline in corporate and other expenses, a 26% increase in net interest expense caused pretax income to be 9.4% lower. After taxes at 34.5%, versus 38.0%, net income decreased 4.2%, to $2.17 a share from $2.27, before a special charge of $0.11, versus $0.34.

	E2.95	3.10	2.97	2.93

Important Developments

Oct. '89— TXT said that earnings for the first nine months of 1989 included interest expense of $16.4 million related to its Avdel unit, a fastener manufacturer based in England that was acquired in early 1989. However, Avdel's earnings were not included in first half results because of an injunction by the Federal Trade Commission.

Next earnings report expected in late January.

Business Summary

Textron is a diversified company with operations in three business categories. Contributions in 1988:

	Revs.	Profits
Aerospace/technology	50%	43%
Commercial products	24%	25%
Financial and other services	26%	32%

The company is one of the U.S. Government's largest defense contractors. Products produced by the aerospace/technology segment include helicopters, gas turbine engines, combat vehicles, air cushion landing craft, missile reentry systems, aircraft wing structures, and aerospace materials, controls and electronics. Major programs are the Navy's V-22 TiltRoter aircraft, the Army's LHX helicopter, and a family of "smart" munitions for the Army and Air Force.

Commercial products are primarily comprised of automotive parts, outdoor products and specialty fasteners. Automotive products include functional components and decorative metal and plastic trims. Other divisions are leading manufacturers of lawn and garden equipment, golf carts, turf maintenance equipment, watch attachments, fasteners and fastening systems.

The Financial and other services segment includes Avco Financial Services, Textron Financial Corporation, Avco Insurance Services/Balboa Life and Casualty, and Paul Revere Insurance Group.

Dividend Data

Dividends have been paid since 1942. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Aug. 25'89	1989					
54 3/4	55 3/4-46	16	2.00	3.7%	A-	1.23

Summary

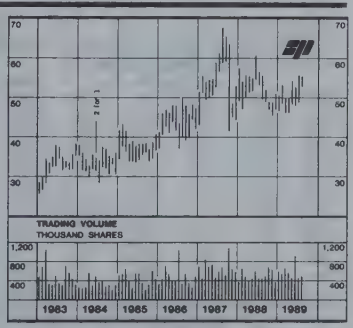
This company designs, manufacturers and markets electrical and electronic components and systems. It primarily serves OEM manufacturers, the commercial and industrial construction market, and the maintenance and repair market. Despite a slowdown in the electronics industry, a stronger dollar, start-up expenses, cost increases and pressure on pricing, higher sales and a lower tax rate should allow for a modest earnings increase in 1989. A more substantial gain is likely in 1990. The dividend was recently increased 8.7%.

Current Outlook

Earnings for 1990 should approximate $3.75 a share, up from the $3.50 estimated for 1989.

The quarterly dividend was raised 8.7%, to $0.50 from $0.46, with the July, 1989 payment.

Sales are expected to grow somewhat more than 5% in 1990, aided by higher capital spending and new product introductions. The gain is likely to be restrained by slow growth in the economy generally and the electronics industry in particular. In addition, it is likely that shipments to the automotive industry will be lower. However, margins should widen due to cost controls, a softening of commodity cost increases and the absence of start-up costs, as well as less pressure on prices. Long-term prospects appear bright due to strong secular growth in capital spending and the electronics industry and the company's strong management and finances.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	137.4	127.0	104.0	87.2
Jun.	136.2	131.6	110.9	89.9
Sep.	---	126.1	109.0	86.9
Dec.	---	129.9	112.6	83.5
	---	514.6	436.5	347.4

Sales for the six months ended June 30, 1989 increased 5.8%, year to year. Due to a strong dollar, commodity cost increases, new plant start-up costs, and competitive pricing pressures in the domestic electronics market, margins narrowed, and pretax income declined 8.0%. After taxes at 31.5%, versus 33.9%, net income declined 4.6%. Share earnings were $1.74, compared with $1.83.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986

Business Summary

Thomas & Betts is a leading manufacturer of electrical and electronic components and systems for connecting, fastening, protecting, insulating and identifying wires, components and conduits. Products include connectors, terminals, fittings, application tools, cable ties, flat cable, wire markers, and other accessories. Products are sold to many submarkets including construction, maintenance and repair, electronic and electrical equipment, electric utility, transportation and telecommunications.

Electrical and electronic original equipment manufacturing (OEM) markets account for about 60% of sales, construction and industrial for 20%, and electrical maintenance and repair markets 20%.

Electronics products account for about 40% of total sales. Major markets are computers, communications equipment, automotive, and aerospace, with applications spreading to consumer electronics products and other areas.

Foreign operations accounted for 42% of sales and 59% of pretax profits in 1988, compared with 42% and 54%, respectively, in 1987.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available.

Tidewater Inc.

NYSE Symbol TDW

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 28'89	1989					
11½	11⅞-7¼	NM	None	None	C	1.16

Summary

This company owns and operates one of the largest fleets of vessels supporting the international offshore oil and gas industry, and provides engineered products and technical services for natural gas compression. In May, 1989 TDW received a letter from a group led by Irwin L. Jacobs that stated that the group, which holds a 21% interest in TDW, was no longer interested in acquiring TDW and was withdrawing its $11 per share cash merger offer. The Jacobs group subsequently said it would sell its interest, and TDW filed a registration statement in September for a public offering of the shares.

Business Summary

Tidewater is an international energy service company which provides various support services, engineered products and technical services to the oil and gas industry. The company owns and operates one of the largest fleets of vessels supporting offshore drilling. In September, 1987 TDW sold for $29 million substantially all of its oil and gas operations. Business segment contributions in fiscal 1988-9:

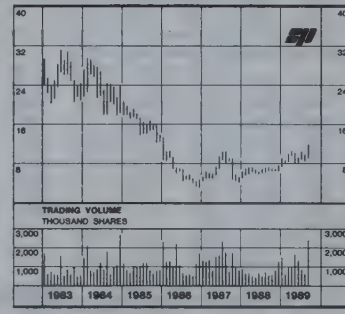
	Revs.	Profits
Marine services	74%	11%
Compression services	26%	89%

Marine service and support functions include towing mobile drilling equipment, positioning and handling anchors, transporting supplies, and supporting construction and production-related activities. At June 30, 1989 TDW's fleet, including joint-venture holdings, consisted of 255 vessels, down from 256 fiscal 1988-9 year-end.

The company rents and services compressors used in boosting pressure levels in natural gas wells, feeding gas production into pipelines and processing facilities, and for secondary and tertiary oil recovery projects.

In September, 1987 TDW sold substantially all of its oil and gas operations, which consisted of interests in two production-sharing offshore contracts in Northwest Java and Southeast Sumatra, Indonesia. TDW maintains modest interests in land-based domestic properties.

Other TDW operations include Tidewater Realty, a wholly-owned subsidiary which manages all domestic fee and leasehold real estate used in TDW's operations, and Pental Insurance Co., a subsidiary which participates in various reinsurance treaties that reinsure aviation, marine, property and casualty risks for other insurance companies and Lloyds of London underwriters.



Important Developments

Sep. '89— TDW announced that it had filed a registration statement with the SEC in connection with a proposed public offering of 4,631,400 (21%) of its common shares held by a group led by Irwin L. Jacobs. In May the group informed TDW that it was no longer interested in acquiring the company and was withdrawing its previously announced $11 per share cash merger offer. At that time, however, the Jacobs group added that it was interested in the purchase of TDW's compression business. Subsequently, TDW and the Jacobs' Group mutually decided not to pursue such a transaction.

Next earnings report expected in early November.

[1]Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	44.8	44.3	34.4	45.3
Sep.		48.1	35.3	43.9
Dec.		47.7	41.5	40.2
Mar.		42.6	44.6	43.7
		182.7	155.9	173.1

Revenues for the three months ended June 30, 1989 rose 1.3%, year to year, as increases in the compression segment outweighed lower marine services revenues. Margins narrowed in the compression segment, reflecting a less favorable product mix, and with total costs exceeding revenues in both periods, the net loss widened to $5.1 million ($0.24 a share) from $4.4 million ($0.20).

Dividend Data

Common dividends were omitted in mid-1986 after having been paid since 1962. Dividends on the adjustable rate preferred, deferred in 1986, were reinstated in December, 1987. At Nonember 1, 1989 arrearages on the preferred were $8.2625 a share.

Finances

In June, 1989 TDW completed debt restructuring agreements with its major lenders covering approximately $102 million of debt. Under terms of the agreements, principal payments of $4.8 million were made at the time of closing of the agreements, with additional principal payment requirements of $12.9 million in fiscal 1989-90, $14.9 million in 1990-1, $16.9 million in 1991-2, $20.7 million in 1992-3, $18.6 million in 1993-4, and $13.2 million in fiscal 1994-5. Interest rates on the debt, which average about 10%, remain unchanged.

124	182¾-103⅛	NM	1.00	0.8%	B+	0.98

Summary

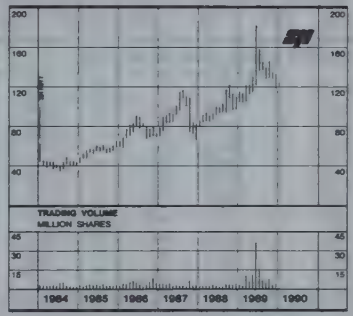
In July, 1989 Time Warner (formerly Time Inc.) completed a tender offer for 100 million shares of Warner Communications (WCI) for $7 billion, raising its stake in WCI to 59.3%. TL will acquire the remainder of WCI's stock for two kinds of new preferred stock with a book value of $5.5 billion plus shares in the BHC television subsidiary of Chris Craft Industries. While debt service costs will impair near-term profitability, and deficits are expected through 1992, longer-term prospects are extremely favorable.

Current Outlook

A deficit of roughly $5.70 a share is projected for 1990, versus a deficit of $3.60 estimated for 1989.

The $0.25 quarterly dividend is expected to be maintained.

The outlook for revenues and operating profits of each of the major operations is favorable for 1990, but the heavy debt service costs related to the acquisition of Warner Communications will impair profitability. Including preferred dividend requirements, the company will report net losses through 1992. Although highly leveraged, the longer term outlook is excellent for the company.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,136	1,065	939	874
Jun.	1,218	1,102	1,042	945

Dec.	---	1,207	1,138	1,029
	---	4,507	4,193	3,762

Revenues for the nine months ended September 30, 1989d advanced 38%, year to year, reflecting the purchase of Warner Communications. Operating income gained 37%, but after other items, including a nearly 8-fold increase in interest expense, there was a net loss of $33 million ($0.56 a share), versus net income of $231 million ($4.00).

Dec.	Ed3.04	1.01	0.88	0.20
	Ed3.60	5.01	4.18	5.95

Important Developments

Dec. '89— TL completed the sale of Scott, Foresman and Company to a unit of Harper & Row for about $455 million, including assumption of $48 million in debt. Separately, TL said that it plans to acquire the remaining 41% of Warner Communications in early January for a package of securities that the company valued at about $70 a share. The package will consist of two kinds of new TL convertible preferred stock with a book value of about $5.5 billion, and common shares of the BHC television subsidiary of Chris Craft Industries which represents WCI's 40% interest in that property. By avoiding additional debt in the purchase of the remainder of WCI, TL sharply reduces the short-term impact on earnings that the acquisition would have caused. In July TL completed the first step of the WCI acquisition by acquiring 100 million WCI common shares for $7 billion.

Next earnings report expected in late January.

Business Summary

Time Warner (formerly Time Inc.) is one of the world's largest media/entertainment/publishing companies following the July 1989 acquisition of a controlling interest in Warner Communications.

TL has one of the world's largest music recording and publishing businesses. Recorded music labels include Warner Bros., Elektra, Geffen, Asylum, Nonesuch, Atlantic, WEA and Reprise.

Filmed entertainment operations include Warner Bros. and Lorimar-Telepictures (acquired in January 1989) which produce and distribute theatrical films, television programming and home video.

Magazines include Time, Sports Illustrated, Life, People, Fortune, Money, Asiaweek, DC Comics, Mad Magazine, Yazhou Zhoukan, Southern Living, Progressive Farmer, Southern Accents, Cooking Light, McCall's, Working Woman, Working Mother, Parenting, President, Travel South, Hippocrates, Student Life, Baby, and SI for Kids.

The book company includes Little, Brown & Co., Oxmoor House, Warner Books, Book-of-the-Month Club and Time-Life Books.

Video operations consist of 82%-owned American Television and Communications Corp. (ATC), Warner Cable Communications (WCC) and Home Box Office, Inc. (HBO). ATC is the second largest multiple system cable TV operator, with 4.0 million basic subscribers owned or managed at year-end 1988. WCC is the fifth largest operator, with 1.6 million basic subscribers. HBO programs and markets two satellite-transmitted pay TV networks, the HBO service and the Cinemax service, which combined had about 23 million subscriptions at year-end 1988.

Dividend Data

Dividends paid since 1930. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

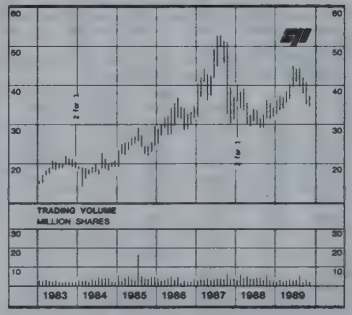
This major media and information company is primarily a publisher of newspapers, including the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, and The Hartford Courant. The company is also involved in book publishing, information services, cable and broadcast television, and magazine publishing. Growth in revenues and operating profits in the periods ahead should continue to be restricted by sluggishness in advertising demand.

Current Outlook

Earnings for 1990 are projected at $2.50 a share, versus the $2.35 estimated for 1989.

The $0.25 quarterly dividend is likely to be raised moderately in the first quarter of 1990.

Revenues for 1990 will be significantly restricted by continuing softness in newspaper and broadcasting advertising. The negative impact of sluggish advertising on profitability should be largely offset by lower newsprint prices and other cost controls, but broadcasting will continue to be affected by high programming expenses. Strong profit growth from cable operations is expected. Other publishing gains will be tempered by weakness in trade magazine advertising.



Total Revenues (Million $)

Quarter:	1990	1989	1988	1987

Important Developments

Jul. '89— TMC acquired a 7% interest in McClatchy Newspapers Inc. The company said that the purchase was for investment purposes only. Separately, TMC acquired Kaset, Inc., a firm specializing in customer relations training and related services. TMC also acquired a 29,000-subscriber cable system in Ohio.

Mar. '89— TMC discontinued publication of its 15-month old magazine, Sports inc. The Sports Business Weekly, due to lack of advertising support. TMC said, however, that its action did not lessen its commitment to the magazine field.

Jan. '89— TMC acquired Zenger-Miller, a California firm that provides training programs and consulting services. Earlier, the company acquired certain assets of PSG Publishing Co., a publisher of health science books and periodicals.

Next earnings report expected in late January.

Business Summary

Contributions to revenues and operating earnings by business segment in 1988:

	Revs.	Profits
Newspaper publishing	60%	58%
Book, magazine & other publishing	26%	24%
Broadcast television	3%	8%
Cable television	8%	8%
Other operations	3%	2%

Newspaper publishing includes The Los Angeles Times, The Baltimore Sun, Newsday and New York Newsday, The Hartford (Conn.) Courant, and the Call-Chronicle Newspapers of Allentown Pa., and two community newspapers in Connecticut. Combined average circulation in 1988 was 2,615,224 daily and 3,131,449 Sunday.

Through Mathew Bender, Richard D. Irwin, Mosby-Year Book Inc., Harry N. Abrams and several other subsidiaries, the company publishes a variety of books, including medical, business, economics, art and law books. TMC also publishes consumer and trade magazines, flight information, road maps, telephone directories and recording charts. TMC is also a leading provider of courseware for industrial training.

Four network-affiliated TV stations are operated in Dallas, Austin, St. Louis, and Birmingham, Ala. Cable television systems serve some 997,000 basic, and 702,000 pay subscribers in 14 states.

Summary

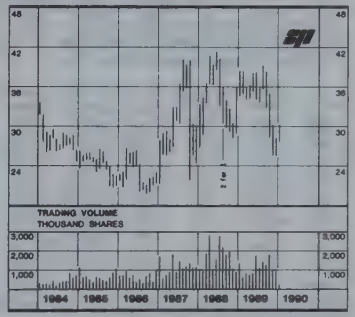
This company is the world's largest producer of tapered roller bearings, with operations highly integrated and efficient. Earnings for the first nine months of 1989 benefited from sales gains, margin expansion, decreased interest costs and a lower tax rate. A projected decline in sales along with pressure on margins will probably result in lower earnings in 1990. In November, 1989 directors authorized the repurchase of up to one million shares of common stock.

Current Outlook

Earnings for 1990 are estimated at $2.30 a share, versus earnings of $2.65 estimated for 1989.

Dividends should remain at $0.23 quarterly.

Sales for 1990 are expected to decline, reflecting the impact of lower capital goods production and decreased automotive output on volume in both the bearings and steel units. Weakness in demand for steel together with general oversupply will probably lead to lower steel prices. Possible gains in market share and the impact of anti-dumping duties should keep bearings prices stable, but a probable decline in capacity utilization from projected volume declines will cause margin contraction and lead to lower earnings in 1990.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	435	381	289	288
Jun.	414	390	303	288
Sep.	358	374	305	245
Dec.	---	409	334	237
	---	1,554	1,230	1,058

Sales for the nine months ended September 30, 1989 rose 5.4%, year to year, reflecting increased volume in the bearings unit and stronger pricing in both the bearings and steel units. Margins widened, and pretax income advanced 45%. After taxes at 37.0%, versus 42.6%, net income rose 59%, to $2.24 a share from $1.46.

Important Developments

Nov. '89— TKR said that directors authorized the repurchase of up to 1,000,000 common shares. Earlier, TKR reported earnings of $0.24 a share on a 4.1% decline in sales for 1989's third quarter, versus earnings of $0.31 a year earlier. TKR attributed the decline in sales to lower demand in both the bearings and steel units in the U. S. and said that lower plant utilization from a work stoppage resulted in lower earnings. TKR added that the impact of the work stoppage on sales and net income would persist into the early part of 1990.

Jun. '89— TKR's Tenax Co. subsidiary called for payment on July 3 all $60 million of its 8.375%debentures of 2010. Virtually the entire issue was converted into 1,993,337 TKR common shares at $30 a share as of June 30.

Next earnings report expected in late January.

Business Summary

The company is the world's largest producer of tapered roller bearings, with about 130 tapered bearing types in some 26,000 combinations. Sales and operating profits (million $) in 1988:

	Sales	Profits
Bearings	64%	67%
Steel	36%	33%

Foreign operations in 1988 accounted for 24% of sales to customers and 14% of operating profits, versus 27% of sales and 26% of operating income in 1987.

Timken's tapered roller bearing markets are diversified, serving hundreds of industries. Over the years, profitability has benefited from developing and broadening the customer base to include the construction, automotive, general industrial, mining, railroad, steel, farm, and service replacement market.

Steel operations are totally integrated, producing alloy steel in bars, billets, and seamless tubing. Steel tubing is supplied to Timken's bearing operations. In 1986, 70% of steel output was sold in the open market. Latrobe Steel, acquired in 1975, is a tool steel industry leader, producing more than 200 varieties of steel and vacuum melted alloys. Scrap steels and alloys are the basic ingredients of the company's steel products.

Costs incurred for research and development totaled $36 million in 1988, $32.0 million in 1987, $34.0 million in 1986, and $24.1 million in 1985.

Summary

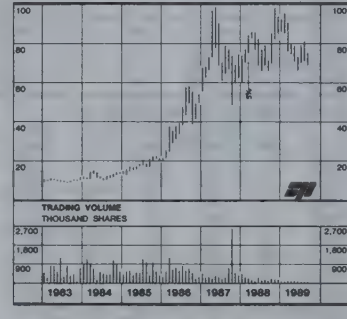
A member of the Mitsubishi Group, this firm is the oldest and largest non-life insurance company in Japan. Principal lines of insurance written by Tokio Marine are automobile, fire, cargo, hull and personal accident.

Business Summary

Tokio Marine & Fire Insurance Co. Ltd., a member of the Mitsubishi Group, is the largest non-life insurance company in Japan.

Net premiums written in recent fiscal years were divided as follows:

	1988-9	1987-8
Automobile	40.7%	40.6%
Fire & allied lines	13.9%	13.9%
Cargo & transit	6.0%	6.2%
Compulsory auto. liability	11.6%	12.0%
Hull	2.9%	3.4%
Personal accident	14.3%	13.1%
Other	10.6%	10.8%



Traditionally, the major portion of Tokio Marine's insurance has been written for industrial and commercial firms, which usually require hull, ocean cargo or standard fire coverages. The company has begun to place increased emphasis on the development and marketing of individual insurance policies, which combine long-term insurance with a savings feature.

The average loss ratio for all lines of insurance (excluding compulsory automobile liability) was 50.1% in 1988-9 (51.0% the year before). Individual product line ratios were: automobile 54.0% (56.5%), fire and allied lines 28.3% (37.6%), cargo and transit 58.9% (54.3%), hull 77.2% (65.1%), personal accident 35.6% (39.6%) and other 65.2% (51.1%). The combined loss and expense ratio amounted to 88.9% (90.1%).

Compulsory auto liability insurance in Japan is reinsured with a pool of non-life companies, which assumes 40% of the risk, the government assuming 60%. Some portion of the risks assumed by the pool is ceded back to Tokio Marine. By law, compulsory auto coverage lines may not be profitable, and balances in any year are accumulated as a tax-free reserve against possible future underwriting losses (see Finances).

The company writes nearly all non-life insurance for the Mitsubishi Group and also accepts reinsurance from and cedes reinsurance to others.

Tokio sells insurance through a domestic network of 47 branches and 434 sub-branches. The company also maintains an international presence in nearly 40 countries, which includes a branch in the U.S., as well as 39 representative and liaison offices, 20 underwriting agents and 24 subsidiaries and affiliates.

Important Developments

Sep. '89— Castle Harlan Inc. announced that Tokio Marine had agreed to purchase a 10% interest in Castle's Delaware Management Holdings Inc., a money-management concern, for $42 million. Under the agreement, Tokio Marine would receive new Delaware Management stock and the two companies would develop a joint plan to market Delaware Management's U.S. investment advisory services to U.S. clients. The closing was expected to occur in October 1989, after final approval by the U.S. Justice Department.

Review of Operations

For the fiscal year ended March 31, 1989, premiums earned were up 13% from those of 1987-8. With net investment income up by the same percentage, total operating income increased in kind. Profitability was aided by a more favorable loss ratio, and pretax income advanced 30%. After taxes at 48.0%, against 47.6%, net operating income was ahead 29%, to $623,826,000, from $482,750,000. Results exclude realized gains on investments of $80,553,000 and losses of $29,258,000 in the respective years. Translations were made at the rate of ¥132=U.S. $1.

Dividend Data

Cash has been paid in every year since 1951. The company assumes the dividend distribution fee.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.233757	—	Mar. 23	Mar. 30	Jul. 18'89

Finances

In August 1989, the company announced that it would issue $500 million in 3.5% four-year U.S. dollar bonds with equity warrants at ¥ 2,163 ($15). The pay date was September 21, 1989.

In February 1989, the company acquired a 40% interest in Continental Corporation's First Insurance Co. of Hawaii, a property/casualty insurer with more than $100 million of direct written premiums in 1988, for about $29 million.

Tokio Marine is a member of the Mitsubishi Group and, although the firms have the same fundamental competitiveness of non-associated companies, there is a tendency for the members to conduct business with one another. Through a cross-holding of shares, Tokio Marine holds a stake in most companies of the Mitsubishi Group.

Japanese insurance accounting standards prohibit distribution to shareholders of any information regarding profits or losses from compulsory auto insurance underwriting. However, statements distributed to ADR holders, prepared in accordance with generally accepted accounting principles, indicate net losses of $15,500,000 in 1988-9 and $5,760,000 in 1987-8. Accumulated compulsory auto insurance losses from April 1, 1966, through March 31, 198, totaled $217,871,000.

Capitalization

Long Term Debt: $435,561,000 (3/89).

Common Stock: 1,468,832,420 shs. (¥50 par). Each ADR equals five shs.

Approximately one-fourth is held by various members of the Mitsubishi Group (see Finances).

Nov. 1'89	1989					
16½	22⅞-8½	12	None	None	B-	1.72

Summary

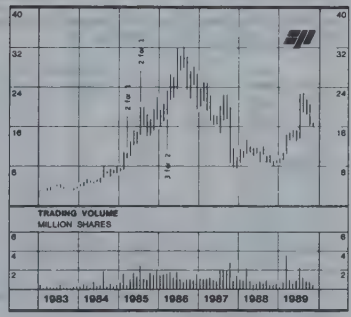
This company sell toys and games under the Tonka, Kenner and Parker Brothers brandnames. Following two years of losses caused by high interest and goodwill charges related to 1987 acquisition of Kenner Parker Toys, meaningful profitability should be restored in 1989 due to strong Real Ghostbusters demand and an aggressive new product introduction program. A further substantial gain is likely in 1990. TKA recently registered to sell 6.5 million common shares, which would nearly double the number of shares outstanding. Proceeds are to be used to reduce debt.

Current Outlook

Earnings for 1990 should approximate $2.50 a share, up from the $1.60 projected for 1989.

Early reinstatement of dividends, omitted in October, 1987, is unlikely.

Sales in 1990 should increase approximately 10%, as stronger demand for traditional toys offsets the absence of $50 million in revenues from the sale of Sega video games. Aiding the increase should be a projected decline in industrywide video games and the company's aggressive new product introduction program. Margins should benefit from the higher volume and a shift in the product mix toward higher margined traditional toys. Interest expense is also likely to be lower as proceeds from a planned sale of common stock reduces borrowings. The number of shares outstanding will, accordingly, be sharply higher.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	162.2	168.4	48.3	53.2
Jun.	189.4	198.4	49.6	72.2
Sep.	274.2	267.5	76.2	96.3
Dec.	---	273.4	208.5	71.7
	---	907.7	382.6	293.4

Sales for the nine months ended September 30, 1989 declined 1.3%, year to year, reflecting lower sales of Sega video games and board games. Primarily due to a 5.5 percentage point increase in the gross profit margin, there was a substantial improvement in profitability, and pretax income totaled $14.3 million, in contrast to a loss of $12.4 million. After taxes in each period, net income totaled $4.4 million ($0.56 a share), versus a net loss of $13.2 million ($1.70).

Business Summary

Tonka Corporation designs, manufactures and markets worldwide a broad line of toys. In October, 1987 Kenner Parker Toys was acquired.

Staple product lines include Tonka's well known line of metal trucks and the Parker Brothers subsidiary's line of board and other games and its Nerf product line. Play-Doh and the Easy Bake Oven are also sold.

Major continuing lines for 1989 include Real Ghostbusters, the Sega video game system, Dress 'n Dazzle fashion play accessories and Starting Lineup baseball figures.

The company has the industry's most extensive new product introduction program for 1989, including proprietary toys and those based upon licences. This reflects management's belief that financial difficulties of certain competitors and the decision of Mattel and Hasbro to focus on staple product lines has created a major opporunity to introduce new promotional/fashion toys.

Foreign operations accounted for 34% of sales and $32.7 million in pretax income in 1988.

Dividend Data

Directors omitted the dividend in October, 1987. Payments had been resumed in 1981 after omission in early 1979. The most recent payment was $0.02 on September 24, 1987. A "poison pill" stock purchase right was adopted in 1986.

Finances

TKA has a revolving credit agreement for up to $350 million through 1993 to finance seasonal borrowing needs.

In October, 1987 the company acquired Kenner Parker Toys. The total cost of $548.8 million plus related acquisition costs of $125.9 million was financed through a $275 million term loan facility from a group of banks, $200 million of 16¼ Series A subordinated debentures, and $80 million of 17.25% Series B subordinated debentures with 560,000 common share warrants.

Capitalization

Long Term Debt: $506,000,000.

Common Stock: 7,902,296 shs. ($0.66⅔ par).
Bramah Ltd. owns about 20%.
Institutions hold approximately 36%.

Dec. 21'89	1989					
52¾	58¾-30	14	1.40	2.7%	A+	1.14

Summary

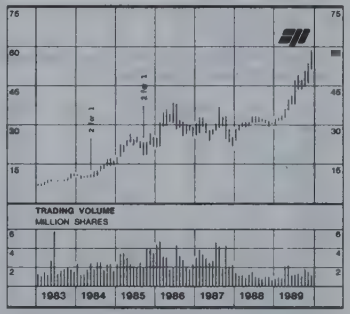
Torchmark Corp., an insurance and diversified financial services holding company, derives the largest portion of its earnings from life and health insurance operations. Through other subsidiaries, TMK offers home fire insurance, property-casualty reinsurance, individual money management and financial planning, including the sale of annuities and mutual funds and investment management for pensions and other institutions.

Current Outlook

Earnings for 1990 (excluding net realized capital gains or losses) are expected to rise to $4.10 a share, up from the $3.75 a share anticipated for 1989.

The $0.35 a share quarterly dividend is the minimum expectation.

Earnings in coming periods are expected to benefit from increased demand for medicare supplemental insurance following Congress's repeal of the Medicare Catastrophic Coverage Act. Individual life insurance premiums will continue to grow, but possible at a slower rate because lower interest rates expected in 1990 may cause a shift to more investment-oriented life products. The financial services unit should also experience revenue and profit growth, assuming no major market downturn. Share repurchases (funded by increased borrowings and internal cash flow) will benefit per-share earnings.



Review of Operations

Revenues for the nine months ended September 30, 1989 rose 5.7%, year to year, (1988 restated), as total premiums increased 1.9%, while financial service revenue was up 6.5% and investment income and realized investment gains both rose 17%. Total benefits and expenses were up 4.0%, and pretax income advanced 13%. After taxes at 32.5% versus, 33.4%, and minority interests, net income was up 12%. Share earnings were $2.94 ($2.86 in operating income) on 6.0% fewer shares, versus $2.45 ($2.38).

Sep.	1.02	0.80	0.87	0.68
Dec.		0.85	0.72	0.72
		3.20	2.98	2.72

Important Developments

Nov. '89— TMK noted that results for the first nine months of 1989 benefited from growth in life insurance premiums and financial services revenues, together with well controlled expenses. The growth in financial services revenue was primarily attributable to increased sales of investment products, as individual investors have ventured back into the mutual funds market. TMK also said its share repurchase program was ongoing, and that 1.6 million common shares had been reacquired during 1989's first nine months.

Aug. '89— TMK sold publicly $100 million of 8.25% senior debentures, due 2009. Proceeds were to be invested in a short-term instrument and upon maturity to be used to repay $100 million of debt due in July, 1990.

Next earnings report expected in early February.

Summary

The fifth largest Canadian chartered bank, Toronto-Dominion conducts a general banking business across Canada and around the world through its offices and correspondents. Overall quality of the loan portfolio continued to improve in fiscal 1988 and, aided by the resolution of the Dome Petroleum loans, earnings improved substantially. A 2-for-1 stock split was effected in July 1989.

Business Summary

Toronto-Dominion Bank, formed in 1955 through the amalgamation of Bank of Toronto and Dominion Bank, is Canada's fifth largest chartered bank, based on assets of $59.3 billion at October 31, 1988. Total income for fiscal 1988 was derived as follows:

Interest on loans & lease financing...	79%
Noninterest income.....	11%
Interest on securities	8%
Interest on deposits with banks.....	2%

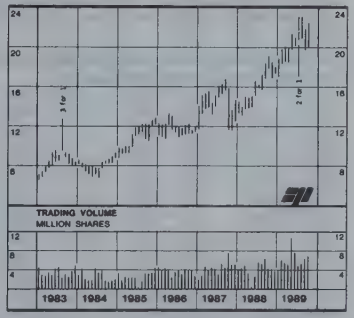
Operations are conducted through nearly 1,000 branches and offices across Canada and abroad.

In addition to the usual personal checking, savings and loan operations, the bank participates in venture capital and mergers and acquisitions markets through TD Capital Group. It also engages in leasing through Toronto Dominion Leasing Ltd. and has interests in a variety of real estate projects. Green Line Investor Service provides stock trading and discount brokerage services to customers in Ontario. In 1988, the bank also incorporated two insurance subsidiaries in Barbados.

International banking is a significant part of Toronto-Dominion's operations. Branches, regional and representative offices are maintained in about 30 cities around the world. A merchant banking subsidiary is located in Australia.

Of the $46.4 billion in total deposits at October 31, 1988, 8% were payable on demand, 37% after notice and 55% on a fixed date. Consolidated total assets were $59.3 billion, of which 3% were cash resources, 10% securities, 73% loans and 14% other assets

On a taxable-equivalent basis, the total net interest margin rose to 4.00% in fiscal 1988 from



3.82% the year before. The domestic interest margin in fiscal 1988 was 4.57%, versus 4.81% in fiscal 1987, while the international interest margin was 2.63% in fiscal 1988, against 1.68% in fiscal 1987.

Important Developments

Aug. '89— Management estimated credit losses for the fiscal year ended October 31, 1989, at $250 million. Losses of $188 million were charged to income in the nine months ended July 31, 1989. Nonaccrual loans continued at low levels—$325 million at July 31, 1989, compared with $414 million at October 31, 1988. It expected that this would be the last year that any material losses are suffered on the portfolio of loans to the 42 countries designated by the Office of the Superindendent of Financial Institutions.

Next earnings report due in late November.

Review of Operations

Net interest income for the nine months ended July 31, 1989, advanced 6.6%, year to year. Following a 7.3% increase in the provision for loan losses, 16% higher other operating expense and an 18% rise in noninterest income, the gain in pretax income was limited to 2.5%. After taxes at 31.9%, versus 38.3%, net income was ahead 13%, to $527,408,000 ($1.68 a share, after preferred dividends), from $466,734,000 ($1.50, adjusted).

Dividend Data

Bank of Toronto paid dividends in every year beginning with 1857; Dominion Bank made payments in each year from 1872. A dividend reinvestment plan is available.

Finances

The bank is exposed to a group of 38 less developed countries which have found it necessary to reschedule foreign debt owed to banks and against which Toronto-Dominion is required to carry mandatory loan loss provisions. The bank increased its reserve on loans to the LDCs to 45% at October 31, 1988. At that date the bank's net LDC exposure amounted to $602 million (which includes the Mexican risk portion of bonds received in swaps), down substantially from the $1.5 billion at year-end 1987 and $2.7 billion at the end of the preceding year.

Toys "R" Us

2243J

NYSE Symbol TOY Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 22'89	1989					
34⅜	36¼-24	25	None	None	B+	1.40

Summary

Toys "R" Us, the nation's largest toy retailer, has entered the children's retail clothing business with the opening of its Kids "R" Us chain and has expanded its toy franchise outside the U.S. TOY's aggressive pricing practices, facilitated by its efficient and strong merchandising skills, coupled with an aggressive expansion program should extend the company's market share gains in the three segments in which it operates. Having converted all of its debentures, Petrie Stores now owns about 14% of TOY common stock. The stock was split 3-for-2 in May, 1989.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 are projected at $1.65 a share, up from fiscal 1988-9's $1.36 (adjusted). Earnings for fiscal 1990-1 could approximate $2.00 a share.

The initiation of cash dividends is not expected.

Revenue growth in fiscal 1989-90 should be fueled by aggressive expansion of domestic and international toy operations, as well as the clothing division. Longer term, TOY's strong merchandising skills, superior systems and aggressive expansion, particularly overseas, should enlarge its share of the growing toy and childrenswear markets.

Net Sales (Million $)

Important Developments

Aug. '89— Management said that it was pleased with sales and earnings for the second quarter of fiscal 1989-90 since comparisons were against a very strong quarter a year earlier. One new toy store opened in fiscal 1989-90 and 66 additional stores, including 22 internationally, are planned to open in the next three months. Also, 25 Kids "R" Us clothing stores have been opened this year. Capital requirements for 1989-90 are estimated at $350 million. At August 16 TOY operated 359 toy stores in the U.S., 52 international toy stores and 137 Kids "R" Us children's clothing stores. Separately, as of March 15 TOY repurchased 2,966,250 shares (adjusted) under a 4.5 million share buyback program.

Next earnings report expected mid-November.

Business Summary

Toys "R" Us operates the world's largest chain of toy specialty retail stores. As of January 29, 1989 TOY operated 358 Toys "R" Us toy stores in 39 states, 23 Canada, 18 in the United Kingdom, two in Singapore and one each in Hong Kong and Malaysia. TOY also operated 112 Kids "R" Us clothing stores.

TOYS's merchandising strategy stresses the development of strong consumer recognition through the use of mass media advertising. Items sold include children's and adult toys, games, bicycle and wheel goods, sporting goods, electronic video games and home computers, and infant and juvenile clothing and furniture. The stores feature name brand merchandise at everyday low prices and offer extensive selections.

Kids "R" Us clothing store operations began in July, 1983 with the opening of two outlets and has expanded rapidly to 112 locations by the end of fiscal 1988-9. The stores, which range from 15,000 to 25,000 sq. ft., apply merchandising policies similar to those in the Toys "R" Us stores; namely, everyday low pricing on name brands, full assortments and liberal refund policies.

The company employs a computer inventory system which allows management to constantly monitor the current activity and inventory in each region and each store. This permits management to allocate the proper amount of merchandise to each store to keep each store adequately stocked at all times.

The company utilizes 21 warehouse/distribution centers and a large fleet of tractors and trailers, which it owns and maintains, to service its 358 domestic stores.

Business is highly seasonal with about 47% of sales taking place in the fourth quarter.

Dividend Data

No cash dividends have ever been paid.

Finances

In March, 1988 substantially all of the 7½% debentures held by Petrie Stores were converted into 9.3 million shares (adjusted) of TOY common stock. Petrie also redeemed its 8% exchangeable debentures in July, reducing its common stock investment in TOY to about 14%.

Capitalization

Long Term Debt: $173,969,000.

Common Stock: 190,743,677 shs. ($0.10 par).
Petrie Stores owns about 14%.
Institutions hold approximately 70%.

Dec. 28'89	1989					
43	48-32¾	10	1.92	4.5%	B	1.00

Summary

Transamerica is a diversified financial service organization engaged in two primary businesses: finance and insurance. TA's Finance Group, the third largest in the U.S., is engaged in commercial and consumer lending, leasing, and real estate services. Insurance operations consists of life, property-casualty, and insurance brokerage. In June, 1989 TA acquired, for approximately $95 million, Criterion Group Inc., an investment management firm with about $10 billion of assets under management.

Current Outlook

Operating earnings for 1990, excluding "fresh start" tax benefits and capital gains or losses, are estimated at $4.20 a share. This compares with the $3.50 a share expected for 1989 (which also excludes such benefits).

The quarterly dividend was raised 2.1%, to $0.48 from $0.47, in October, 1989.

Earnings for 1990 will benefit from continued growth in all life insurance lines. The resulting cash flow from those operations will also aid investment income. Pricing on standard p-c lines will likely remain weak through mid-year and underwriting losses will expand. However, a shift to more specialty (and less price sensitive) lines and expanded reinsurance operations bodes well in the long term. Brokerage profits will benefit from the expected upturn in p-c rates. Consumer lending growth may slow, and competitive pricing pressures in inventory financing operations will hurt commercial lending profits. Leasing should benefit from high utilization rates. A soft market will likely hurt real estate services.

Review of Operations

Total revenues for the nine months ended September 30, 1989 rose 10%, year to year (1988 restated). Total expenses were up 9.5%, and pretax income advanced 20%. After taxes at 30.2%, against 20.8%, net income (including $40.2 million in realized capital gains, versus $9.3 million) increased 6.2%. Share earnings were $3.23, versus $3.06, which excludes a special charge of $0.49.

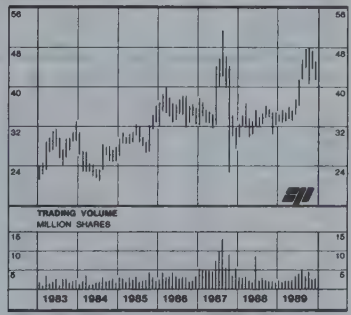
		4.27	4.02	2.55



Important Developments

Nov. '89— TA said earnings for the first nine months of 1989, while in line with expectations, continued to be impaired by the downturn in the property-casualty cycle, which has exerted downward pressure on prices. Unfavorable workers' compensation claims experience in certain areas and higher storm-related catastrophe losses exacerbated this situation. Separately, TA filed a shelf registration with the SEC, enabling it to sell publicly up to $500 million of debt securities.

Jun. '89— The company paid $94.9 million in cash to acquire Criterion Group, Inc., a Texas-based asset manager with approximately $10 billion of assets under management.

Next earnings report expected in early February.

Business Summary

Transamerica is a major financial service company primarily engaged in finance and insurance. The finance operation consists of lending, leasing and real estate services. Insurance operations include life, property casualty insurance, and insurance brokerage. Revenues, and earnings before corporate expenses and taxes in 1988 were derived:

	Revs.	Profits
Life insurance	52%	22%
Property insurance	23%	8%
Insurance brokerage	1%	10%
Real estate serv.	4%	11%
Lending	14%	37%
Leasing	6%	14%
Other	Nil	-2%

The Transamerica Life Companies market life, and accident and health insurance, reinsurance and pension and investment products. At year-end 1988 insurance in force amounted to $236.0 billion. In 1987, TA sold most of its group life and health operations. Transamerica Insurance Group provides personal, commercial and specialty property-casualty insurance. TA also holds a 39% equity interest in Sedgwick Group, a London-based insurance broker. In 1988, TA acquired TIFCO Inc., the second largest insurance premium financing company in the U.S.

Transamerica Finance Group, the third largest independent finance company in the U.S., conducts commercial and consumer lending, leasing and real estate services. In 1987, TA acquired BWAC Inc., a commercial finance company. Transamerica's real estate services include real estate tax, title and other services. Transamerica Leasing is a major lessor of intermodal transportation equipment.

In 1986 TA sold its car rental operations, completed the disposition of its airline assets, and spun-off its Delaval unit to shareholders.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

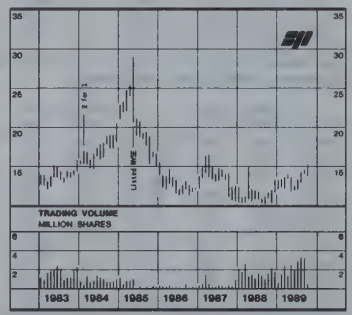
This company operates a natural gas pipeline system extending from Alberta to eastern Canada, and has equity interests in several other major pipelines and pipeline projects in Canada and the U.S. Long-term prospects are enhanced by an active expansion of TRP's pipeline network. In May, 1989 TRP spun off to shareholders its oil and gas exploration and production business.

Current Outlook

Share earnings for 1990 are estimated at C$1.05, up from the C$0.90 estimated for 1989.

Dividends are expected to continue at C$0.17 quarterly.

Profits from gas sales and transmission operations in 1990 should benefit from an expected increase in the allowed rate of return on equity and growth in the rate base. Growth in the rate base reflects a continuing expansion of the company's pipeline system to meet strong increase in demand for gas in Canada and the U. S. Share earnings progress is expected to be restricted by an expected offering of equity to help finance pipeline construction.



Operating Revenues (Million Can. $)

Quarter:	1989	1988	1987	1986
Mar.	920	930	924	1,288

Important Developments

Aug. '89— TRP filed a prospectus for an offering of C$130 million of long-term debt. TRP placed privately $125 million in long-term debt in July and in June the company redeemed its $100 million of cumulative redeemable convertible first preferred stock. Separately, TRP applied for an expansion in 1991 and 1992 of its pipeline system, which would cost about $1.2 billion and allow TRP to ship an additional 345 Bcf of gas annually.

May '89— On May 2 TRP spun off to shareholders Encor Energy Corp. (ECR), which would own and operate TRP's oil and gas exploration and production business. One common share of ECR was distributed for each TRP common share held. TRP management decided to make the spin-off to enhance shareholders' value and improve the financial flexibility of TRP.

Next earnings report expected in early November.

Business Summary

TransCanada PipeLines owns and operates Canada's main pipeline system for the transportation of natural gas from western Canada to eastern markets. It also holds interests in Trans Quebec & Maritimes Pipeline, Foothills Pipe Lines (Sask.) Ltd., Great Lakes Gas Transmission Co., and the Northern Border pipeline project. Oil and gas exploration and production operations were to be spun-off to TRP shareholders in May, 1989. Contributions to revenues in recent years:

	1988	1987
Gas sales		
Domestic	52%	49%
Export & other	20%	11%
Gas transmission	28%	40%

Gas sales volumes in 1988 amounted to 792.4 Bcf in Canada, versus 839.7 Bcf in 1987, and 280.1 Bcf of U.S. exports, against 150.5 Bcf. Gas transported for others in Canada in 1988 totaled 1,008 Bcf, compared with 954.1 Bcf in 1987, and 337.9 Bcf transported for export, versus 197.9 Bcf.

TRP is also involved in the construction of new pipelines to bring natural gas to the Alberta, Nova Scotia, and Northeastern U.S. areas.

Oil and gas exploration and production operations were spun-off to TRP shareholders in May, 1989.

Dividend Data

Common dividends were initiated in 1964. A dividend reinvestment plan is available.

Summary

This holding company operates a natural gas pipeline serving the eastern U.S., including the New York-New Jersey-Philadelphia metropolitan area. It is also involved in coal production. In September, 1989 Transco Exploration Partners, Ltd. sold certain assets for $902 million; earnings for the first nine months of 1989 rose sharply on a large gain associated with the planned liquidation of the partnership and lower nonoperating charges.

Current Outlook

Share earnings for 1990 are projected at $2.50, down from the $3.00 (including nonrecurring gains of $1.93) estimated for 1989.

Dividends should continue at $0.34 quarterly.

Gas pipeline profits for 1990 should rise sharply, reflecting higher rates, a small increase in throughput, and the absence of nonrecurring charges, including costs associated with unrecoverable take-or-pay related costs; Texas Gas Transmission should be profitable after the September, 1989 retirement of debt associated with the acquisition of Texas Gas. Profits from hydrocarbon marketing should decline on less marketing opportunities. Consolidated earnings comparisons will be hurt by the absence of a large gain on the liquidation of Transco Exploration Partners.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	714	868	928	1,143
Jun.	737	682	642	842
Sep.	632	567	777	772
Dec.	---	657	895	933
	---	2,774	3,242	3,691

Revenues for the first nine months of 1989 declined 1.6%, year to year. Income from operations was down 19%, but following a $69.4 million ($2.42 a share) after-tax gain on the initial distribution associated with the liquidation of Transco Exploration Partners, Ltd. and lower nonoperating charges, net income rose to $88.3 million ($2.48 a share) from $14.5 million ($0.14).

Important Developments

Dec. '89— A Federal Energy Regulatory Commission Law Judge required the company to make about $85.5 million in refunds and forego recovery of an additional $26.5 million associated with gas costs; E planned to follow the appropriate procedures so that the commission reviews the judge's decision.

Sep. '89— Transco Exploration Partners, Ltd. sold substantially all of its producing and development properties to Amerada Hess Corp. for $902 million. The transaction was part of a planned liquidation of the partnership, which was not expected to be completed until after 1989 year-end. Separately, E recorded a $22 million ($14 million after-tax, $0.49 a share) charge in the 1989 third quarter relating to estimated producer settlement costs that E will not be able to recover from its customers.

Next earnings report expected in early February.

Business Summary

This holding company's main subsidiary, Transco Gas, consists of: Transcontinental Gas Pipe Line (TGPL), which operates a natural gas pipeline system extending from Gulf Coast producing areas to southern and Atlantic seaboard states; Texas Gas Transmission Pipeline (acquired in 1989), which operates a pipeline system extending from Louisiana to Indiana; and Transco Energy Marketing Co., a natural gas and gas liquids marketing company. Oil and gas exploration and production are conducted through 74%-owned Transco Exploration Partners, Ltd. (EXP). Transco Coal mines coal in eastern Kentucky and Tennessee. Contributions by segment in 1988 (profits in million $):

	Revs.	Profits
Pipeline	43%	$59.7
Hydrocarbon marketing	48%	17.1
Coal	9%	8.6
Expl. & prod.	Nil	- 2.4

Gas pipeline sales in 1988 were 234 Bcf (397 Bcf in 1987). Gas transported for others was 1,246 Bcf (1,002 Bcf). At year-end 1988 proved gas reserves were estimated at 339.2 Bcf (399.1 Bcf).

Gas marketing sales in 1988 were 594 Bcf (521 Bcf in 1987). Liquid sales totaled 17.1 million bbls. in 1988 (19.1 million bbls.).

Coal shipments in 1988 totaled 8.1 million tons (10.7 million tons in 1987). Recoverable coal reserves totaled 187.5 million tons in 1988 (249.3 million in 1987).

Dividend Data

Dividends have been paid since 1952. A "poison pill" stock purchase right was adopted in 1986.

37 3/8	45-34 1/2	7	2.40	6.4%	B+	1.02

Summary

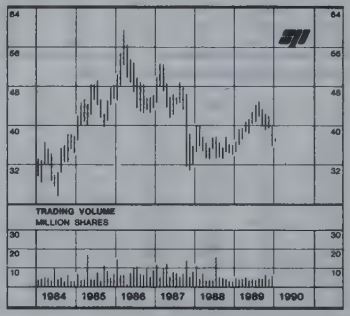
Travelers is one of the nation's largest stock insurance companies. TIC also provides financial and health care services. In an effort to concentrate on its core insurance and investment operations, TIC has sold several nonrelated businesses, including its Keystone Group Inc. mutual fund business. The sale of its mortgage unit was still being pursued as of late 1989. Earnings comparisons have rebounded on improved employee benefits pricing, and the absence of large investment losses.

Current Outlook

Excluding "fresh start" tax benefits and realized investment gains and losses in both years, earnings for 1990 are estimated at $4.25 a share, up from the $3.20 anticipated for 1989.

The $0.60 quarterly dividend is the minimum expected.

Excluding gains from asset sales, operating earnings for 1990 are expected to rise. The price hikes instituted in the group health area have returned that operation to profitability. Property-casualty rates should begin to firm by the middle of 1990 and while this will not affect earnings until 1991, it will at least stem the losses incurred in that area. Sustained improvements in the individual life, asset management and pension areas will also aid comparisons, barring further reserving action ($415 million in 1988). Margins will also benefit from an extensive cost cutting effort initiated in 1988.



Review of Operations

Revenues for the nine months ended September 30, 1989 rose fractionally, year to year (1988 restated), as the absence of sizable realized investment losses was offset by lower premiums and investment income. Total benefits and expenses were down 4.9%, and net income was $306 million ($2.54 a share of operating income, plus a $0.41 investment gain), versus a net loss of $195 million ($1.45 of operating income and a $3.48 investment loss).

[1]Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.96	0.85	1.05	0.82
Jun.	1.10	0.10	1.10	0.93
Sep.	0.89	0.85	1.02	1.11
Dec.		2.34	0.93	1.59
		4.14	4.10	4.45

Important Developments

Nov. '89— TIC said that earnings for 1989's first nine months were aided by the turnaround in the employee benefits area and improvements in non-insurance subsidiaries. The group area was aided by pricing actions taken in response to rising health care costs. Stronger investment banking results and reduced losses in the real estate development area also aided results. Earnings from p-c lines declined, reflecting the soft insurance market and increased storm-related losses. Later, in a move aimed at concentrating on its core insurance and investment operations, TIC sold its Keystone Group Inc. mutual fund operations to a management-led investor group for an undisclosed amout. As of late December, TIC was still seeking a buyer for its mortgage banking subsidiary.

Next earnings report expected in early February.

Summary

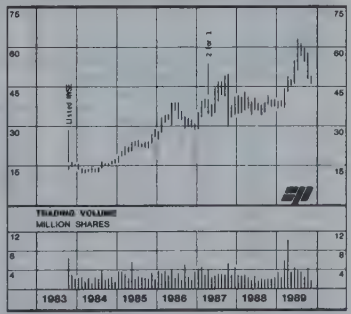
This diversified communications company is engaged in newspaper publishing, broadcasting and entertainment, and newsprint/forest products. In spite of a cyclical downturn in newsprint operations, double digit earnings gains are expected for the period ahead, aided by an ongoing cost-containment program and favorable revenue and profit gains from broadcasting and entertainment.

Current Outlook

Earnings for 1990 are expected to rise 16%, to $3.70 a share from the $3.20 estimated for 1989.

Dividends, increased 16% in early 1989, are likely to be raised again in 1990.

Revenues for 1990 should advance slightly as softness in newspaper advertising and newsprint largely offsets strong growth in broadcasting and entertainment. Aided by cost controls and lower newsprint costs, newspaper profits should improve, which when combined with continued strong profit growth from broadcasting and entertainment, should more than offset sharply lower newsprint profits.



Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	553	522	480
Jun.	---	643	613	562
Sep.	---	591	575	535
Dec.	---	---	625	584
	---	---	2,335	2,160

Revenues for the nine months ended September 24, 1989 rose 4.5%, year to year. Operating income gained 7.5% in spite of a sharp drop in newsprint earnings. After other items, including sharply lower interest expenses and a lower effective tax rate, net income advanced 19%. After preferred dividends in 1989 only, share earnings were $2.21, up 14% from $1.94.

Important Developments

Jul. '89— TRB sold radio station WICC-AM in Bridgeport, Conn. for an undisclosed sum. Separately, the company said that capital spending for 1989 would be about $240 million, up 12% from the 1988 total, with spending largely slated for completion of printing and distribution facilities at the Fort Lauderdale and Escondido newspapers, and modernization projects at the Baie Comeau mill.

Apr. '89— Directors authorized the repurchase of up to eight million additional common shares in the open market. Of the 18 million common shares authorized for repurchase since 1986, 9.1 million had been bought through April 1989.

Next earnings report expected in mid-January.

Business Summary

Tribune Co. is engaged in newspaper publishing, broadcasting, entertainment, and newsprint/forest products operations. Business segment contributions in 1988:

	Revs.	Profits
Newspapers	62%	60%
Broadcasting & entertainment	20%	18%
Newsprint/forest products	18%	22%

Tribune publishes nine daily newspapers, making it the fourth largest newspaper publisher in the U.S. Dailies include the Chicago Tribune, New York Daily News, Fort Lauderdale News and Sun-Sentinel, The Orlando Sentinel, the Daily Press and The Times-Herald in Newport News, the Times-Advocate in Escondido, and the Times Tribune in Palo Alto. The group also includes 12 community publications and a subsidiary that provides syndicated news and features to print and electronic media. Circulation of TRB's newspapers for the six months ended March 31, 1989 averaged 2,707,147 daily and 3,595,987 Sunday.

TRB is the fifth largest television group broadcaster, with six independent TV stations in Chicago (WGN-TV); New York (WPIX-TV); Denver (KWGN-TV); New Orleans (WGNO-TV); Atlanta (WGNX-TV); and Los Angeles (KTLA-TV). Four radio stations owned are WGN-AM, Chicago; WPIX-FM, New York City; and KCTC-FM and KGNR-AM, Sacramento, Calif.

Entertainment and programming services are provided through Independent Network News, Tribune Entertainment Co., and the Chicago Cubs.

The newsprint/forest products group produces newsprint and chemical by-products.

Dividend Data

Payments on the publicly-held shares began in late 1983. A "poison pill" preferred stock purchase right was adopted in 1987.

Summary

Tri-Continental is a publicly traded (closed-end) investment company. With the bulk of investments in a broadly diversified list of common stocks, it offers participation in a high-grade portfolio under professional management. Recent emphasis has been on consumer goods, industrial equipment, communications, energy, and drugs and health care.

Business Summary

Tri-Continental Corp., a diversified publicly traded investment company, invests primarily for the longer term with the objective of producing future growth of both capital and income while providing reasonable current income. Funds are invested in established and better-known securities.

At September 30, 1989 investments aggregated $1.62 billion (at market). Net assets at September 30, 1989 and December 31, 1988 were divided as follows:

	9/89	12/88
Common stock		
Consumer goods	9.4%	11.6%
Industrial equipment	9.8%	10.8%
Communications	12.9%	8.3%
Energy	6.6%	6.3%
Computers & services	2.7%	5.8%
Chemicals	2.6%	5.3%
Drugs & health care	5.8%	5.3%

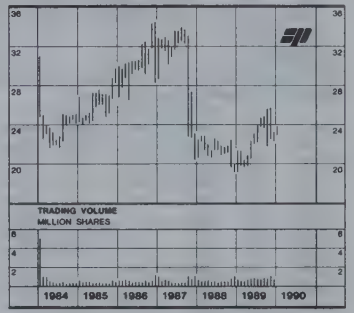
Wholesale/retail trade	4.9%	4.4%
Special holdings	2.9%	3.7%
Transportation	4.2%	3.7%
Other	24.5%	14.4%
Total common stock	88.1%	84.3%
U.S. Gov't securities	7.9%	12.1%
Short-term holdings	3.3%	2.7%
Cash & other (Net)	0.7%	0.9%

At September 30, 1989 the 10 largest holdings (representing 27.3% of common stock investments) were AT&T, General Electric, Capital Cities Communications/ABC, PepsiCo, Walt Disney, United Telecommunications, GTE, Sundstrand Corp., Schering-Plough Corp., and Deere & Co.

Management and administrative services are provided by J. & W. Seligman & Co. For its services Seligman receives 0.45% of the first $1.25 billion of the fee base ranging down to 0.225% of the fee base over $3.25 billion. The management fee was $4,505,682 in 1988, versus $5,005,130 in the prior year.



The company offers a dividend reinvestment plan whereby all or part of distributions may be reinvested in additional shares. TY reports audited statements of operations and changes in net investment income on a semi-annual basis only.

Important Developments

Oct. '89— During the 1989 third quarter TY made initial investments in Chubb Corp., Community Psychiatric Centers, and Sara Lee Corp., while additional investments were made in AMR Corp., Dow Chemical, Honeywell, and North Carolina National Bank Corp. Eliminated from the portfolio were Bank of Boston Corp., Time Warner, and Washington Post Co. Class B, while reductions were made in Deere & Co., E. I. duPont de Nemours & Co., Giant Food Inc. Class A, and McDonald's.

Next earnings report expected in early March.

Trinova Corp.

NYSE Symbol TNV Options on Phila (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 3'90	1989-90					
41½	30⅜-21	22	0.68	2.8%	B+	1.36

Summary

Trivona is a worldwide industrial manufacturer of fluid power and plastics products for diverse original equipment and replacement markets. Earnings for the third quarter of 1989 were adversely affected by a charge for restructuring and write-downs totaling $1.28 a share. The probable absence of unusual charges and a lower tax rate should permit higher earnings in 1990.

Current Outlook

Earnings for 1990 are estimated at $2.30 a share, versus earnings $0.90 projected for 1989.

Dividends should remain at $0.17 quarterly.

Revenues for 1990 are expected to rise at a less rapid rate than in 1989, reflecting lower auto production and less buoyant industrial equipment markets in North America. Although restructuring will help longer-term profits, some decline in operating rates may occur in 1990 and place pressure on margins. But assuming a lower tax rate and the likely absence of unusual charges, TNV should report higher earnings in 1990.

Dec.	---	526	462	370
	---	1,919	1,682	1,447

Sales for the nine months ended September 30, 1989 rose 12%, year to year (1988 restated), reflecting gains in both segments. Hurt by lower margins in both units, the gain in gross profits was cut to 6.6%. Penalized further by a $53 million restructuring charge and an $8.0 million writedown, pretax income fell 71%. After taxes at 54.5%, versus 38.0%, net income from continuing operations declined 79%. Earnings were $0.38 on 3% fewer shares, versus $1.79 (restated).

Important Developments

Oct. '89— TNV attributed the loss in 1989's third quarter to a $53 million restructuring charge ($1.13 a share) to implement a program designed to improve asset utilization and profitability in several major areas. The provision included estimated costs for the reconfiguration, downsizing or closure of facilities, and costs for the reduction of personnel over a three-year period. TNV also recorded an $8.0 million charge ($0.15 a share) for the write-down of a flexible manufacturing system.

Oct. '89— TNV said that it would resume the purchase of up to 3,000,000 shares of its common stock in accordance with a stock purchase program announced in 1987. The shares would be purchased from time to time in the open market or through privately negotiated transactions.

Next earnings report expected in late January.

Business Summary

Trinova (formerly Libbey-Owens-Ford) makes fluid power and plastics products for many diverse original equipment and replacement markets. The glass business was sold in 1986 to Pilkington Brothers plc in exchange for 6,096,675 TNV common shares (adjusted) and the assumption of $70 million of debt. Contributions by business segment in 1988:

	Sales	Profits
Power & motion control	77%	85%
Plastic products	23%	15%

Foreign operations accounted for 35% of sales and 44% of earnings in 1988.

In the power and motion control business, Aeroquip Corp. is a leading worldwide manufacturer of hoses, fittings, couplings, and cylinders. Vickers, Inc., acquired January 1, 1984, is a worldwide leader in the production of electrohydraulic systems and components. In 1988 power and motion control sales by market were divided 58% industrial equipment, 28% aerospace/defense, 12% transportation, and 2% building and construction.

Sterling Engineered Products makes custom-engineered molded plastic products, specialty resins, and self-adhering trim moldings. Sales by market in 1988 were divided 60% transportation, 33% building and construction,and 7% industrial equipment.

Dividend Data

Dividends have been paid since 1933. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1989.

46½	49¼-32¼	20	0.28	0.6%	A-	1.19

Summary

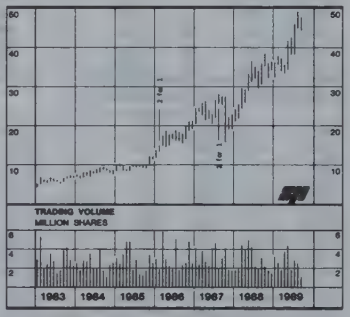
This company is a leading manufacturer of fire protection systems. It also makes flow control products, electrical and electronic components and packaging materials. Earnings increased rapidly in recent years, aided by growing demand for fire sprinkler systems and acquisitions. Further earnings progress is likely in fiscal 1989-90.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 are expected to reach $3.00 a share, up from the $2.31 reported for fiscal 1988-9.

A modest increase in the $0.07 quarterly dividend is likely in late 1989.

Sales for fiscal 1989-90 are expected to increase significantly, led by internal growth of the fire protection and flow control products segment. In addition, part of the gain should also reflect the consolidation for the full year of Mueller Co., which was acquired in September, 1988. Underwater communications is also expected to experience strong growth. Other operations may grow at a more moderate pace. Margins should benefit from the higher volume, well controlled costs and better margins on packaging materials sales. Somewhat offsetting should be higher interest expense. Long-term prospects should benefit from an aggressive acquisition policy.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Aug.	433	305	259	151
Nov.	506	416	271	185
Feb.	494	403	253	195
May	538	451	279	285
	1,971	1,575	1,062	796

Sales for the fiscal year ended May 31, 1989 increased 25% from those of the previous year, reflecting gains in all segments. Primarily because of an 86% gain in pretax income at the fire protection and flow control products segment, margins widened. Pretax income was up 39%. After taxes at 37.6%, versus 36.9%, net income rose 37%, to $2.31 a share from $1.93.

	2.31	1.93	1.27	1.02

Important Developments

Aug. '89— TYC said that operating profits of its fire protection and flow control products group increased in fiscal 1988-9, due to higher volume and margins related to sales of flow control products, the inclusion of Mueller for eight months, and inclusion of pipe products of Allied Pipe for the full year.

Next earnings report expected in early October.

Business Summary

Tyco Laboratories manufactures fire protection and flow control products, electrical supplies and electronic components, and packaging materials. Industry segment contributions in fiscal 1988-9:

	Sales	Pretax Profits
Fire protection & flow control products	63%	61%
Electrical supplies and electronic components	20%	24%
Packaging materials	17%	15%

The company's Grinnell Corp. subsidiary is the largest designer, fabricator and installer of automatic sprinkler and fire suppression systems in North America. Alarms, detection and activating devices and central control monitors are also installed. Sales for new buildings account for approximately 50% of this segment's sales.

The company's electrical supplies and electronic componets include underwater communications cable and cable assemblies, printed circuit boards and assemblies backplanes, and electrical conduit, wire products and related components.

The packaging materials segment primarily produces laminated and coated paper, board and foil, as well as manufacturing of polyethylene film and packaging products.

Dividend Data

Dividends were initiated in 1975. A dividend reinvestment plan is available.

Tyler Corp.

NYSE Symbol TYL

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 5'90	1989-90					
7/8	10 1/8-4 7/8	33	0.08	0.9%	B	1.08

Summary

Following the sale of the Hall-Mark Electronics subsidiary in August, 1988 and the Reliance Universal subsidiary in August, 1989, Tyler's remaining operations consisted of the manufacture of industrial explosives and pipe and fittings. In December, 1989 Tyler agreed to sell one of its two remaining units, Atlas Powder, to Imperial Chemical Industries for $193 million in stock and assumption of liabilities.

Business Summary

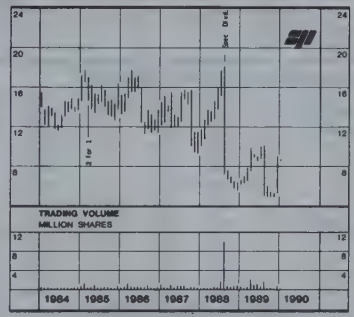
Tyler Corp. manufactures industrial explosives and pipe and fittings. The Reliance Universal subsidiary, which manufactured specialty industrial coatings, was sold in August, 1989. Industry segment contributions in 1988 (including Reliance Universal but excluding Hall-Mark Electronics which was sold in August, 1988) were:

	Revs.	Profits
Industrial explosives	30%	36%
Specialty coatings	44%	49%
Pipe and fittings	26%	15%

The Atlas Powder subsidiary manufactures a complete line of commercial and industrial explosives for various industries, including coal mining, quarrying, construction, metal mining and seismic exploration. Nitrated esters are also produced for use in propellants for the aerospace industry. Specific products include nitroglycerine-based explosives, emulsions, and electric and non-electric detonators. Atlas' products are sold by salesman and distributors nationwide. Atlas believes that it ranks first in sales of commercial and industrial explosives in the U.S.

Tyler Pipe Industries manufactures cast iron pipe, fittings and related building materials and cast iron water and sewage fittings. Pipe, fittings and related building materials, which are sold to wholesale plumbing and supply houses, are used primarily for drain, waste and vent applications in commercial, industrial, and residential construction. Water and sewage fittings, which are used by municipalities, are sold to waterworks jobbers and municipalities.

Fittings for use in water and sewage treatment systems are manufactured in both gray and ductile iron. Ductile iron is characterized by higher strength yet lighter weight.



Important Developments

Dec. '89— TYL said that it agreed to sell its Atlas Powder subsidiary, one of its two remaining units, to Imperial Chemical Industries (ICI) for $193 million in a tax-free exchange. The agreement called for TYL shareholders to receive about $128 million of ICI common stock convertible into ICI American Depositary Receipts (ADRs) traded on the NYSE. An additional $9.9 million in ICI common stock would remain unissued pending the satisfaction of certain indemnifications. For the balance of the consideration, TYL would be relieved of its bank debt estimated to be about $55 million at the closing. The transaction was subject to several conditions, including receipt of regulatory clearances and approval by TYL shareholders. A shareholders meeting was scheduled for late Spring 1990 with a closing to follow immediately if the sale is approved. The proposed transaction involves the spinoff of Tyler Pipe Industries into a new corporation to be owned by TYL shareholders followed by the exchange of TYL stock for ICI stock. The exchange ratio would be set just prior to the transaction's closing date.

Next earnings report expected in late January.

Sales from continuing operations for the first nine months of 1989 advanced 10%, year to year. However, cost increases and a less favorable product mix at Atlas Powder, combined with higher raw material costs and slow nonresidential construction markets at Tyler Pipe led to a 9.2% decline in operating profit. Following a 2.5% rise in interest charges, pretax income fell 14%. With taxes at 38.0%, versus 39.2%, net income was down 12%, to $0.22 a share (based on 18% more average shares) from $0.30. Results exclude a loss from discontinued operations of $0.07 a share, versus a profit of $0.81.

Dec. 18'89	1989					
23⅜	26¼–14¾	15	0.04	0.2%	A	0.83

Summary

With the acquisitions of Valmac Industries in 1985 and Lane Processing in 1986, Tyson Foods became the leading poultry producer in the U.S. Expansion of higher-margin convenience products has also contributed to steady earnings gains. Following an extended bidding war with ConAgra, the company acquired Holly Farms Corp. (HFF) at $70 for each of HFF's 18.4 million common shares. Although somewhat dilutive near term, the Holly Farms acquisition should aid future results.

Current Outlook

Earnings for fiscal 1990 may decline modestly to $1.50 a share, from fiscal 1989's $1.55.

The dividend should remain at $0.01 a share quarterly.

Sales should advance sharply in fiscal 1990 on the Holly Farms acquisition, as well as on greater demand for value-added poultry products from fast-food restaurants. Average selling prices are not expected to be significantly higher, but an improving product mix, lower feed costs and considerable scale efficiencies from the higher volume and upgraded facilities should help widen operating margins. However, much higher interest costs are expected to dilute earnings gains until nonstrategic Holly Farms assets are divested.

Important Developments

Oct. '89— The company announced that it and a leasing company had entered into an agreement to sell National By-Products to a group led by National's management. Annual sales of the Holly Farms subsidiary were about $200 million. Tyson agreed to sell its flour milling and bakery unit to Archer Daniels Midland Co. in September, and also its Globe Products division to Curtice Burns Foods, Inc. (net sales of $42 million). Proceeds from the divestitures of approximately $300 million were anticipated.

Jul. '89— The company acquired Holly Farms Corp. for approximately $1.3 billion. The acquisition, working capital needs and certain debt of both companies was funded in November, 1989 with a $1.4 billion senior secured bank credit facility, and $405 million in senior secured bank notes.

Next earnings report expected in late January.

Business Summary

Tyson Foods, the largest poultry processor in the U.S., produces fresh, frozen and precooked poultry, as well as pork and Mexican foods.

Contributions to sales in recent fiscal years were:

	1988	1987
Value-enhanced poultry	77%	75%
Basic poultry	14%	16%
Live pork & related revenue	4%	4%
Mexican food & other	5%	5%

Value-enhanced poultry includes chicken patties; pre-cooked chicken; further-processed, quick-frozen chicken; pre-packaged, pre-priced poultry; rock cornish game hens; and entrees and other enhanced poultry products.

Basic poultry includes fresh and frozen poultry products sold without value-added processes such as cutting, deboning, cooking, packaging or freezing.

Some 2.1 billion pounds of dressed products are processed annually and sold to the foodservice industry and to retail outlets.

Export sales, primarily to the Far East, equaled 6.3% of sales in fiscal 1988, compared with 5.7% the year before.

Dividend Data

Cash has been paid each year since 1976.

Summary

In late 1989 management was reportedly attempting to restructure a buyout attempt that would give employees a majority control of the company. An earlier buyout plan at $300 a share collapsed in October because of inability to obtain sufficient debt financing. Restructuring or buyout attempts could come from outside sources, including Coniston Partners, which owns 12% of the stock. The company plans a major expansion of its Pacific area services in 1990.

Current Outlook

Earnings for 1990 (for UAL as a separate entity) are projected at $15.00 a share, versus the $16.00 estimated for 1989.

Common share dividends are prohibited under a March, 1988 credit agreement.

Revenues for 1990 should rise moderately. Traffic growth should be mostly confined to the Pacific markets at least during the early months, when soft economic conditions should restrain domestic expansion. Yield gains are likely to be modest in the first half. Margins could be affected by startup costs of new minihubs in Asia, although fuel cost increases should be smaller than in 1989.

Operating Revenues (Billion $)

Quarter:	1989	1988	1987	1986

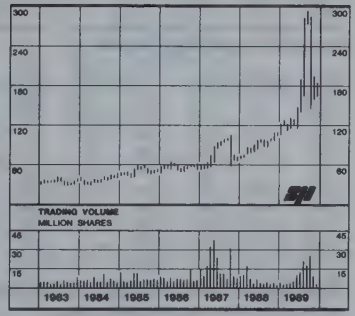
	E16.00	[1]20.20	d0.08	0.25



Important Developments

Dec. '89— UAL was reported to be continuing to attempt to revive a failed buyout plan that would place majority ownership in employee hands, with a possible minority ownership by the public. An earlier attempt to take over the company by management, the pilots union and British Airways for $300 a share collapsed in October when the group was unable to obtain $7.2 billion in bank financing. Coniston Partners, holders of 12% of the stock, has indicated it may seek to effect a restructuring.

Dec. '89— United Airlines announced that it planned to nearly double its operations in the Pacific market by August 1990.

Next earnings report expected in late January.

Business Summary

UAL Corp. (formerly Allegis Corp. and prior to that UAL, Inc.) is a holding company whose principal subsidiary is United Airlines. In late 1987 and early 1988 it sold its other major subsidiaries (Hertz Car Rental, Hilton International Hotels and Westin Hotels), which had combined annual revenues of about $2.7 billion.

United Airlines is one of the largest U.S. air carriers. In 1988 it boarded 58.1 million passengers. At the end of 1988 it served more than 150 cities in the United States, Canada, Mexico, the Bahamas, Australia, Hong Kong, Japan, New Zealand, China, the Philippines, Singapore, South Korea, Taiwan and Thailand. Principal domestic hubs are Chicago, Denver, San Francisco, Washington (Dulles) and Los Angeles. At the end of 1988 the fleet totaled 405 aircraft—31 747s, 55 DC-10s, 29 DC-8s, 19 767s, 148 727s, and 123 737s. On order were 61 737-300s (1989-90), 15 747-400s (1989-92) and 30 757-200s (1989-91). In April, 1989 a large order for additional 737s and 757s was made.

Covia Partnership (50.1% owned) operates the Apollo computer reservations systems for airlines and other companies.

Dividend Data

Under terms of the credit agreement completed in March, 1988 to finance in part the stock repurchase, the company is prohibited from paying dividends on the common shares. Payments had been suspended in November, 1987. A "poison pill" stock purchase right was adopted in 1986.

Finances

In March, 1988 UAL arranged a $1.235 billion term loan, a $600 million letter of credit and a $600 million revolving credit. The term loan was exercised to finance the repurchase of 35.5 million shares. The loan was repaid by the end of the third quarter of 1988, partially through sale of $500 million of notes.

Capitalization

Long Term Debt: $2,060,221,000, incl. $411 million of capital leases.

Summary

This diversified energy company distributes natural gas and electricity in portions of eastern and central Pennsylvania (excluding Philadelphia) and markets compressed and liquefied gases. In the 1989 second half the company sold its air separation plant and certain natural carbon dioxide reserves and acquired certain propane businesses. Earnings for the first nine months of 1989 declined, reflecting warmer weather conditions.

Business Summary

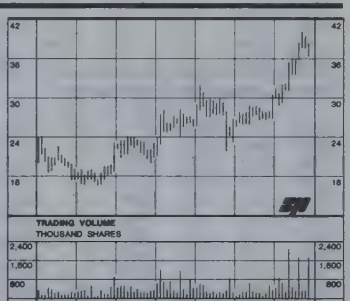
This diversified energy company distributes natural gas and electricity in portions of Pennsylvania, distributes propane in 35 states, produces and distributes industrial and specialty gases and related equipment and supplies throughout the U.S. Contributions to revenues and operating income in 1988:

	Revs.	Profits
Gas utility	56%	75%
Electric utility	13%	13%
Compressed gases	29%	6%
Other	2%	6%

Gas utility operations serve 13 eastern and southeastern counties in Pennsylvania. Customers at 1988 year-end were 214,453, up from 210,386 a year earlier. In 1988 gas throughput totaled 69,037 MMcf (65,224 MMcf in 1987) and was divided: 23% residential, 14% commercial, 9% industrial, 46% transportation, and 8% retail.

Electric utility operations provide service in two northeastern Pennsylvania counties. Customers at 1988 year-end were 57,383, up from 56,737 a year earlier, and 770,513,000 kwh. of electricity (726,463,000 kwh.) were sold. Kilowatt-hour sales in 1988 were divided: 55% residential, 33% commercial, and 12% industrial.

Through the Amerigas unit and Cal Gas Corp. (acquired 1987), UGI distributes liquid propane fuel, produces and sells compressed liquefied and specialty gases, sells related equipment and welding supplies, and engineers, designs and constructs industrial gas plants, throughout the U.S. Sales of LP-gas totaled 379.6 million gallons in 1988, compared with 229.5 million gallons in 1987, and customers served at 1988 year-end were 406,149, versus 406,817 a year earlier.



Important Developments

Oct. '89— UGI completed the sale of its air separation plant and related assets to AGA Gas Inc.; the sale was part of a planned divesture of Amerigas' industrial gas interests and reinvestment of proceeds to expand propane operations. Separately, UGI acquired Utility Propane Co. from KCS Group Inc. for $21.3 million plus working capital.

Sep. '89— UGI's Amerigas unit sold to Amerada Hess Corp. certain natural carbon dioxide reserves and certain related assets. Separately, Amerigas purchased for $31.0 million plus working capital the businesses of West Florida LP Gas Co. and Best L-P Gas Inc.; the two companies combined serve 37,000 customers and have annual revenues of about $17.3 million.

Next earnings report expected in mid-February.

Dec.		127.5	117.8	118.2
		433.4	419.4	443.1

Revenues for the nine months ended September 30, 1989 rose 0.9%, year to year. Warmer weather conditions and higher operating expenses more than offset higher interest income, and pretax income declined 13%. After taxes at 36.0%, versus 37.0%, net income from continuing operations was off 11%, to $1.56 a share from $1.81. Results exclude income from discontinued operations of $0.42 a share, against $0.15.

ummary

is company is one of the country's leading property-casualty insurers and has a lesser interest in life surance and financial services. While the soft p-c market will depress 1989 earnings, a firming of p-c es in 1990 should lead to modest earnings growth.

urrent Outlook

t operating earnings for 1989 (excluding "fresh art" tax benefits and realized investment gains d losses) are estimated at $2.25 a share, versus 88's $3.57, which included $0.24 of such tax nefits. Earnings in 1990 could reach $2.50.

e $0.70 quarterly dividend is not expected to increased over the near term.

rnings will likely decline in 1989, reflecting the ft p-c market. Increased competition and FG's cision to reduce its writings in certain lines will ely result in lower premiums. Larger underwriting sses are expected, but moderately higher invest- nt income will provide a cushion. While strong es are expected from life operations, reduced rgins will hamper earnings growth. Profit contri- ions from financial services are not expected in 89. Modest earnings growth is expected in 90, reflecting a firming of p-c rates, increased mand for reinsurance, and contributions from life erations.

eview of Operations

venues for the six months ended June 30, 1989 se 2.6%, year to year (1988 restated), as a .% drop in premiums and greater realized invest- nt losses were offset by an 18% rise in invest- nt income. Benefits and expenses rose 6.2%, d pretax earnings fell 70%. After $1.2 million of credits, versus taxes at 10.6%, net income s down 66%, to $0.28 a share ($1.13 of operat- income), from $1.06 ($1.74), before a $0.06 ecial credit in 1988.

Important Developments

Aug. '89— The company attributed its sharply lower earnings for the first half of 1989 primarily to significantly higher realized capital losses on investments, and increased second quarter catastrophe losses. The investment losses were the result of losses on options utilized as part of a hedging strategy against a stock market decline. P-C operations were impaired not only by intense price competition, but by increased second quarter catastrophic losses of $29.9 million, versus $13.1 million a year ago. The combined ratio rose to 107.8 for 1989's first half, up from 104.7 in the year earlier interim. Life insurance operations benefited from a 12% rise in premium income. While financial services revenues grew 83%, costs associated with acquisitions led to a loss of $14.2 million, versus $7.6 million.

Next earnings report expected in early November.

Business Summary

USF&G Corp. (formerly U.S. Fidelity & Guaranty) derives the bulk of its earnings from property-casualty insurance operations. Products are sold primarily through a network of approximately 5,600 independent agents in the U.S. and Canada, who are supported by underwriting, marketing, administrative and claim services provided through 176 offices. Revenue sources:

	1988	1987	1986
Prop.-cas. prems.			
Commercial	41%	50%	53%
Fidelity-surety	2%	2%	2%
Personal	15%	18%	20%
Reinsurance	6%	8%	6%
Life ins. prems.	20%	7%	4%
Net invest. inc.	14%	14%	15%
Financial serv.	2%	1%	0%

At year-end 1988 the investment portfolio totaled $9.87 billion, of which bonds accounted for 63%, common stocks 19%, preferred stocks 1%, short-term investments 6%, real estate and mortgage loans 8%, and policy loans and other long-term investments 3%.

Through Thomas Jefferson Life Ins. Co. and Fidelity and Guaranty Life Ins. Co., life insurance products are sold in the U.S. and Canada by independent agents. Life insurance premiums totaled $1.11 billion in 1988, versus $356 million in 1987. Life insurance in force amounted to $15.6 billion, of which term insurance accounted for 42% individual permanent 32%, and group 26%. In 1988, FG acquired Citicorp Investment Management Inc., (renamed Chancellor Capital Management) which manages assets of over $18 billion for various clients.

Summary

USG Corp. is the largest producer of gypsum wallboard and other gypsum products, and also manufactures a variety of products for the commercial and residential construction and remodeling markets. A recapitalization plan was instituted in July, 1988 in a successful effort to fend off a takeover attempt by Desert Partners L.P.

Current Outlook

Earnings from continuing operations for 1990 are projected at $0.30 a share, compared with the $0.40 estimated for 1989.

Payment of quarterly cash dividends is unlikely following the recapitalization.

Sales of gypsum wallboard and other gypsum products are expected to be down slightly in 1990, as a stagnant homebuilding market limits growth. Interior systems sales should continue to grow. Profits will continue to be hampered by high interest costs associated with the restructuring.

Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	538	558	693
Jun.	---	570	563	726
Sep.	---	560	587	753
Dec.	---	---	540	726
	---	---	2,248	2,898

Sales for the nine months ended September 30, 1989 declined 2.4%, year to year, reflecting lower gypsum wallboard prices. Income from continuing operations fell 73%, to $0.35 a share from $1.36. Results exclude earnings from discontinued operations of $0.03 a share and $0.23 in the respective periods.

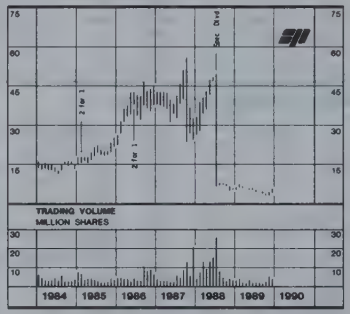
Important Developments

Nov. '89— The company announced the sale of its lime plant in Genoa, Ohio to GenLime Group L. P.



The facility manufacturers a variety of building and industrial lime and limestone products. Terms of the sale were not disclosed. USG will continue to market many of the products produced at the plant.

Nov. '89— USG said that it would sell its headquarters building in Chicago to Manufacturers Life Insurance Co. of Toronto. Terms and price of the sale were not disclosed. USG will lease back the building until it moves to a new headquarters in 1992.

Jul. '89— Earnings for the second quarter of 1989 included an after-tax gain of approximately $7 million ($0.13 a share) from the sale of the construction metal business under USG's restructuring program.

Next earnings report expected in late January.

Business Summary

USG Corp. (formerly U.S. Gypsum) is the leading producer of gypsum products in the U.S., manufactures a variety of building products for use in residential and nonresidential construction, remodeling and repair, and makes products for the industrial processes market. Industry segment contributions in 1988:

	Revs.	Profits
Gypsum products	52%	71%
Interior systems	22%	22%
Bldg. products distribution	18%	3%
Other	7%	3%

In 1988 sales in the United States accounted for 85% of total sales, Canada 9%, and other countries 6%.

The Masonite Corp. subsidiary was sold to International Paper Co. for $400 million in November, 1988 as part of USG's recapitalization plan. Masonite accounted for $530 million (18%) of USG's sales in 1987.

Dividend Data

Common dividends were omitted in 1988 after having been paid since 1919. The most recent payment was $0.28 on June 15, 1988. A "poison pill" stock purchase right was adopted in 1988.

Finances

In July, 1988 shareholders approved a recapitalization plan developed to fend off a $42 a share unfriendly tender offer by Desert Partners, L.P., which was subsequently withdrawn. Under the recapitalization, shareholders received $37 in cash, $5 face amount of a 16% junior subordinated payment-in-kind debenture, and one new share of common stock for each USG share held. The debentures will pay semiannual interest in cash or in kind for five years. Thereafter, interest will be payable in cash until maturity in 2008. The debentures are redeemable at par after the second year at the option of the corporation.

Capitalization

Long Term Debt: $2,354,418,000.

Minority Interest: $23,147,000.

UST Inc.

NYSE Symbol UST Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 1'89	1989					
27⅞	30¾–19½	18	0.92	3.3%	A+	0.81

Summary

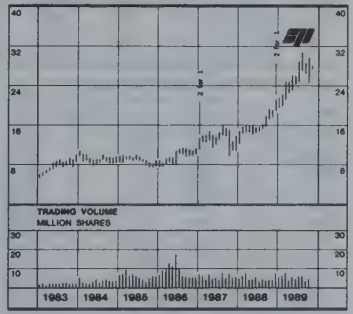
This company is a leading producer of smokeless tobacco marketed under such brand names as Copenhagen, Skoal, Skoal Long Cut, and Skoal Bandits. Substantial pricing flexibility combined with volume gains and controlled costs should allow above-average earnings growth to continue in the future. The company has introduced a smokeless snuff targeted at cigarette smokers.

Current Outlook

Earnings for 1990 could increase 14%, to $2.00 a share from the $1.75 estimated for 1989.

The quarterly dividend may be increased from $0.23.

For 1990 moist smokeless tobacco products are expected to experience good unit volume growth, given success in new product introductions, particularly with Select, a cigarette substitute. Unit sales growth may be slightly below 1989's estimated 3.4%, but higher prices, a better product mix and improving productivity should keep earnings in a good uptrend. Share repurchases at a rate of 3%-4% annually would benefit per-share earnings comparisons.



Sales[1] (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	157.6	145.1	131.8
Jun.	---	173.1	159.4	143.3
Sep.	---	173.7	157.9	147.2
Dec.	---	---	156.2	153.7
	---	---	618.5	576.1

For the nine months ended September 30, 1989, sales increased 9.0%, year to year, reflecting higher moist smokeless tobacco sales. Costs were well contained, and with interest income sharply higher, pretax income advanced 15%. After taxes at 36.8% versus 38.3%, net earnings rose 19%, to $1.25 a share (on 1.6% more shares) from $1.07.

	E2.00	E1.75	1.41	1.13

Next earnings report expected in late January.

Important Developments

Oct. '89— Domestic unit volume for moist smokeless tobacco for the 1989 nine months rose 3.1%, to 388.7 million cans. In the third quarter volume was up 4.1%. UST began test marketing a new smokeless product for cigarette smokers during the period.

Mar. '89— UST bought back 1.1 million common shares in 1989 through March 31 for $24.2 million. Repurchases under a 1984 program to buy back 20 million shares aggregated 15.5 million shares at a total cost of $198.9 million.

Jan. '89— A 1986 order dismissing the $148 million smokeless tobacco product liability lawsuit against UST was affirmed by the Tenth Circuit Court of Appeals.

Dec. '88— The company raised prices for all moist smokeless tobacco products 7%.

Business Summary

UST Inc. (formerly U.S. Tobacco) is one of the largest producers of smokeless tobacco, and it also manufactures pipes and pipe tobacco, cigars, writing instruments and premium wines. Segment contributions (profits in $ million) in 1988:

	Sales	Profits
Tobacco		$278.3
Smokeless products	80%	
Other tobacco products	4%	
Wine	7%	1.2
Other	9%	-2.0

Smokeless tobacco products include Copenhagen and Skoal, the two largest selling brands of moist smokeless tobacco in the world. Chewing tobacco is sold under the WB Cut names. Other products include imported smoking tobaccos (Borkrum Riff, Amphora and Alsbo) and premium cigars, including Don Tomas, La Regenta (imported) and various private brands.

Wines are comprised of premium varietal and blended wines dominated by Washington state-produced Chateau Ste. Michelle and Columbia Crest and two premium-quality California wines, Conn Creek and Villa Mt. Eden.

Other includes smokers' accessories (Dr. Grabow and Mastercraft pipes, Zig-Zag cigarette papers, and Dill's pipe cleaners); pens, markers and pencils; international operations and UST Enterprises.

Dividend Data

Dividends have been paid since 1912. A dividend reinvestment plan is available.

Summary

The nation's largest steelmaker changed its name in 1986 to USX Corp. from U.S. Steel to reflect its move into the energy business, which has accounted for more than 50% of revenues since the 1982 acquisition of Marathon Oil Co. In October, 1989 USX announced that it planned to sell the oil and gas reserves of its Texas Oil and Gas unit and apply the proceeds to debt reduction and share repurchases. An SEC filing later disclosed that Carl Icahn had increased his stake in USX to 13.06% from 11.4%.

Current Outlook

Earnings for 1990 are projected at $2.90 a share, versus the $3.10 estimated for 1989.

The $0.35 quarterly dividend may be increased in 1990.

Sales for 1990 are expected to record a small decline, reflecting weakness in steel and lesser growth in oil. Natural gas sales should improve. A projected decline in steel profits should be mitigated by a recovery in demand for oil country tubular goods. Overall margins are expected to narrow. Profits will be aided by lower interest expense, share repurchases, and the contemplated sale of TXO's reserves, but the absence of a large gain from a litigation award should lead to a small earnings decline in 1990.

Net Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	4.46	4.02	2.79	4.65
Jun.	4.96	4.29	3.95	4.17
Sep.	---	4.17	3.86	3.34
Dec.	---	4.41	4.23	2.77
	---	16.88	14.84	14.94

Sales for the six months ended June 30, 1989 rose 13%, year to year, primarily reflecting a large gain in the energy unit. Aided by sharply higher operating profits at Marathon Oil, gains from asset sales and a favorable litigation settlement, pretax income advanced 61%. After taxes at 35.6%, versus 29.8%, net income rose 48%. Share earnings were $2.00 on 2.1% more shares, versus $1.26.

Important Developments

Oct. '89— USX announced that it planned to sell the oil and gas reserves of its Texas Oil and Gas Corp. (TXO) unit and apply the proceeds to debt reduction and the repurchase of common shares. As of December 31, 1988 the reserves were estimated at 1.2 billion MCF of gas and 28 million bbls. of oil. After the sale, USX would retain TXO's gas gathering and contract drilling businesses. Subsequently, an SEC filing revealed that Carl Icahn had raised his stake in USX Corp. to 13.06% from 11.4%. In the filing Mr. Icahn stated that he would not accept any buy-out that would give him a higher price than would be available to other USX shareholders. He also said he was studying the feasibility of a buy-out or combination for USX and would speak with management about the possibility of a meaningful restructuring that would substantially enhance shareholder value.

Next earnings report expected in late October.

Business Summary

USX Corp. (formerly U.S. Steel) operates primarily in the oil and gas and steel industries. In February, 1986 it merged with Texas Oil & Gas. Industry segment contributions in 1988:

	Sales	Profits
Oil & gas	59%	36%
Steel	34%	39%
Diversified businesses	7%	25%

Oil and gas includes operations of Marathon Oil and Texas Oil and Gas. In 1988 sales consisted of refined products (50%), crude oil and condensate (10%), natural gas (8%), gas gathering (5%), transportation, excise taxes and other items (27%). Production of crude oil and natural gas liquids averaged 224,000 barrels per day and of natural gas 1,187 million cubic feet per day. Estimated net proved reserves at 1988 year end were 794 million barrels of liquid hydrocarbons and 4,487 billion cubic feet of natural gas.

Steel shipments were 12.2 million tons in 1988 (8.6 million in 1987), production totaled 15.5 million tons (11.5 million in 1987), and capacity utilization was 81.4% versus 60.0% in 1987.

Steel mill products include sheet, strip and tin mill products (82% of 1988 shipments); plates, structural and piling (17%); pipe and tubing (10%); semi-finished (6%); and bars and rods (5%).

Diversified businesses include engineering, consulting and construction services, real estate, and the management of mineral resources.

Dividend Data

Dividends have been paid since 1940. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

NYSE Symbol ULT

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 27'89	1989					
8⅞	12¼-7⅛	12	None	None	B	1.14

Summary

Ultimate Corp. integrates its own operating system software with minicomputer hardware made by other vendors and sells the systems for a range of business applications. ULT restructured operations in the second quarter of fiscal 1988-9 and incurred a $22 million charge. ULT returned to profitability in the second half of fiscal 1988-9, but results in the fiscal 1989-90 second quarter were impaired by a $3.1 million provision related to the discontinuance of Tandem-based products.

Business Summary

Ultimate Corp. designs and integrates minicomputer systems, consisting of computer hardware made by other vendors and its own operating system software, for use in a variety of business applications. ULT also provides complete technical support and service. Contributions to revenues in recent fiscal years:

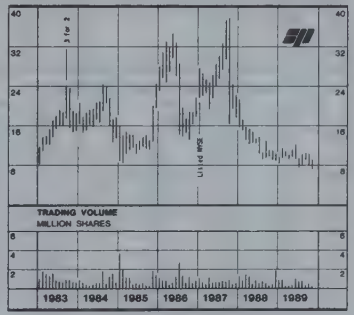
	1988-9	1987-8	1986-7
Product	67%	75%	75%
Service	33%	25%	25%

Foreign operations, primarily in Europe and Australia, contributed 30% of revenues in fiscal 1988-9.

ULT minicomputer systems include its own operating system software, the Ultimate Operating System; computer hardware manufactured by Bull HN Information Systems (formerly Honeywell-Bull), IBM, Hewlett-Packard and Sequoia; ULT's own coprocessor to enhance performance; and applications software provided by ULT's network of independent and wholly-owned dealers which target specific vertical industries. At year-end fiscal 1988-9 ULT had an installed base of over 8,000 systems.

The Ultimate Operating System is based on the Pick operating system, designed for business data management. It is optimized for flexibility and efficiency in classifying, sorting and retrieving data. The operating system operates as a relational database, which allows users to access data without knowing where the data is stored, with English-like (fourth generation) language. It also offers communication capabilities, office automation, and various productivity tools such as word processing, business graphics and spreadsheet software.

Total research and development expenditures approximated $6.7 million and $5.5 million in fiscal 1988-9 and fiscal 1987-8, respectively.



Important Developments

Oct. '89— The company discontinued the sale of Tandem-based systems in favor of Pick-based systems supplied by Sequoia Systems; ULT incurred a one-time $3.1 million provision related to the discontinuance of the Tandem-based product. Separately, in September, 1989 ULT announced that the company and certain of its current and past officers and directors were served with a class action complaint alleging that Ultimate's former chairman, T. M. Sabarese, personally and on behalf of the company guaranteed loans for the purchase of certain aircraft and provided use commitments to the lender, which resulted in a lawsuit against Ultimate, and that Mr. Sabarese declared personal bankruptcy as a result of his involvement. Ultimate believes that the class action complaint misstates, distorts and misinterprets facts already in the public record and that the claims are immaterial to Ultimate's financial condition.

Next earnings report expected in late February.

Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	49.1	46.2	45.9	36.3
Oct.	51.6	46.7	52.4	42.5
Jan.		51.7	51.7	41.7
Apr.		55.1	59.2	50.7
		199.9	209.2	171.1

Revenues for the six months ended October 31, 1989 advanced 8.3%, year to year. Gross margins narrowed, reflecting increased sales of lower margin systems, but selling, general and administrative expenses were down 26% due to the restructuring of operations and budgetary controls. There was a $3.1 million provision for the discontinuance of the Tandem-based product, but in the absence of a $22.1 million restructuring charge, pretax income was $550,000, in contrast to a loss of $33.1 million. After taxes at 35.1%, versus tax benefits of $11 million, net income was $357,000 ($0.04 a share), against a net loss of $22.1 million ($2.24, excluding a special credit of $0.20).

No cash dividends have ever been paid.

Finances

ULT restructured its operations during the second quarter of fiscal 1988-9, which resulted in a one-time charge of $22.1 million. The company provided reserves for the closing of several smaller lines of business and the de-emphasis of certain products, including its Digital Equipment VAX products. Inventory adjustments were also made and the provision for uncollectable debts increased. Certain operations were closed, including subsidiaries in Hong Kong and Spain, some direct sales programs, and a supplies "catalogue" business. ULT also announced it would repurchase some of its common stock in the open market from time to time. At July 31, 1989 the company had $24.0 million in cash and $87.5 million in equity.

Capitalization

Long Term Debt: $11,174,000.

Common Stock: 9,604,123 shs. (no par).
About 21% held by officers and directors.

Summary

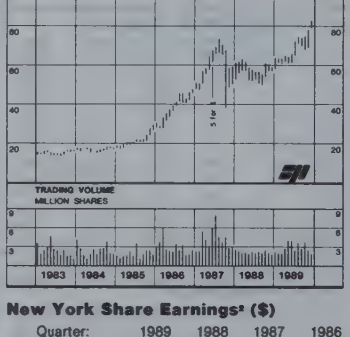
This company and Unilever PLC constitute a vast international organization that is a world leader in brand name consumer goods, mainly foods, detergents and toiletries. Other important interests include specialty chemicals and agribusiness. Currency fluctuations significantly influence reported earnings. In recent years the company has divested a number of commodity-based businesses and sharpened its focus on consumer product markets via acquisitions, including Cheseborough-Ponds for $3.1 billion in 1987 and Faberge and Elizabeth Arden for $1.55 billion in 1989.

Current Outlook

Earnings for 1990 should advance to $6.10 a New York share from the $5.75 estimated for 1989.

Dividends from 1989 earnings should at least match the approximately $2.06 per New York share (before 15% Netherlands tax) declared from 1988 earning.

Profits should continue in an uptrend in 1990, reflecting the Faberge and Elizabeth Arden acquisitions, increased emphasis on branded products, and aggressive marketing of foods and detergents worldwide. Comparatively stable materials costs and exchange rates will be important to expected earnings gains, along with successful new product introductions, cost savings programs, and continuing divestiture of underperforming assets. Cash flows should allow additional strategic acquisitions. A declining dollar versus the guilder would increase dollar-denominated earnings.



Sales[2] (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	7.85	7.69	7.56	5.47
Jun.	8.74	8.25	7.84	5.93
Sep.	9.15	8.40	7.84	5.67
Dec.	---	8.60	7.71	6.64
	---	30.98	30.95	25.37

Group sales for the 1989 nine months rose 13%, year to year (at constant exchange rates), reflecting acquisitions and increased volume in traditional products. Operations in Europe and North America improved and, despite higher interest costs, net income advanced 16%. At the September 30, 1989 rate of exchange ($1 = Fl.2.12), earnings per New York share rose 9%, to $4.23 from $3.89.

Business Summary

Unilever NV and PLC constitute a diversified international group of businesses operating as a single entity with identical boards of directors and linked by a series of agreements which equalize dividends payable and other shareholder rights. The group primarily makes branded and packaged consumer goods, but also has specialty chemicals, agribusiness, packaging and medical products operations. Contributions to sales and pretax profits in 1988:

	Sales	Profits
Margarine, edible fats and oils	20.0%	20.0%
Frozen foods and ice cream	12.4%	10.1%
Other food and drinks	17.4%	20.4%
Detergents	21.8%	16.1%
Personal products	9.5%	10.9%
Specialty chemicals	8.5%	13.4%
Agribusiness	2.9%	2.4%
UAC & other	7.5%	6.7%

Products and services are provided in some 75 countries. The geographic distribution of Group sales (and operating profits) in 1988 were: Europe 60% (58%), North America 20% (19%), and other regions 20% (23%).

Cheseborough-Pond's, the diversified consumer products firm, was acquired in December, 1986 for $3.1 billion.

Dividend Data

The company normally pays an interim dividend from a year's earnings around December of that year and a final dividend around the next May.

Summary

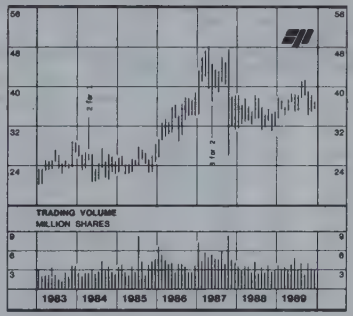
This leading producer of paper and paperboard has successfully diversified into such areas as chemicals, building materials and land development, thus lessening the effect of paper industry cyclicality. An excellent management team, sound financial condition, and increased ability to meet fiber requirements from its own lands should enable the company to remain one of the premier firms in the industry.

Current Outlook

Earnings for 1990 are projected at $4.30 a share, compared with the $4.60 estimated for 1989.

The dividend should remain at $0.37 quarterly.

Sales for 1990 should show moderate gains, based upon healthy backlogs and continued strong demand for paper, paperboard and packaging. Prices and margins should hold up well unless the general economy begins to weaken.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	706	645	537
Jun.	---	712	660	578
Sep.	---	667	670	583
Dec.	---	---	686	610
	---	---	2,661	2,308

Sales for the nine months ended September 30, 1989 increased 5.6%, year to year, reflecting good demand for linerboard and corrugated containers. Margins widened, and pretax earnings increased 8.4%. After taxes at 36.3%, versus 36.9%, net income was up 9.5%. Share earnings were $3.45 on 1.2% fewer shares outstanding, compared with $3.11.

Important Developments

Oct. '89— In discussing third quarter results, the company said that shipping and production schedules had been disrupted by hurricane Hugo. The Savannah, Ga. and Eastover, S.C. mills were down during the storm, but did not suffer serious physical damage. The disruptions contributed to a 4% decline in paper shipments during the quarter.

Sep. '89— The company sold its tallow fatty acids business, including formulations and manufacturing technology, to Witco Corp. for an undisclosed amount of cash.

Apr. '89— UCC said that its total mill capacity would rise 26%, to 3.5 million tons per year by 1992.

Next earnings report expected in mid-January.

Business Summary

UCC is an integrated producer of paper and paperboard products. Contributions by business segment in 1988:

	Sales	Profits
Paper & paperboard	41%	87%
Packaging	38%	6%
Chemicals	15%	5%
Building products	6%	2%

UCC produces unbleached coarse paper, containerboard, and special processed grades. About 65% of unbleached output in 1988 was converted by UCC into corrugated boxes, bags and folding cartons. The company also makes white papers for use in printing and advertising, business forms and envelopes. In 1988 UCC produced some 2,640,000 tons of paper and paperboard products.

Building materials activities include the production of lumber, plywood and particleboard. UCC owns or controls 1.7 million acres of timberland. UCC also makes various wood-based chemicals, including tall oil, turpentine derivatives and aromatic chemicals. The acquisition of Bush Boake Allen gives UCC a worldwide position in the flavor and fragrance compounding business.

UCC also has interests in land development. Foreign packaging operations are conducted in Ireland, Spain and the Canary Islands.

Dividend Data

Dividends have been paid since 1940. A dividend reinvestment plan is available.

Nov. 2'89	1989					
24⅛	33¼-23	5	1.00	4.1%	B-	0.79

Summary

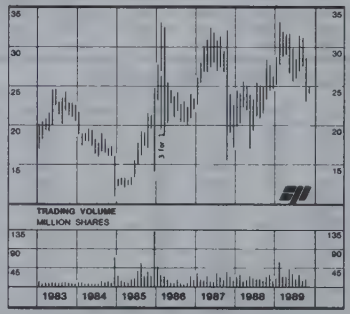
This company is a leading producer of petrochemicals, plastics, industrial gases, specialty chemicals, and carbon products. Over the past several years UK completed a major restructuring program involving asset divestments and personnel cuts. Earnings in recent periods have been penalized by lower prices for plastics, and difficult industry conditions may continue well into 1990. In February, 1989 UK paid $470 million to settle all litigation arising from the Bhopal, India industrial accident.

Current Outlook

Share earnings for 1990 are projected at approximately $4.00, down from the $4.60 estimated for 1989.

Dividend should continue at $0.25 quarterly.

Earnings in 1990 are expected to be penalized by the severe decline in polyethylene (PE) prices and margins experienced during 1989. Prices for PE may stabilized somewhat due to the recent explosion at a major competitor's PE plant and the ending of industrywide inventory reductions. Weak steel markets will limit the carbon business. The industrial gases business should continue to improve with strong industrial markets and recent industrywide price increases for gases.



Net Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.24	1.95	1.68	1.59
Jun.	2.28	2.13	1.66	1.60
Sep.	2.14	2.11	1.73	1.55
Dec.	...	2.14	1.85	1.60
	...	8.32	6.91	6.34

Sales for the first nine months of 1989 rose 7.7%, year to year, reflecting increased volumes and prices. With increased industrial gases profits, net income was up 5.0%. Share earnings were $3.74, versus $3.71.

Common Share Earnings ($)

	E4.60	4.88	1.76	1.25

Important Developments

Oct. '89— UK said that lower third-quarter earnings reflected a 32% decline in chemical and plastics profits as prices for polyethylene and ethylene oxide and glycols continued to soften. Carbon profits fell 70% due to weakness in the steel industry markets. Industrial gases profits rose 50% with gains in all geographic areas. Earnings included a $0.44 a share gain from the sale of the urethane polyols business to ARCO Chemical Co., partly offset by a $0.39 a share charge for writedown of the polysilicon business. Separately, in September UK restarted a 500 million pound a year capacity ethylene plant in Taft, La., and started up a 500 million pound polyethylene plant in Seadrift, Tex. UK announced plans to increase its ethylene oxide capacity at Taft by 410 million pounds a year.

Next earnings report expected in late January.

Business Summary

Industry segment contributions in 1988 of this diversified chemicals producer:

	Sales	Profits
Chemicals & plastics	66%	80%
Industrial gases	25%	17%
Carbon products	9%	3%

Foreign operations accounted for 31% of sales and 23% of operating profits.

Chemicals and plastics includes polyolefins (polyethylene, fabricated plastic products, specialty polymers, and technology licensing), industrial chemicals (ethylene oxide/glycol and derivatives, feedstocks and olefins, polycrystalline silicon), solvents and coatings (alcohols, esters, latexes), and speciality chemicals (biocides, solvents, silicone, urethane intermediates, lubricants, catalysts, water soluble polymers, molecular sieves, and process systems).

Industrial gases include atmospheric and specialty gases used in industrial, chemical, aerospace, electronics, food, steel, metal fabrication, and medical markets, coatings services, membrane systems, and ceramics. Carbon and graphite products include electrodes, refractories and industrial products.

Dividend Data

A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

0.25	Oct. 25	Nov. 2	Nov. 8	Dec. 1'89

Next dividend meeting: late Jan.'90.

Finances

In February, 1989 UK paid $425 million to settle all litigation arising from the 1984 leak of methyl isocyanate gas at Bhopal, India, with 51% owned Union Carbide India Ltd. also paying the rupee equivalent of $45 million. Fourth quarter 1988 earnings included a $58 million ($0.43 a share) charge for the settlement, with the bulk of the payment from insurance and previous accruals. In May, 1986 all claims in U.S. Federal court against UK were dismissed.

Capitalization

Dec. 6'89	1989					
73⅝	81-63¼	14	2.32	3.2%	A	1.21

Summary

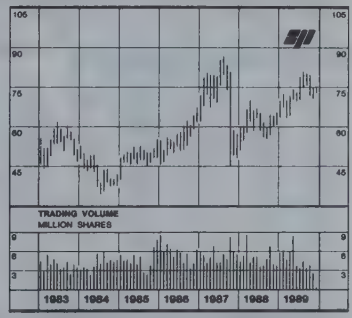
This company operates a major rail system and a leading motor carrier, and holds important interests in oil and gas, real estate and waste management services. In keeping with recent restructuring efforts, UNP repurchased in June, 1989 11 million of its common shares (10%) at $73 each through a "Dutch auction" tender for up to 14.5 million (13%), and said that it would dispose of its real estate unit. In 1988 UNP sold its oil refining assets for $555 million and a pipeline unit for $105 million.

Current Outlook

Earnings for 1990 are projected at $6.00 a share (on some 5% fewer shares), versus the $5.55 anticipated for 1989.

Dividends were lifted 5.5%, to $0.58 quarterly from $0.55, with the January 1990 payment.

Rail profits in 1990 could improve moderately as a pickup for grain traffic offsets sluggish cyclical merchandise volumes and flat rates. Helping to support margins will be savings realized from the consolidation of dispatching operations and integration of the "Katy." Overnite profits could ease, reflecting continued discounting pressure and flat volumes. Oil and gas profits should improve as output advances and prices remain firm. USPCI's profits should improve markedly as it puts expansion costs behind. Proceeds from the sale of UNP's real estate unit will help cut interest costs.



Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986

	E5.55	4.90	4.90	[1]d4.13

Important Developments

Oct. '89— UNP told analysts that it had repurchased an additional 906,000 (0.9%) of its common shares since buying back in June 11,017,160 shares (9.9% of the total outstanding) at $73 each through a "Dutch auction" self-tender. Separately, UNP said that it expected to sell its Union Pacific Realty Co. unit by 1989 year-end. Union Pacific Realty, which earned $41 million in 1988, has assets valued at over $400 million. UNP's latest restructuring efforts, which are intended to enhance shareholder value, follow its withdrawal from all downstream energy activities. In January, 1989 UNP sold its 50% stake in a 160,000 bbl./day Texas refinery to Petroleos de Venezuela for $89 million. In 1988 UNP sold its California refinery to Ultramar PLC for $466 million and a pipeline unit to GATX Corp. for $105 million.

Next earnings report expected in late January.

Business Summary

Contributions (in million $) from continuing operations by business segment in recent years:

	1988	1987	1986
Transportation	$925	$774	$113
Natural resources	231	181	-508
Waste services	3	---	---
Land	41	36	31

The Union Pacific R.R., the nation's third largest railroad, expanded its system in 1988 to 22,853 miles through the acquisition of the 3,000-mile Katy line for $117 million. Traffic increased to 176.6 billion ton-miles in 1988, from 157.2 billion in 1987. Union Pacific is a major hauler of chemicals, which in 1988 generated 22% of freight revenues. Coal and petroleum generate 17% of rail revenues, while grain accounts for 12%.

Overnite Transportation is one of the nation's largest general freight motor carriers, operating through a network of 132 terminals in 39 states and the province of Quebec. Overnite handled 4.4 million tons of freight in 1988 (of which 74.2% was less-than-truckload cargo), compared with 3.9 million tons in 1987 (71.6%).

Natural resources activities include the production of oil and gas, coal and trona. At 1988 year-end UNP had reserves of 152.5 million bbls. of oil, condensate and gas liquids and 1.5 trillion cubic feet of gas, and controlled 6.4 million net acres of undeveloped properties. UNP also produces coal through a joint venture, collects royalties on leased properties and has a 50% stake in a major trona deposit in Wyoming.

Union Pacific Realty Co. (to be sold), an integrated land and building development company, owned 1.8 million sq. feet of properties at 1988 year-end. USPCI, Inc., acquired in 1988 for $401 million, provides a variety of waste management services including treatment, recovery and disposal at two sites in Oklahoma and Utah.

Dividend Data

Dividends have been paid since 1900.

Unisys Corp.

NYSE Symbol UIS Options on ASE & CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 24'89	1989					
16	30½-12⅜	NM	1.00	6.3%	B+	0.94

Summary

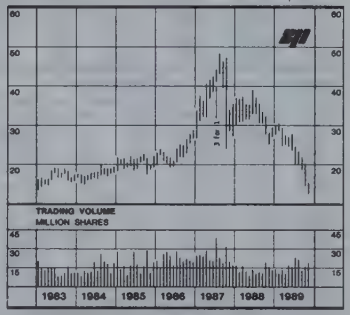
Unisys Corp. is the world's third largest computer vendor. The company incurred restructuring and other charges totaling $381 million in the 1989 third quarter, reflecting workforce reductions, manufacturing facilities consolidation, estimated losses on government contracts and litigation provisions. Although the restructuring is intended to reduce UIS' annual cost base by $500 million, results for 1990 should be adversely affected by weak revenue growth from both the commercial and Government sectors.

Current Outlook

Share earnings for 1990 are projected at $1.00, versus a loss of $4.70 estimated for 1989.

The $0.25 quarterly dividend is unlikely to be increased until profitability improves.

Revenue growth in 1990 should continue to be under pressure. Although there will be wider availability of the new 2200 Series of mainframe computers, mainframe industry growth is only 5%-7%. Furthermore, competitive pricing has intensified, and UIS has been losing market share to IBM and others. Demand for the company's open systems products should remain strong, but they still account for a small portion of total revenues. Sales to the Government will remain restricted by defense budget constraints and the ongoing investigation into procurement practices. Cost reductions resulting from the recently announced restructuring will not fully benefit earnings until later in 1990. With debt currently at 51% of total capitalization, interest expense will remain high.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	2,202	2,368	2,416	1,136
Jun.	2,575	2,393	2,275	1,338
Sep.	2,352	2,268	2,223	2,423
Dec.	---	2,874	2,799	2,536
	---	9,902	9,713	7,432

Revenues for the nine months ended September 30, 1989 advanced 1.4%, year to year. Margins were depressed across most product lines, reflecting high manufacturing costs associated with excess capacity and competitive pricing pressures. Selling, general and administrative expenses and interest costs were up significantly, and after restructuring and other charges totaling $381 million, there was a pretax loss of $605.3 million, compared with pretax income of $690.5 million. After taxes of $68.0 million, versus $227.9 million, the net loss was $673.3 million ($4.75 a share), against net income of $462.6 million ($2.38). Per-share results are after preferred dividends.

Dec.	E0.04	1.20	1.26	d1.56
	Ed4.70	3.58	3.15	d0.54

Important Developments

Oct. '89— UIS said that its pretax loss in the third quarter included a $231 million restructuring charge, reflecting a work force reduction of about 8,000 people, consolidation of manufacturing facilities, and discontinuation of certain products and businesses. These and other actions are intended to reduce UIS' annual cost basis by about $500 million by the end of 1990. The pretax loss also included charges of $150 million to cover estimated losses on certain Government contracts and litigation provisions.

Next earnings report expected in mid-January.

Business Summary

Unisys (formerly Burroughs Corp., merged with Sperry Corp. in 1986) is the world's third largest vendor of information systems and related products and services. Revenue sources:

	1988	1987
Mainframes & peripherals	30%	32%
Distributed systems & workstations	14%	12%
Software & services	17%	16%
Equipment maintenance	20%	20%
Custom products & services	17%	18%
Other	2%	2%

Foreign operations provided 46% of revenues and 34% of operating profits in 1988. Government agencies contributed 25% of revenues.

Unisys sells a complete line of small to large mainframes and related communication processors and peripherals such as printers, storage devices and document handling equipment. Distributed systems and workstations include departmental systems, intelligent workstations, UNIX equipment, personal computers, and terminals. Software and related services consist of application and systems software along with related professional services. Custom products and services include specialized information processing systems and services marketed mainly to government agencies.

Research and development spending in 1988 amounted to $713 million (7.2% of total revenues), up from $597 million (6.1%)in 1987.

Dividend Data

Dividends have been paid since 1895. A "poison pill" stock purchase right was adopted in 1986.

Nov. 28'89	1989					
35⅜	54¾-33⅜	27	¹0.12	¹0.3%	B+	1.20

Summary

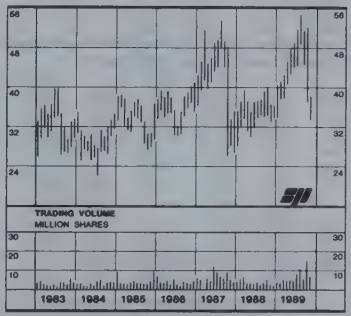
This holding company, whose principal subsidiary is USAir, a highly efficient airline operating primarily in the eastern half of the U.S., completed an aggressive acquisition program in 1987, when it acquired Piedmont Aviation and Pacific Southwest Airlines. This combination of airlines has significantly expanded the company's operating area and should produce substantial long-term operating benefits. To defend against hostile takeovers, the company sold in August, 1989 a new preferred stock to Berkshire Hathaway Inc., increased its stock buyback program and established an ESOP.

Current Outlook

Earnings for 1990 are projected at $3.50 a share, versus the $0.45 estimated for 1989.

Dividends should continue at $0.03 quarterly.

Revenues for 1990 probably will advance moderately from 1989 levels. Traffic during the first half is likely to be restrained by slow growth in the economy, but some pickup should develop later in the year. Average fare yield is likely to be flat, reflecting competitive conditions in some markets. Operating costs should be under improved control, reflecting absence of nonrecurring merger expense and possible flat fuel prics. Share earnings comparisons will benefit from share buybacks.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,485	1,248	465	407
Jun.	1,735	1,493	620	458

Dec.	Ed0.66	0.53	0.62	1.06
	³E0.45	3.81	5.28	3.34

Important Developments

Oct. '89— The third-quarter loss was attributed to lower fare yield and increased fuel, labor and merger-related costs.

Aug. '89— The company sold $358 million of new convertible preferred stock to Berkshire Hathaway Inc. The stock would be convertible after two years into an approximate 12% common share interest. BRK agreed to a limit of 14% on its voter interest without USAir's approval.

Aug. '89— USAir established an Employee Stock Ownership Plan, which acquired 2.2 million newly issued common shares. It also increased to 9.4 million the number of shares authorized for repurchase in the open market.

Next earnings report expected in late January.

Business Summary

USAir Group is a holding company whose principal subsidiaries are USAir and Piedmont Aviation. Pacific Southwest Airlines, which was acquired in May, 1987, was merged into USAir in April, 1988. USAir and Piedmont are to be merged in August 1989. Other subsidiaries include Pennsylvania Airlines, Henson Aviation, Jetstream International, Suburban Airlines, Clark Leasing and USAir Leasing.

As of January, 1989, USAir served more than 130 cities in the U.S. and Canada through 106 airports. Principal hubs are at Pittsburgh and Philadelphia. During 1988 USAir carried 32.5 million passengers.

Piedmont Airlines serves more than 125 cities through 96 airports largely in the southeastern and eastern U.S., and in Canada, Nassau and London. Its principal hubs are Charlotte, Baltimore, Dayton and Syracuse. During 1988 it carried 27.1 million passengers.

The combined fleet of the two carriers at the beginning of 1989 consisted of six 767-200ERs, 44 727-200s, 31 MD-80s, 189 737s (-200,-300,-400), 74 DC-9-30s, 21 BAe 146s, 11 BAe 1-11s and 45 F-28s. On order were 61 737s (-300,-400,-500) for delivery in 1989-91, two 767-200ERs for 1990 delivery and 20 F-100s for delivery in 1989-90. Remaining payments for these aircraft totaled $1.47 billion. There were also options for 106 aircraft.

Dividend Data

Quarterly dividends were initiated in 1980. Previously, cash was paid only in 1965 and 1968. A "poison pill" stock purchase right was adopted in January, 1986 and amended in June, 1989.

Dec. 29'89	1989					
1½	2¼-1	NM	None	None	C	1.69

Summary

This company is one of the largest on-site manufacturers of single-family homes, with over two-thirds of operations concentrated in the Sunbelt. In an effort to restore profitability, management has repeatedly downsized operations and withdrawn from unprofitable markets. Sales and earnings are very sensitive to changes in mortgage interest rates.

Current Outlook

A small profit is possible for 1990, compared with a small loss from continuing operations expected for 1989.

An early resumption of dividends is unlikely.

Revenues for 1990 are expected to decline slightly, based on withdrawals from several markets and sluggish homebuilding activity. However, higher average sales prices should limit the sales decline. Earnings should eventually benefit from more conservative management policies.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	163	169	181	158
Jun.	173	184	199	198
Sep.	174	190	203	207
Dec.		193	204	203
		736	787	767

Operating revenues for the nine months ended September 30, 1989 declined 6.0%, year to year, primarily reflecting a sharp drop in revenues from financial services. Housing revenues were down 1.2%. A loss from continuing operations of $2,965,000 ($0.07 a share) was reported, in contrast to income of $3,393,000 ($0.08). Results exclude a loss of $0.08 a share from discontinued operations, in contrast to income of $0.01 in the year-earlier interim. Results for the 1989 period also exclude a special credit of $0.18 a share.

Important Developments

Oct. '89— The company said that third quarter deliveries of new homes were 1,408 units, down 15%, year to year. New orders in the third quarter rose 4.8%, to 1,522 units. The dollar value of the backlog was $252 million.

Oct. '89— The company reported that it had retired $42.4 million of public debt during the first nine months of 1989, and an additional $16.3 million in the month of October. The debt reduction was expected to yield annual interest savings of approximately $5.6 million.

Jun. '89— UH exercised its option to pay $4,018,597 interest due on debentures and notes due in 1995 and 1997 by issuing 2,656,488 common shares in lieu of cash.

Next earnings report expected in late January.

Business Summary

UH is one of the largest on-site manufacturers of single-family homes, with operations in 29 metropolitan areas in 13 states. Contributions to revenues by industry segment in the past two years:

	1988	1987
Single-family homes	87%	83%
Sales of lots/land	4%	4%
Equity in joint ventures/other	1%	1%
Financial Services	8%	12%

Deliveries of site-built dwellings in 1988 totaled 6,178 units, down 22% from those of 1987.

UH acquires land, installs on-site and offsite improvements, and supervises the on-site manufacturing of homes. Arrangements for mortgage financing of purchases are made with local financial institutions and through VA and FHA mortgage programs. U.S. Home Mortgage Corp. conducts mortgage brokerage and service operations, primarily for homebuyers of UH.

UH divested its manufactured housing operations in January, 1987. In August, 1988 the company sold its Dee Wood Industries unit for $16.8 million in cash.

Dividend Data

Dividends were omitted in October, 1984 after having been resumed in 1976. The most recent payment was $0.02 on September 17, 1984. A "poison pill" stock purchase right was adopted in 1986.

Finances

UH records sales of its homes at the time of closing when title has passed to the customer. Interest is capitalized on land, lots and houses during the development and construction period.

Capitalization

Long Term Debt: $336,977,000 (9/30/89).

Common Stock: 44,030,962 shs. ($0.10 par). Institutions hold approximately 12%. Shareholders of record: 8,519.

Warrants: To purchase 1,425,000 shs.

Summary

This company is a leading women's apparel and eyewear retailer. USR also manufactures and retails brand name footwear. Earnings for fiscal 1988-9 declined due to softness in the women's apparel sector and weak footwear sales. However, profits for the first nine months of fiscal 1989-90 rose substantially as result of higher earnings in women's apparel and optical retailing, and USR was expecting to report a significantly higher earnings for the full year.

Business Summary

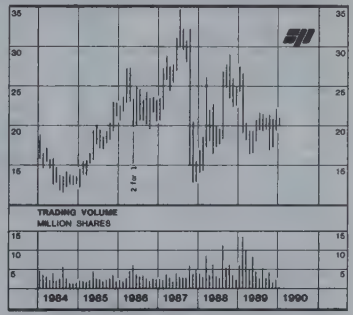
U.S. Shoe is a consumer goods company with operations in women's apparel retailing, optical retailing and footwear manufacturing and distribution. As of year-end 1988-9 the company was operating 2,512 retail locations, consisting of 1,758 stores specializing in apparel, 296 optical retailing stores, and 458 footwear stores. Industry segment contributions in fiscal 1988-9:

	Sales	Profits
Women's specialty retailing	49%	14%
Optical retailing	18%	34%
Footwear	33%	52%

The women's speciality retailing group consists mainly of enclosed mall stores, including 756 Casual Corner stores (women's medium-to-better grade apparel), 397 Ups 'N Downs stores (young women), 237 Petite Sophisticate stores (petite), 194 Caren Charles stores (misses sizes), 89 August Max Woman and August Max stores (better-quality womens), 50 Career Image stores (working women), and 15 Cabarat stores (fashion accessories). Free standing stores consist of 20 T.H. Mandy stores (misses brand name merchandise at discount prices).

The optical retail division consists of 287 LensCrafters optical superstores and nine other stores.

Footwear consists of the manufacturing, importing, wholesaling, and retailing of moderate-to-better priced women's footwear. Major brands include Abstrax, Amalfi, Bandolino, Calvin Klein, Capezio, Cobbie, Cobbie Cuddler, David Evins, Divertente, Easy Spirit, Easy Spirit Dress, Evan-Picone, Famolare, Garolini, Innovations, Joyce, Leslie Fay, Liz Claiborne, Pappagallo, Red Cross, and Selby. The company also produces various brand name boots. USR additionally operates 283 shoe stores including Hahn Shoes, Cincinnati shoes and Bannister shoes, as well as various concept shoes stores, and operates 175 leased shoe departments.



Important Developments

Nov. '89— USR attributed the year-to-year gain in profits for the first nine months of fiscal 1989-90 to higher earnings at the optical and women's apparel retailing groups. Based on these positive trends for the first nine months, USR said that it was expecting a strong profit gain for its fiscal year ending January 30, 1990. Given current consumer buying patterns, management said Casual Corner would report its highest earnings ever. Performance at Lenscrafters Optical was also strong, with 350 outlets expected by fiscal year-end. Another 100 units should open in fiscal 1990-1 as part of a long term goal of reaching $1 billion in sales by 1993. Meanwhile, although the footwear division's earnings declined during the nine-month period, profits improved during the third quarter, reflecting increased demand for shoes sold under the Easy Spirit brand.

Next earnings report expected in late February.

Oct. 25'89	1989					
69⅞	75¼-56¾	12	3.76	5.4%	A-	0.74

Summary

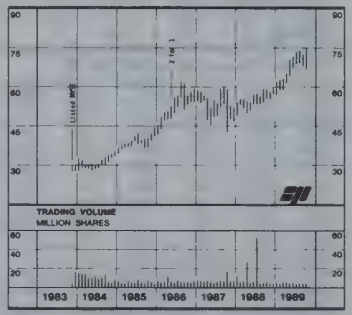
U S West, the seventh largest telephone holding company in the U.S. (based on 1988 revenues), serves customers in 14 Great Plains, Rocky Mountain, and Pacific Northwest states. While seeking to enhance its competitive position in the traditional telephone business, USW has been fairly aggressive in efforts to diversify into other businesses.

Current Outlook

Earnings for 1990 are projected at $6.25 a share, versus the $5.90 estimated for 1989.

The $0.94 quarterly dividend is likely to be raised during the first half of 1990.

Revenues from telephone operations in 1990 are expected to modestly increase, reflecting growth in access lines and calling volume, offset by rate cuts. Revenues from non-regulated operations should rise at a strong pace: cellular and paging revenues should continue to increase at a double digit pace; revenues from directory publishing should be strong; and revenues from financial services should benefit from an acquisition; revenues from building sales are unpredictable but could go higher. Margins may narrow, largely reflecting rate cuts on local telephone service.



Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.39	2.19	2.04	2.03
Jun.	2.43	2.25	2.11	2.05
Sep.	2.32	2.43	2.13	2.14
Dec.	---	2.35	2.16	2.08
	---	9.22	8.45	8.31

Revenues for the nine months ended September 30, 1989 increased 4.1%, year to year. After a $145.4 million special gain in the 1988 period, pretax income decreased 12%. After taxes at 29.5%, versus 30.5%, net income declined 11%, to $4.17 a share from $1.30.

	E5.90	6.17	5.31	4.86

Next earnings report expected in late January.

Important Developments

Oct. '89— USW said that third-quarter earnings included onetime effects of rate settlements in Minnesota and Colorado. Earnings comparisons also reflected a gain from the sale of a building in the 1988 quarter, versus none in the 1989 quarter. Nine month comparisons reflected a onetime gain of $88.7 million, or $0.48 a share, from the April, 1988 sale of common stock in USW's cellular and paging unit. On a comparable basis, USW that said operating earnings modestly increased. Earlier, Washington State regulators proposed an incentive regulation plan that would provide $65 million annually in rate reductions and service improvements over a five year period. USW's authorized rate of return in that state would rise from 10.5% to 11.25%, and excess revenues beyond that level would be shared by ratepayers and USW. The proposal required further regulatory approval.

Business Summary

U S West is the seventh largest telephone holding company in the U.S., based on 1988 revenues. As of December 31, 1988, US West Communications, the company's telephone operations (formerly USW's Northwestern Bell, Mountain Bell, and Pacific Northwest Bell subsidiaries), served some 11,878,000 customer access lines in the following states: Arizona, Colorado, Montana, New Mexico, Utah, Wyoming, Idaho, Iowa, Minnesota, North Dakota, South Dakota, Oregon, and Washington. The subsidiaries generally provide local telephone service, and provide some intrastate long distance service.

USW has established subsidiaries to enter businesses other than the traditional telephone business. New Vector Group, Inc. (80.5% owned) at 1988 year-end provided cellular communications service in 29 western cities, including San Diego, Phoenix, and Denver, to more than 83,000 cellular customers, an increase of some 63% from the previous year. A separate subsidiary offered paging services in 51 western cities serving more than 90,600 customers.

BetaWest Properties, Inc. owns and develops commercial real estate and provides construction, design and property management services.

US West Marketing Resources Group Inc. is engaged in advertising and publishing, including directory publishing, through its U S West Direct, TransWestern Publishing and US West Marketing Resources subsidiaries.

U S West Financial Services Inc. provides leasing and sales financing to customers of USW's companies and to others. Applied Communications, Inc. markets transaction-processing software.

The company jointly owns, with the six other regional Bell holding companies, Bell Communications Research, which provides technical assistance and consulting services to the companies.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.88	Jan. 6	Jan. 13	Jan. 20	Feb. 1'89
0.94	Feb. 3	Apr. 13	Apr. 19	May 1'89
0.94	Jun. 2	Jul. 14	Jul. 20	Aug. 1'89
0.94	Oct. 6	Oct. 16	Oct. 20	Nov. 1'89

Next dividend meeting: early Jan. '90.

Finances

Consolidated capital spending amounted to $2.29 billion ($1.79 billion by telephone subsidiaries) in 1988, up from $1.91 billion ($1.62) billion in 1987. Capital spending by the telephone companies is expected to approximate $1.6 billion in 1989.

On January 1, 1984 AT&T spun-off its 22 Bell operating companies in the form of USW and six other regional holding companies (RHCs). That action was taken pursuant to a divestiture agreement settling Federal antitrust action.

Summary

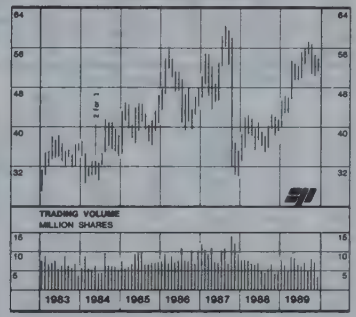
United Technologies is a major manufacturer of commercial and military aircraft jet engines, helicopters, flight systems products, air conditioning equipment, elevators and escalators, and automobile and other products. UTX has begun a program to improve margins through restructuring of operations, including employee reductions, which should produce higher profits in 1989 and 1990.

Current Outlook

Earnings for 1990 are projected at $5.60 a share, versus $5.20 estimated for 1989.

Dividends should continue at least at the current $0.40 quarterly rate.

Revenues for 1990 should show a moderately good advance. As in 1989, the power group should again lead the way as deliveries of commercial engines build up, spurred by the order boom. Some further gain in spare parts sales is also likely. Margins should improve moderately. Flight systems results should continue to be hampered by the problems at Norden. Modest gains are likely for building systems, while the industrial products group profits could decline, reflecting the drop in auto production.



Revenues[1] (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	4.46	4.33	3.94
Jun.	---	5.27	4.46	4.29
Sep.	---	4.75	4.47	4.21
Dec.	---	---	5.27	4.74
	---	---	18.52	17.17

Revenues for the first nine months of 1989 rose 6.4%, year to year. Pretax income was up 3.8%. After taxes at 39.5%, versus 39.5%, and larger minority interest, net income was up 1.8%. Share earnings were $3.91, versus $3.89.

Dec.	E1.55	E1.29	1.16	1.32
	E5.60	E5.20	5.05	4.52

Important Developments

Oct. '89— Through mid-October UTX had announced orders for $11 billion of commercial jet engines in 1989, more than double the record full-year total of $5 billion established in 1988.

Oct. '89— Total backlog at September 30 was $18.6 billion, up 12% from a year earlier.

Aug. '89— UTX said that it abandoned attempts to sell its Norden subsidiary. It was considering a merger of Norden with its Hamilton Standard unit.

Jun. '89— UTX established an Employee Stock Ownership Plan, which was issued 10.2 million shares of new convertible preferred for $660 million borrowed from the company. Debt securities will be issued to repay the loan. UTX will repurchase 10.2 million common shares.

Next earnings report expected in late January.

Business Summary

UTX produces and sells high technology products and services. Business segment contributions (profits in $ million) in 1988:

	Sales	Profits
Power	34%	$685
Flight systems	19%	-15
Building systems	35%	409
Industrial products	11%	207
Other	1%	-48

Non-U.S. operations accounted for 29% of sales in 1988. U.S. Government business comprised 24% of sales.

Power products consist of Pratt & Whitney aircraft jet engines and spare parts for both commercial and military aircraft.

Flight systems products include Sikorsky helicopters for military and commercial operations; and rocket motors, fuel control, radar and integrated display systems and other airborne and space systems.

The Building group consists of Carrier (air conditioning equipment) and Otis Elevator (elevators and escalators).

Industrial products include wiring systems, electromechanical and hydraulic devices and electric motors for the automotive industry, and controls for the appliance industry.

Dividend Data

Dividends have been paid since 1936. A "poison pill" stock purchase right was adopted in 1986.

Oct. 17'89	1989					
78⅛	87½-44	30	$2.00	2.6%	B+	0.84

Summary

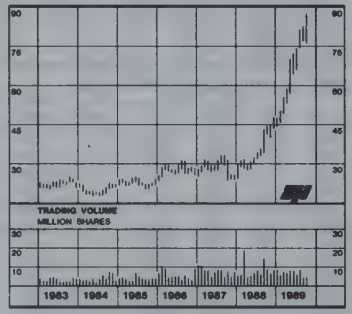
This company operates the nation's ninth largest telephone system and, with the January 3, 1989 purchase of an additional 30.1% interest from GTE Corp., has a controlling interest (80.1%) in US Sprint, the nation's third largest long distance carrier. Other operations include directory publishing, equipment distribution, "900" and operator services. A 2-for-1 stock split is to be distributed December 28, 1989.

Current Outlook

Earnings for 1990 are projected at approximately $5.50 a share, versus the $3.60 estimated for 1989 (both unadjusted for the pending 2-for-1 split).

In October, 1989 UT raised its quarterly dividend 4.2%, to the equivalent of $0.50 on present shares from $0.48.

Total revenues for 1990 should increase sharply, reflecting US Sprint revenue growth in excess of 20%, moderate growth from telephone operations, and stong growth from complementary businesses. Margins for US Sprint are anticipated to widen significantly due to a sharp increase in volume and the unit's high operating leverage. Earnings from telephone operations should increase modestly. Profits from complementary businesses should improve.



¹Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,766	1,495	573	583
Jun.	1,853	1,557	588	584
Sep.	1,934	1,707	600	587
Dec.	---	1,734	644	617
	---	6,493	2,405	2,372

Revenues for the nine months ended September 30, 1989 advanced 17%, year to year (1988 restated to include US Sprint on a consolidated basis), reflecting a 27% rise in US Sprint revenues, a 5.7% gain for local service, and a 13% increase for complementary businesses. Margins widened sharply on the higher volume, and operating income rose 2.5-fold. After a 15% increase in interest costs, and minority interests, pretax income rose 2.8-fold. Following taxes at 30.9%, versus 2.7%, net income increased to $261.5 million from $131.1 million. Share earnings were $2.49, against $1.27, which was before a $0.02 loss from discontinued operations.

Dec.	E1.11	0.09	0.29	0.27
	E3.60	1.38	d0.55	1.88

Important Developments

Oct. '89— The company attributed the rise in 1989 third quarter earnings largely to increased stability and continued growth of its US Sprint unit. UT noted that significant revenue growth opportunities continued to exist for US Sprint in the fourth quarter of 1989 and beyond, citing the commencement of services for the Federal government under the FTS-2000 contract and plans to extend international service utilizing the PTAT transatlantic fiber-optic cable system.

Next earnings report expected in mid-February.

Business Summary

United Telecommunications' United Telephone System is the ninth largest provider of local telephone service in the U.S. Long distance service is provided through US Sprint, and diversified operations include the distribution of telecommunications and other equipment. Contributions to 1988 sales and operating income (in million $):

	Sales	Income
US Sprint	51%	-$409.0
Telephone system	38%	596.8
Complementary businesses	11%	40.6

At year-end 1988 telephone operating subsidiaries served 3,685,337 access lines, up 4.8% from 3,516,814 a year earlier.

Complementary businesses include Directories-America, the 10th-largest directory publishing company in the U.S. with $183 million of revenues in 1988; and North Supply, which distributes telecommunications, electrical and security alarm products.

US Sprint Communications, an 80.1%-owned subsidiary (GTE Corp. owns 19.9%), is the nation's third largest long distance company. US Sprint is the only nationwide network with three alternate fiber-optic routes of coast-to coast transmission.

Summary

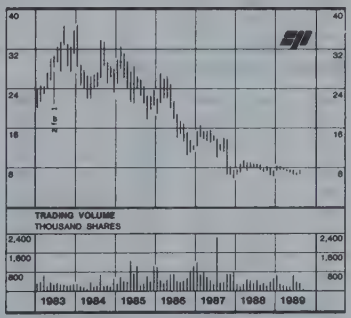
Unitrode manufacturers discrete power semiconductors and other electronic components. Half of sales in fiscal 1988-9 were made to the military. UTR recently announced that it agreed to sell its passive components business. Despite a strong recovery in the semiconductor industry and the lifting of a five-month shipment hold by the U.S. Government on certain UTR products, only modest profitability was restored in fiscal 1988-9. Slowing industry growth and unusual charges will likely cause lower earnings in fiscal 1989-90.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 should approximate $0.10 a share, down from fiscal 1988-9's $0.14.

Resumption of cash dividends (omitted in November, 1987) is not anticipated.

Sales for fiscal 1989-90 are expected to decline approximately 5%, reflecting slowing growth in the semiconductor industry and the absence of sales from the passives components division for part of the year due to its planned sale. However, there should be improvement in demand from instrument, telecommunications and motor controls markets. Higher capital goods spending generally should further limit the decline. Although the stronger dollar will be somewhat restraining, foreign operations should benefit from healthy market growth and a reorganization of the company's sales force. Recent cost reductions should allow margins to expand, although severence and other nonrecurring costs will be restraining.



Net Sales (Million $)

Quarter:	1989-0	1988-9	1987-8	1986-7
Apr.	39.8	40.3	34.9	38.3
Jul.	40.1	41.6	32.8	39.6
Oct.	---	40.9	30.5	38.0
Jan.	---	40.4	37.0	33.5
	---	163.3	135.1	149.4

Sales for the six months ended July 29, 1989 declined 2.5%, year to year, reflecting sluggish demand from key computer customers. Margins narrowed on the lower volume, and pretax income declined 56%. After taxes at 45.0%, versus 40.0%, net income decreased 59%, to $0.03 a share from $0.08.

Important Developments

Aug.'89— UTR said that second quarter earnings were negatively impacted by severance costs related to employment reductions. Earlier in the month, UTR announced that it had agreed in principle to sell its passive components division to AVX Corp. The division had sales of $22 million and earned a small profit in fiscal 1988-9.

Next earnings report expected in mid-November.

Business Summary

Unitrode Corp. manufacture and sell electronic components and subsystems. Sales contributions by product lines in recent fiscal years were:

	1988-9	1987-8
Semiconductors	39%	35%
Power management ICs	17%	15%
Passive components	14%	15%
Data conversion devices	13%	16%
Switching power supplies	17%	19%

Foreign operations (principally Europe) accounted for 24% of sales and $7,722,000 of income from operations in fiscal 1988-9.

Unitrode's semiconductor products include rectifiers, diodes, zener diodes, thyristors, rectifier assemblies, and analog integrated circuits.

Power management integrated circuits regulate the flow of power to a circuit. Passive components include EMI filters and ceramic capacitors that are used with semiconductors to store and discharge electrical energy. Data conversion devices change an analog signal to digital form for it to be processed by a computer and then convert the digital signal back to analog form for interpretation or action. Switching power supplies that regulate power are also manufactured.

The company's products are used in computers, computer peripheral equipment, process control systems, instrumentation and telecommunications equipment, as well as recreation, home safety and transportation products. Its products are also used in major missile and defense programs in such applications as navigation, electronic countermeasures, rader and control and airborne computers.

Dividend Data

Prior to omission in November, 1987, dividends were paid since 1967. The most recent payment was $0.05 on November 1, 1987.

Universal Corp.

NYSE Symbol UVV

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 9'89	1989					
39	39-33	12	1.40	3.6%	A+	0.61

Summary

Universal Corp. is the holding company for the world's largest independent leaf tobacco dealer, Universal Leaf Tobacco Co. Through other subsidiaries, UVV also sells title insurance and is engaged in the agri-products business. Earnings for fiscal 1989 declined, as continued soft real estate markets and poor claims experience in its title insurance operations outweighed improvements in the tobacco and agri-products segments.

Business Summary

Universal Corp. is the holding company formed in December, 1987 by Universal Leaf Tobacco Co., the world's largest independent leaf tobacco dealer, now a UVV subsidiary. Through other subsidiaries UVV sells title insurance on real estate, buys and sells agri-products worldwide, and distributes timber and building supplies in Europe. Contributions by segment in fiscal 1989 (profits in million $):

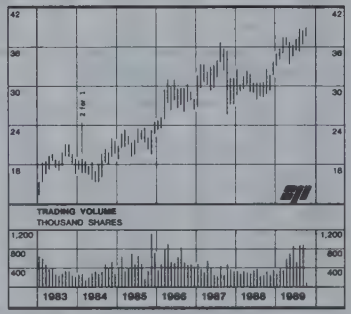
	Sales	Profits
Tobacco	52%	$93.3
Title insurance	16%	-$1.3
Agri-products	32%	$22.0

In fiscal 1989 the U.S. accounted for 64% of total sales, Western Europe 28%, South and Central America 3%, and others 5%.

Tobacco operations involve selecting, buying, shipping, processing, packing, storing and financing leaf tobacco in the U.S. and other tobacco growing countries for the account of or resale to, manufacturers of tobacco products throughout the world. The company itself does not manufacture cigarettes or other consumer tobacco products. In a normal year, the company purchases for itself and its customers about 35% to 40% of the total pounds of Flue-cured and Burley tobacco products made in the U.S. Phillip Morris Inc. accounted for 44% of tobacco revenues in fiscal 1988 (latest available). Most foreign customers are long-established firms or government monopolies.

Wholly-owned Lawyers Title Insurance Corp. and its subsidiaries provide title insurance to purchasers of real property, tenants, lenders and developers in 49 states, the District of Columbia, Canada, Puerto Rico, the U.S. Virgin Islands and the Bahama Islands.

Agri-products operations involve primarily the distribution of timber and building supply products in Europe, and the buying and selling of products



such as rubber, tea, sunflower seeds, peanuts, and vegetable oils throughout the world.

Important Developments

Aug. '89— Management attributed UVV's lower earnings for fiscal 1989 to poor results at its title insurance operations, which were adversely affected by continued soft real estate markets and a high level of claims payments made on policies written in previous years. Tobacco operations, however, experienced volume and profit increases, while sales and operating profits of agri-products improved, benefiting from increased margins in rubber, canned food, tea and peanuts. In commenting on 1990, management expected that, barring a recession, measures taken to aid title insurance operations should improve results. UVV also stated that it foresees improvement in its tobacco business, and expected agri-products to benefit from a strong European economy.

Next earnings report expected in late October.

Revenues for the fiscal year ended June 30, 1989 advanced 20% from those of the prior year, primarily reflecting an increase in the value of tobacco bought, processed and shipped. Results, however, were hurt by weaknesses at its title insurance operations, which experienced continued soft real estate markets and increased claims, and pretax profits rose 1.0%. After taxes at 32.3% versus 23.6%, higher minority interests, and slightly higher income from unconsolidated affiliates, net income fell 11%, to $3.19 a share from $3.56.

Jan. 4'90	1989-90					
23⅞	26¼-21⅜	15	0.68	2.8%	A-	0.77

Summary

This company produces a variety of food products, some of which are sold to other food companies as ingredients for their products. Earnings have risen rapidly in recent periods, reflecting volume gains in all segments. In September, 1989 High Voltage Engineering Corp. terminated its hostile takeover attempt of the company, and management said that UFC was on target to achieve its $1.93 earnings per share goal for fiscal 1990. The shares were split 3-for-2 in October.

Business Summary

Universal Foods makes and distributes a wide range of food products, many of which are sold to other food companies as ingredients for their products. The Import Foods division, which included gourmet and commodity foods, was divested in January, 1988. Sales by segment in recent years were derived as follows:

	1988	1987
Cheese	26%	25%
Frozen foods	25%	16%
Fermentation	20%	21%
Flavorings & food colors	19%	18%
Dehydrated products	7%	7%
Import division	3%	13%

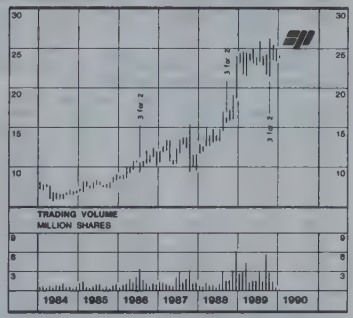
The Cheese division produces a full line of specialty delicatessen and Italian-type cheeses, cheese substitutes, a line of low sodium, semi-soft cheeses, and imports specialty cheeses from Europe. The products are marketed to grocery stores and to food processors that use these cheeses to produce their own food products.

Frozen foods involves the processing of various frozen potato products, including french fries, hash browns, and potato pancakes.

The Fermentation division produces compressed, active dry, nutritional yeast and highly refined yeast products for sale to industrial, institutional, and consumer markets under the Red Star label. Specialty yeast products are also sold to a wide range of customers.

Food colors are produced and sold to producers of soft drinks, bakery products and pharmaceuticals. Flavors are sold to the dairy, food processor and beverage industries.

The Dehydrated Seasonings division produces and markets chili powder, chili pepper and paprika as well as dehydrated onions, garlic, parsley and celery.



Important Developments

Nov. '89— Management stated that UFC was on target to achieve its $1.93 earnings per share goal for fiscal 1990, which would represent the fourth consecutive year of record earnings. Separately, in October, directors effectively raised the quarterly dividend 16%, to $0.17 per share, following a 3-for-2 stock split.

Sep. '89— High Voltage Engineering Corp. (HVE) terminated its cash tender offer for all of UFC's common shares which began in December, 1988 at $23.33 per share and was subsequently raised to $25.33 per share. In July, 1989 UFC rejected a request by HVE to meet and negotiate the acquisition of UFC by HVE at $28 per share because, among other reasons, the price was inadequate and UFC was not for sale. (All figures adjusted.)

Next earnings report expected in mid-January.

Unocal Corp.

2374M

NYSE Symbol UCL Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 8'89	1989					
50⅞	58¼-37⅜	14	1.40	2.8%	B	0.93

Summary

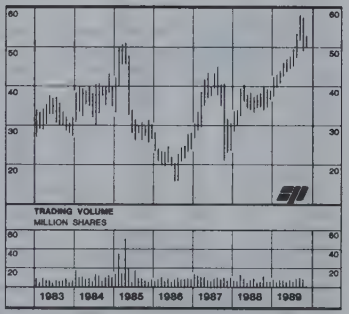
Unocal Corp. is an integrated oil and gas firm with interests in chemicals, geothermal energy and metals. In 1985 the company markedly leveraged its balance sheet with a debt-for-equity exchange offer to shareholders designed to ward off a takeover attempt. Since then, UCL has pared down its debt while expanding its exploration and production program. The company can be expected to divest nonstrategic assets in order to further improve its debt ratio and to enhance its earnings power. The quarterly dividend has been increased 40% and a 2-for-1 stock split is pending.

Current Outlook

Share earnings for 1990 are projected at $3.20, up from the $3.10 (both presplit) estimated for 1989, before a nonrecurring gain associated with the sale of the Chicago refinery. A 2-for-1 stock split is payable November 13, 1989.

The quarterly dividend on the presplit shares has been raised 40%, to $0.35 from $0.25.

Revenues for 1990 are projected to show some modest improvement, as increased natural gas prices and greater gas volumes offset potentially erratic crude oil prices. Gains in the chemicals business should continue.



[1]Total Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.64	2.30	2.06	2.28
Jun.	3.08	2.55	2.42	2.10
Sep.	2.82	2.58	2.58	1.91
Dec.		2.65	2.33	2.06
		10.08	9.39	8.35

Operating revenues for the first nine months of 1989 rose 14%, year to year (1988 restated). In the absence of a writedown in the 1988 period, pretax income was $473 million, versus a pretax loss of $196 million. After taxes at 39.5%, against a tax credit of $79 million, net income was $286 million, versus a net loss of $117 million. Share earnings were $2.44, versus a loss of $1.00, before a $3.91 special credit in 1988.

Common Share Earnings ($)

Dec.	E0.66	1.20	0.26	0.42
	E3.10	0.21	1.56	1.51

Important Developments

Nov. '89— The transfer of UCL's Chicago refinery and other related assets to a joint venture with Petroleos de Venezuela, S.A. is expected to be completed in 1989's fourth quarter. The transfer would generate more than $500 million (pretax). Operating profits in the exploration and production segment in 1989's third quarter benefited from increased crude oil prices and greater U.S. natural gas production. Operating profits in the refining, marketing and transportation business were impaired by narrower margins and increased maintenance costs. Chemical profits were unchanged from a year earlier. Geothermal earnings improved, reflecting higher foreign steam production and lower foreign income taxes.

Next earnings report expected in late January.

Business Summary

Unocal is an integrated oil and gas company. Active in development of alternative fuels, UCL is also the world's largest producer of geothermal energy. Profits in recent years:

Oper. Profits	1988	1987	1986	1985
Expl. & prod.	49%	86%	53%	71%
Ref., mkt. & trans.	27%	10%	27%	14%
Chemicals	8%	6%	11%	9%
Geothermal	4%	7%	15%	10%
Metals	1%	1%	-1%	Nil
Other	11%	-10%	-5%	-4%

In 1988 net crude oil and condensate production averaged 243,000 barrels a day (243,200 in 1987), natural gas production 1,186.9 million cubic feet a day (1,142.6 MMcf), natural gas liquids 13,900 b/d (14,100 b/d), input to crude oil processing units 418,900 b/d (428,400 b/d), and geothermal production 23.8 million kilowatt-hours a day (23.8 million kilowatt-hours). Sales of petroleum products averaged 519,700 b/d (479,100 b/d).

Net proved reserves at 1988 year-end stood at 764,000,000 barrels of crude oil and condensate (771,000,000 bbls.), 6,137 billion cubic feet of natural gas (6,093 Bcf) and 117,000,000 barrels of natural gas liquids (126,000,000 bbls.) The 95%-owned Union Exploration Partners, formed in 1985 as an MLP, holds most of UCL's Gulf of Mexico region oil/gas properties.

In 1988's first quarter UCL recorded a $322 million net write-down related to production assets and a $456 million net gain from a change in taxes. In 1988's fourth quarter UCL sold its headquarters facilities for a net gain of $98 million.

Dividend Data

Dividends have been paid since 1916. A dividend reinvestment plan is available.

Dec. 26'89	1989					
37⅞	42⅛-27⅝	19	1.00	2.6%	A+	1.19

Summary

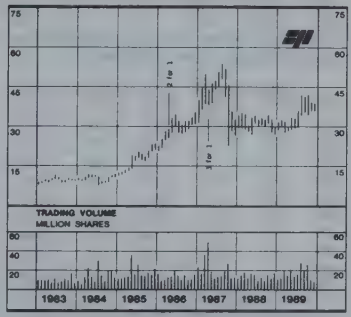
Upjohn is one of the nation's largest manufacturers of prescription drugs, consisting mainly of steroids and other anti-inflammatory agents, antibiotics, oral antidiabetes, and central nervous system compounds. Important interests are also held in agricultural products. A $1.08 a share restructuring charge is expected to result in a net loss for 1989's fourth quarter and sharply lower earnings for the year. New drugs in the R & D pipeline should make meaningful earnings contributions in the years ahead.

Current Outlook

Earnings for 1990 are projected at about $2.40 a share, up from the $1.00 estimated for 1989 (after a $1.08 restructuring charge).

An increase in the dividend, presently at $0.25 quarterly, is likely in 1990.

Sales for 1990 are expected to show further growth, aided by higher sales of Rogaine, Xanax (aided by expanded indications), Micronase and non-prescription Motrin IB. Profit comparisons should benefit from the better volume, productivity gains and the absence of the 1989 restructuring costs.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	755	662	597	537
Jun.	737	722	665	594
Sep.	715	652	609	561
Dec.	---	710	650	588
	---	2,746	2,521	2,280

Sales for the nine months ended September 30, 1989 advanced 8.4%, year to year, aided by gains in most pharmaceutical and agricultural products. Pretax income increased 11%. After taxes at 31.0% against 29.0%, and higher minority interest, net income was up 7.6%. Share earnings were $1.59, compared with $1.47.

Important Developments

Dec. '89— Upjohn said that it will record an after-tax restructuring charge estimated at about $200 million ($1.08 a share) against fourth quarter 1989 earnings. The charge is associated with the planned phase-out of the North Haven, Conn. fine chemicals plant, as well as various other writeoffs and reserves.

Dec. '89— UPJ filed with the SEC for the planned sale of $300 million of debt securities. Also in December, the FDA approved UPJ's Zefazone injectable antibiotic; and in November, the agency approved Eminase, a thrombolytic drug which UPJ will market with SmithKline Beecham. Other new drugs awaiting FDA approval include Deracyn, an antidepressant; and Marogen, an EPO anti-anemia drug.

Next earnings report expected in early February.

Business Summary

Contributions by business segment in 1988 were:

	Sales	Profits
Human health care	81%	91%
Agricultural	19%	9%

Foreign operations accounted for about 35% of sales and 28% of profits in 1988.

Human health care products include central nervous system agents (29% of human health care sales in 1988) such as Xanax and Halcion; steroids, anti-inflammatory and analgesic drugs (24%), which include Motrin antiarthritic, Nuprin analgesic, Medrol, Deltasone and other steroids, and Provera, Depo-Provera and Halotestin sex hormones; and antibiotics (15%) such as Lincocin and Cleocin. Other products (24%) include: Orinase, Tolinase and Micronase antidiabetics; Regaine topical minoxidil for male pattern baldness; nonprescription items such as Cheracol cough syrup and Kaopectate for diarrhea, and Unicap vitamins. Home health care services (8%) are also provided.

Asgrow Seed Co. develops, breeds, and produces peas, beans, sweet corn, hybrid corn and sorghum, and soybeans. Agricultural chemicals and equipment are also distributed in Florida. UPJ also produces animal health products such as feed additives and growth promotants.

Dividend Data

Dividends have been paid since 1909. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 1'89	1989					
4 13/4	48 1/8-34 1/8	9	1.48	3.5%	B+	0.86

Summary

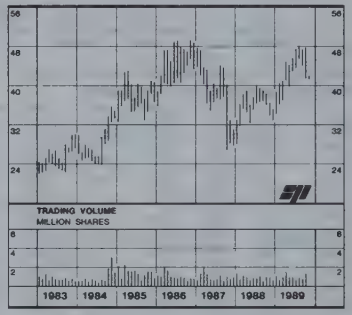
This diversified financial services holding company derives by far the largest portion of its earnings from life insurance subsidiaries. Other interests include realty investments, investment advisory, broker-dealer, and data processing operations. Increased sales of interest-sensitive life insurance products, favorable claims experience, and a rebound in the group health area aided earnings for the first nine months of 1989. Further advances are expected in 1990.

Current Outlook

Excluding realized capital gains or losses, earnings for 1990 are projected at $4.70 a share, up from the $4.25 estimated for 1989.

Directors raised the quarterly dividend 5.7%, to $0.37 from $0.35, in October, 1989.

Earnings in future periods are expected to benefit from increased demand for existing interest-sensitive individual life insurance products, contributions from new life and annuity products, and an expected turnaround in the group health area. Since mid-1987, USH has implemented sizable group health rate hikes, reflecting higher than expected medical care cost inflation and increasing utilization rates. These rate increases, plus the long term positive effects of an upgraded and more cost efficient claims processing system, should spur a profit turnaround, barring a surge in claims. Disappointing group life results will somewhat offset the gains in other lines. Per share comparisons will be aided by a share repurchase program.



Review of Operations

Total revenues for the nine months ended September 30, 1989 increased 9.0%, year to year (1988 restated). Following a 7.3% rise in benefits and expenses, pretax earnings were up 26%. After taxes at 32.6%, versus 29.8%, net income advanced 21%. After preferred dividends, share earnings were $3.46 on 2.6% fewer shares, up from $2.77, before a $0.38 extraordinary charge in the 1989 interim.

Dec.		1.12	1.11	1.09
		3.81	3.94	3.91

Important Developments

Oct. '89— The company announced the extension of its stock repurchase program through October, 1990; through that date, directors have authorized the repurchase of up to one million common shares and/or other outstanding equity securities. Since the program's inception in 1981, USH has repurchased approximately 8.7 million of its common shares at an average cost of $30.59 per share.

Sep. '89— USH said that the Eighth Circuit Court of Appeals upheld a $15 million judgement against All American Life Insurance Co., a wholly-owned subsidiary of USH. The judgement stems from a shareholders' class action suit, filed in 1975, concerning an acquisition All American Life made before it was acquired by USH. As a result, USH posted a $6.5 million ($0.38 a share) net special charge against third quarter earnings.

Next earnings report expected in late January.

Business Summary

USLIFE is a diversified financial services holding company, providing individual and group life and health insurance products through subsidiaries. Other subsidiaries are engaged in investment advisory, broker-dealer, real estate and data processing and administrative services.

Through seven life insurance subsidiaries, USH offers individual life insurance and annuity policies, group life and health insurance with particular emphasis on small groups, and credit insurance. Several life subsidiaries also offer products designed for funding pension, profit sharing and other qualified plans. At year-end 1988 life insurance in force totaled $90.3 billion, of which individual life accounted for 62%, group term 14%, credit 10%, and other 14%. In 1988 total life premiums accounted for 70% of total premiums and health for 30%. Individual life accounted for 72% of total life premiums and group health 69% of total health premiums. Despite regional concentrations, several subsidiaries conduct business in all states.

Real estate activities, which include realty investments and mortgage financing, are conducted through USLIFE Real Estate Service Corp. and its subsidiaries. Securities investment operations include USLIFE Advisers Inc. and USLIFE Equity Sales Corp., a registered broker-dealer operating in 48 states and the District of Columbia. USLIFE Systems provides data processing services.

Summary

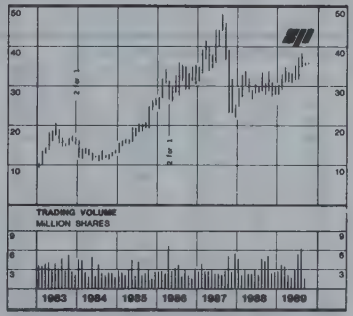
VF Corp. is an international apparel company which produces jeanswear mainly under the Lee and Wrangler names, sportswear under the Bassett-Walker and Jantzen names, intimate apparel under the Vanity Fair, Lollipop and Lee names, and occupational apparel under the Red Kap name. Earnings for 1988 were hurt by soft jeanswear sales and certain restructuring charges, but profits should rebound in 1989 and 1990. In August, 1989 VFC repurchased 10 million of its common shares (14.7% of the total) in a Dutch auction.

Current Outlook

Earnings for 1989 are estimated at $2.80 a share, up from 1988's $2.55. Share earnings for 1990 could reach $3.30.

An early increase in the $0.22 quarterly dividend is likely.

Sales for 1989 may decline slightly, reflecting soft demand for jeanswear which should be somewhat offset by stronger sales at the Bassett Walker division and higher sales at the lingerie and workwear divisions. Margins should widen on restructuring benefits at the Lee division and more efficient manufacturing and distribution at Bassett-Walker. Interest charges will increase. Fewer shares will be outstanding.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	563	596	581	317

Dec.	---	605	620	452
	---	2,516	2,574	1,545

Sales for the six months ended July 1, 1989 fell 5.2%, year to year, mainly reflecting a 14% decline in jeanswear sales. Margins narrowed, and operating income fell 7.1%. After lower interest expenses, however, pretax income rose 1.4%. Taxes were at 38.6%, versus 39.2%, and net income advanced 2.4%, to $1.23 a share from $1.20.

Important Developments

Aug. '89— VFC repurchased 10 million of its common shares (14.7% of the total) at about $38 a share through a Dutch auction self tender offer announced July 18. The company financed the purchase with bank borrowings.

Jul. '89— VFC said sales and operating income of jeanswear during the first half of 1989 were down 14% and 18%, respectively, reflecting slower unit shipments and pricing pressures. Earnings declined at Lee and and were flat at the Wrangler division. However, VF said industry-wide demand for jeanswear products was improving. Sales and operating income of sportswear rose 7% and 100%, respectively, mainly on a turnaround at Bassett-Walker. Meanwhile, sales and operating income rose 13% and 6% at the intimate apparel division, and rose 7% and 2% at the occupational apparel division

Next earnings report expected in mid-October.

Business Summary

V. F. Corp. is an international apparel company which produces jeanswear, sportswear, intimate apparel and occupational apparel through four major divisions. In 1986 VFC acquired Blue Bell, a producer of Wranger jeans, Jantzen sportwear and swimwear, and work clothes, for $732 million. Segment contributions in 1988:

	Sales	Profits
Jeanswear	59%	63%
Sportswear	18%	5%
Intimate apparel	11%	16%
Occupational apparel	12%	16%

Through the Lee Company and the Wranger division, VFC has approximately 27% share of the domestic jeans market. The Lee Company produces jeanswear and casual apparel sold under the Lee, Lee Riders, and Lee Casuals trademark. The Wrangler division sells jeanswear and casual apparel under the Wrangler and Ru stler names. VFC also make upscale jeans under the Girbaud name.

Sportswear is made through Bassett-Walker, Jantzen, and JanSport. Bassett-Walke. is a leading designer and manufacturer of knitted, fleeced activewear. Jantzen produces an extensive line of men's and women's swimwear and sportswear under the Jantzen trademark, and JanSport imprints purchased activewear and t-shirts with various college logos and makes day and backpacks.

Vanity Fair produces a complete line of intimate apparel sold under the Vanity Fair name. Modern Globe produces women's cotton underwear and men's tee-shirts under the Lollipop and Lee labels.

Occupational apparel is sold under the Red Kap label.

Dividend Data

Dividends have been paid since 1941. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

NYSE Symbol VHI Options on Phila (Mar-Jun-Sep-Dec)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 27'89	1989					
18	18-11¾	16	0.20	1.1%	B-	NA

Summary

This broadly diversified company has interests in chemical operations, petroleum services and supplies, the production and sale of refined sugar, forest products, hardware, and the fast-food restaurant business. In December, 1989 a VHI subsidiary increased its stake in Lockheed Corp. to 16.9% of the outstanding common shares. Contran Corp., controlled by Harold Simmons, owns about 88% of VHI.

Business Summary

Valhi, Inc. represents the 1987 merger of LLC Corp. and Amalgamated Sugar Co. Through subsidiaries, the company is engaged in chemical operations, petroleum services, the production of refined sugar, forest products, the fast-food restaurant business, and the production of locks and hardware. Contributions by industry segment in 1988:

	Revs.	Profits
Chemicals	45%	66%
Petroleum services	22%	8%
Refined sugar	18%	13%
Forest products	9%	8%
Fast food	4%	3%
Hardware products	3%	2%

Foreign sales accounted for 49% of total revenues in 1988, compared with 35% the year before.

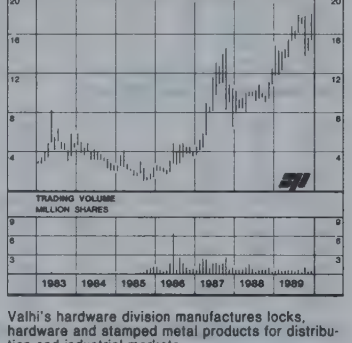
NL Industries (66%-owned) is one of the world's leading producers of titanium dioxide pigments for use in a wide variety of products, including paints, plastics, paper, fibers and ceramics. NL is also a producer of rheological additives and specialty resins.

Baroid Corp. (52%-owned, formerly NL Petroleum Services, Inc.) provides supplies and services to the drilling and production segments of the oil and natural gas industry.

Wholly-owned Amalgamated Sugar Co. is the second-largest refiner and processor of sugarbeets in the U.S. and produces approximately 10% of total domestic sugar production.

Medford Corp. (100%-owned) is an integrated forest products company that owns 151,000 acres of timberland in Oregon and produces and sells plywood, lumber, veneer and wood chips. Wholly-owned Medite Corp. is one of the world's leading producers of medium density fiberboard and a producer of laminated panel overlays.

Sybra Corp. (95%-owned) is the second-largest franchisee of Arby's restaurants with 128 restaurants in seven states.



Valhi's hardware division manufactures locks, hardware and stamped metal products for distribution and industrial markets.

Important Developments

Dec. '89— VHI said that a unit of its 66%-owned NL Industries subsidiary increased its interest in Lockheed Corp. to 16.9% of the outstanding common shares, from 10.8%, bringing its total investment in the aerospace and defense company to about $470 million. Earlier, VHI announced that it had withdrawn its previously announced proposal to merge with NL Industries. Under the proposal, NL would have become a wholly owned subsidiary of VHI and NL's common stockholders other than VHI would have received 1.5 shares of VHI common stock for each NL share. Management said the proposal was withdrawn following a preliminary determination by an investment banking firm that it would be unable to support the proposed exchange ratio.

Next earnings report expected in February.

Varian Associates

NYSE Symbol VAR Options on ASE (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 5'89	1989					
25⅜	30⅛-23½	10	0.26	1.0%	B	1.29

Summary

Varian Associates produces a broad line of electron tubes, analytical instruments, semiconductor production equipment, and medical equipment. Stronger industry conditions and cost reductions allowed earnings to increase in fiscal 1988, despite a net nonrecurring charge. The absence of the nonrecurring charge should have led to significantly higher earnings in fiscal 1989, despite sharply lower profits expected in the fourth quarter. A more moderate increase in earnings is likely for fiscal 1990.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 should approximate $1.75 a share, up from the $1.60 estimated for fiscal 1989.

Dividends should continue at $0.06½ quarterly.

Sales are expected to increase moderately in fiscal 1990, led by higher semiconductor production equipment sales, which are benefiting from a shift in the industry to more technologically advanced products, and should offset any impact from slowing industry growth. Although instrument industry sales have slowed recently, sales of analytical instruments should still rise, benefiting from higher technology related capital spending and expanded uses. Other operations are likely to grow at a slower rate. The increased volume, well controlled costs, and a restructuring of the microwave tube and equipment areas, as well as sharply lower legal costs related to a Government investigation of the power grid tube industry, should allow operating margins to expand sharply.

	---	1,171	983	891

Sales for the nine months ended June 30, 1989 advanced 14%, year to year. Margins widened, and in the absence of a year-earlier $35.0 million restructuring charge, pretax income rose to $49.2 million from $5.6 million. After taxes at 38.0%, versus 35.9%, net income amounted to $30.5 million, compared with $3.6 million. Earnings were equal to $1.46 a share, compared with $0.16.

Important Developments

Sep. '89— VAR said that it expected its fourth quarter earnings to fall substantially below the $0.45 per share reported for the third quarter. It blamed the anticipated shortfall on losses being incurred in the microwave tube and equipment areas and legal expenses in connection with a Government investigation of the power grid tube industry.

Next earnings report expected in late October.

Business Summary

Varian Associates is a high technology concern serving communications, defense, industrial production, scientific and industrial research, and health care markets. Segment contributions (pretax operating profits after nonrecurring items) in fiscal 1988 were:

	Sales	Profits
Electron devices	43%	38%
Analytical instruments	19%	27%
Semiconductor equipment	18%	7%
Medical & industrial products	20%	27%

Foreign business accounted for 25% of sales and 30% of pretax operating income in fiscal 1988.

Electron devices include electron tubes, solid state devices and components, and related equipment for use in communications, defense, industrial, scientific and medical applications.

The Instrument group supplies analytical instruments for the determination of chemical structure, chemical composition, or both. The instruments are used in industrial, academic, and governmental laboratories throughout the world.

The Semiconductor equipment group makes process equipment used in the manufacture of semiconductor devices such as integrated circuits.

The Medical and industrial products group makes linear accelerators used in cancer therapy, and also produces vacuum equipment and components, and electrical and magnetic components.

Dividend Data

Dividends were initiated in 1973. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Jan. 9'90	1989-90					
2 1/2	3 3/8-2	8	None	None	B-	1.06

Summary

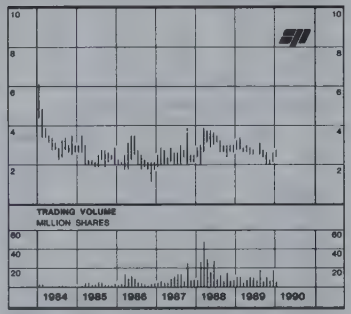
This Canadian company is a leading worldwide manufacturer of agricultural tractors, diesel engines, industrial machinery, and engineered products for the motor vehicle industry. In November, 1989 VAT acquired K-H Corp. (formerly Fruehauf Corp.) in a transaction consisting of some $40 million in cash, $422 million principal amount of K-H notes, and about 41 million new VAT common shares.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are projected at $0.20 a share, versus the $0.30 estimated for fiscal 1989-90.

Resumption of common dividends is possible.

Excluding the acquisition of K-H Corp., revenues are projected to decline in fiscal 1990-1, reflecting continued weakness in the demand for industrial machinery and transportation products along with flat farm equipment sales. Decreased sales will probably lead to lower operating rates and a drop in gross profits. Hurt further by higher interest costs and dilution from the K-H acquisition, earnings will likely decline in fiscal 1990-1.



Net Sales (Million U.S. $)

Quarter:	1989-0	1988-9	1987-8	1986-7
Apr.	524	554	454	346

Oct.	535	525	465	256
Jan.	---	624	569	394
	---	2,285	1,949	1,359

Sales for the nine months October July 31, 1989 fell 4.0%, year to year, reflecting changes in currency values and weakness in the farm/industrial and transportion units. Margins widened, and pretax net gained 22%. After taxes at 16.0%, against 6.0%, net income was up 8.8%. After preferred dividends, share earnings were $0.22, versus $0.21. Inclusion of tax-loss carryforward credits (1988-9 restated) added $0.06 and $0.12, respectively, to share earnings.

Important Developments

Dec. '89— VAT announced that it had completed the acquisition of K-H Corp. (formerly Fruehauf Corp.) in a transaction consisting of some $40 million in cash, $422 million principal amount of K-H notes and approximately 41 million new VAT common shares. VAT noted that terms of the indenture governing the K-H notes would limit VAT's ability to pay cash dividends on its common shares in certain circumstances. Following the acquisition of K-H, a major supplier of wheels, wheel-end components and anti-lock braking systems for cars and trucks, VAT will have annual sales of about $3.5 billion, and total assets of some $2.6 billion. The merger is expected to reduce VAT's farm machinery sales to less than 35% of gross revenues and provide VAT with major operating assets in North America where it has about $500 million in tax loss carryforwards.

Next earnings report expected late March.

Business Summary

Varity Corp. (formerly Massey-Ferguson) produces farm and industrial machinery, diesel engines, and engineered products. Segment contributions in fiscal 1988-9:

	Sales	Profits
Farm & industrial machinery	58%	49%
Engines	25%	37%
Transportation product	14%	12%
Other	3%	2%

The U.S. accounted for 22% of sales in fiscal 1988-9, Canada 3%, and Europe and other 75%.

Massey-Ferguson farm equipment consists of agricultural tractors in the 14 to 180 horsepower range. Industrial equipment includes backhoe and tractor loaders and other industrial tractors in the 45 to 80 horsepower range.

Perkins Engines produces diesel engines in the 7 to 1,500 horsepower range for original equipment manufacturers.

Dayton Walther manufactures transportation products, including engineered products for the motor vehicle industry and hydraulic components.

Dividend Data

Common dividends were omitted in 1978.

Finances

During fiscal 1988-9 VAT realized net proceeds of $72.1 million from the sale of assets and applied nearly all of the funds to reduction of long-term debt. Debt reduction continued in fiscal 1989 and VAT reported that long-term debt at October 31, 1989 had been cut to its lowest level since 1971.

In December, 1989 VAT said that it had adopted (retroactively) FAS # 96 under which the realization of tax benefits related to prior years' losses for the three and nine months ending October 31, 1989 was included in income before extraordinary items. This had the effect of increasing income before extraordinary items under U. S. GAAP for the the three and nine months ended October 31, 1989 by $3.7 million and $12.5 million, respectively.

NYSE Symbol WAG Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 24'89	1989					
43⅝	50¼-30	17	0.80	1.8%	A+	1.43

Summary

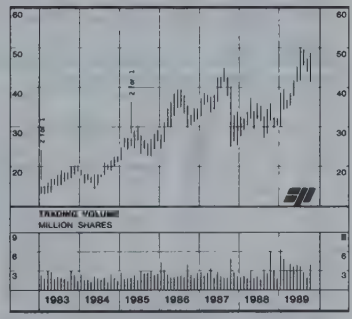
An aggressive store opening program and increasing contributions from prescription business provide this leading drug retailer with strong growth potential. Computerization of pharmacy operations, coupled with a geographically diversified store base, should enhance WAG's competitive position, as should ongoing programs to boost productivity.

Current Outlook

Share earnings for the fiscal year ending August 31, 1990 should rise to about $2.95 from the $2.50 of fiscal 1989.

The quarterly dividend was raised 18%, to $0.20 from $0.17, with the October, 1989 declaration.

Revenue growth in fiscal 1990 should reflect continued strong gains in prescription sales and an expanded store base. Competitive pricing and third party programs will keep a lid on margin expansion. Interest expense will be higher. Longer term, WAG's continuing productivity advances and superior pharmacy operations should sustain its strong industry position.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Nov.	1,212	1,115	960	818
Feb.	1,477	1,351	1,175	1,002
May	1,351	1,216	1,071	914
Aug.	1,341	1,202	1,075	927
	5,380	4,884	4,282	3,661

Sales for the fiscal year ended August 31, 1989 (preliminary) rose 10%, year to year, largely on strong prescription sales. Gross margins narrowed due to competitive pricing and expense ratios improved. Pretax income advanced 17%. After taxes at 36.7%, versus 38.2%, net income rose 20%, to $2.50 a share from $2.10.

Aug.	0.54	0.52	0.42	0.42
	2.50	2.10	1.68	1.67

Important Developments

Oct. '89— Management said that earnings for the fourth quarter were hurt by the sale of WAG's private label manufacturing operations, resulting in a onetime pretax loss of $6.1 million or $0.05 a share. Good inventory control, however, added interest income of $15.3 million to pretax earnings, compared with $4.5 million the prior year. In fiscal 1989 WAG opened 89 stores and remodeled 157 stores, including 99 pharmacies. The company planned to open 600 stores over the next five years. Capital spending was projected to increase to $200 million in fiscal 1990; over $40 million will be devoted to construction of WAG's eighth distribution center. The company opened four RxPress mini-drugstores (2,000 sq. ft.) in Chicago, offering a full service pharmacy and popular nonprescription items.

Next earnings report expected in mid-January.

Business Summary

Walgreen is the largest retail drug store chain in the U.S. The company also manufacturers and packages over 400 private label health and beauty items which are marketed nationally through its own stores.

There were 1,416 drug stores in operation at August 31, 1988 in 29 states and Puerto Rico (1,356 at fiscal 1987 year-end). Of these, 88 new drug stores were opened during the year, 28 were closed and 60 stores remodeled. By the end of fiscal 1988, about 60% of all drug stores were either new or had been remodeled in the last five years.

In fiscal 1988 prescriptions accounted for 27% of sales, proprietary drugs 13%, general merchandise 29%, liquor and beverages 13%, cosmetics and toiletries 11%, food services 2% and tobacco products 5%. The company's prescription sales increased by 26.1% and 29.8% in fiscal 1988 and 1987, respectively. The company considers its Intercom pharmacy system a major factor in prescription sales increases. The on-line system connects all stores with headquarters and one another.

The company completed its largest acquisition—66 Medi Mart drug stores in the Northeast—and also purchased 26 Ribordy drug stores in Northern Indiana in fiscal 1986.

In August, 1988 the company sold its 91 Wag's family restaurant chain to Marriott Corp.

Dividend Data

Dividends have been paid since 1933. A dividend reinvestment plan is available.

Summary

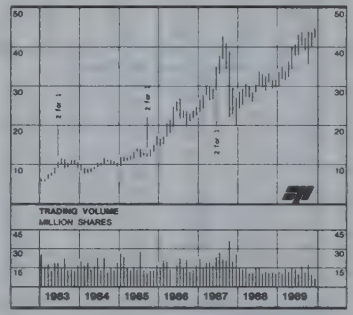
Wal-Mart operates a chain of discount department stores in an area spanning the Sunbelt and the Midwest, with locations generally in smaller communities. Strong base expansion and an aggressive pricing posture should facilitate market share gains in the Wal-Mart division, while improving profitability of the wholesale clubs and contributions from new hypermarkets—combination supermarket/discount merchandisers—and other new store prototypes enhance longer-term prospects.

Current Outlook

Share earnings for the fiscal year ending January 31, 1991 are projected at $2.30, versus an estimated $1.85 in fiscal 1989-90.

The $0.05½ quarterly dividend should be increased in early 1990.

Sales for fiscal 1990-91 should continue to reflect double digit gains in the Wal-Mart stores and growing contributions from high-volume wholesale clubs. Continuing use of efforts to pare operating and distribution costs, coupled with improved inventory management, should accommodate an aggressive price posture, facilitating market share gains.



Net Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	5.37	4.28	3.21	2.34

Important Developments

Nov. '89— Management said that although the fourth quarter of fiscal 1989-90 was expected to be highly competitive, the company's inventory levels and dedication to customer service will enable it to meet its goals and objectives. In the third quarter of fiscal 1989-90 WMT opened 40 new Wal-Mart stores, nine Sam's Wholesale Clubs and two Hypermarket USA units (formerly operated as a joint venture), adding 5 million square feet of retail space. At October 31, WMT had 1,347 Wal-Mart stores, 118 Sam's Wholesale clubs, 14 dot Discount Drug stores and three Hypermarket USA units. In July the company's Sam's Wholesale Club division announced its expansion into North Carolina, Iowa, Wisconsin and Pennsylvania.

Next earnings report expected in mid-February.

Business Summary

Wal-Mart is a discount retailer, primarily operating a chain of 1,259 Wal-Mart discount department stores in 25 Southern, Southwestern states, 105 Sam's Wholesale Clubs and 14 dot Discount Drug stores at January 31, 1989.

The average Wal-Mart discount store is 63,500 sq. ft. in size (90% selling area), located primarily in small towns. Each store features nationally advertised merchandise, as well as private label items, in some 36 departments, including family apparel, automotive, housewares, sporting goods, hardware, health and beauty aids, toys, etc. Softlines generally account for about 28% of sales. The company plans to expand or relocate about 70 of the older Wal-Mart stores into experimental combination supermarket/ general merchandise stores to operate as Wal-Mart SuperCenters.

The first Sam's Wholesale Club was opened in 1983. Sam's is a membership-only, cash and carry wholesale warehouse operating in metropolitan areas. Units are located primarily in larger metropolitan markets and range in size from 68,000 sq. ft. to 130,000. At fiscal year-end 1988-9, 105 units were in operation.

Thirteen distribution centers supplied the stores with some 78% of their merchandise needs in fiscal 1988-9.

The company sold its three Helen's Arts and Crafts stores in 1988.

Dividend Data

Dividends were initiated in 1973.

4⅞	10⅞-4⅝	NM	¹---	¹---	B	1.13

Summary

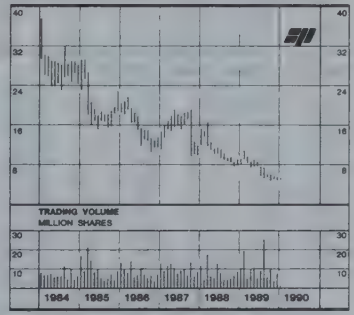
This company manufactures computer systems and provides related products and services, primarily for the office automation market. Losses are projected to continue into fiscal 1990, reflecting a difficult minicomputer marketplace, customer concern over the company's financial health, and further margin declines in its proprietary minicomputer lines. The company's credit agreements with its bank lenders were restructured in mid-1989, and the quarterly dividend was omitted.

Current Outlook

Losses are expected to continue into fiscal 1990, following fiscal 1989's loss from continuing operations of $1.96 a share.

Quarterly dividends were omitted in July 1989.

Revenues in fiscal 1990 should continue under pressure, hurt by a lack of acceptance of new products, reflecting customer concern regarding Wang's financial condition. A stronger dollar would also reduce foreign sales. Weakness in domestic minicomputer demand has clouded visibility and increased competition. Minicomputer vendors also face competition from workstation vendors and are encountering a shift from proprietary architectures to industry standards. Wang is relying on its new image systems to generate growth, but this business currently accounts for a small percentage of total revenues. Cost containment programs could lead to improved operating margins, but net interest expense will likely rise.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	597	684	693	598

Mar.		721	768	746
Jun.		741	823	824
		2,869	3,068	2,837

Revenues for the three months ended September 30, 1989, dropped 13%, year to year, as restated. Domestic sales fell 21%, and international business was down 3.8%. Margins narrowed, and following $12.9 million of restructuring charges, a pretax loss of $62.1 million contrasted with pretax income of $19.9 million. After no taxes, versus taxes at 18.6%, a net loss of $62.1 million ($0.38 a share) replaced income from continuing operations of $18.2 million ($0.10). Results exclude a loss of $0.02 a share from discontinued operations in the 1988 period.

Jun.		d1.70	0.08	0.20
		d1.96	0.56	d0.44

Important Developments

Oct. '89— Wang sold the lease portfolio of its domestic lease financing unit for $152 million, of which $139 million was used to repay bank debt. An additional $30 million of debt was subsequently repaid through other asset sales. Separately, Wang said it expects to record an additional accrual for employee severance of $30 million in the second quarter of fiscal 1990.

Next earnings report expected in mid-January.

Business Summary

Wang Laboratories manufactures computer and communication systems and provides related products and services primarily used for data and text processing as well as image and voice processing. Foreign operations accounted for 49% of revenues in fiscal 1989.

Wang's principal hardware line is the VS family of computers. The low end microprocessor-based VS 5000 series, introduced in July 1988, is designed for small businesses, corporate departments and distributed offices in large enterprises. The VS 8000 series, introduced in September 1989, consists of mid-range computers that offer intensive processing power and large storage capacities for heavily interactive applications, distributed data processing and advanced communications. The high end VS 10000 series was introduced in January 1989.

Wang Integrated Image Systems (WIIS) makes possible the integration of paper-based image documents with data and text and permits users to incorporate image information into office and data processing systems. Shipments began in fiscal 1988.

Dividend Data

Cash dividends, which had been paid on Class B shares since 1976, and on Class C (formerly common) since 1974, were omitted in July 1989. The last quarterly dividend on Class B was $0.04, paid on August 8, 1989.

Finances

In August 1989, Wang restructured its credit agreements with its bank lenders. The new agreements cover $575 million of bank borrowings, an increase of $100 million from prior agreements. The restructuring also extends the maturity of $125 million from September 30, 1989, until July 15, 1990. Wang has pledged its assets, excluding inventory, to its lender banks, and the agreement enables Wang to release collateral to raise $175 million for working capital.

Capitalization

Long Term Debt: $604,000,000 (9/89), incl. about $372.3 million of debs. conv. into 7.8 million Cl. B com.

Common Stock: 158,210,762 Cl. B ($0.50 par); 5,879,775 Cl. C ($0.50 par).

Cl. B shs. have 1/10 vote ea.; elect 25% of directors; receive divs. of $0.01¼ more quarterly than Cl. C. Cl. C shs. elect 75% of directors; are conv. sh.-for-sh. into Cl. B.

Wang family interests hold about 22.9% of Cl. B and 82.8% of Cl. C.

Shareholders of record: 46,600 Cl. B; 2,300 Cl. C.

Nov. 21'89	1989					
112¼	116-74½	19	2.56	2.3%	B+	1.05

Summary

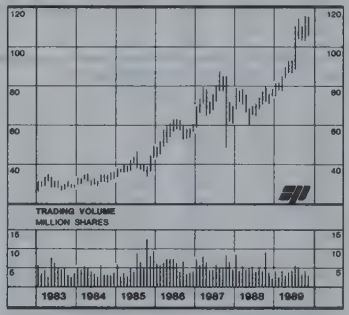
Warner-Lambert is a leading producer of prescription and over-the-counter pharmaceuticals, with interests in a number of consumer products. Good growth prospects for WLA's product lines coupled with benefits from an aggressive R&D program and further expansion in foreign markets point toward above-average earnings growth in the years ahead.

Current Outlook

Earnings for 1990 are projected at about $7.10 a share, up from the $6.10 estimated for 1989.

An increase in the $0.64 quarterly dividend is likely over the near term.

Sales for 1990 are expected to show further strong growth, aided by gains in major established drug and consumer products lines and contributions from new products such as WLA's Accupril ACE inhibitor cardiovascular drug. Continued strong demand is projected for WLA's Lopid lipid-regulating drug. Profitability should benefit from the better volume, cost controls, and a lower tax rate. Significant long-term potential is seen for Cognex, a treatment for Alzheimer's disease.



Sales (Million $)

Important Developments

Oct. '89— WLA projected research and development expenditures of nearly $350 million in 1990, of which about 80% was slated for pharmaceutical R & D. WLA's strategic plan calls for an R & D investment of $1.8 billion over the next five years. Sales of ethical products for the first nine months of 1989 increased 11%, year to year, aided by growth in Lopid lipid regulating drug. Sales of non-prescription products rose 5.8%, gum and mint sales advanced 10%, and sales of other products increased 4.8%. New drug products include Accupril, an ACE inhibitor cardiovascular; Cognex (THA), a treatment for Alzheimers disease which WLA plans to submit for FDA approval by mid-1990; a nicotine skin patch to be used as a smoking cessation aid; and an advanced quinolone antibacterial which WLA licensed from a Japanese firm.

Next earnings report expected in late January.

Business Summary

Warner-Lambert produces ethical drugs, over-the-counter pharmaceuticals and various consumer products. Segment contributions in 1988 were as follows:

	Sales	Oper. Profits
Ethical products	31%	42%
Non-prescription products	33%	30%
Gums and mints	24%	19%
Other products	12%	9%

Foreign operations represented 47% of sales and 41% of profits in 1988.

Ethical products include pharmaceuticals, biologicals and diagnostic products, capsules and hospital products. Products include Meclomen nonsteroidal anti-inflammatory agent, Procan SR heart drug, Centrax tranquilizer, Lopid lipid (fat) regulator, Dilzem antihypertensive, Dilantin epilepsy treatment, Comprecin quinolone antibacterial, Doryx antibiotic, and Cholybar cholesterol-lowering candy bar. Branded generics are also sold.

Non-prescription items include Listerine oral antiseptic, Listermint mouthwash, Bromo-Seltzer anti-acid-analgesic, Halls cough tablets, Rolaids anti-acid, Benadryl cold medication and others.

Gums and mints include Dentyne, Trident, and Freshen-Up gums; Clorets, Dynamints, Junior Mints and Certs mints; and Pom Poms and Rascals candies.

Other products include the Schick line of razors and blades, Tetra home aquarium and empty gelatin capsules.

Dividend Data

Dividends have been paid since 1926. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

2428M

NYSE Symbol WMX **Options on Phila (Feb-May-Aug-Nov)** **In S&P 500**

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 28'89	1989					
65⅜	66⅜-40¾	29	0.60	0.9%	A	1.21

Summary

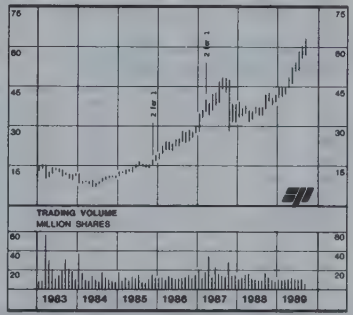
This company is the nation's largest provider of comprehensive waste management services, offering collection and disposal services for residential, commercial and industrial generators of solid, liquid, chemical, nuclear and hazardous wastes. Good earnings growth is expected to continue for the next several years, reflecting further expansion of solid waste operations and strong gains for the Chemical Waste Management unit.

Current Outlook

Earnings for 1990 may rise to $3.00 a share from the $2.45 estimated for 1989.

Dividends should remain at $0.15 quarterly.

Revenues for 1990 are anticipated to rise about 20%, reflecting additional acquisitions of local haulers, more municipal contracts, continued geographic expansion, and higher prices. Contributions from recycling operations and the treatment and disposal of medical waste will also aid revenue growth. The hazardous waste disposal business will benefit from capacity additions and a greater number of wastes excluded from land disposal. Margins will probably narrow slightly, due to lower margins from international operations. Long-term prospects appear favorable, based on the company's leadership position and the strong growth seen for the solid waste disposal industry.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	959	768	584	433
Jun.	1,119	887	658	491
Sep.	---	938	757	528
Dec.	---	973	759	565
	---	3,566	2,758	2,018

Revenues for the six months ended June 30, 1989, rose 26%, year to year, reflecting price increases, acquisitions and volume gains for domestic operations, and growth for international revenues, which were aided by acquisitions. Margins narrowed, and following higher depreciation and interest charges, the gain in pretax income was spared to 20%. After taxes at 37.0%, versus 38.0%, net income advanced 22%, to $1.13 a share from $0.93.

Important Developments

Apr. '89— WMX and DuPont Co. announced they had signed a letter of intent to form a joint venture that will be the largest U.S. plastics recycling operation. The venture will reclaim plastics for high-value uses by cleaning, separating and recycling them at a facility that was expected to start in early 1990 and have the capacity to process up to 40 million pounds of plastics annually.

Next earnings report expected in mid-October.

Business Summary

This company is the nation's largest provider of comprehensive waste management services. Revenue and pretax profit breakdown in 1988:

	Revs.	Profits
North American group	76%	73%
Chemical waste group	20%	26%
International group	4%	1%

The Waste Management of North America (WMNA) group collects, processes and disposes of solid waste in 46 states, the District of Columbia, and five Canadian provinces. In 1988 operations in California, Florida and Pennsylvania accounted for about 27% of revenues. At the end of 1988, WMNA served about 655,700 commercial and industrial customers and 7.6 million households, and also operated 123 landfills in North America, with 80 additional sites under investigation for development. The company is also engaged in providing paper, glass, plastics and metal recycling services. In addition, WMX holds a 22% interest in Wheelabrator Technologies Inc., the nation's leading waste-to-energy company.

Chemical Waste Management (81%-owned) is the largest provider of comprehensive hazardous waste management services in the U.S. Services include transportation, treatment, resource recovery and disposal, which are provided principally to commercial and industrial customers. It also provides integrated hazardous waste site remediation services and low-level radioactive waste management services.

Dividend Data

Dividends were initiated in 1976. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.12	Nov. 29	Dec. 15	Dec. 21	Jan. 5'89

Summary

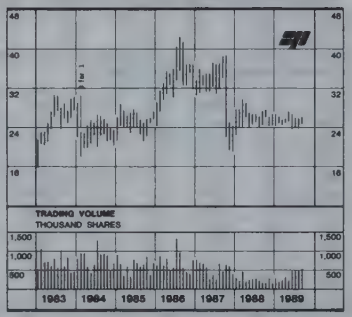
This company designs and manufactures advanced electronic systems and devices for military, industrial and space applications. Microwave tube and semiconductor products and equipment for commercial markets are also produced. Although tight defense spending has affected the flow of new orders, some gain in operating earnings is likely for 1990 through improved margins.

Current Outlook

Earnings for 1990 are projected at $2.80 a share, compared with the $3.00 estimated for 1989, which includes $0.34 nonrecurring income.

Dividends should continue at the current $0.12 quarterly rate.

Revenues for 1990 should advance moderately. Order rates have weakened somewhat in 1989, particularly for certain systems and some devices used in various missiles. Backlog could remain flat during the 1989 second half and finish the year below the year-end 1988 total. Improvement in margins is likely in 1990, reflecting internal efficiencies and employee reductions.



Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	80.8	69.9	66.1	58.8
Jun.	82.3	69.9	62.4	68.9
Sep.	---	71.8	66.1	63.2
Dec.	---	80.6	69.6	64.5
	---	292.2	264.3	255.4

Sales for the first half of 1989 increased 16.6%, year to year. Margins narrowed, and pretax income rose 15.3%. After taxes at 34.0%, against 33.0%, net income was up 13.6%, to $1.28 a share from $1.13.

Important Developments

Sep. '89— The company reached an agreement to acquire R. L. Stollar & Associates, which provides consulting services to industry and government in solving environmental and water-resource problems.

Aug. '89— WJ won a judgement of $5.75 million in a breach of contract suit against the government of Iran. As a result, third-quarter 1989 earnings will be increased by $0.34 a share.

Jul. '89— WJ said that the firm order backlog on June 30 was $263.9 million, down 3.1% from the year-earlier backlog of $272.2 million. The portion of the latest backlog shippable within 12 months was 80%, compared with 82%.

Next earnings report expected in late October.

Business Summary

Watkins-Johnson designs, develops and manufactures advanced electronic systems and devices for military, industrial and space applications. Contributions by product line in the past three years:

Sales	1988	1987	1986
Electronic systems	60%	52%	51%
Devices	40%	48%	49%

Foreign sales accounted for 26% of total sales in 1988, compared with 19% in 1987.

The majority of sales are to governmental agencies and to customers engaged in national defense. Direct sales to U.S. Government agencies totaled $87.0 million in 1988, versus $79.9 million in 1987.

The electronic warfare market is WJ's largest. Products offered there include receiving systems for threat detection, intelligence collection, and general reconnaissance and surveillance purposes, as well as various types of jammers.

Other markets served include automatic missile components test equipment, test instruments, signal parameter measurement, communications and production and laboratory furnaces for the semiconductor industry.

WJ's research and development efforts in 1988 resulted in 115 new products. Company sponsored R&D expense amounted to 6.3% of sales in 1988.

Dividend Data

Dividends have been paid since 1974. A "poison pill" stock purchase right was adopted in 1986.

Nov. 28'89	1989					
79⅛	87½-59	8	3.60	4.5%	A-	1.17

Summary

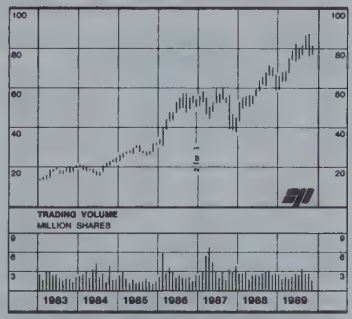
This bank holding company is the fourth largest in California and the 11th largest in the U.S. WFC is continuing to realize efficiencies, even after the full integration of Crocker National, which was acquired in 1986. It also emphasizes higher margined, though riskier business lines. Together with the reserve building of recent years, this gives WFC flexibility to experience earnings gains despite mounting problem real estate loans and slowing loan growth.

Current Outlook

Earnings for 1990 could reach $12.00 a share, before an estimated $1.30 gain from the sale of a 50% interest in WFC's institutional investment unit, up from the $11.00 projected for 1989.

The quarterly dividend was raised 20%, to $0.90 from $0.75, with the October, 1989 payment.

WFC is continuing to stress the efficiency of its operations, even though it is already one the the most efficient banks in the nation, following the very successful integration of its cross-town rival, Crocker (acquired in 1986). This focus on expense control should help in 1990 as loan growth will likely slow as the economy cools. WFC also emphasizes high-return businesses, such as real estate lending, financing leveraged buyouts (a $3.4 billion portfolio at September 30), and credit cards, which can, however, be the most risky. While provisions for loan losses have increased in 1989, rising nonperforming loans in the real estate portfolio (about 42% of the total loan portfolio) could lead to higher provisions in 1990. Long-term LDC exposure has been eliminated via sales and chargeoffs. Recent alliances with Asian firms could help WFC develop new markets and enhance revenue growth.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 11%, year to year, reflecting 5.2% growth of earning assets (average commercial loans rose 13%) and a wider net interest margin. The provision for loan losses was 25% higher at $282 million, to boost reserves in light of rising nonperforming assets. Noninterest income advanced 14%. With noninterest expenses up 2.4%, pretax income gained 24%. After taxes at 40.3%, versus 33.2%, net income was up 18%. Share earnings were $8.07, compared with $6.75.

Important Developments

Oct. '89— During the third quarter WFC signed definitive agreements to acquire three California banking companies; Valley National Bank of Glendale, Central Pacific Corp. of Bakersfield, and the Torrey Pines Group of Solana Beach, for approximately $55 million, $160 million and $75 million, respectively.

Next earnings report expected in mid-January.

Business Summary

Wells Fargo & Co. owns California's third largest and the nation's seventh largest bank. Retail banking conducted through some 452 branches, is important, as well as construction and middle market commercial lending, and trust operations ($98 billion of assets under management). International operations are being scaled back. Nonbanking activities include leasing, mortgage banking, consumer and agricultural credit, and credit life insurance.

Average earning assets of $40.5 billion during 1988 were divided: commercial loans 34%, real estate loans 36%, consumer loans 18%, foreign loans 3%, investment securities 8% and money market assets 1%. Average sources of funds were noninterest bearing deposits 14%, savings deposits 36%, time deposits 24% (total deposits were $33.0 billion), short-term borrowings 11%, long-term debt 7%, equity 5% and other 3%.

At year-end 1988 nonperforming assets were $1.0 billion (2.7% of loans), against $1.6 billion (4.3%) a year earlier, reflecting sales of LDC loans. The reserve for loan losses was 2.00%, versus 3.69%. Net chargeoffs during 1988 were 0.80% of average loans, against 0.73% in 1987.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available.

Summary

Earnings of this operator and franchisor of Wendy's Hamburgers restaurants peaked in 1985, and have been relatively weak since then. Efforts to improve results have included closing or disposing of weaker units, reducing administrative costs, and a large-scale introduction of a buffet product. However, industry conditions are likely to remain quite competitive, which is expected to limit gains in 1990.

Current Outlook

Earnings for 1990 are estimated at $0.28 a share, up from the $0.24 expected for 1989, which excludes a special credit of $0.07.

Dividends may remain at $0.06 quarterly.

Revenues for 1990 are expected to rise slightly, with the number of company-operated restaurants approximating year-earlier levels. Advertising efforts and an emphasis on lower-priced menu items may continue to boost the number of customer transactions, but this could be offset to some extent by lower average check sizes. Restaurant development efforts are expected to accelerate in 1990, with ground being broken for at least 100 new units (including franchises).

Important Developments

Nov. '89— In 1989's third quarter WEN's systemwide sales totaled $787 million, compared with $758 million a year-earlier. Average net sales of domestic company-operated units increased to $210,000 from $205,000, while sales of domestic franchises rose to $204,000 from $196,000. During the quarter WEN introduced a "Super Value Menu" — seven to nine items priced at 99 cents each. WEN said that the number of customer transactions in the quarter rose 3%. However, overall prices were up only 3.5% during a period in which average beef prices were about 14% higher. WEN's profit margin for all company-operated restaurants narrowed to 10.2% from a year-earlier 11.1%. At October 1, 1989 WEN had 1,142 company-operated and 2,612 franchised units, compared with 1,188 and 2,572, respectively, a year earlier.

Next earnings report expected in late February.

Business Summary

Wendy's International owns and operates, and licenses others to operate, restaurants under the name Wendy's Old Fashioned Hamburgers.

	1988	1987
Units in operation (yr.-end)		
Company-owned	1,173	1,229
Franchised	2,589	2,587
Avge. sales per unit:		
Systemwide (thousand $)	759	741

At year-end 1988 a total of 3,762 Wendy's restaurants were being operated, while another 19 were under construction. Restaurants menus may vary somewhat, but major products includes hamburgers, other types of sandwiches, french fries, and a SuperBar buffet product which was introduced in 1987. At year-end 1988, the SuperBar was in 88% of the company-operated units and in 41% of the franchise restaurants. In 1988 WEN's systemwide sales totaled $2.902 billion, up 1.1% from the year before.

Franchise holders are required to pay WEN a royalty of 4% of gross receipts. Also, under newly executed franchise agreements, a technical assistance fee of $25,000 per restaurant is required.

In March, 1987 WEN sold its Sisters International subsidiary, an operator of 35 restaurants and franchiser of 35 more, to SIS Corp.

Dividend Data

Cash dividends were initiated in 1976. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

This California-based company is a leading manufacturer of a broad range of storage management, intelligent disk drive, communications, imaging, core logic and integrated systems products for both OEM and reseller markets. Acquisitions and strong international demand have led to dramatic sales growth in recent years, but earnings have been falling since fiscal 1987, restricted by narrowing margins.

Business Summary

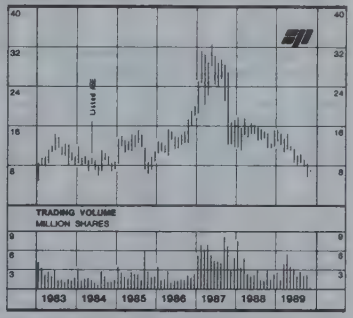
Western Digital Corp. designs, manufactures and markets proprietary semiconductor devices, board-level subsystems and Winchester disk drives for personal computers and microcomputer-based systems. International sales accounted for 48% of the total in fiscal 1989, down from 52% in fiscal 1988, but up from 36% in 1987. Contributions to sales by type of product in recent years were:

	1989	1988
Storage management	64%	71%
Imaging	25%	18%
Communications	6%	4%
Integrated systems	5%	6%

The company believes it is the leading supplier of Winchester hard disk controller products for use in IBM-compatible personal computers. The acquisition of Tandon Corp.'s Winchester disk drive operations in March 1988 extended Western's presence in the Winchester hard-disk controller device and Winchester hard-disk controller board-level subsystems markets. The company recently commenced production of its newly developed intelligent drives. These drives combine the functions of the disk drive controller, the drive electronics and the drive mechanism in one unit, thereby reducing size and manufacturing costs and improving performance.

With the 1986 acquisition of Paradise Systems, Inc., the company also became a leading supplier of IBM PC-compatible video controller boards and related integrated circuit devices. The company manufactures video controller products that conform to most industry standards, such as EGA and VGA, and markets such products under both the Western Digital and Paradise brand names.

Integrated systems products consist of core logic semiconductor devices and integrated motherboards. The company entered this market by acquiring Faraday Electronics Inc. in 1987.



Communications products are comprised of data communication and network protocol controllers, including StarLAN, Ethernet, Ethernet/Twisted-pair and Token Ring.

Research and development expenses were 8.7% of revenues in fiscal 1989, down from 8.8% a year earlier. Manufacturing facilities are located in California (three), Ireland, Malaysia, Puerto Rico, Korea and Singapore.

Important Developments

Nov. '89— The company said it had jointly developed with Texas Instruments (TXN, NYSE) the systems board featured in TXN's new portable computers.

Aug. '89— Western Digital said it had signed a three-year agreement, valued in excess of $60 million, to market IBM's high capacity disk drives for PCs under its own name worldwide.

Next earnings report expected in late January.

Total Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	224.9	247.0	140.1	90.3
Dec.		258.4	160.7	109.8
Mar.		243.2	190.7	122.0
Jun.		243.5	276.8	140.3
		992.1	768.3	462.5

Revenues for the quarter ended September 30, 1989, slid 8.9%, year to year, primarily reflecting a sharp falloff in sales of imaging products to the reseller channel. Gross margins narrowed, and, despite lower research and development expenses, results were penalized by higher net interest expense; a net loss of $2,690,000 ($0.09 a share) replaced income of $12,854,000 ($0.45).

No cash has been paid.

Finances

In May 1989, the company sold $60 million of 9% subordinated debentures due June 1, 2014, convertible into Western common at $14.45 a share. Proceeds were used to reduce bank borrowings and for general corporate purposes.

In August 1988, Western entered into a three-year agreement with a financial institution under which it agreed to sell undivided fractional interests in designated pools of trade accounts receivable on an ongoing basis, in an amount not to exceed $40 million. In March 1989, it entered into a similar two-year agreement to sell certain European trade receivables in an amount not to exceed $20 million.

In April 1988, the company signed a $75 million revolving credit/term loan agreement.

Capitalization

Summary

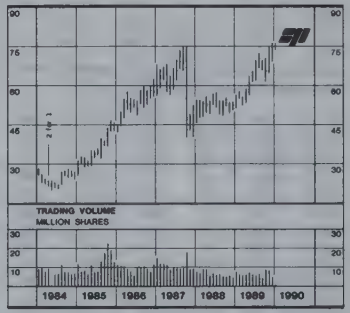
Westinghouse Electric's diversified businesses include electronics, electrical energy, construction, broadcasting, and finance. A restructuring program has been implemented over the past few years. Led by strong comparisons from energy and utility systems and the industrial segment, earnings should have increased for the sixth consecutive year in 1989. A further gain is likely in 1990.

Current Outlook

Share earnings for 1990 are expected to approximate $6.75 a share, up from the $6.20 projected for 1989.

A modest increase in the $0.60 quarterly dividend is likely in 1990.

Sales should increase modestly in 1990, assisted by higher capital spending and the beginning of a cyclical rebound in energy and utility systems. Financial services should also grow meaningfully due to the company's aggressive marketing efforts. However, the gain will be restrained by limited economic growth. In addition, broadcasting is likely to experience only modest growth, as should the electronic systems group due to pressure on defense spending. Margins should continue to benefit from well controlled costs and continuing benefits from restructuring. Long-term prospects should be aided by management's commitment to stimulate earnings growth.



Net Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.89	2.75	2.32	2.55
Jun.	3.18	3.04	2.64	2.73
Sep.	3.13	3.06	2.59	2.57
Dec.	---	3.65	3.12	2.87
	---	12.50	10.68	10.73

Revenues for the nine months ended September 30, 1989 increased 3.9%, year to year. Margins widened, and following a $266.1 million gain from the sale of the elevator business and the formation of a transmission and distribution joint venture that was largely offset by a $261.5 million restructuring charge, a 3.1% decline in other income, and a 13% advance in interest expense, pretax income rose 12%. After taxes at 26.5%, versus 23.0%, and minority interest, net income increased 6.0%, to $4.46 a share from $4.23.

	E6.20	5.86	5.12	4.42

Important Developments

Dec. '89— WX said that it had completed the acquisition of eight radio stations for approximately $360 million.

Dec. '89— The company announced that it had sold its factory automation systems and drive control systems developments and its interest in Mictron Inc. to AEG AG, West Germany.

Next earnings report expected in mid-January.

Business Summary

Westinghouse is the second largest maker of electrical equipment. Segment contributions in 1988:

	Sales	Profits
Industrial	37%	25%
Energy and utility systems	21%	23%
Electronic systems	21%	22%
Commercial	9%	9%
Financing services	6%	11%
Broadcasting	5%	12%
Other	1%	-2%

The U.S. Government accounted for 22% of sales in 1988. Foreign operations totaled 11% of sales and 9.8% of operating income.

Products manufactured by the Industrial segment include transport refrigeration systems, laminates, electrical distribution and control products, industrial automation systems and large industrial motors.

The Energy and Utility Systems Group combines all business activities involving electrical power generation and transmission and distribution products and services.

The Electronic Systems Group manufactures products for the Department of Defense, Federal Aviation Administration, National Aeronautics and Space Administration and certain other Government agencies.

The Commercial Group includes Westinghouse Beverage Group, Inc., Westinghouse Communities, Inc., Westinghouse Furniture Systems and Longines-Wittnauer Watch Company.

A wide range of financial services are offered.

The Broadcasting Group owns television and radio stations.

Westmoreland Coal

5642

NASDAQ Symbol WMOR (Incl. in Nat'l Market; marginable) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 21'89	1989					
13¾	23½–14¼	13	¹---	¹---	C	0.85

Summary

This leading independent coal producer also has minority interests in several cogeneration projects. Following the erratic profit performance over the past decade, WMOR's recent cost-control efforts appear to be bearing fruit. In July 1989, Penn Virginia Corp. raised its interest in WMOR to 39.6%, from 19.6%, with the purchase of 1,650,000 common shares at $15.75 each.

Current Outlook

Profits for 1990 could reach $1.50 a share, compared with the $1.25 estimated for 1989.

The restoration of dividend payments is anticipated by late 1990.

Coal volume should increase moderately in 1990, spaced by rising sales of steam coal by WMOR's 50%-owned affiliate, Westmoreland Resources. Also supporting volume will be the commencement of shipments to the Fort Drum cogeneration plant.

Prices for metallurgical coal should remain firm.

Margins should continue to widen, reflecting cost-control measures and the absence of 1989's labor disruptions. Reduced interest expense will be offset by a sharply higher effective tax rate.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	149.7	137.2	141.4	142.6
Jun.	153.8	150.5	193.1	157.8
Sep.	145.4	153.4	143.1	152.1
Dec.	---	152.4	139.2	146.1
	---	593.5	616.7	598.6

Revenues for 1989's first nine months were up 4.8%, year to year, on a 2.2% increase in coal volume. With results aided by tight cost controls and better mining conditions at WMOR's Virginia operations, a $9,966,000 pretax profit contrasted with a $4,646,000 loss. After taxes and minority interests, income was $8,497,000 ($1.03 a share), versus a $5,164,000 ($0.63) deficit. Results for the 1988 period exclude a special credit of $0.20 a share.

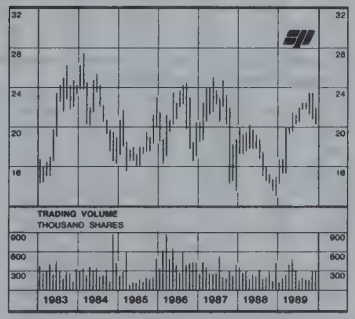
Dec.	E0.22	0.61	d6.17	d0.18
	E1.25	d0.02	d5.00	1.59



Important Developments

Dec. '89— WMOR was awarded a 15-year contract to supply 385,000 tons of coal annually to the Salt City Energy cogeneration plant in Solvay, N.Y., beginning in 1991. In October, WMOR, together with its partner Hadson Power Systems, secured $380 million in financing for the construction of four 70-megawatt coal-fired cogeneration plants in Virginia. WMOR, with a 30% interest in the facilities, will supply a portion of the coal requirements.

Dec. '89— WMOR sold its Central Supply Co. unit, a distributor of mining supplies and equipment, to United Supply Co. Inc. for an undisclosed amount.

Jul. '89— Penn Virginia Corp. raised its interest in Westmoreland to 39.6%, from 19.6%, with the purchase of 1,650,000 WMOR common shares held by VEBA AG for $26 million, or $15.75 each.

Next earnings report expected in late January.

Business Summary

Westmoreland Coal is a leading independent coal producer, operating mines in Virginia, West Virginia, Kentucky and Montana.

Contributions to coal volume by market in recent years were:

	1988	1987	1986
Domestic steam	63%	70%	74%
Export steam	5%	6%	7%
Domestic metallurgical	14%	8%	6%
Export metallurgical	18%	16%	13%

Total coal sales in 1988 were 19,148,000 tons (of which 9,172,000 tons were brokered), at an average price of $27.97 per ton, compared with 17,609,000 tons in 1987 (8,091,000 tons brokered) at $30.33 per ton. In 1988, some 61% of coal volume was sold under long-term contracts. Westmoreland's two largest customers in 1988, Duke Power and Georgia Power Co., generated 26% of coal revenues.

WMOR's recoverable coal reserves at 1988 year-end were 1,331,189,000 tons, of which 238,053,000 were unassigned. Approximately 60% of WMOR's coal reserves were leased from the Crow Tribe in Montana, while 29% of total coal reserves were leased from Penn Virginia Corp.

Other activities (accounting for 9% of total revenues in 1988) include Cleancoal Terminal, a six-million-ton-capacity coal transloading facility on the Ohio River in Kentucky; a 17.5% equity interest in Dominion Terminal Associates, which operates a 14-million-ton export coal terminal at Newport News, Va.; Westmoreland Energy, which is active in the development of seven cogeneration plants; and the leasing of mining equipment to other coal producers.

Dividend Data

The quarterly dividend was omitted in July 1988, after having been paid continuously since 1983.

Capitalization

Long Term Debt: $71,562,000 (9/89), excl. $25,102,000 of certain employee benefits.

Minority Interest: $12,762,000.

Common Stock: 8,250,000 shs. ($2.50 par). Penn Virginia Corp. owns 39.6%. Institutions hold some 48%. Shareholders: 2,295 of record.

Sep. 20'89	1989					
31½	33⅜-27¾	9	1.00	3.2%	A-	0.98

Summary

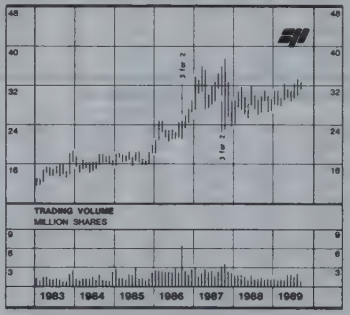
This company is an integrated producer of bleached board, white printing and converting papers and is an important factor in linerboard and corrugated medium, a substantial portion of which is converted into shipping containers. Long-term prospects are enhanced by strong new product development, expanding activities in Brazil and a large capital spending program.

Current Outlook

Earnings for the fiscal year ending October 31, 1990 are projected at $3.90 a share, compared with the $3.50 estimated for fiscal 1989.

The quarterly dividend has been raised 8.7%, to $0.25 from $0.23, with the October, 1989 payment.

Sales for fiscal 1990 should benefit from strong prices for pulp, containerboard and most paper grades, together with good volume levels. The recent rise of the U.S. dollar is unlikely to hurt exports. New products should make a significant contribution to earnings.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jan.	---	555	501	441
Apr.	---	562	533	461
Jul.	---	565	532	482
Oct.	---	---	567	520
	---	---	2,134	1,904

Sales for the nine months ended July 31, 1989 rose 7.3%, year to year, reflecting price gains. Margins widened on the higher prices, and pretax income increased 22%. After taxes at 39.5%, versus 38.7%, net income was up 21%. Share earnings were $2.51, compared with $2.08.

	E3.90	E3.50	3.10	2.25

Important Developments

May '89— W announced it would invest $130 million for a new recovery boiler for its Covington, Virginia bleached paperboard mill. The new recovery boiler would support major future growth at the mill.

Jan. '89— The company said that capital spending for fiscal 1989 and for the next several years would exceed $500 million per year, compared with $393 million in fiscal 1988. Capital spending for fiscal 1989 will be concentrated on expanding coated paper production.

Jan. '89— W announced a $25 million voluntary investment program to reduce chlorine use at its mills and thereby reduce the potential for the generation of trace amounts of dioxin. Westvaco has been an industry leader in environmental protection.

Next earnings report expected in late November.

Business Summary

Westvaco is a large producer of printing and converting paper and bleached board, and is an important factor in the corrugating and linerboard area. Contributions by industry segment:

Fiscal 1988	Sales	Profits
Bleached pulp and paper	65%	66%
Unbleached paper products	26%	26%
Other	9%	8%

Foreign units accounted for 8.6% of net income in fiscal 1988.

In fiscal 1988 the company produced 2,488,000 tons of paper, paperboard and market pulp, up from 2,386,000 tons in fiscal 1987. Westvaco's domestic converting facilities produce corrugated containers, envelopes, paper cups, milk cartons and flexible packaging.

The U.S. Envelope division is one of the largest domestic producers of envelopes.

The Rigesa, Ltda. subsidiary operates two paperboard mills, and three corrugated container plants in Brazil. Foreign sales units are in Belgium, Australia Hong Kong, Tokyo, and Toronto.

At October 31, 1988 W owned some 1,462,000 acres of timberland. These lands, combined with certain managed acreage, provided the equivalent of 38% of W's wood requirements in fiscal 1988. Westvaco eventually plans to provide 50%-75% of its fiber needs internally. Four plants produce specialty chemicals. W also produces lumber.

Dividend Data

Dividends have been paid since 1892. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Summary

One of the nation's largest food wholesalers, Wetterau supplies nearly 2,600 retailers in 28 states and also operates food and other retail outlets. Operations have been expanded through an aggressive acquisition program. Earnings and dividends have risen steadily in recent years.

Business Summary

Wetterau Incorporated is one of the nation's largest wholesale food distributors. The company also distributes nonfood items, operates retail outlets and provides various ancillary services to retailers.

Contributions in 1988-9 were:

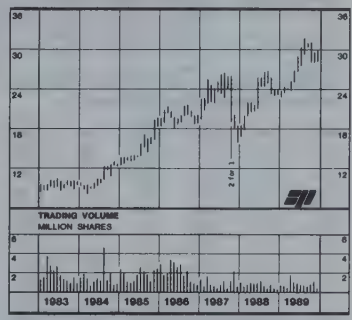
	Revs.	Profits
Food Distribution Group	94%	76%
Industries Group	6%	19%
Financial Operations.....	---	5%

At April 1, 1989, the Food Distribution Group was supplying food and nonfood items to 2,580 retailers. In recent years, Wetterau has emphasized expansion of its regional chain business through an aggressive acquisition program.

Wetterau operates numerous retail supermarkets through its four retail subsidiaries. Laneco, Inc. operates 41 stores primarily in eastern Pennsylvania and western New Jersey. Save-A-Lot (acquired in January 1988), a wholesale and retail food distributor, consists of about 250 stores in 16 states throughout the Midwest and along the Eastern Seaboard. Operating mainly in the St. Louis area, Shop 'N Save Warehouse Foods, Inc. has 25 stores, which are mostly super warehouse and warehouse-type units. The company also operates one Super Dollar grocery store; 12 Spee-D Mart convenience stores in Pennsylvania and West Virginia; and three Save and Pack stores in the Tampa Bay area of Florida.

The Industries Group provides services and products related to retail grocery store operations, consisting primarily of housewares, school supplies, health and beauty aids and bakery products. It also offers construction services, promotional and advertising materials and a complete line of insurance protection programs.

Wetterau provides additional services to its retailers, including loans for fixtures, equipment and store improvements, and leased store locations. Other services include management development and training, audiovisual services and data processing and management information systems.



Important Developments

Dec. '89— Wetterau's directors authorized the repurchase of one million shares of the company's common stock on the open market, to be used for general corporate purposes. Earlier in 1989, the company entered into an agreement to purchase 1.5 million Wetterau common shares from Raymond A. Bartolacci, a director of Wetterau and chairman and chief executive officer of its Laneco, Inc. subsidiary; the value of the transaction was not disclosed.

Oct. '89— In reporting results for the second quarter of 1989, Wetterau said it had been selected as the primary supplier for the Almac's chain of 36 supermarkets in Rhode Island and southeastern Massachusetts, representing the largest single customer acquired by the company, with more than $200 million expected in additional yearly sales.

Next earnings report expected in late January.

Finances

At July 1, 1989, the company had available lines of credit totaling $298 million, of which $213 million was unused.

In October 1988, the company filed a shelf registration statement covering the sale of $150,000,000 of senior subordinated debt securities on a delayed or continuous basis. As of April 1989, Wetterau had not issued any of the securities.

In June 1988, Wetterau acquired Roger Williams Foods, a full-service food distributor operating mainly in Connecticut, Massachusetts and Rhode Island (annual sales of $425 million), making it the leading wholesale food distributor in New England.

Weyerhaeuser Co.

NYSE Symbol WY Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 4'89	1989					
27⅝	32¾–24½	9	1.20	4.3%	B+	1.37

Summary

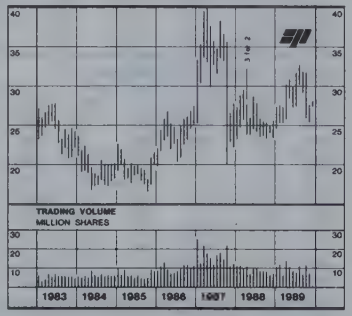
This company is the largest factor in the wood products area and a major producer of pulp, paperboard and corrugated containers. While earnings remain vulnerable to fluctuations in general business conditions, the ability to supply virtually all of its fiber needs internally, coupled with benefits from large capital spending programs and cost efficiency moves, should enable WY to remain one of the premier firms in the forest products industry.

Current Outlook

Earnings for 1990 are projected at $2.70 a share, compared with the $2.85 estimated for 1989.

Dividends should remain at $0.30 quarterly.

Wood products sales and earnings should hold up well in 1990 as timber shortages caused by environmental lawsuits continue. Sales and earnings from pulp and paper should remain firm in line with the general economy. Export sales and earnings will also continue strong.



Sales (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	2.32	2.28	1.62
Jun.	---	2.64	2.62	1.77
Sep.	---	2.57	2.54	1.82
Dec.	---	---	2.56	1.78
	---	---	10.00	6.99

Sales for the 39 weeks ended September 24, 1989 rose 8.6% from those of the comparable year-earlier period. The increase reflected strong domestic pulp, paper and paperboard markets and good export sales of logs. Margins widened, and pretax earnings increased 14%. After taxes at 34.8%, versus 35.0%, net income was up 15%. Share earnings were $2.21 on 2.3% more shares outstanding, compared with $1.95.

Dec.	E0.65	E0.64	0.73	0.61
	E2.70	E2.85	2.68	2.12

Important Developments

Nov. '89— Weyerhaeuser continued its efforts to refocus operations and to sell off small units that were not essential to core businesses. These included its corrugated packaging operations, nurseries, a wall paneling business, gypsum wallboard operations, and a private label health and beauty aids business.

Jul. '89— Weyerhaeuser completed the sale of its milk carton business and its Vancouver, Wash. production facility to Tetra Pak MatWest Inc. Details of the sale were not announced. The Vancouver plant had annual sales of $30 million.

Apr. '89— WY said that it was reviewing its businesses and expected that following the review, a company with "fewer, and a less complex group of businesses" would emerge.

Next earnings report expected in mid-January.

Business Summary

WY is the world's largest timber products firm, and is a major factor in pulp and paper. Contributions by business segment in 1988 (profits in million $):

	Sales	Profits
Forest products	35%	$313
Paper	34%	737
Diversified & specialty	7%	-7
Corporate & other	2%	-121
Real estate	8%	64
Financial services	14%	18

About 20% of 1988 sales were made abroad.

Sales in 1988 included 1,146,000 metric tons of pulp, 470,000 tons of newsprint, 753,000 tons of paper, 669,000 tons of paperboard and containerboard, and 23,260 million sq. ft. of packaging. WY also shipped 4,442 million bd. ft. of softwood lumber, 2,878 million sq. ft. of softwood plywood and veneer, 599 million sq. ft. of particleboard, and 1,029 million sq. ft. of oriented strandboard. WY also conducts real estate activities.

WY owns 5.83 million acres of timberland in the U.S. and has rights on another 13.3 million acres in Canada. WY supplies virtually all of its fiber needs and over two-thirds of its energy requirements from internal sources.

Dividend Data

Dividends have been paid since 1933. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Jan. 2'90	1989-90					
32¼	33⅜-24¼	13	1.10	3.4%	A-	1.38

Summary

This leading producer of home appliances sells about 38% of its output to Sears, Roebuck. WHR has enlarged its sales base through acquisitions, including KitchenAid in early 1986, purchase of the Roper brand name from General Electric Co. in April, 1988, and 53% of N.V. Philips' appliance business in January, 1989, making WHR the world's largest appliance manufacturer. While real sales growth should be moderate in 1990, mainly reflecting weak domestic demand and slow growth abroad, earnings should benefit from productivity improvements and various cost savings programs.

Current Outlook

Earnings for 1990 are projected at $2.90, up from the $2.70 estimated for 1989.
The $0.27½ quarterly dividend may be increased in 1990.
Despite continued weak domestic demand, sales should increase about 5% in 1990 on higher prices and increased volume at Whirlpool International. Adverse effects of currency exchanges and competitive pressures both domestically and abroad will be offset by cost controls, productivity improvements, integration of most of WHR's businesses, and a global source of raw materials. Interest charges should be lower.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,549	1,042	961	871
Jun.	1,604	1,127	1,137	1,075
Sep.	1,465	1,152	1,109	1,120
Dec.	---	994	972	943
	---	4,315	4,179	4,009

Revenues for the first nine months of 1989 rose 39%, year to year, reflecting the joint venture formed between WHR and N.V. Philips. Operating margins narrowed slightly, and following higher interest charges, pretax income rose 22%. After taxes at 43.9%, versus 40.4%, earnings from affiliated companies, and minority interests, net income from continuing operations rose 14.0%, to $1.99 a share from $1.74, which excludes a loss from discontinued operations of $0.21.

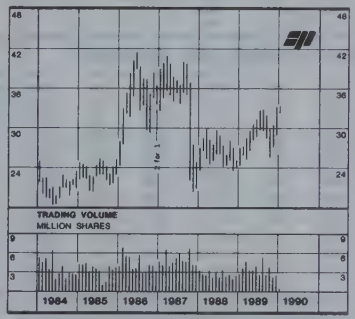
Dec.	E0.71	0.59	0.59	0.57
	E2.70	2.33	2.53	2.70



Important Developments

Oct. '89— WHR said that its North American operating margins improved in the third quarter and nine month periods, reflecting productivity gains, price increases and cost controls. Meanwhile, increased volume at Whirlpool International, B.V. offset intense competitive pressures and higher raw material prices, allowing a positive earnings contribution. Despite adverse currency exchanges and weak domestic demand, WHR said that it was well-positioned to compete globally, with various programs now in place to enable it to respond quickly to the marketplace and effectively manage production and spending levels. WHR added that domestic volume should decline in the fourth quarter, but business should begin to recover in 1990.

Next earnings report expected in late January.

Business Summary

Whirlpool Corp. manufactures a full line of household appliances and other products for home and industrial use. In January, 1986 WHR completed the purchase of Kitchen-Aid Inc. from Dart & Kraft Inc. In April, 1989 WHR acquired the Roper brand from General Electric Co., and on January 2, 1989 acquired a 53% interest in a joint venture with N.V. Philips Gloeilampenfabrieken of The Netherlands.

About 38% of 1988's sales were made to Sears, Roebuck & Co., which sells the products under its own brand names and the Whirlpool name. About 13.5% of the sales were foreign, versus 12% in 1988.

Major appliances produced by WHR include home refrigeration and room air conditioning equipment (34% of 1988's sales), which consists of refrigerators, freezers, and room air conditioners and dehumidifiers. WHR also makes home laundry appliances (34%), which include automatic washers and dryers and coin operated laundry machines; and manufactures various other appliances (25%), which include vacuum cleaners, dishwashers, ranges, built-in ovens and surface cooking units, microwave ovens, and trash compactors.

Whirlpool Acceptance Corp. provides inventory financing for distributors and dealers selling WHR products. Whirlpool International B.V., a joint venture in which WHR owns a 53% interest, consists of the major portion of N.V. Philips' Gloeilampenfabrieken's worldwide major domestic appliance business.

Dividend Data

Dividends have been paid since 1929. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Dec. 26'89	1989					
27⅞	38¼-27½	15	1.02	3.7%	B	1.23

Summary

This diversified holding company (formerly IC Industries) has sharpened its focus on consumer goods markets via acquisitions and the 1988 sale of Pneumo Abex and spin-off of Illinois Central Railroad. Major subsidiaries include Pet Inc., Pepsi-Cola General Bottlers, Hussmann Corp., and Midas International. Acquisitions and expansion at Pet Foods should propel higher earnings in 1990 and beyond.

Current Outlook

Earnings for 1990 are expected to be up 13% to $2.15 a share from the $1.90 estimated for 1989. The quarterly dividend is likely to remain at $0.25½.

Revenues and profits from continuing operations for 1990 should remain in a good uptrend, given continued growth at Pet Foods, relatively stable costs and higher prices for Pepsi bottling operations, and further expansion of Midas shops abroad. A comparatively stable dollar will also be important to anticipated earnings growth. Per share earnings should be modestly enhanced by 1989 treasury stock repurchases.

Sales & Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	859	766	901
Jun.	---	956	858	985
Sep.	---	1,023	924	989
Dec.	---	---	1,035	1,152
	---	---	3,583	4,027

Sales from continuing operations for the 1989 nine months rose 15%, year to year, led by a 15% gain at Pet foods. Margins narrowed on soft pricing for Pepsi and adoption of an employee stock ownership plan, but after lower interest costs, pretax net gained 21%. After taxes at 38.6% versus 43.1%, net income was up 36%, to $1.14 a share on 4.7% fewer shares from $0.99. Results excluded a loss from discontinued operations of $0.24 a share versus income of $0.41, and a $0.22 special credit in 1988.

Important Developments

Nov. '89— Directors elected James W. Cozad chairman and chief executive officer effective January 1, 1990 following the unexpected death of former chairman Karl D. Bays.

Nov. '89— WH reported a net cost of $0.02 a share and income of $0.07, respectively, in the 1989 third quarter and nine months from an Employee Stock Ownership Plan formed in January, 1989. The plan issued $500 million of new 7.75% Whitman preferred stock, convertible into common equal to 10% of Whitman's total common or, with prior employee holdings, equal to 15%.

Sept. '89— WH acquired Van de Kamp's Frozen Seafoods, a subsidiary of the former Pillsbury Co. with annual sales of $100 million from Grand Met for approximately $140 million.

Next earnings report expected in late January.

Business Summary

This diversified company (formerly IC Industries) makes consumer and commercial products. Segment contributions:

1988	Sales	Profits
Pet	41%	48%
Pepsi General	25%	26%
Midas	11%	13%
Hussman	23%	13%

Pet Inc. includes Mexican and Italian specialty foods (Old El Paso, Progresso and Primo brands), Whitman's chocolates, Accent seasonings and Underwood spreads.

Pepsi-Cola General Bottlers bottles and distributes Pepsi soft drinks in the Midwest (includes RKO General Bottlers and a joint venture with Pepsi-Cola, Inc. since late 1987).

Midas International provides auto repair services through more than 2,000 shops worldwide.

Hussmann Corp. makes refrigeration systems and environmental controls for supermarkets and the foodservice industry.

Pneumo Abex Corp., a leading producer of aircraft landing gear and inflight controls, was sold in August, 1988 for $1.3 billion.

In December, 1988 WH spun off its Illinois Central Gulf R.R. unit to shareholders.

Dividend Data

Dividends have been paid since 1950. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Summary

In June, 1989 this manufacturer of technology and chemical products completed a recapitalization plan under which each WKR common share outstanding (except those held by certain members of senior management) was exchanged for $40 in cash and one new WKR share. As part of the plan, WKR has sold or plans to sell the bulk of its chemical operations, certain technology operations, and certain non-operating assets. At October 31, 1989 WKR had a shareholders' equity of negative $46.8 million.

Business Summary

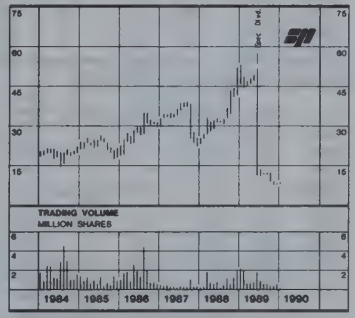
Whittaker Corp. manufactures a wide variety of technology products for the defense, aerospace and automotive industries, and produces various chemical products including coatings, adhesives and plastics. Contributions by business segment in fiscal 1988:

	Sales	Profits
Technology	59%	54%
Chemicals	41%	46%

About 12% of fiscal 1988 sales were to customers outside the U.S.

Technology activities include the production of aircraft fluid controls; radar and digital system simulators; electronic countermeasures equipment; aluminum automotive engine parts; coaxial and multiconductor cable assemblies; expendable and rechargeable high-energy-density batteries utilized primarily for space, missile and undersea applications; and command, control and communications systems. Whittaker also provides immunoassay diagnostic test kits for the clinical laboratory market, tissue cultures, and other biomedical products. In fiscal 1988 some 37% of this segment's sales were directly or indirectly to the U.S. government.

The chemicals business involves primarily the manufacture of industrial coatings, plastics, adhesives, heat-treating compounds, and other specialty chemical products. Principal industrial coatings are coatings applied to aluminum and steel coils, decorative and functional finishes, highway marking coatings, and finishes for wood and furniture. Plastic products include liquid plastic products used as sealants and gaskets, and various custom-extruded thermoplastic products. Adhesive products, used for bonding rubber to metal, are sold to customers in the packaging, automotive, and electronics industries.



Important Developments

Dec. '89— WKR reported that during fiscal 1989 its Aerospace division accounted for 65% of its $209.7 million in sales from continuing operations and 65% of its $40.6 million of operating profits, Specialty Chemicals accounted for 20% and 20%, respectively, and Biotechnology 15% and 15%. WKR's continuing operations have been grouped into the three segments in connection with its restructuring. Earnings for fiscal 1989 were penalized by a nonrecurring pretax charge of $14.1 million consisting of (1) $6.8 million for expenses related to efforts to maximize stockholder value, including attempts to sell the company; (2) $3.8 million for the cancellation of employee stock options in connection with the recapitalization; and (3) $3.5 million for the resolution with the U.S. Government of certain claims against a subsidiary of the company. Together, these charges cut net income by $8.5 million ($1.12 a share).

Next earnings report expected in late February.

Sales from continuing operations for the fiscal year ended October 31, 1989 (preliminary) advanced 4.8% from those of fiscal 1988 (restated). Penalized by nonrecurring charges totaling $14.1 million and a substantial rise in interest expense, pretax profits declined 33%. After taxes at 45.0%, versus 47.9%, net income fell 29%, to $0.41 a share on 11% more shares from $0.64. Results exclude income from discontinued operations of $1.11 a share against $2.33, and gains on sale of these operations of $2.67 versus $0.33.

Dividend Data

Dividends were initiated in 1978 and discontinued in February, 1989 in connection with the recapitalization and payment of a $40 special distribution in June, 1989. The most recent quarterly dividend was $0.25 in January, 1989. A "poison pill" stock purchase right was adopted in 1988.

Finances

In June, 1989 WKR completed its recapitalization plan under which each common share held by the public on June 28 became exchangeable for $40 in cash and one new WKR share. Each WKR common share held by certain members of senior management became exchangeable for one new common share and one new non-voting participating preferred share. In connection with the plan, WKR implemented a restructuring program involving sale of a substantial part of its chemical operations, certain technology operations, and certain nonoperating assets.

Summary

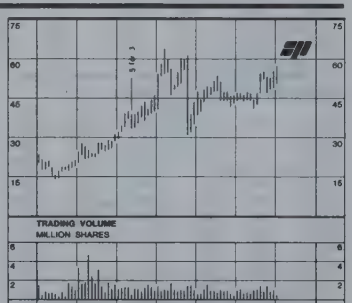
This integrated forest products company produces and sells particleboard, plywood, corrugated containers, bleached pulp, grocery bags and other wood and paper products. Strong prices for plywood and other building products will contribute to record earnings for 1989, and the outlook for 1990 is favorable, barring an economic downturn.

Business Summary

Willamette Industries, Inc. grows and harvests timber and manufactures and sells building products (such as lumber, plywood and particleboard) and paper products (such as pulp, paper, paperboard, containers, bags and business forms).

The company estimates that its share of national U.S. output by product in 1988 was:

Particleboard	13.1%
Grocery bags	8.1%
Fiberboard	11.7%
Bleached hardwood market pulp	6.1%
Plywood	6.1%
Continuous business forms	4.6%
Linerboard, bag paper and corrugating medium	3.9%
Corrugated containers	4.1%
Fine paper	1.7%
Lumber	0.9%



In 1988, the Paper Group accounted for 68% of total sales, while the Building Materials Group contributed 32% (compared with 67% and 33%, respectively, in 1987). The Paper Group was responsible for 90% of operating income in 1988 (78% in 1987), with the Building Materials Group accounting for the remaining 10% (22%).

The company sells its building products primarily to wholesalers and distributors. Converted paper products are sold mainly to industrial and commercial users.

At 1988 year-end, the company owned about 1,000,000 acres of timberland in seven states, with 563,000 acres located in Louisiana, Arkansas and Texas, 282,000 in Oregon, 86,000 in Tennessee and 69,000 in the Carolinas. Willamette supplies 43% of its own long-term log needs, while 23% is purchased on the open market and 34% is derived from government timber sales or private short-term contracts.

At December 31, 1988, the company was operating 70 plants in 17 states. Production in 1988 included 1.64 billion square feet of plywood, 321 million board feet of lumber, 516 million square feet of particleboard, 111 million square feet of medium-density fiberboard, 1.41 million tons of pulp and paper, 12.3 billion square feet of corrugated containers, 236,000 tons of business forms and copy paper, 107,000 tons of grocery bags and 212 million square feet of preprinted linerboard.

Important Developments

Oct. '89— Concern about timber shortages in the Pacific Northwest helped drive up plywood and lumber prices, contributing to higher third-quarter earnings. Environmentalists have fought to protect old-growth timberlands from logging, while Japanese and other foreign interests have bid heavily for remaining timber supplies.

Next earnings report expected in late January.

Williams Companies

NYSE Symbol WMB Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 18'89	1989					
40⅝	44¾-29¾	NM	1.40	3.5%	B-	1.26

Summary

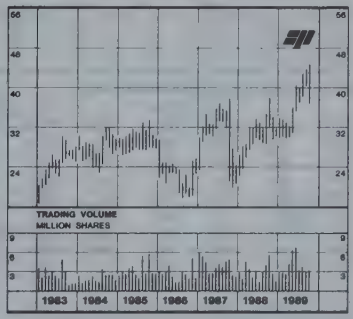
This company owns and operates a 16,800-mile interstate natural gas pipeline system, an intrastate natural gas pipeline in Louisiana, and a petroleum products pipeline. WMB also holds a majority interest in Williams Telecommunications Group, which operates a coast-to-coast telecommunications system. Earnings for the 1989 first half declined sharply, reflecting lower pipeline profits and higher interest charges.

Current Outlook

Share earnings for 1990 are projected at $1.65, compared with an estimated $0.90 for 1989.

Dividends should continue at $0.35 quarterly, supported by cash flow.

Gas pipeline profits should rebound in 1990, reflecting an expected increase in gas transmission volumes and margins at both Northwest Pipeline and Williams Natural Gas; absence of a loss provision for contract reformation should further enhance profits at Northwest Pipeline. Profits at Williams Telecommunication Group should benefit from expansion of services and an improvement in margins on those services.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	514	627	536	678
Jun.	338	304	327	349
Sep.		292	337	311
Dec.		450	581	521
		1,673	1,780	1,859

Revenues for the six months ended June 30, 1989 declined 8.7%, year to year (1988 period restated), reflecting conversion by customers from gas sales to transportation services. Penalized by sharply lower profits at Northwest Pipeline and Williams Natural Gas and increased interest charges more than offsetting higher telecommunications profits, net income dropped 42%, to $0.58 a share from $1.08, which excludes income from discontinued operations of $2.45.

Important Developments

Oct. '89— Kern River Transmission Co., WMB's joint venture with Tenneco Inc., said it had signed agreements to provide to customers in California firm transportation of 320 million cubic feet of natural gas daily and had letters of intent for an additional 639 million cubic feet per day; gas transmission service by Kern River was expected to start in 1991. Separately, a Kansas City Southern Industries, Inc. unit planned to sell all of its 16% interest in Williams Telecommunications Group, Inc.

May '89— WMB sold 3.0 million shares of exchangeable preferred stock at a price of $50 each; the shares are convertible into WMB common stock at $39.25 per share. Net proceeds of $146 million were to be used for general corporate purposes.

Next earnings report expected in late October.

Business Summary

WMB is a broadly diversified company engaged in oil and gas pipeline transportation and interstate telecommunications. As part of a restructuring plan, completed in 1987, the company sold its oil, gas and coal exploration and production interests, chemical fertilizer operations, and real estate activities. Segment contributions in 1988:

	Sales	Profits
Northwest Pipeline	31%	38%
Williams Natural Gas	30%	29%
Williams Gas Marketing	21%	-4%
Williams Telecommunications	10%	15%
Williams Pipe Line	8%	22%

Northwest Pipeline is a 7,000-mile interstate pipeline system serving eight Western U.S. states. Williams Natural Gas is a 9,800-mile interstate pipeline system serving six Midcontinent states. Williams Gas Marketing operates a large intrastate gas pipeline in Louisiana. Williams Pipeline operates a 8,500 mile petroleum products pipeline in the Midwest.

Williams Telecommunications Group (84%-owned) operates an interstate coast-to-coast digital telecommunications network, and is affiliated with National Telecommunications Network, which provides telecommunications service to virtually every major metropolitan area.

Dividend Data

Dividends were resumed in 1974. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Winn-Dixie Stores

NYSE Symbol WIN In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 4'90	1989-90					
63¼	65-42⅞	18	1.98	3.1%	A	0.81

Summary

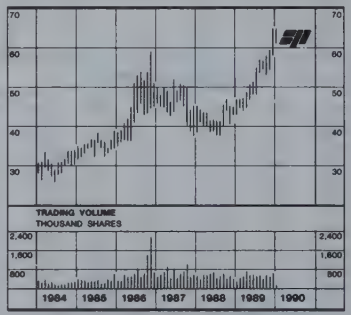
Winn-Dixie is the largest supermarket operator in the highly competitive Sunbelt area. The closing of unproductive stores and emphasis on larger stores with expanded specialty food and general merchandise departments have boosted earnings. More aggressive pricing strategies should strengthen the company's competitive position.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are projected to rise to $3.80 a share from the $3.36 of fiscal 1989. Earnings should approximate $4.15 a share in fiscal 1991.

The $0.16½ monthly dividend is the minimum expected.

Sales for fiscal 1990 should advance moderately. Gross margins should remain about level, but selling, general and administrative expenses may increase slightly as a percentage of sales, reflecting higher costs at the store level. Longer term, the benefits of improved computer technology will aid profit margins.



Net Sales (Million $)

Period:	1989-90	1988-9	1987-8	1986-7
12 Wks. Sep. ...	2,170	2,029	1,997	1,985

12 Wks. Jun.	---	2,153	2,205	2,025
		9,151	9,008	8,804

Sales for the 12 weeks ended September 20, 1989 rose 6.9%, year to year; comparable store sales increased 5.4%. Margins widened, reflecting cost cutting and more aggressive buying programs, and pretax income increased 25%. After taxes at 34.0%, versus 33.2%, net income was up 24%. Share earnings were $0.63, versus $0.50.

	E3.80	3.36	2.87	2.72

Important Developments

Oct. '89— WIN said that average weekly sales increased 8.3% in the first quarter of fiscal 1990 and same stores sales rose 5.4%. The company continues to lower operating expenses and to improve its buying programs, so additional savings can be passed on to customers. WIN is expanding its everyday low price format, emphasizing customer service, and continuing to work on expense controls. During the first quarter of fiscal 1990 WIN opened seven new stores averaging 38,500 square feet, closed nine older stores averaging 25,000 square feet, and remodeled or enlarged 10 locations. On September 20, 1989 1,227 locations were in operation, compared with 1,241 a year earlier. Some 31 new stores were under construction. During fiscal 1990 WIN began installation of its new retail automation system, which should be completed in three years.

Next earnings report expected in late January.

Business Summary

Winn-Dixie, the nation's fifth largest food retailer, was operating 1,229 stores in 13 Sunbelt states at June 28, 1989. The heaviest concentration of stores was in Florida (476), North Carolina (146), Georgia (120), Alabama (91), South Carolina (89) and Louisiana (88).

Fiscal Yr. End	1989	1988	1987
Stores	1,229	1,246	1,271
Total store square footage (million)	36.5	35.8	35.2

The average supermarket contained about 29,700 sq. ft. at the end of fiscal 1989, up from 28,800 at the end of the preceding fiscal year. Recent emphasis has been on constructing larger superstores and combination stores, and closing or enlarging older stores. The company labor force is predominantly nonunion.

WIN operates various support facilities for its stores, including 15 warehousing and distribution centers and a variety of manufacturing and processing plants. An unconsolidated subsidiary operates 12 stores in the Bahamas.

The company discontinued its Table Supply superwarehouse operations during fiscal 1988-9; five stores were converted to Winn-Dixie and one store, in Orlando, Florida, continued to use the Table Supply name.

Dividend Data

Dividends, which have been paid since 1934, are declared quarterly and paid monthly. A dividend reinvestment plan is available.

Summary

Following a major restructuring in 1982, this major retailer has pursued a three-pronged strategy of revitalizing its domestic variety stores, aggressively expanding its multiple shoe and other specialty store formats, and acquiring compatible specialty retail businesses. The significant gains in the refurbished variety stores and rapid expansion of specialty stores should continue to contribute to good earnings growth over the next few years.

Current Outlook

Share earnings for the fiscal year ending January 31, 1991 should advance to about $5.50 from the estimated $4.95 of fiscal 1989-90.

The $0.47 quarterly dividend is the minimum expected.

Added specialty outlets and higher sales in refurbished variety stores should boost domestic revenues in fiscal 1990-91; sales of foreign operations are also expected to improve. Margins should widen on greater contributions from specialty businesses. Expense ratios are expected to be well controlled. Further acquisitions in specialty areas are possible.

Revenues[1] (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	1,877	1,721	1,531	1,365
Jul.	1,983	1,847	1,630	1,515
Oct.	2,165	1,974	1,756	1,601
Jan.	---	2,546	2,217	2,020
	---	8,088	7,134	6,501

Sales for the nine months ended October 28, 1989 rose 8.7%, year to year. Gross margins widened and expense ratios improved, but following higher depreciation and amortization costs, pretax income advanced only 6.9%. After taxes at 38.2% in each period, net income also rose 6.9%. Earnings per share were $2.38, versus $2.24.

Important Developments

Nov. '89— Specialty store revenues for the 13 weeks ended October 28, 1989 rose 18% and general merchandise revenues increased 3.6%; domestic revenues rose 9.8% and foreign revenues increased 9.3% (in U.S. dollars). Operating profit at specialty stores rose to $99 million from $83 million, and general merchandise operating profit was unchanged. General merchandise results mainly reflected a decline in operating profit of Woolworth stores in Germany, where unseasonably mild weather hurt apparel sales. At the end of fiscal 1988-9, 39% of revenues and 52% of operating profits were from specialty stores; general merchandise operations accounted for the balance. Z planned to open 778 specialty and 34 general merchandise units in fiscal 1989-90.

Next earnings report expected in late February.

Business Summary

Woolworth Corp. (formerly F.W. Woolworth Co.) is a major retailer of general merchandise and footwear in the U.S. and abroad, operating a total of 7,739 retail stores, of which 6,098 are specialty units and 1,641 are general merchandise stores.

Fiscal 1988-9	Sales	Profits
U.S. Woolworth	26%	20%
Woolworth/Woolco Canada	21%	15%
Woolworth Germany	15%	13%
Kinney Shoe Corp.	32%	49%
Richman Brothers	4%	2%
Other specialty	2%	1%

The U.S. Woolworth division, primarily consisting of 1,100 variety stores, is undergoing substantial restructuring including the redesign of store layouts. The merchandise mix will emphasize more heavily basic departments, such as health and beauty aids, which account for about two-thirds of Woolworth's volume. An additional 506 Woolworth and Woolco stores operate in Canada and Germany.

Kinney operates 1,813 family shoe stores and leased departments in the U.S. and Canada. Foot Locker and Lady Foot Locker, two fast growing athletic shoe chains, operate 1,621 stores.

Men's and boy's clothing is sold through 148 Richman stores; family apparel through 129 Anderson-Little shops.

Other specialty operations include the Kids Mart and Little Folk Shop apparel chains, with 416 stores combined, and 8 deep-discount drug stores.

Dividend Data

Dividends have been paid since 1912. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

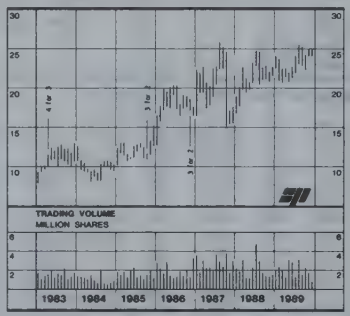
This processor of close-tolerance steel also manufactures steel castings, pipe fittings, pressure cylinders and custom plastic and precision metal parts. Earnings for the first quarter of fiscal 1990 were adversely affected by a less favorable sales mix and by costs associated with a new plant and the start-up of several new product lines.

Current Outlook

Earnings for the fiscal year ending May 31, 1990, are estimated at $1.40 a share, versus the $1.58 recorded in fiscal 1989.

The dividend was increased 17%, to $0.14 a share quarterly, with the September, 1989, payment.

Sales may decline in fiscal 1990, reflecting a forecasted softening of demand in both the processed steel and custom plastics units. Lower auto production and weakness in durable goods will account for most of the projected decline in volume. Start-up costs at a newly opened plastics plant, along with the decreased volume, should lead to margin contraction and a decline in earnings for fiscal 1990.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	228.0	226.5	198.4	188.3
Nov.		244.2	215.5	197.1
Feb.		251.6	226.8	202.8
May		283.7	263.5	230.6
		1,006.0	904.2	818.8

Net sales for the three months ended August 31, 1989, rose 0.7%, year to year. Margins were hurt by a less favorable sales mix and start-up costs associated with several new product lines; gross profits fell 5.1%. After increased selling, general and administrative expense and higher interest costs, pretax income declined 13%. After taxes at 37.0% in both periods, net income also fell 13%. Earnings were $0.28 versus $0.32.

May	E0.46	0.51	0.48	0.36
	E1.40	1.58	1.37	1.02

Important Developments

Sep. '89— WTHG reported a 13% decline in earnings on a 0.7% rise in sales for fiscal 1990's first quarter. WTHG attributed the sluggish sales growth to weaker than expected orders from the automotive and leisure time industries. The company stated that a less favorable sales mix along with costs of a recently opened plastics plant and start-up costs of several new jobs and product lines hurt profitability.

Mar. '89— WTHG announced plans to build a steel processing plant in Porter, Indiana, stating that the facility would include a highly advanced pickling operation in addition to equipment for slitting, rolling and leveling. Construction of the 400,000 square foot building is scheduled for completion in 1990, with the total investment in the project expected to exceed $30 million.

Next earnings report expected in late December.

Business Summary

Worthington Industries, Inc. processes flat-rolled steel, manufactures pressure cylinders and pipe fittings, and makes a broad line of cast steel products and precision parts. In 1988-9, sales and profits were derived from:

	Sales	Profits
Processed steel products	65%	73%
Custom plastic products	18%	15%
Cast products	17%	12%

The processed steel products segment processes sheet steel to the custom order of more than 1,700 industrial customers in the automotive, appliance, electrical, machinery, communications, office equipment, leisure time and other industries. It also produces pressure cylinders including disposable steel cylinders sold primarily to producers and distributors of refrigerant gases, and refillable steel and aluminium cylinders used to hold liquified petroleum gas.

The custom plastic products segment makes injection molded plastic and precision metal parts, primarily for customers in automotive original equipment markets. Sales are also made to appliance, lawn equipment and houseware manufacturers. Products consist of a variety of custom made injection molded plastic components and precision metal components made mostly for the auto and trucking industries.

Cast products consist of steel castings and pipe fittings operations. The steel castings operation makes a diverse line of cast steel products for the mass transit, construction, off-highway, defense and petroleum drilling markets. Pipe fittings operations produce malleable iron and plastic pipe fittings, plastic valves, pipe couplings, cast iron fittings and other related products.

Dividend Data

Wrigley (Wm.) Jr.

NYSE Symbol WWY Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 5'90	1989-90					
54⅛	57-35½	20	¹0.80	¹1.5%	A-	0.96

Summary

Wrigley is the world's largest producer of chewing gum, with some 47% of the U.S. market. In April, 1986 the company distributed one additional common share and one share of a new Class B common (with 10 votes per share) for each share held. Expansion abroad and good sales gains in the U.S. should boost earnings nicely again in 1990. Since mid-1987, WWY has bought back 2.8 million of its common shares for a total of $86.8 million under authorizations for up to $120 million of stock repurchases.

Current Outlook

Earnings for 1990 should increase to $2.95 a share from the $2.72 expected for 1989.

The regular quarterly dividend, raised 25% in mid-1989, should remain at $0.20. The 1989 year-end payment was raised 25% to $0.60.

Sales for 1990 should remain in a good uptrend, although growth may be less robust. Market penetration should continue to increase, and concomitant volume gains should facilitate higher returns on newly improved equipment. Higher prices may also help maintain margins, given stable packaging and ingredient costs. Comparisons for foreign currency translations will be an important variable, while an improved product mix should help raise profitability. Growing contributions from expansion at Amurol should also aid the future.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	258.9	215.3	184.4
Jun.	---	261.8	241.4	209.2
Sep.	---	242.3	232.1	203.1
Dec.	---	---	202.6	184.4
	---	---	891.4	781.1

Sales for the 1989 nine months rose 11%, year to year, due largely to higher volume worldwide and gains for Amurol Products. Well-contained product and marketing costs widened margins, and net income advanced 23%, to $2.31 a share (on 2% fewer shares) from $1.83.

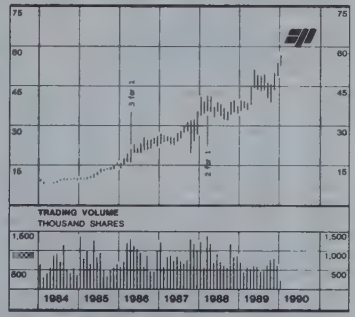
Dec.	E0.50	E0.41	0.35	0.32
	E2.95	E2.72	2.18	1.69



Important Developments

Nov. '89— Settlement of a U.S. income tax case in the 1989 third quarter increased net earnings $0.08 a share.

Nov. '89— As of October 30, 1989 WWY had repurchased 2,837,998 of its common shares for an aggregate $86,806,490 under a June, 1987 $120 million authorization.

Aug. '89— The company increased prices for Spearmint, Doublemint, Juicy Fruit and Big Red gums 17% late in the 1989 second quarter. Prices for Freedent and Extra were raised 15%.

May '89— The company reported that a May, 1988 expansion of Extra sugarfree gum boosted the brand to a number one market share position in the U. S.

Next earnings report expected in late January.

Business Summary

Wrigley is the world's largest manufacturer of chewing gum, and accounts for about 47% of total chewing gum sales volume in the U.S. Principal products include Wrigley's Spearmint, Doublemint and Juicy Fruit. Newer products include Freedent, Big Red, Orbit, Hubba Bubba (bubble gum) and Extra. Chewing gum accounts for more than 90% of total sales and earnings.

By geographical area, sales and profit contributions in 1988 were:

	Sales	Profits
United States	64%	60%
Europe	21%	20%
Other	15%	20%

Three domestic associated companies produce certain other types of products. Amurol Products Co. primarily manufactures novelty gum products and to a lesser extent hard candies and mints. L. A. Dreyfus Co. makes chewing gum base for Wrigley and other customers, as well as industrial coatings and adhesives. Northwestern Chemical Co. processes flavorings and refines mint oil for Wrigley and for food-related industries. The Wrico Packaging division produces a majority of the company's domestic printed and other wrapping supplies. The company's six largest markets abroad in 1988 were Australia, Canada, West Germany, Kenya, Taiwan and the U.K.

Xerox Corp.

NYSE Symbol XRX Options on CBOE & Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 15'89	1989					
57⅝	69-56	15	3.00	5.2%	B+	1.12

Summary

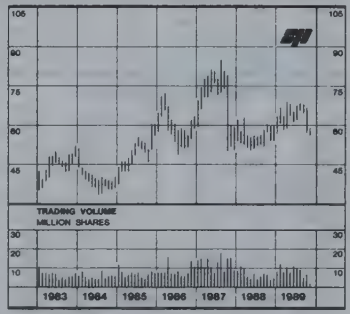
Xerox is the leading producer of copying and duplicating machines, and sells other office and computer equipment. XRX also provides financial services. Near-term earnings growth should continue to be impaired by soft demand for business products and systems, unfavorable currency impacts, and tough environments in the property and casualty and investment banking businesses. XRX recently authorized the adoption of an ESOP and repurchased about 11.5 million common shares at $68 each.

Current Outlook

Earnings for 1990 are projected at $6.70 a share, up from the $6.15 estimated for 1989.

Dividends should continue at $0.75 quarterly.

Revenues for the business products and systems segment, which had posted double-digit growth in the first half of 1989 on strong demand for the new model 50 copier family, have recently been restrained by softer domestic demand and unfavorable currency impacts. The recent sluggishness is likely to continue into 1990; however, continued tight cost controls should benefit margins. Earnings of the financial services group, dominated by Crum and Forster, are likely to be under pressure from competitive pricing as the insurance industry remains in a period of slowness; however, a turn in the underwriting cycle is expected in mid-1990, which bodes well for profits in the latter half.



[1]Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	4.14	3.83	2.32	2.02
Jun.	4.38	4.07	2.59	2.30
Sep.	4.45	4.15	2.58	2.32
Dec.	---	4.40	2.83	2.72
	---	16.44	10.32	9.36

Business products and systems revenues for the nine months ended September 30, 1989 rose 6.0%, year to year. Pretax income advanced 13%, reflecting the effects of price increases that Xerox received in Brazil which partially offset the extreme inflation and devaluation. Net income from this segment was up 11%. Net income from financial services advanced 1% as a high level of capital gains, investment income, and finance income was offset by weakness in the investment banking and property and casualty businesses as well as reserve strengthening and the impact of Hurricane Hugo. Combined net income rose 5.8%. After preferred dividends, earnings increased to $4.55 a share from $4.32.

Dec.	E1.59	d0.83	1.43	1.29
	E6.15	3.50	5.35	4.52

Important Developments

Oct. '89— XRX offered $150 million of 8.75% notes due 1995 as part of a $750 million shelf registration filed during the 1989 first quarter. In recent months, XRX also issued $150 million of 8.50% notes due 1992 and $250 million of 9.20% notes due 1999. Separately, in July 1989, XRX authorized the adoption of a leveraged employee stock ownership plan, the issuance of a new series of cumulative preferred stock and the commencement of a "Dutch Auction" self-tender offer for 11.2 million common shares.

Next earnings report expected in late January.

Summary

Yellow is the nation's largest general freight motor carrier. While volume growth should remain positive in 1990 as YELL scores market share gains, profits will remain checked by fierce rate discounting on less-than-truckload freight.

Current Outlook

Profits for 1990 are estimated at $2.30 a share, versus the $2.10 anticipated for 1989.

Dividends were lifted 8.6%, to $0.19 a share quarterly, with the August 1989 payment.

Freight volume growth will continue to slow in 1990, reflecting sluggish economic activity. Yellow, however, should continue to outperform other carriers, deepening its penetration in several key markets. Fierce rate discounting for less-than-truckload shipments will continue to hamper profitability, but earnings comparisons should be positive as fuel costs ease, insurance and utility expenses stabilize and diminishing capital requirements permit the reduction of bank debt.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	530	464	415	397
Jun.	565	491	438	437
Sep.	566	538	448	445
Dec.	---	524	459	435
	---	2,016	1,760	1,714

Revenues for 1989's first nine months rose 11%, year to year, on a 9% tonnage gain. Operating margins narrowed, as freight rates came under pressure. Pretax income fell 7.8%. After taxes at 34.6%, versus, 33.9%, net income was off 8.9%. Share earnings were $1.59, compared with $1.75.

Important Developments

Nov. '89— Capital outlays for 1990 were projected at $175 million, versus the $182 million expected to be spent in 1989. Yellow said it would spend some $71 million in 1990 for tractors, trucks and trailers (compared with $84 million in 1989). Some $71 million was allocated for land and structures ($77 million). YELL said terminal additions in 1990 would approximate the 18 expected for 1989. Outlays for computers and other equipment were budgeted at $26 million ($19 million).

Dec. '88— YELL repurchased 341,000 of its common shares in 1988 for $8.5 million under a 1,270,000-share (4.4%) buyback program authorized in November 1987. The stock repurchase program, originally set to expire at 1988 year-end, was extended for an indefinite period.

Next earnings report expected in late January.

Business Summary

Yellow Freight is the nation's largest general freight motor carrier, providing service to all 50 states, Puerto Rico and the Canadian provinces of Alberta, British Columbia, Manitoba, Ontario and Quebec. Through intermodal arrangements, Yellow offers service to points in Europe, Australia, New Zealand and the Far East.

Operating Data	1988	1987
Shipments (000s)	15,145	14,229
LTL tonnage (000s)	6,302	5,559
TL tonnage (000s)	1,468	1,304
Avg. shipment weight (lbs.)	1,026	965
Average haul (miles)	1,215	1,196
Terminals	618	610

In 1988, higher-rated less-than-truckload (LTL) freight generated 90% of freight revenues and 99% of shipments. YELL's fleet at 1988 year-end consisted of 3,826 road tractors and 27,362 trailers (of which 86% were "pup" trailers used in tandem configurations). Yellow also operated 10,776 trucks, tractors and trailers for pickup and delivery service.

Dividend Data

Cash dividends have been paid each year since 1958. A "poison pill" stock purchase right was distributed in October 1986.

NYSE Symbol ZOS

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 27'89	1989					
2½	4¼-2	NM	None	None	C	0.98

Summary

Zapata operates a fleet of offshore drilling rigs, explores for and produces oil and natural gas, and produces fish meal and oil; it also has a 34.7%-interest in Zapata Gulf Marine Corp., operator of a large fleet of marine service vessels. Recent large losses reflect the prolonged depression in the oil service industry. Following a review of its recent financial performance and outlook for the future, the company announced in August, 1989 that it would suspend interest payments on its subordinated debentures, and began talks regarding a comprehensive restructuring of its principal debt obligations.

Business Summary

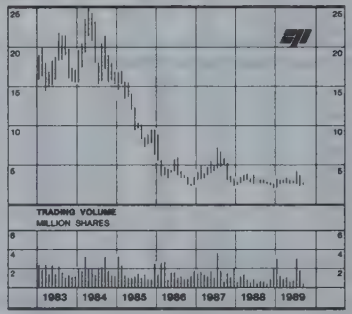
Zapata Corp. is an international company which operates a fleet of offshore drilling rigs, conducts commercial fishing and related processing, and explores for and produces oil and natural gas. ZOS also holds a 34.7% interest in Zapata Gulf Marine Corp., which operates a fleet of marine service and supply vessels. Industry segment contributions in fiscal 1988 (profits in million $):

	Revs.	Profits
Fishing	47%	$12.0
Offshore drilling	32%	-28.3
Oil & gas	21%	10.7

ZOS operates 14 offshore drilling rigs worldwide, including eight semisubmersibles and six jackup rigs. A number of the rigs are equipped for work in deep water and severe environments. Average rig utilization rate in fiscal 1988 was 84%, compared with 48% in fiscal 1987. Zapata Gulf Marine Corp. operates 344 marine service vessels.

Zapata's fishing and related processing operations catch menhaden, a small boney fish, and process it into fish meal and fish oil. Operations are conducted by a fleet of 63 fishing vessels and 46 spotter aircraft that supply five processing plants in Louisiana, Mississippi and Virginia. Fish meal is sold primarily to poultry feed producers as a high-protein ingredient, and fish oil is exported to Europe and used to make shortening and margarine. The company's fish catch in fiscal 1988 totaled 726,000 tons; price of fish meal averaged $386 a ton, versus $299 the year before.

At September 30, 1988 oil and gas interests consisted of 384,077 net developed and undeveloped leasehold acres located in the U.S. Gulf of Mexico region and in Bolivia. Net proved reserves at 1988 fiscal year end totaled 119 Bcf of natural gas and 1.8 billion bbls. of liquids. For fiscal 1988, U.S.



prices were $1.84 per Mcf of gas ($1.60 per Mcf in fiscal 1987) and $16.06 per bbl. ($16.68).

Important Developments

Aug. '89— ZOS said it suspended interest payments to holders of its subordinated debentures following a review of recent financial performance and the outlook for the future. As permitted under its November, 1987 bank debt restructuring, the company reduced its past-due interest on the debentures earlier in 1989, at which time ZOS said continued payments would depend on its current and prospective financial condition. ZOS also began talks with its bank group regarding a restructuring of its principal debt obligations. The company said it was not in default to its bank lenders and expected to remain in compliance with its loan covenants through 1990.

Next earnings report expected in late November.

		193.8	147.2	219.8

Revenues for the nine months ended June 30, 1989 rose 2.4%, year to year. Operations were again unprofitable, although depreciation and interest charges decreased, and following a $16.4 million provision for the write-down of coal-related assets, the pretax loss widened to $58.7 million from $57.4 million. After tax credits of $12.9 million, against $1.3 million, the net loss was $45.7 million, versus a loss of $56.1 million. Following preferred dividend requirements, the loss per share was $1.44 on 29% more shares, versus $2.28.

Dividend Data

Directors omitted the dividend on the common stock in February, 1986 and dividends on the $6 cumulative preferred stock and $2 noncumulative preference stock in May, 1986.

Finances

In December, 1987 ZOS completed the restructure of about $595 million of long-term debt. Under the agreement, $75 million of debt converted into 10 million new common shares in April, 1988, with $100 million to be converted in 1990 into a new preferred series, which ZOS would redeem in 1996 through 2000 at $1,000 a share. ZOS deferred principal and interest payments on nearly all bank-related debt through September, 1990.

Capitalization

Zenith Electronics

2520

NYSE Symbol ZE Options on ASE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 24'89	1989					
13⅜	21½-13	NM	None	None	C	1.54

Summary

A major manufacturer of television sets and VCR's, Zenith Electronics also makes picture tubes, cable products and electronic components. Subject to shareholder and regulatory approvals, ZE has agreed to sell its computer business, which accounted for 58% of sales in 1988, and plans to use the approximately $635 million proceeds from the sale to reduce debt and expand remaining operations. A deficit is likely to be incurred on continuing operations in 1989. Profitability should be restored in 1990, aided by higher television prices and sharply lower interest expense.

Current Outlook

Earnings for 1990 should reach $1.00 a share, in contrast to the $0.50 loss anticipated from continuing operations in 1989.

Early reinstatement of dividends is unlikely.

Sales in 1990 should rise 10%, aided by higher television and picture tube prices. Margins should benefit from the higher prices, reductions in costs and sharply lower interest expense caused by debt reduction from the anticipated sale of the computer and components segment.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	574	547	401

Important Developments

Oct. '89— ZE announced that it had signed a definitive agreement to sell its computer business to Groupe Bull, a French company. Under terms of the agreement, the exact purchase price will be based on the net asset value of the computer business at the time of closing, which is expected at year-end. Based on the balance sheet as of July 1989, the purchase price would have been $635 million, but ZE indicated that the final price at the closing would likely be lower. Proceeds are to be used to reduce debt and fund expansion of the company's consumer electronics business. ZE has decided to seek shareholder approval for the transaction, which is expected to be completed by year-end. The transaction was also subject to regulatory approval.

Next earnings report expected in late January.

Business Summary

Zenith Electronics is a major manufacturer of television sets and VCRs. An agreement has been reached to sell its computer systems and components operations. Sales contributions:

	1988	1987
Computer systems and components	58%	53%
Consumer electronics	42%	47%

Foreign operations accounted for 11% of revenues and 18% of pretax income in 1988. Sales to the U.S. Government totaled 21%.

In October, 1989 the company announced that it had agreed to sell its computer systems and components segment that manufactures and markets personal desktop computers, portable computers, computer terminals, color monitors, monochrome monitors, computer printers, other peripherals, software, educational systems and electronic kit products.

Zenith is a leader in both color and black-and-white television in the U.S. Other consumer electronic products include video cassette recorders, related parts and accessories, large screen projection color televisions, monitor-receivers, stereo TV decoders, and teletext decoders, as well as cable decoders.

The company is also a leading supplier of monochrome and color displays, switch mode power supplies and hybrid microcircuits for original equipment manufacturers in the computer, telecommunications and automotive industries.

Dividend Data

Dividends were omitted in August, 1982 after having been paid since 1939. A "poison pill" stock purchase right was adopted in 1986.

Finances

At July 1, 1989 the company had $174 million of short-term debt outstanding, including $7 million in current maturities of long-term debt.

Capitalization

Long Term Debt: $309,000,000, incl. $115 million of 6¼% debs. due 2011, conv. into com. at $31.25 a sh.

Common Stock: 26,708,475 shs. ($1 par). Institutions hold approximately 55%. Shareholders of record: 22,188.

Summary

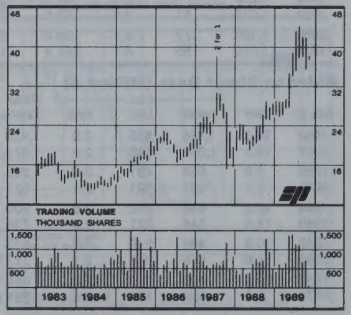
Zurn is a leading provider of products and services for waste-to-energy plants and water quality control systems. It also makes Lynx golf equipment. Strong earnings growth was achieved in fiscal 1988-9, primarily reflecting gains for the fast growing waste-to-energy business, and continued good growth is anticipated for the next several years. Dividends were recently raised 12%.

Current Outlook

Earnings for the fiscal year ending March 31, 1991 may rise to $2.65 a share from the $2.30 estimated for fiscal 1989-90.

The dividend was raised 12%, to $0.19 quarterly from $0.17, with the October, 1989 declaration.

Sales for fiscal 1990-1 are expected to advance about 15%. Strong growth should continue in the waste-to-energy segment, reflecting greater public awareness of the need to dispose of solid wastes in an environmentally-acceptable manner and a declining number of landfill sites available for solid waste disposal. Improving demand for backflow prevention equipment will contribute to gains in the water control area. Modest growth is seen for Lynx golf equipment and mechanical drives. Margins should be stable, aided by cost controls. Long-term prospects appear favorable, based on the increased emphasis being placed on the high growth waste-to-energy business and the company's strong financial position.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	130.6	103.2	108.8	87.8
Sep.	164.1	120.0	100.9	89.9
Dec.	---	118.1	94.6	101.0
Mar.	---	143.2	101.5	104.6
	---	484.5	405.8	383.3

Sales for the six months ended September 30, 1989 rose 32%, year to year, reflecting gains all segments, especially the waste-to-energy group. Margins widened significantly on the higher volume, aided by cost controls. However, following lower other income and greater interest charges, pretax income was limited to a 28% gain. After taxes at 40.0%, versus 37.5%, net income rose 23%, to $1.06 a share from $0.88.

Mar.	E0.64	0.62	0.43	0.37
	E2.30	1.98	1.56	1.43

Important Developments

Oct. '89— ZRN announced that it had received approval to proceed on four separate waste-to-energy and wastewater control projects totaling $59 million. Separately, ZRN reported that its backlog at the end of fiscal 1989-90's second quarter totaled a record $403 million, up 28% from a year earlier. Zurn noted that order activity for its three segments continued to exceed the year-earlier pace and that earnings improvements were expected to continue in 1989-90's second half.

Next earnings report expected in mid-January.

Business Summary

Zurn primarily makes products and provides services for waste-to-energy plants and water quality control systems. Segment contributions in fiscal 1988-9:

	Sales	Profits
Environmental technologies:		
Waste-to-energy	40%	43%
Water control	42%	47%
Other technologies	18%	10%

Export sales were 4.9% of total sales in fiscal 1988-9, versus 5.1% in 1987-8.

The waste-to-energy segment designs, constructs and operates alternate energy power plants, builds steam generators and waste heat energy recovery and incineration systems, and produces equipment and fans to control emissions of solid particulate and gaseous pollutants. Primary markets served are the municipal refuse and biomass-burning markets.

The water control group provides a broad range of products, systems, technologies and services for the control, distribution and treatment of water and wastewater streams. Products and services include engineering and construction of water resource and water quality control systems, engineered concrete products, water and wastewater systems and equipment, and wastewater controls.

Other technologies include Lynx golf clubs and accessories, and mechanical energy conversion products.

Dividend Data

Dividends have been paid since 1964. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.
